Per P. and O. str., 20th June, from Southampton to Hong Kong: Mr. Maintz.

Per P. and O. str., 20th August.—From Southampton to Hong Kong: Mr. and Mrs. Woods.

Per Foam to Hong Kong: Mr. Arthur Hill.

ADDITIONAL PASSENGERS OUTWARD.

On the 26th of May, Southampton to Hong Kong.—Mrs. Randall and infant. 4th June, Southampton to Hong Kong.—Mr. Sheppard.

PASSENGERS ARRIVED OUTWARD.

At Hong Kong, per Strathallan from London.—Capt. Montgomery, of the 60th Rifles, Ensign Gosling, Ensign Sutherland, Assistant-Surgeons Palwasser and Kemp, and twenty-two Army Hospital Corps. Per Aquitaine from Bordeaux.—M. M. George W. de Grandmaison, Henri Guillet, and Eugene Guillet. Per Behar, mail steamer, from England, &c.—Dr. Mackay, Don E. Santos; Messrs. Hancock, Rainbow, Friedlander, Lamb, Price, Stadd, Magee, McConnachie, Middleton, Funk, Platt, J. Stephens, and Reine.

Summary of News from the Far East.

THE YANG-TSZE EXPEDITION.

The account we have received by this mail of the expedition up the river Yang-tsze, is extremely interesting and important. This account reached Shanghai on the 16th March by Messrs. Dent and Co.'s steamer *Yang-tsze*, which vessel left Hangkow on the 10th, and met H.M.'s ships on the same evening at anchor within fifty miles of that port. The river has been declared open above Chin-kiang, and as far as Hangkow to British vessels. The notification which we publish below states fully the provisional regulations under which the river is henceforth to be thrown open to British trade. The intercourse both with Imperialists and rebels has been hitherto satisfactory, with the exception of a slight and happily bloodless *fracas* between the Taepings and the crew of the *Waterman*. The accounts from all quarters tell the same sad tale of the awful devastation which marks the track of the rebels. Villages in flames, houses without inhabitants, dead bodies left to be devoured by dogs, testify to the cruelty of the Taepings. Nanking and Chin-kiang are both in ruins. At the former city all trade is stopped, and the people are said to be in literal slavery. The inhabited portions of the city, if laid together, would not, according to the *North China Herald*, make up a very large village. The same journal informs us that Hung-tsu-stien is not dead, as was reported, but that he is still the prime director of the movement, while Mr. Roberts, his former teacher, is holding rank at Nanking, and wearing robes of Imperial yellow, but not exercising any functions of the Government.

The *Centaur*, and a gunboat, remain off Nanking to preserve order and neutrality. The squadron left Nanking on the 2nd March, passed Taeping, Kyan-king,—a large city in possession of the rebels, but beseiged by Chin-koo-fang, the ablest of the Imperial generals, Tu-nglin and Hukow. Here the *Atalante* was left in order to make a survey of the Poyang Lake. The rest of the squadron passed on to Kiu-kiang, where they learnt that the people had direct communication by the creeks all the way to Shanghai. Kiu-kiang is said to form the best place for an intermediate port between Hankow and Chin-kiang. Here, therefore, as well as at the two other cities, a British Consulate will be established. On the 11th March Admiral Hope was close upon Hankow, the goal of the expedition, but it is probable that one or more of the vessels will proceed as far as the Tungting Lake. It is a notable fact that coal can be purchased at Kiu-kiang for 540 cash per picul, and at Hangkow for 350 cash per picul. This will greatly facilitate the steam navigation of the river, which bids fair to be rapidly promoted by our trade.

The following is the Notification referred to above, to which Her Majesty's Consul at Shanghai gives notice that he is prepared to give full effect, "pending instructions from Her Majesty's Envoy Extraordinary and Chief Superintendent of Trade":—

NOTIFICATION.

Referring to the Notification of His Excellency the Earl of Elgin and Kincardine, K.T.G.C.B., &c., dated Hong Kong, Jan. 20, 1861, informing Her Majesty's subjects in China of the measures then being taken to give effect to the arrangement concluded between Her Majesty's Plenipotentiary and the Imperial Commissioner for opening the Yang-tsze river to British trade, the undersigned is now authorised by His Excellency the Naval Commander-in-Chief to declare the river, above Chin-kiang, and as far as Hankow, to be open, in accordance with that arrangement, to British vessels, under the accompanying regulations, which are pro-

Digitized by Google

visional until they have received the sanction of His Excellency the Hon. Mr. Bruce, C.B., and the Peking Government.

His Excellency, the Naval Commander-in-Chief, has furnished the undersigned, for the information of Her Majesty's subjects in China, with the annexed extracts of a communication, made by Commander Aplin of H.M.S. *Centaur* on the 1st inst., to the insurgent authorities at Nanking, and of their reply, together with a copy of the pass to be used by British vessels passing Nanking. It will be observed from this correspondence that the free navigation of the river by British vessels is not to be interfered with by the insurgents, but that all intercourse held with any place in their possession, will be conducted under such conditions as the insurgent authorities, with the approval of the senior naval officer, shall think proper to prescribe; and the undersigned is further desired to call attention to that regulation of the insurgent authorities, which is concurred in by the Commander-in-Chief, requiring merchant vessels not to approach nearer to Nanking at night than the Pingshan Pagoda, nor to enter at any time the Tsaouhea Creek.

The positions at present selected for consular establishments on the river above Chingkiang are the cities of Hankow and Kiu-kiang, and his Excellency, the Naval Commander-in-Chief has stationed vessels of war at these ports, as well as at Chinkiang and Nanking for the [illegible] protecting British interests, and giving due support to Her Majesty's Consuls in the performance of their duties.

[illegible] Commanding,

Yang-tsze River, March 9th, 1861. HARRY S. PARKES.

PROVISIONAL REGULATIONS FOR BRITISH TRADE IN THE YANG-TSZE RIVER.

ART. I. Every British vessel wishing to proceed up the Yang-tsze River beyond Chinkiang, must apply to the British Consul at Shanghai for a pass, to be called the "river pass," authorising the vessel to trade as high as Hankow, which will be issued by the Shanghai Customs, and only by the Customs at that port, on the application of the Consul, as soon as the Customs are satisfied that all the dues and duties due upon the vessel and her cargo have been paid. The Consul will deliver the river pass to the vessel, and will retain in his hands her register or sailing letter, and on the return of the vessel to Shanghai the river pass must be surrendered to the Consul, and returned to the Customs.

ART. II. Every vessel proceeding up or down the river shall be permitted to carry for her protection such an amount of arms and ammunition as shall appear to the Customs at Shanghai to be reasonable, and this amount of arms and ammunition shall be entered in a certificate to be called the "Arms Certificate," which shall be delivered by the Customs, through the Consul, to any vessel applying for the same; and the said vessel shall be bound to bring back to Shanghai all the arms and ammunitions she is thus authorised to carry, or, if she have expended any portion of them during her voyage up or down the river, then to account for the manner in which such portion has been expended. Any vessel returning to Shanghai without any portion of the arms or ammunition stated in her Arms Certificate, and being unable to account satisfactorily for such missing portion, or being discovered trafficking in arms, munitions, or implements of war, at any port or place in the river, or carrying any arms or munitions in excess of the amount stated in her Arms Certificate, is liable to have her river pass withdrawn, and to be prohibited from trading upon the river.

ART. III. The Shanghai Customs may, if they see fit, appoint one or two of their officers to accompany the vessel as far as Chin-kiang, and the master of the vessel is bound to receive these officers on board, and to provide them suitable acommodation, but not their food or expenses. Trading of any kind between Shanghai and Chin-kiang, being an infraction of the XLVII. Article of the Treaty of Tien-tsin, may be punished as is therein provided.

ART. IV. No vessel is allowed to pass Chin-kiang without anchoring, and being reported to the British Consul and the Customs at that port. The master, on arriving at Chin-kiang, must deliver to the Consul his river pass, arms certificate, Shanghai port clearance, and a list of all passengers and persons not forming part of the registered crew on board, and if he wish to proceed up the river immediately, the Consul will forward all the papers above-named to the Customs, who may board and inspect the vessel, and if the Customs have no claim upon the vessel, or there be no cause for her detention, they will at once grant a new port clearance, and give this, together with the river pass and arms certificate to the master, who will then be at liberty to continue his voyage. But if the stay of a vessel at Chin-kiang exceed twenty-four hours, she must be reported within that time to the British Consul, and by the Consul to the Customs, in the manner provided in the XXXVII. Article of the Treaty of Tien tsin, and a manifest of her cargo and a copy of her passenger list furnished to the Consul; and if she land any portion of her cargo, or take on board any cargo, she must do so in the manner provided in the said Treaty; and the Consul will retain in his possession her river pass and arms certificate, until she receives her port clearance from the Custom-house, and is again ready to depart. Any British vessel proceeding up the river above Chin-kiang without a river pass, arms certificate, and Chin-kiang port clearance, duly obtained as provided in these regulations, commits infringement of the XLVII. Article of the Treaty of Tien-tsin, and is liable to the penalty therein provided.

ART. V. Every vessel must be reported to the British Consul at Kiu-kiang and Hankow, within twenty-four hours after her arrival at either of those ports, and the master must lodge in the hands of the Consul the vessel's river pass, arms certificate, and Chin-kiang port clearance, and must deliver to the Consul a manifest of her inward cargo, and a list of all passengers and persons not forming part of the registered crew on board; and the Consul will retain in his possession the river pass, arms certificate, and Chin-kiang port clearance, until the vessel is again ready to depart, and until he has received the manifest of her cargo outwards, and a list of all passengers and persons not forming part of her registered crew, and intending to leave the port in the said vessel; and before returning the said papers to the master, the Consul will endorse on the Chin-kiang port clearance, the respective dates on which it was lodged in his hands, and returned to the master. No report, however, need be made in the case of a vessel passing Kiu-kiang without anchoring, nor is it requisite that a vessel passing that port without discharging or taking in cargo, should deliver a manifest to the Consul.

ART. VI. Every vessel coming down the river must anchor at Chin-kiang, and be reported to the Consul, and cleared by the Customs, in the manner provided in the Fourth Article of these Regulations; and the Customs may, if they see fit, appoint one or two of their officers to accompany the vessel to the port of Shanghai, where the vessel is bound to proceed without touching at any other port or place, and these Customs officers must be received on board, and treated in the manner provided in the Second Article of these Regulations.

ART. VII. The payment of all import and export duties due by all British vessels, duly authorised to trade on the river above Chin-kiang, being secured to the Chinese Government by Articles I., IV., and VI. of these Regulations, Articles XXXVIII., XXXIX., XL., and XLI., of the Treaty of Tien-tsin, will not apply to such vessels, after they have passed Chin-kiang inwards, and any vessel so authorised may therefore discharge or load legal merchandise, at ports or places on the river above Chin-kiang, without being required to obtain Custom-house permits, or to pay export duties until the vessel returns to Chin-kiang.

ART. VIII.—The manifests of cargo that are to be delivered to Her Majesty's Consuls at the various ports, as provided in these regulations, must be made out in the form of a summary, stating the quantity of each description of goods on board, either in dimensions, weight, or value as the case may be.

ART IX.—The breach of any of these Regulations may be punished by the withdrawal from a vessel of her river pass, and by prohibiting her from further trading on the river, and if this penalty be awarded when on the river, she may be sent or taken to Shanghai, and also, and in addition to the preceding penalty, by any other pains or penalties that may be incurred by the same offence for a breach of treaty. And it shall be competent for any of Her Majesty's Consuls, to detain any vessel trading on the river under these Regulations, against which any other complaint or claim may at any time be laid, until the same shall have been heard and determined by the Consul, and his judgment carried into execution.

ART. X.—These Regulations may at any time be suspended or annulled, added to or amended, as, and in whatever way, may be judged expedient by H B. Majesty's Minister Plenipotentiary in China, and the high Chinese authorities in communication together. HARRY S. PARKES.

CORRESPONDENCE WITH THE REBELS.

I am directed by the Commander-in-chief of the Naval Forces of Her Majesty the Queen of England, in China, to acquaint you:—

That by the recent arrangements at Peking, the right has been conceded to British ships, of navigating the River Yang-tsze for the purpose of trade immediately, and that he has stationed me with the *Centaur* at Nanking, in order that they may exercise that right, with entire freedom to themselves, and without molestation to others.

That in order to effect this object, every British vessel passing Nanking will communicate with, and receive a pass from me; a copy of which will be sent, for your information, to whomsoever you may think proper to name for the purpose, and the Commander-in-Chief expects you will order all persons acting under your authority, to be instructed duly to respect my passes, and not to interfere with the vessels carrying them.

That in the passes the vessel will be fully described, the master will be directed invariably to carry his flag, and not to use his guns, or other arms, except in self-defence; and will be duly informed of the regulations under which he may go ashore, or conduct trade at the several places in your possession.

That the Commander-in Chief has seen the letter written by Mung, Prince of Tsan, and Lin, Prince of Chang; and that the request contained therein—that all persons wishing to enter the city from British ships shall receive directions to give notice of the same to the Superintendent of Customs, and that no person shall visit your armed encampment—shall be duly attended to.

That the Commander-in Chief further expects, that if your forces attack and take either of the following places, namely—Chin-kiang, Kiu-kiang, Hankow, or any others in the river at which British subjects may be settled or trading, all such British subjects will be unmolested both in their persons and property; that on the other hand the commanders of the vessels of war stationed there, will receive directions in no way whatever to interfere in the hostilities which may be going on, except for the purpose of protecting their countrymen, should it be necessary to do so.

That if British subjects commit any offence on shore, they are not to be punished by the Taeping authorities, but are to be made prisoners, and sent on board the *Centaur*, with a full statement of the offence they have committed, which shall be duly dealt with according to British law. Should a Chinese of the Taepings commit an offence on board any British ship, he will in the same manner be sent to the authorities on shore for punishment.

I am directed distinctly to acquaint you, that I am in no degree responsible for the conduct of any other vessels, except those which are British, and that, as far as I am concerned, you can deal with all others in any way you may think proper.

REPLY OF TAEPING AUTHORITIES.

"They agree unreservedly to all the conditions of the above communication. In the event of their attacking Chin-kiang, Kiu-kiang, or Hankow, they will give previous notice to the British authorities if possible. British vessels coming to Nanking, should not approach nearer than the Ping-shan Pagoda at night; and the Tsaouhea Creek can only be used by vessels of war.

FORM OF PASS.

Pass granted to Mr. (A.B.), master of the British (steamer or vessel C.D. barque), rigged, (340) tons burthen, (2) guns, No. of her crew (21)

1. Your vessel is permitted to navigate the river for the purposes of trade and on presenting this pass to any of the Taeping authorities you will not be interfered with by them.

2. You are permitted to hold intercourse with the shore, or to trade only under such regulations as their authorities shall think proper to prescribe subject to my approval, and wherever a British vessel of war is stationed

Digitized by Google

you are not to communicate with the shore except with the sanction of her commander.

3. You are to be careful that your English Red Ensign is hoisted always.

4. You are not to use your guns or arms except in self-defence, for which I shall hold you personally responsible, and you are not to visit any armed encampment of the Taepings.

5. You are to be careful that when the shore is visited, either by yourself, your officers, or crew, such conduct is observed as will avoid giving offence to the inhabitants.

JAPAN.

There is no fresh news of interest from Japan, the latest date being the 4th March, which conveys the intelligence which appeared in our last issue. The China papers, however, contain the full report of a meeting, which ought to have reached us by the last mail—of British residents at Yokuhama on the 19th February, convened by Capt. F Howard Vyse, "for the purpose of taking into consideration a report, and the proceedings of a preliminary meeting, on the subject of existing grievances and obstructions at this port."

CHINA.

PEKING.

The *China Mail* affirms "on good authority" that the Government of Peking is in a state of confusion, and that Mr. Wade writes that the dynasty will be utterly destroyed, or in the expressive language of the *China Mail*, "go to smash," if the Emperor delays his return much longer. An important Imperial edict has been published, establishing a Board for Foreign Affairs. This significant document seems to show that the Chinese Government considers it not only necessary but wise to fulfil in good faith the obligations to which she is pledged. We transcribe the following portion of the edict, which was first published in the *Peking Gazette* of March 20th:—

"Let a Board of Superintendence of Commercial Intercourse with all nations be established at Peking, and let the Prince of Kun, Yi-sin, the High Chancellor Kwei-liang, and Wen-hsiang, Vice-President of the Board of Revenue, be appointed to the control thereof. Let the Board of Rites at the same time issue a seal of office, bearing the title of 'Imperially appointed superintendency of commercial intercourse with foreign nations.' For the under-secretaryships which it is necessary to establish, let Manchou and Chinese officials, to the number of eight, be selected from among the secretaries of the inner council, the boards, and the council of State. These officers will not be required to do duty at the same time at the council of State. They will take their turn of duty consecutively.

"The Titular Vice-President, Tsung-hou, is to reside at Tien-tsin, as superintendent of the three (northern) ports, having all commercial relations at Niu-chwang, Tien-tsin, and Teng-chou, beneath his supervision; and he will co-operate with the respective Manchou generals, viceroys, governors, and prefects, in the discharge of his duties. He will receive a seal with his title as 'Superintendent of Trade for the Three Ports'—but it will not be necessary to add the designation of 'Imperial Commissioner.'

"The duties of superintendent of trade at Canton, Foo-chow, Amoy, Ningpo, and Shanghai, together with the three ports on the Inner River; and Chao-chou, Chiung-chou, and Tam-sui in Formosa, are to be discharged by the Acting Imperial Commissioner, Hieh-hwan, Governor of Kiang-su.

"Of the newly opened ports, Niu-chwang alone is to be beneath the control of the Superintendent of Manchurian Customs. For the conduct of business at Tang-chou and the other ports, let officers be appointed by the respective Viceroys and Governors, in concert with Tsung-hou and Hsieh-hwan.

"Reports to the Throne must be made from time to time, regarding the official communications from (the representatives of) the different nations, together with all matters affecting commercial intercourse; while the original despatches themselves must, at the same time, be forwarded for perusal, communication being simultaneously made to the Board of Rites for transmission to the superintendency of foreign commercial intercourse."

TIEN-TSIN.

Dates from Tien-tsin are to the 15th of March, the Peiho being clear of ice, gunboats and other vessels are again passing to and fro. The British Minister was to start for Peking on the 20th, and the Emperor to leave Jehol for the capital on the 23rd. The journey would occupy five days.

Our troops, as usual, have found means of driving out *ennui*, and what with feats on the ice and theatricals, they appear to have had a good time of it. They have fitted up a theatre in the building, inside the East Gate, called the "Grotto Yamun." It is said to be a perfect gem; the scenery was painted by Captain F——, whose artistical talent is renowned. The opening address was written and delivered by an officer of the Commissariat Staff. The pieces produced were "The Wandering Minstrel," "Taming a Tiger," and "Whitebait at Greenwich."

Part of the French force is about to leave, namely—one battalion of the 102nd Regiment for Cochin China, and a battery of artillery for France.

The following notification has been issued:—

1. The Custom-house for foreign shipping will be opened forthwith at the northern extremity of the ground set apart for the British settlement, and all inspections of goods subject to duty will be made there daily by the Chinese officers.

2. British merchant vessels arriving at Tien-tsin must anchor in that part of the river between the new Custom-house on the north and the two large forts connected with Sangkolinsin's wall on the south.

3. An office of general inspection is about to be established at Taku, and any British merchant vessel entering the river, will be boarded there by a Custom-house officer who will remain on board till she reaches the anchorage for foreign shipping at Tien tsin.

4.—The time allowed in Art. 37 of the Treaty of Tien-tsin, for lodging the ship's papers, &c., in the hands of the Consul at Tien-tsin is extended to seventy-two hours in the case of a merchant vessel whose draught of water is such as to necessitate her anchoring outside the bar of the Peiho; and if this rule be not complied with within ninety-six hours, the penalties which are laid down in the above-named article of the Treaty aforesaid will be enforced.

In like manner the time allowed for correcting a manifest is extended to forty-eight hours; and the corrected document may be handed in to the Customs officers either at Tien-tsin or Taku.

5.—When portions of the cargo of a British merchant vessel have already paid duty at any of the other open ports of China, the exemption certificates should be handed in to the Consul, along with the ship's papers, manifests, &c., that the same may be reported at once to the Superintendent of Customs, so as to obviate delay in landing the goods.

6. When the Superintendent of Customs at Tien-tsin shall have granted a permit to open hatches to any British merchant-vessel anchored off the bar, this permit must be presented in the first instance at the Taku Office, and Chinese officers will then be despatched to see the hatches opened, and take note of the nature and amount of the cargo transhipped into the cargo-boats. As each of these boats is laden her hold will be sealed, and a permit granted her to proceed to Tien-tsin. This permit will contain a statement of the cargo conveyed, and the name of the ship from which it is taken, and on the arrival of the boat at Tien-tsin it must be handed in at the Custom-house, when the cargo will be inspected, and if everything be found correct, the goods may then be landed and the duties paid into the Government bank.

(Signed) J. MONGAN, Acting Consul.

A letter dated 14th March says:—The ice at Taku commenced to show indications of breaking up on the 2nd instant, it then being unsafe to cross on it between the forts. On the 8th it was partially broken up at various parts of the river, and at noon on the 12th it suddenly began to crack, and move away in front of the town of Tien-tsin, and the river is now quite clear up to that point, though masses of ice are still floating past the town from portions of the river higher up, not yet navigable. This day at noon, the first gun-boat of the season arrived from Taku, the *Drake*, No. 78, and will take down the present mail to Maitau, from whence it will be sent on to Shanghai.

The French received this forenoon their mails of the 12th January, but the English portion of the mail is not yet forthcoming. Throughout the winter the postal arrangements of our allies have been much superior to ours, as they have had their mails regularly from Chefoo, while it was only on the 3rd of the present month that the English army received any since the 19th December last, on which day the European mail of 10th October arrived. The English mail of 10th December was delivered in Tien-tsin, *via* Chefoo, on the 3rd; and on the 6th inst., the mails of 26th October, 10th and 26th November came up from Chefoo, and yesterday was received the one of 26th December; so at last, with the exception of the 10th January from London, the army have received all their missing mails.

Quite a feat has been accomplished by one of the officers stationed at Tien-tsin, who skated from Taku to Tien-tsin, an estimated distance of sixty-eight miles. He started at 8 A.M., and arrived at 5 P.M., and is probably the only instance on record of the journey having been performed in that style.

SHANGHAI.

The opening of the Yang-tze-Keang and the movements of the expedition, engross public attention to the exclusion of almost all other matters. Full details will be found in another column. The port of Neu-chwang, which has hitherto attracted but little attention, is open to trade, and signs of improvement are manifest here in the demand for goods for shipment to the Northern ports. Trade in the old channels is still interrupted, in consequence of the proximity of large bodies of insurgents, who had advanced to and burned the town of Cheen-joo, within easy distance of Shanghai; and it appears doubtful whether an active business can be carried on by the natives, and whether the whole of the trade with the interior will not be transferred to foreigners, or at any rate pass up the river in craft bearing

Digitized by Google

treaty flags. The Imperial government appears to become daily more impotent; and, although there are few, if any, traits in the rebels worthy of admiration, the Government that cannot suppress them is equally to be despised.

The rebels have been burning villages and detached farm-houses in the neighbourhood of Shanghai, and appear anxious, according to the *North China Herald*, "to surround the town with a belt of desolated country." The *Herald* adds: "It may come to pass that the principle of non-intervention will prove an error, and be abandoned by our authorities to the discomfort of the rebels, when it is found that the ports are virtually cut off from the interior by a desert, created through their marauding propensities. Their deference to our power and their ostensible friendliness to foreigners generally, will be of very little advantage to our commerce if the Chinese traders cannot pass freely to and fro. Indeed, but for the opening of [illegible] as hoped, We should see a mere city of refuge, our only employment being the housing of Chinese, exiled from their own towns and homes."

From the same paper we extract the following summary of news:—"A disturbance has taken place outside the East Gate of the city, which was eventually quelled by the French stationed there. The troops of a certain General named 'Ma' having arrived at Shanghai during the night, desired to get admission into the city; this being denied to them, they proceeded to take forcible possession of the dwellings near the East Gate for quarters, greatly to the consternation of the occupants, who imagined that nothing short of the rebels having arrived, could have given rise to such disturbance. As the native officers could not restore order, the French troops were called out and arrested some 50 of them. A high officer named Pang, (a retired Minister of the Privy Council), and specially deputed from Peking as commander of the Shanghai militia) afterwards proceeded to the spot to investigate the cause of the uproar, and finding that the officer in charge could not control his troops, ordered him at once to be executed, which was then and there carried into effect. As the inhabitants were still apprehensive of further attacks from this soldiery, and kept their shops closed, the Shanghai magistrate, to set their mind at rest, issued a proclamation stating that these troops would only remain there a few days and then be marched off to Tsing-poo.

The Imperialist troops suffered a severe defeat some three or four days ago at Ka-ting. They had been pursuing some rebels from Nan-siang to Ka-ting, and at first succeeded in entering the place, but were as speedily driven out again with a loss of altogether some 100 soldiers. On a valiant Colonel Ma-ting-kwei, who has been winning to himself considerable reputation lately, coming to their relief, the rebels fell back at the sight of his standard. The Imperialists have since occupied a strong position at Nang-siang and Hang-chiao, between this and Ka-ing, to intercept their further approach upon Shanghai.

Two thousand more Imperial troops have recently arrived at Woosung, from the country north of the Yang-tze. Great things are expected of these troops, as they have been fighting in Gan Hwui, and been everywhere victorious. The little steamer purchased by the "literati" and traders of the retreat, in the Ta-hu Lake, Tung-ting-shan, is said to have been captured by the rebels, and the place itself taken some ten days ago.

Communications with Hang-chow, Shao-hing, and Ningpo, by way of Hu-chow, has been reopened, the rebels having departed from thence.

About 100 French troops and the *Meteor* steamer are stationed at Woosung to prevent the rebels interfering in that quarter, which we believe has been threatened; but the people there do not seem to evince any alarm, and business is going on just as usual.

According to accounts from the districts near Soo-chow, business was being carried on without interruption, and duties being levied at the barriers of San-li-ch'ao and Chi-li-chiao, near Woo-keang and Loo-c'heu, by the rebels, and on goods conveyed by native boats from this place; a fixed rate of duty was being levied on the invoice being presented showing their value.

A plot of ground has been ceded to the French in the city here, on the site of a Roman Catholic church, which existed there under a past dynasty, and on which a Chinese temple, the "Kuan-li-Miao," was erected some sixty years ago; this building is also now in their possession. A claim was made for this ground some fifteen years ago, and resulted in a promise, which was never fulfilled, that the French should have it after ten years from that date. School-rooms for Chinese children have now been opened there under the supervision of the missionaries.

Mr. E. A. Reynolds has designed and built a vessel called the *Lan-hwa*, which deserves notice as being the first steamer built in Shanghai, and the first vessel clearing for any port on the Yang-tsze-kiang under the new regulations for foreign trade on that river. She cleared on the 19th of March for Chin-kiang, and will probably proceed to Hankow.

The Prince of Kung has sent Mr. Lay authority to act as Inspector-General of Customs.

SWATOW.

The body of James Malley, the Second Engineer of the [illegible], has been brought in by some fishermen. There were marks of two frightful blows upon the face, which had undoubtedly been received before life was extinct. One very severe blow was between the eyes, the other on the lips. From all the ascertained circumstances of the case, there is only too great reason to fear that he was murdered in a sampan while on his way to the gunboat, which lay about 300 yards from the shore. It would then seem as if he had been taken outside and thrown overboard. The body when found was stripped of the coat, and plundered of a ring and about $25 which the unfortunate man is known to have had with him.

Among recent arrivals has been that of Mr. Breck, U. S. Consul, who with Mrs Breck was to leave for Ningpo.

HONG KONG.

According to a return published in the *Hong Kong Register*, the number of troops in China were as follows:—At Tien-tsin 3,080, at Taku Forts 75; Shanghai 1,740; Hong Kong 1,989; Kowloon 925; Stanley 69; Canton 2,640. Total 10,518. The 60th Royal Rifles are about to embark for England.

From the *Daily Press* we extract a notice of the new territory of Kowloong:—

Mr. Commissioner May has made rapid progress in developing the resources of the place, and considering the primitive means at his command, we were not a little surprised at the result. He has nothing but convict labour to rely on, and his prison is a confiscated cargo boat, which likewise serves for the police station. An excellent road has been constructed to the civil encampment, which is beautifully situated on the summit of a hill, and consists of a number of tents enclosed on a levelled spot by a bamboo fence. The road then strikes in an easterly direction, and when completed will communicate with all the villages on the cession.

The statistics of the Civil Commissioner, combined with a report of the cases adjudicated by him, would be valuable returns in more respects than one. In the first place, they would illustrate the sad state of anarchy at present ruling in China; and in the next place, they would form an authentic unimpeachable record of what Cowloon was when the English took it. Should the place ever attain the importance we expect it will, such a record will be cherished by future generations.

The extent of the cession is much larger than we had the most remote idea of. Cutting off the corners, we should say it must be more than ten miles round. The difference between the atmosphere on the Cowloon side and on this is something considerable. For instance, on Sunday last, whilst there was scarcely any wind here, there was a strong sea breeze blowing on the Cowloon side through the Ly-ee-moon. The difference surprised us.

Regarding the encroachments of the military authorities we were perfectly astounded. Some distance north of the parade ground, and just at the point, where if there ever should be a town there it should certainly form the centre, a line of long sheds is being constructed. We should think their dimensions are each 120 feet by 45. They are double roofed with large eaves, are high off the ground, and extremely well adapted for summer quarters. There are about ten of them, and they reach nearly across the peninsula. If the 60th Rifles are really going home, which we believe there is no doubt about, what can these huts be for? The cost is $1,300 each, but they will stand no chance against a typhoon. With the huts already erected, the parade-ground, and these sheds just described, all absorbed by the military, which is clearly what is aimed at, the cession will be a burden to the colony, for the remainder will be hardly worth having."

Digitized by Google

Sir Hercules Robinson's Government is said to be approved of by people of every class.

Frequent desertions have occurred in the army and navy, upwards of forty having taken place within a very short time.

A large concourse met in the Happy Valley, on the 30th of March, to witness the exploits of the contending athletes for prizes offered by the Race Committee. Foot races, hopping, and hurdle races, wrestling, &c., formed the programme of the day's amusements. The band of H. M.'s 44th Regiment, as well as that of the 21st Madras Native Infantry, were on the ground, and enlivened the scene with excellent music.

The *Hong Kong Register* says, "We perceive, with the highest satisfaction, that his Excellency has proposed, and his council assented to, a plan for procuring efficient Chinese scholars to fill the vacant offices connected with interpretership in our criminal and civil courts, by importing well educated youths from home, and having them instructed here under competent masters, at the expense of the Colony."

We have much pleasure in noticing that the resident merchants of Yokuhama have subscribed the sum of $1,000 for the payment of the fine imposed on Mr. Moss by Mr. Alcock, her Majesty's minister at Yedo, and in amemorial t o him they record their opinion that he acquitted himself throughout the trial in a most truthful and praiseworthy manner, and that had the Japanese not been under *duresse*, the evidence would have been totally different, and quite confirmatory of his own statements. A suit has been instituted in the Supreme Court of Hong Kong against Mr. Alcock for damages, which will shortly be brought to trial.

The American steamer *Fire Dart* arrived from New York on the 20th March, having left the latter place on 10th of December.

CANTON.

The *Friend of China* writes somewhat severely of the Bishop of Victoria, whom it accuses of "gross neglect in not providing some means for the performance of Divine service at Whampoa. His Lordship knows," says the editor, "that two-thirds of the master mariners visiting the anchorage are Englishmen, who prefer the Church of England's to any other form of worship; and yet, notwithstanding the presence of the conventicle of which we speak, no Church of England minister is able to officiate, simply because there is no licensed quarter in which he may publicly appear."

From a number of items of news in the same paper we extract the following:—

"The distress occasioned in Cochin China, by the now long continued war with France, will have made many of the poorer of the population quite ready to go to any quarter where food can be obtained; and dollars being given in advance, as in China, Coolie labour will be as abundant as we hear it is among the smaller islands under the Government of the Philippines, a quarter which importers of Coolie labour at Havana intend to try next year we are told; the restrictions applying to Chinese have no application to born subjects of Her Most Catholic Majesty."

Such another place as China for feasts and festivals there cannot be in the world. The other evening, when all work was done, a procession passed through the streets of Honan, the end of which could not be seen after an hour had gone by. On inquiry we were told that it was termed the festival of *sieu foe*, "burning old clothes." Some of the effigies, especially of fishes of transparent paper, with candles inside, were particularly good; while the living figures of pretty girls just reaching their teens, nicely dressed, be-whitened and be-rouged (showing that Chinese have as much love as Westerns for fair complexions, rosy cheeks, and cherry lips) were charms on which a bachelor could dream for nights.

The number of the *Friend of China* for March 30, contains an interesting and curious article on Coolie emigration, entitled "The Other Side; or, the Coolie Question in its True Bearings."

The following is the form of passport given to approved applicants at British Consulates—Fee one dollar:—

Passport No. British Consulate,
1861.

The undersigned, Her Britannic Majesty's Consul at , requests the civil and military authorities of the Emperor of China, in conformity of the Ninth Article of the Treaty of Tien-tsin, to allow a British subject to travel freely and without hindrance or molestation in the Chinese empire, and to give him protection and aid in case of necessity.

Mr. ——, being a person of known respectability, is desirous of proceeding to (cities and towns in the Kwang-tung province) passport is given him, on condition of his not visiting the cities or towns occupied by the insurgents. H. B. M.'s Consul.

This passport will remain in force for a year from the date thereof.

Signature of the bearer:

The Allied Commissioners have issued a proclamation that in consequence of the setting in of the South-West monsoon, and the approach of a season unfavourable to navigation, emigration depots will close on the 30th of April (they are closed already), and not re-open till the 15th of September next.

In the *Daily Press* we observe the report—for the truth of which that paper does not vouch—that the Governor-General of Hoonan and Hoopeh has addressed a despatch to the Emperor, suggesting that the Imperial Court be removed to Shensi. "The reason given is that foreigners are invincible upon or near the water, and that Peking is open to their attacks; therefore, if the Court remain at that city, it can be brought under their influence by intimidation. Shensi is recommended because it is surrounded by hills, through which foreigners would have great difficulty in penetrating. The reply from the Emperor was that the suggestion should be adopted, and the Court removed during the course of the year."

PHILIPPINES.

MANILA.

On the 9th of December, 1857, a Royal order was published for the establishment of a Mint for reducing to small coins the South American doubloons which at present constitute the large proportion of the currency. It was not till the 19th of March that this came into partial operation, and several months must yet elapse before any issue of the smaller coins can be made that will serve as a substitute for the large silver dollars.

Great activity is being manifested in the construction of roads and bridges, and material improvements are being rapidly introduced in the provinces, especially in the manufacture in sugars, the old system being abandoned by many of the growers, and boilers and machinery adopted for crushing, &c. In this respect a great loss is felt in the death of Mr. Stoll, a mechanical engineer of great ability, who kept their machinery in repair, and had just entered into contracts for making and setting up machines.

Cholera and small-pox have been very prevalent, but are now gradually disappearing.

COCHIN CHINA.

SAIGON.

Dates have been received to March 30. Another expedition of the French was preparing for an attack on Mitho. Several vessels were waiting for rice, and the price had risen to nearly $2 per picul.

BORNEO.

SARAWAK.

The little steamer *Rainbow*, belonging to the Sarawak Government, had again returned to Singapore, with dates from Sarawak to March 26, and she bids fair to supply efficiently the greatest want which Sarawak had, viz., want of communication. The improvement of the settlement may date from the time of her arrival.

Muka is represented to be as strongly fortified as Seriff Massahore could make it, and it was anticipated he would make an attack on Kanowit. Captain Brooke had placed reinforcements in the fort. Sir James Brooke was about to visit Brunó in the *Rainbow*.

JAVA.

BATAVIA.

Further details are given of the effects of the inundations. The *Herndelsblad* remarks: "Truly there is no country in the world where past misfortunes are so soon forgotton as in Java. The inhabitants of the inundated districts have again returned to their dwellings, or are busy building new houses on the old sites. The fields which were destroyed have been mostly replanted, and the 'pestiferous mud' of a month previous is now become 'the fruitful layer of slime' which promises a rich harvest and compensation for past losses. Of those who found their death in the water or under landslips little is thought." There is no fear of any prolonged want. The necessaries of life are very little dearer than usual at this time of the year, and the state of the rice crops is really everywhere very promising.

The damage done on the West coast of Sumatra by the earth-

Digitized by Google

quake, and especially by the rising of the sea, was very great. The sea came so suddenly on the garrison that they fled half-clothed to the Campong Hilibobo. Twelve of the soldiers and thirty-two natives were drowned. The rest of the garrison afterwards proceeded to Gunong Sitoli, where they arrived in a sick and wretched condition.

Complaints are made regarding the large export of silver money from Java to Singapore, and the Government is called upon to take measures to prevent this. In 1858 2½ millions, and in 1859, four millions of florins were thus exported, and it is stated that by the last mail that 800,000f. were taken from Batavia. The export of this money causes a loss to the State of from four to five per cent.

MALACCA STRAITS.

SINGAPORE.

The *Singapore Free Press* announces the arrival of the Sultan of Tringaun, who was received by the Governor and resident councillor. The Sultan is on his way to Mecca.

A petition will be presented in a few days to his Honour the Governor, showing the great injury the petitioners suffer from foreigners being allowed to sail in vessels from this port under the British flag, the privilege of taking the command of a ship sailing under other national colours being denied them in other ports.

The tiger now exhibited in Campong Glam measures fourteen feet from the tip of its nose to the end of its tail, and is thirty-three inches in height, at the withers.

The *Standard* announces:—"The old-remembered tenants of Gemmill's-buildings are gradually leaving; a gentleman who has for years established a store, is selling off; the hotel portion of the block will pass into other hands; the old shipping office, latterly used for general transactions, will be occupied by another tenant.

The second number of the *Singapore Review* has fully realised the expectations which were entertained from the author's varied and general knowledge; and if the first number was not graciously received, at least in Singapore, it carried with it much local information which could not fail to interest strangers.

The ice ship has arrived, and is expected to realise a fair price.

The Government are constructing lines of road from Serangoon to Pongul, a distance of about two and a-half miles; from Pongul to Eo Chu Kang, two and a-half miles; from Tangling to Passer Panjang, three miles, from whence a road will lead to Ayer Rajah, three miles; from Panjang, in a due westerly direction, to a place not yet named, four miles.

His Imperial Majesty's steam frigate *Gironde*, Mons. Thayan, arrived at Singapore on the evening of the 27th of March, having left Bankok Siam on the 23rd, with their Excellencies the Siamese Ambassadors, who landed under the usual salute from Fort Fullerton. Their Excellencies embarked on board the *Gironde* on the 3rd of April, *en route* to France *via* Suez.

The captain and crew of the schooner *Willy* (Brem.) arrived here on the 11th of March, reporting the total loss of that vessel.

Births, Marriages, and Deaths.

(Announcements for Subscribers are made free of charge.

BIRTHS.

ALISON.—On the 6th inst., at 4, Albyn-place, Edinburgh, the wife of Lieut.-Colonel Alison, C.B., of a daughter.

BOWMAN.—On the 5th inst., at Stangrove, Eden bridge, Kent, the wife of A. Bowman, Esq., of a daughter.

BESLEY.—On the 24th ult., at 4, Brunswick-terrace, Brighton, the wife of Frederick Besley, Esq., of Oak Lodge, Highgate, of a son.

CLARK.—On the 3rd inst., at Instow, North Devon, the wife of Thomas Clark, Esq., of Point de Galle, Ceylon, of a son.

D'ALMEIDA.—On the 24th March, at Mount Echo, Singapore, the wife of Joaquim D'Almeida, Esq., of a son.

GREENFIELD.—On the 30th ult., at 1, Abbot's-road, Kilburn Priory, the wife of Hume Greenfield, of a son.

GORDON.—On the 4th inst., at the Royal Arsenal, Woolwich, the wife of H. W. Gordon, Esq., C.B., of a son.

JOAQUIM.—On the 2nd March, at Mount Narseis, Singapore, Mrs. Joaquim, of a daughter

LACY.—On the 24th ult., at 3, Kew-terrace, Great Western-road, Glasgow Mrs. Henry B. Lacy, of a daughter.

LATHAM.—On the 5th inst., at 17, Kent-terrace, Regent's-park, the wife of Edward Latham, Esq., of a daughter.

MORRICE.—On the 9th inst., at the Vicarage, Longbridge Deverill, Wilts, the wife of the Rev. W. D. Morrice, of a daughter.

PAGE.—On the 2nd March, at Shanghai, China, Mrs F. M. Page, of a daughter.

PEIRCE.—On the 22nd March, at Cochin, Malabar Coast, the wife of R. H. Peirce, Esq., of a son, which only survived his birth twenty-four hours.

RIBEIRO.—On the 23rd March, at Macao, the wife of Mr. L. V. Ribeiro, of a son.

SKOTTOWE.—On the 25th ult., at the Priory, Douglas, Isle of Man, the wife of N. J. Skottowe, Esq., Commander of the P. and O. Co.'s ship *Columbian*, of a son.

TATE.—On the 9th March, at Shanghai, Mrs. J. Priestley Tate, of a son.

MARRIAGES.

BRACE—OSBORN.—On the 2nd inst., at the parish church, Fareham, Hants, by the Rev. Sir Henry Thomson, Bart., Francis Edward Brace, Esq., of Catisfield Lodge, Fareham, late Lieut. of 3rd Buffs, to Elizabeth, second daughter of Charles Osborn, Esq., of Down-end, Fareham.

BALLARD—MONCRIEFF.—On the 30th ult., at Dalkeith, N.B., by the Rev. W. Scott Moncrieff, Brevet Lieut.-Colonel J. A. Ballard, C.B., Bombay Engineers, to Joanna, daughter of Robert Scott Moncreiff, Esq., of Fossaway, Perthshire.

BIRDSEYE—BURROUGHS.—On the 14th March, at Trinity Church, Shanghai, by the Rev. J. Hobson, T. J. Birdseye, Esq of Shanghai, to Sarah Maria, daughter of the late Thomas Burroughs, Esq., of Derby.

DURNFORD—COURCY.—On the 1st inst., at St. Martin's Church, Guernsey, by the Rev. James Mainguy, M.A., Colonel George Durnford, to Henrietta, only child of M. de Courcy, Esq., Havelet House, in that island.

LYALL—MACNEILL.—On the 24th ult., at Montrose, by the Rev. John Ferguson, Johanna, daughter of Captain Macneill, of Easter Brakie, Forfarshire, late of the 91st Regiment, to John Lyall, Esq., late of Calcutta.

SMITH—SPROULE.—On the 7th inst., at the Church of the Holy Trinity, Haverstock-hill, London, by the Rev. William Darby, Thomas Smith, of China, to Marian, eldest daughter of James Sproule, Esq., of Adelaide-road, Hampstead.

SANFORD—WOOLLETT.—On the 6th inst., at Bolbec, Seine Inférieure, by the Rev. Hill Wilson, Resident Protestant Minister at Havre (the ceremony having been previously performed by H.M.'s Consul at Havre), Heaunas Sanford, Esq., of Park-road, Stockwell, to Marran Elizabeth, only daughter of Joseph Woollett, Esq., of Bolbec.

DEATHS.

ALVES.—On the 15th March, at Macao, Joze Miguel Alves, Esq.

BASTOS.—On the 30th March, at Hong Kong, Jose Bastos, third son of the late A. J. Bastos.

BRIARD.—On the 15th February, on board the American barque *C. E. Tilton* in the Gulf of Siam, of dysentery, Charles Tilton Briard, only son of J. H. and Louisa Briard aged three years, three months, and eighteen days.

BROWN.—On the 5th March, at Hong Kong, Colour-Sergeant Brown, 44th Regiment, aged 31 years.

CLARK.—On the 27th ult., Deputy-Inspector of Army Hospitals, John Clark, M.D., aged 54.

MARKWICK.—On the 8th March, at Hong Kong, of smallpox, Ricardo, and on the 30th March, Maria, son and daughter of Mr. Richard Markwick.

RAWSON.—On the 26th ult., aged 74, Mrs. Rowson, Green Royde, Halifax, Yorkshire.

STOLL.—On the 11th March, at Manila, Mr. John Stoll aged 39 years.

WADMAN.—On the 4th inst., Henry A. Wadman, infant son of E. Wadman, late of Ningpo, China, aged 13 months and 8 days.

WILBER.—On the 14th March, at the Excelsior Hotel, Whampoa, aged 21 years, of paralysis, Charlotte Hays, the wife of E. E. Wilber, Esq., of the firm of E. E. Wilber and Co., Commission Agents.

COMMERCIAL REPORT.

CHINA—IMPORTS.

SHANGHAI.—The opening of the ports up the Yang-tsze, and the prospects of trade at Tein-tsin, have at length tended to impart some life into the market, and although quotations have not decidedly advanced, still there is an improved demand and a much better feeling in the minds both of importers and dealers. A vessel called the *Maryland*, cleared for Tein-tsin with 150 bales and 300 cases Manchester goods, 200 bales Am. drills, 100 boxes glass, and 50 chests opium. Sales of grey shirtings T. cloths, chintzes, and Am. drills have been made to some extent for shipment to Hankow. T. cloths are a little higher. White shirtings, white and dyed spots, coloured brocades, chintzes (especially scarlet) camlets, lastings, and well assorted Sp. stripes are readily saleable and incline upwards. Lead is in limited demand. Iron dull, with a heavy stock. Tin lower and quiet. Tin plates saleable for Japan. Window glass, saleable with difficulty, stock excessive. Ratans, sapanwood and sandalwood are all saleable. Provisions, &c.: A demand springing up for the service of the French; good Gallego flour has been placed at $8 to $8.50, but the market is now dull again. Beef is in excessive supply, and good American can be had at $9 per barrel. Pork is not in such heavy stock, and is saleable at $13 to $15 per barrel for prime. In other articles under this heading there is no room for remark, the market being glutted. Coals: The supply continues large. The Hong Kong rates afloat for entire cargoes are $10 to $10.50 for English steam, $6 for Sydney. The Shanghai quotations rule much higher, say English 12 to 15 taels. Sydney, 10 to 10½ taels. Japan, 5 to 6 taels.

FOO-CHOW-FOO.—There has been a good demand for grey long cloths, T.-cloths, and lead. The following are the sales reported for the fortnight:—Cotton yarn, 75 bales, low numbers at $32 to $33; grey shirtings 2,000 pieces 9½ lb. at $2.75; T.-cloths 5,500 pieces, 6 to 7 lb. at $1.50 to $2; brocades 300 pieces, white at $2.20; 300 piece died to $3.50; lead 1,000 piculs at $8.75 to $9.25.

CANTON.—Yarn in reduced stock and firmer; grey shirtings incline upward; iron, lead, and tin plates in good demand.

HONG KONG.—A fair amount of business has been done, but prices show no improvement. The *Star of the North*, *Strathallan*, and *Veloz* have arrived during the fortnight with moderate supplies. The following are the sales reported:—Yarn 300 bales; long cloths, grey 15,750 pieces; white 600 pieces; T.-cloths 418,500 pieces; Am. drills 4,000 pieces; long ells 500 pieces scarlet; Spanish stripes 250 pieces assorted; lastings 600 pieces; iron 4,000 to 5,000 piculs.

CHINA—EXPORTS.

TEA.—Shanghai: Black; supplies continue checked, and the small stock at market, whilst it offers a meagre selection, is held above the rates current at Canton and Foochow. The consequence is that an extremely limited business has been transacted during the fortnight, the settlements being reported at under 2,000 chests common Congous at 18 to 20 taels. The stock on the market is stated at 5,000 chests Congou (consisting of Ningchows, Hohows, Hoochows, and common repacked), and 2,000 chests Flowery Pekoes, three-fourths of which are new teas. Green—supplies have been much more free than were anticipated. Settlements during the fortnight are reported to the extent of 7,000 half-chests China, and 2,500 packages Japan leaf. As the business is nearly all transacted by contract quotations cannot be given. The stock on the market is stated at 14,000 half-chests China, and 4,000 half-chests Japan. Arrivals are reported at Ningpo to the extent of 15,000 packages, and the ship *Lord Clarendon* has proceeded there to fill up for New York. Owing to the increased supplies, and to the unfavourable political news from the United States, buyers are unwilling to go on at the excessive rates which have been established, and prices at Shanghai have receded fully 3 taels. The total settlements of greens for this season to date are 89,000 half-chests China, and 40,000 half-chests Japan, against 420,000 packages China, at corresponding period last season. At Foo-chow-Foo: The season's yield of Congou is clearly exhausted, supplies from the country being limited to driblets. The teamen continue firm in their demands, which circumstance, combined with the fact of the assortment at market being the refuse of the

Digitized by Google

season, fully accounts for the small business transacted. About 1,300 packages of Fychow Greens have come to hand, and a quantity more are expected. As the risk and expense of bringing these to such an unusual market are very great, the rates demanded are exorbitant. The stock on the market is reduced to 12,000 chests Congou, 1,000 chests flowery Pekoe, and 300 half-chests common Oolong. Canton: There has been a strong disposition evinced during the fortnight by foreigners to invest in Congous, at rates much above those ruling in London on the departure of the 26th January mail. This caused the teamen to become firmer than ever, and prices have tended upwards. The natural consequence is that very little business has been done. Of new country greens about 2,000 packages have come to hand, a quantity of Hyson having been taken for India, at extreme rates. Four chops of Congou have also arrived during the fortnight, which complete the season's supply. Settlements are reported of Congou: 8 chops Oonam and Oopack, common to middling at 18 to 26½ taels, and 650 chests Canton packed at 24 taels. Scented Teas: 3,300 boxes Orange Pekoe at 24 to 29 taels, and 1,000 boxes Caper at 15 to 15½ taels. Powchong: 120 half-chests and 1,400 boxes (for New York) at 17 to 19 taels.

RAW SILK.—Shanghai: The dealers show an evident desire to realise, but will not as yet submit to a decline corresponding with the London quotations. From the interior the arrivals have been moderate, and the proportion of good silk is still very small. The sales of the fortnight are estimated at about 1,200 bales. The quotations are—Tsatlees, best 3, 425 to 430 tls. per picul; taysaams 2, 330 to 345 per picul; yuenfa, best 380 to 390:—Canton.—Small settlements are reported for shipment to India to the extent of 50 piculs Loonkong. The remaining stock is very small, and there are not likely to be any more transactions worth reporting for Europe or the United States this season. The quotations are—Rereeled comchock $470 to $475 for the best; Kowkong $400 to to $410; Loonkong $430 to $440. The Macao market has been swept.

DRUGS, &c.—Cassia Lignea: At Canton there is none good at market, the nominal quotation is $18. At Macao 300 piculs came to hand, which were taken at $18 to $18 25c., leaving none upon the market. Cassia Oil is dull, with ample supplies. The Canton quotation is $280; Macao, $260 to $265. Cassia Buds: There is no stock either at Canton or Macao. At the latter the nominal quotation is $35 to $36. Star Anniseed: At Canton none; at Macao 100 piculs are on the market, $14 25c. to $14 50c. being asked. Anniseed Oil is in full supply, both at Canton and Macao, the quotation being $160 to $165. Fire Crackers: The Canton quotation is 90c. per 40 packets of best quality. Matting: At Canton Lintan cargo is quoted 10½c. per yard of four quarter white, and one cent more for red check. Vermillion at Canton is $39 per box of Sun-shing chop.

BATAVIA.—We have had a decided improvement in our market during the last fortnight, and large sales have been made of suitable goods; prices generally are lower than they should be, but still all kinds of manufactures adapted to the season find ready purchasers.

SINGAPORE.—Large arrivals of English goods have brought down rates, and the demand is slack. The stocks are heavy. In exports the purchases have been small, owing to a scarcity and high rates.

MANILA.—The supplies of European goods have been small, and there has been general inactivity in the import markets. The produce market continues very dull, the unfavourable advices from Europe and the United States, combined with scarcity of tonnage, making shippers unwilling to purchase unless at rates that producers are generally unwilling to accept.

The picul is 133⅓ lbs. weight; the tael at Shanghai is equal to 1 dollar and 40 cents and is divided into decimal parts of ten.

EXCHANGES ON LONDON.

EXPORTS FROM CHINA.

Per Clarendon, from Shanghai, March 11, to New York. Tea, 125,796 lbs.

Per Eliza and Ella, from Shanghai, March 16, to New York. Tea, 894,171 lbs.; raw silk, 20 piculs.

Per Melbourne, from Foo-chow-foo, March 20, to Australia. Tea, 464,000 lbs.

Per Comet, from Canton, March 15, to New York. Tea, 681,400 lbs.; pongees, 16,450 pieces; sarsnets, 123; crape shawls and scarfs, 10,540; raw silk, 40; cassia, 65 piculs; matting, 3,036 rolls; sweetmeats, 100 boxes; fire crackers, 11,900; cassia oil, 12; fans, 494; cassia buds, 53.

Per Pekin, mail steamer, from Hong Kong, March 16, to England. Silk, 1,833 bales. To the Continent, 488.

Per Willy, from Hong Kong, March 14, to San Francisco. Tea, 130 packages; sugar, 1,440 piculs; rice, 1,450; matting, 1,000 rolls; opium, 1,800 taels; China goods, 2,322 packages.

Per Bald Eagle, from Hong Kong, March 15, to San Francisco. Tea, 1,511 packages; sugar, 2,512 piculs; rice, 7,016; oil, 300; opium, 6,000 taels; China goods, 2,734 packages.

EXPORTS FROM MANILA.

Per Melancthon, March 13, to Cork. Hemp, 3,500 piculs; sugar, 6,000.

Per Avalanche, March 17, to London. Hemp, 6,500 piculs; sugar, 8,000; sapanwood, 200; cigars, 1,320 mil.

Per Sultan, March 23, to New York. Hemp, 11,400 piculs; sugar, 8,000; sapanwood, 200; cigars, 100 mil.

Per Nelly, March 14, to Sydney. Sugar, 9,150 piculs; coffee, 450; cigars, 1,000.

Per S. H. Talbot, March 16, to Sydney. Sugar, 11,200 piculs; coffee, 265; cigars, 5 mil.

EXPORTS FROM SINGAPORE.

Per Barracouta, to London, March 27. Gambier, 841 piculs.

Per Crisis, to Liverpool, March 28. Tin, 324 piculs; sago flour, 7,761; rattans, 85; sapanwood, 84; white pepper, 91; India rubber, 70; Coffee, 33; Malacca canes, 12,000; Matting, 5 bundles.

Per Champion, to Liverpool, April 2. Gambier, 2,523 piculs; sago flour, 4,410, sapanwood, 255; rattans, 88; white pepper, 60; black pepper, 200.

SHIPPING INTELLIGENCE.

ARRIVED.

At SHANGHAI.—From London: March 14, George Washington. From Liverpool: 16, Egan. From Cardiff: 14, Constance; 15, Juliane. From Brest: 8, Cardinal Hamblin.

At HONG KONG, MACAO, and CANTON.—From London: March 18, Star of the North; 22, Strathallan; Veloz. From Cardiff: 19, Saracen; 29, Prius veld Abrar Schulk. From Newcastle: 23, Spirit of the North. From Toulong: 31, Antoinette. From Bordeaux: 23, Aquitaine. From New York: 20, Fire Dart (str.); 21, Independence.

At MANILA.—From Cadiz: March 18, H.C.M.S. Animosa (str.); H.C.M.S. Valiente.

At BATAVIA.—From Liverpool: March —, Java, Britannia.

At SINGAPORE.—From Liverpool: March 24, Procymatia; 28, Kamehameha IV.; April 4, Peter Symons. From Cardiff: March 28, Arracan; April 3, Schelde; 5, Garland. From Newcastle: 3, Elix Ruboke. From Boston: 4, Hollander.

SAILED.

From SHANGHAI.—For New York: March 11, Lord Clarendon; 16, Eliza and Ella.

From HONG KONG, MACAO, and CANTON.—For England: March 21, H.M.S. Furious. For Havana: 12, Fides; 19, Messenger. For Demerara: Sea Park; 26, Lancashire Witch.

From MANILA.—For London: March 17, Avalanche. For Cork: 13, Melancthon. For New York: 23, Sultan.

From SINGAPORE.—For Liverpool: March 27, Crisis; April 2, Champion.

LOADING.

At SHANGHAI.—For London: Egmont, Glencoe. For New York: Mary and Louisa.

At FOO-CHOW-FOO.—For London: Excelsior, Europe, Kinnaird, Oriental, Japan. For Australia: M. R. Mitford.

At HONG KONG, MACAO, and CANTON.—For London: Panic, Strathallan, Strathmore, Weymouth. For Havana: Independence. For Demerara: Whirlwind. For Sydney and Melbourne: Arabian, Marian Moore. For San Francisco: Challenge, Early Bird, Franklin Haven, Imperial, Nor' Wester, White Swallow.

Digitized by Google

At MANILA.—For Melbourne: Joshua Bates, Peking.
At SINGAPORE.—For London: Procymatia, Sappho. For Liverpool: Kamehameha IV., Skiddaw. For Genoa: Ricardo Schmidt.

CASUALTIES.

The Beuin (Dutch), from Rotterdam to Macassar, was lost near the latter place on the 13th March. The crew and passengers have been saved.

The Norseman, from Batavia to Hong Kong, reports seeing a large round stern ship, having the appearance of an American, on shore on Helen Shoal. She stood in as close as possible, but could see no signs of life on board.

FREIGHTS AND CHARTERS.

At SHANGHAI.—To London: tea, £2. 10s. To New York: tea, $'0; silk, $20. There is still a scarcity of suitable tonnage for the coast, &c., and in consequence of which but a moderate business has been done. Amongst the charters reported are—Griefswold to Foo-chow-Foo and back, 40 lay days, $4,500; Earl of Chester to Swatow, 25 lay days, $1,900; Armistice, at $1,600 nett per month; Grenada to Hankow and back, at $1,300 dollars per month; Faust to Tien tsin, at $8 per ton.

At FOO-CHOW-FOO.—To London, £3. 10s.

At HONG KONG, MACAO and CANTON.—For London: £2. 10s. to £3. The demand for tonnage continues, and a larger amount of business would be done if suitable craft was at hand. The above rates are likely to continue until the new teas come to hand in June, when, if the present demand continues, higher rates may be expected. A brisk demand is also experienced for emigration purposes. For Sydney and Melbourne a good business has been done for both cargo and passengers. Amongst the settlements are—Strathallan to London at current rates, British Empire, from Riceports to Great Britain, at £3 15s. to £4, or 10s. extra to the Continent. Challenge, to San Francisco, at $19,000 nett. Six vessels to Saigon and back at 70c. per picul, and nine vessels to Bankok and back, at 55c. to 65c. per picul. Maria, at $1,300 per month. Jan Hendrik, to Batavia, for 6,000 guilders. The Governor-General, steamer, has been sold for between £8,000 to £10 000.

At MANILA.—There is not a single vessel here available for charter, and the present rates are likely to advance at the next arrivals.

At BATAVIA.—To the Continent: £3 5s. A very small business is doing as produce is so scarce, and although there is such a demand at the other ports, rates have given way, and are not likely to improve until August, when produce will be more plentiful. The Magdalena and Neptune are loading rice at Akyab, at £4.

At SINGAPORE.—To London, £3 10s. to £4. A scarcity of shipping still prevails at this port, although charters are still offered for the rice ports. A few coast charters are the only engagements that have taken place.

PASSED STRAITS OF SUNDA.

From England and Continent to China: March 16, Sultana, Eloisa, Robin Hood, Cornelis Gips; 17, Zanzibar; 22, Invincible; 29, Veronica; 30, Georgiana. To Batavia: 22, Gerilla. To Manila: 27, Soberana. From China to England and Continent: 17, Caroline, 18, Morayshire; 19, Rostock; 21, Dr. J. Jantsen, 22, Merchantman; 23, Shantung; Bacchante, Humphrey Nelson. To New York: 18, Onward. To Melbourne: 18, China. To Demerara: 18, Mystery. To Havana: 23, Independence. From Manila to London: 18, Mary Shepherd. To Liverpool; 18, Sales; 22, Queen of the East. To Cadiz: 21, Reina de los Angeles. From Holland to Batavia: 10, Bilderdyk; 16, J. C. Ross, America. From Batavia to Holland: 18, Stella Maris; 26, Johanna Maria; 27, Beatrix; 30, Hebe. From Singapore to Hamburg: 15, J. H. Becker.

THE CHINA MAILS.

The following notice has been issued from the Post-office:—

The second monthly mail to Penang, Singapore, and China—namely, that now despatched *via* Southampton on the 20th and *via* Marseilles on the 26th of the month, will be discontinued after the month of June next. Commencing with July, therefore, the mails for Penang, Singapore, and China will only be forwarded *via* Southampton on the 4th, and *via* Marseilles on the 10th of each month. By command of the Postmaster-General, ROWLAND HILL, Secretary. General Post office, May 11.

A reference to our Parliamentary Intelligence will further elucidate this notification and show that a subsidy of £24,000 per annum has hitherto been paid by Government to the Peninsular and Oriental Company for the conveyance of the bi-monthly mail to China. This subsidy it is proposed to discontinue on the 30th of June; but the grounds for such a suicidal step we are of course not favoured with by Government. By the public—even by those who do not care a straw for our interests in the Far East—we venture to assert that any interruption of our means of communication with a country against which we have just thought it worth expending millions in order to obtain an extension of our tradal privileges, will, indeed, be considered suicidal, more especially when such comparatively useless subsidies are granted as that voted to the Galway line of steamers to America.

We are, however, enabled to announce that representations will be made by those interested in the China trade, which will induce Her Majesty's Government to continue the present subsidy, as, by their own showing, the Post-office receive one-half the subsidy of £24,000 per annum for postages by the bi-monthly mail, and we have good authority for believing that this acknowledged sum of £12,000 is much understated. But, admitting that the outlay is £12,000 per annum, how insignificant are these figures when compared with our interests in the Far East. The places which will suffer in addition to China and Japan, are not by any means unimportant to English commerce, and include our own settlements of Singapore, Penang, and Labuan; Java, Siam, Borneo, Cochin China, and the Philippines. We cannot for one moment believe that the present Government will refuse to make the necessary grant, but should it do so we can fall back on the P. and O. Company to convey our mails to Calcutta on the 20th and 26th of each month; and from thence they can be forwarded by one of the many fine steamers now trading between Calcutta, Penang, Singapore, and Hong Kong, and considering the very superior speed of such boats as the *Fiery Cross*, *Lancefield*, *Thunder*, and *Lightning*, they will reach their destination as soon as by the present conveyance from Galle by the P. and O. boats. But we much prefer to see the carriage of our mails performed by vessels paid for that purpose by Government, and under the usual penalties for their proper and due transmission.

Truly does *The Times* say, in alluding to the encouraging prospects of our trade with China, that the Post-office, in choosing this special time for reducing the frequency of the mails by one-half, betrays "a perversity which amounts almost to genius."

Continental Intelligence.

RUSSIA.

ST. PETERSBURG, May 2.
(FROM OUR OWN CORRESPONDENT.)

On the proposition of the Minister of Finance and by the advice of the Council of State, the Emperor has been pleased, by ukase of the 30th of March (11th April) last, to permit the importation of tea both by sea and land, into the empire of Russia and kingdom of Poland under the following regulations:—

Merchants of Kiachta enjoying the right of trading with China, are permitted in future to exercise that privilege either by the barter of goods, or by sale and purchase of commodities by payments of gold and silver without any restriction. The same applies also to merchants of Kouldja, Tchougoutchak and Kaschgar.

The China trade is permitted to all merchants belonging to either of the three guilds or classes, as well as to peasants in possession of the needful certificates of permission.

The restrictions hitherto imposed at Kiachta on the trade with China being abolished, and the commercial relations with that country being now placed by treaty on the broad basis of general principles, gold and silver, both in bar and specie, are struck out of the list of articles hitherto prohibited to be imported or exported by the tariff of Kiachta.

On and after the 1st of October next the duties on tea will be levied by the Custom-house at Kiachta and the other stations on the Asiatic land-frontiers of the empire as follows:—

1. On merchants' tea (*baykofje tchai*), black, green, and yellow teas, as well as tea blossom, 40 copecks per lb.
2. Merchants' tea, ordinary quality, 15 copecks per lb.
3. Brick tea, and that known by the name of *louganes*, as well as all teas of inferior quality, 2 copecks per lb.

On and after the 1st of April, 1862, the importation of tea in the European seaports and land-frontiers of the empire is permitted to take place as follows:—

a. At the land-frontier custom-houses at Jurbourg, Tauroggen, Radziwill, Novoseltsy, and Skouliany in Russia, and in the kingdom of Poland at Warsaw, Wirballen, Niescawa, Szcipiora, and Granitza, at a duty of 30 copecks per lb. for merchants' black tea, and 60 copecks per lb. for flowery teas, and black, green, and yellow tea.

b. At the ports of St. Petersburg, Archangel, Riga, Reval, Libau, Odessa, Theodosia, and Taganrog, at 35 and 65 copecks per lb. respectively as above.

The ukase further contains the regulations enacted to protect the revenue from smuggling, together with the pains and penalties to be inflicted on persons convicted of that illicit commerce, which I need not here particularise, further than stating that they are generally in accordance with the Custom-house regulations hitherto enforced in the seaports and frontier stations throughout the Russian Empire.

The Government of the "Celestial Empire" appears to have obtained a more extended idea of the power and resources of foreign nations since the disagreeable visit of the "red barbarians" to Peking last year, and seems inclined to regard them on a footing of equality. Hitherto China only recognised the existence of tributary princes and vassals, between whom and the Government the needful communication and relations were carried on by a sort of colonial department under the direction of officials of a very inferior grade.

Naval and Military.

We have to announce the further arrival of vessels from China with troops.

The *Indomitable*, transport, with a division of the 2nd (Queen's Royals) Regiment on board, consisting of 12 officers, 300 men, and 3 women, has arrived at Portsmouth, where the troops disembarked, and, headed by the band of the 2nd battalion of the 11th Regiment, marched into the garrison, and took up quarters in the Cambridge barracks. Three deaths among the troops have occurred on the passage home, but in all three cases from disease contracted previous to embarkation. The health of the troops, otherwise than the cases mentioned, has been excellent throughout the voyage.

The *Adventure*, Commander Edward Lacy, arrived at Spithead on the 1st inst., with the head-quarters of the Royal Marine battalion on board, under the command of Lieutenant-Colonel John H. Gascoigne, consisting of 24 officers and 500 non-commissioned officers and men, who have proceeded to Chatham garrison and joined head-quarters.

The *Cyclops*, Captain W. J. S. Pullen, arrived at Spithead on the 4th inst. with a few naval invalids on board, from the Cape. The *Cyclops* was engaged while at the Cape of Good Hope in removing the detachment of the 3rd Buffs from the wrecked transport ship *Miles Barton*, in Struys Bay. This vessel made the fifth wreck on which the *Cyclops* had been in attendance during her present commission.

The *Sparrowhawk*, Commander J. T. Byng, was officially inspected at Spithead on the 4th inst., and afterwards went into Portsmouth harbour, where she will be dismantled and return stores, pay off her crew, and be put out of commission. A part of the crew of her Majesty's late screw troopship *Assistance* came home in the *Sparrowhawk*.

The *Mars* troopship, Captain Anderson, was towed into Portsmouth harbour on the 8th inst., and discharged her troops, consisting of Royal Artillery, from China. They consist of Brevet Lieut.-Colonel Barry's battery of the 4th Brigade—two captains, one lieutenant, one assistant-surgeon, one veterinary-surgeon, two staff-sergeants, eight sergeants, five corporals, 18 bombardiers, 89 gunners, 67 drivers, two trumpeters, and 13 artificers; one bombardier of Captain Millward's battery; and Major Rotton's battery of the 2nd Brigade—one lieutenant, one assist.-surgeon, two sergeants, two corporals, four bombardiers, one trumpeter, and two artificers. Lieut.-Colonel Barry's battery will proceed to quarters at Christchurch. Major Rotton's battery proceeds to Dover. One death occurred during the passage, which was from dysentery.

His Netherland Majesty's steamer *Berkel*, 8 guns, from Helvoet, bound to Java, arrived in Falmouth on the 4th inst. to fill up coal, and was to sail for her destination on the following day.

A letter has appeared in the *Times* from "A Near Relative of One on Board" H.M.S. *Camilla*, in which he states that the Commander wrote home to a friend shortly before her loss, and stated that "the *Camilla* had the dry rot in her port quarter; that she was so leaky he feared he should never get her home; that she would have to be broken up out there."

It is announced by the *United Service Gazette* that the recently established Sanitarium at the Cape for the treatment of military invalids from India is about to be abandoned, and the extensive buildings sold, of course for a fraction of the money which had been expended on their construction. A collision of departments has, as usual, been the cause of this profligate waste of the public money. The India Government have, we understand, refused to allow their invalids to be sent there, and as the Sanitarium would, in consequence, be useless, Lord Herbert has ordered the works to be stopped, of course sacrificing all the money that has already been expended. The blame in this case appears to lie entirely at the door of the India Office.

Captain Henry Trollope, R.N., late principal Agent for Transports in China, arrived at Southampton by the P. & O. str. *Ceylon* on the 1st inst.

It is certain that the Horse Guards have come to the conclusion to reduce eight depot battalions; and it is also believed that the 1st and 2nd depot battalions, from the 1st Royals down to the 25th Regiment, will be amalgamated into one depot battalion for each corps.

CANTON PRIZE MONEY.

Notice is hereby given, that the distribution of the prize money for the capture of the city of Canton, on the 28th and 29th of December, 1857, to the land forces present at the said capture (including those portions of the Royal Marine Artillery and Light Infantry serving on shore), under the command of Major-General Sir Charles Thomas van Straubenzee, K.C.B., will commence at my office on Wednesday, the 22nd inst., to those entitled, and will be continued daily (except on Mondays and Thursdays) during the hours of eleven to two o'clock.

The following are the regiments, &c., entitled to share, viz., General Staff, &c., Medical Staff Corps, Royal Artillery, Royal Engineers, 59th Regiment, Acting Military Train, 38th Madras Native Infantry, Royal Marine Artillery, and Royal Marine Light Infantry, who served on shore under the Major-General commanding.

A. MOORHEAD, Secretary to the Commissioners,

CHINA MISSION BREAKFAST.—The friends of the Wesleyan Mission to China sat down on the 27th April to a public breakfast at the London Tavern. Mr. Francis Lycett presided, and pointed out the many hopeful signs there are at present in China with reference to Missionary work. The Rev. Josiah Cox, who arrived in England last summer, gave a long and extremely interesting account of his life and work in China, and excited great interest by referring to the Taepings and to documents he had just received from the "Shield King." "I have received," he said, "since I came into the room, this letter (holding up a yellow piece of silk covered with Chinese characters) from the "Shield King." I have not read it all, but he announces to my colleagues and myself his journey from Canton, through the provinces, to join his brother, and his promotion to be the veritable "Shield King." He expresses a hope that his presence at Nanking may be the means of spreading Christianity, and desires us to go and assist him in preaching the Gospel. I lived with him four months. Morning and evening we united in prayer and reading the Scriptures, and spent the day in various employments, such as preaching and visiting. He is well educated, and better instructed in systematic theology, than any Chinaman I have seen. Mr. Cox admitted, however, that the "Shield King" lacked judgment, that he was ambitious, that he has recently become guilty of polygamy, and has made insinuations against one or two of the missionaries. Mr. Cox thinks that the movement of the Taepings is of the greatest importance, and that there is more to hope for, for the renovation of China, and for its advancement in all the sciences and arts, and appliances of Western civilisation, from the success of that movement, than of all other operations combined. Mr. Cox described in graphic language the horrors now being perpetrated in China by Imperialist soldiers, as well as by the rebels. In allusion to this meeting and to Mr. Cox's speech, the *Watchman* asserts that Kang-Wang is, "beyond comparison the most extraordinary Chinaman of whom we have any account since Confucius," and that he is "the master-mind, the teacher, legislator, and administrator of the renovated Chinese empire."

THE investigation relating to the robbery of ten bales of China raw silk the property of the St. Katharine Dock Company, and which has been pending for seven weeks, has been brought to a close. The prisoners are committed for trial.

Parliamentary Intelligence.

HOUSE OF LORDS.

THE SUEZ CANAL.—(6.) Lord CARNARVON, in moving for copies of correspondence between her Majesty's Government and the Consul-General of Egypt, and of any other communications that have passed between her Majesty's Government and the Governments of Turkey and France relative to the proposed construction of the Suez Canal, called the attention of the House to the danger which would arise if a foreign Government, acting through a foreign company, should become owners of property in the very heart of Egypt. He referred to the fact that M. Lesseps had persuaded the Viceroy to subscribe the enormous sum of £3,500,000 to the undertaking, although at the present moment the revenues of Egypt did not exceed £5,000,000 a-year. He also asked under what sanction this work was being carried on?—Lord WODEHOUSE, in reply, observed that the policy of her Majesty's Government in respect to the Suez Canal had been in no respect changed. They continued to think that the scheme was impracticable in itself, and that other considerations existed which rendered it necessary to watch the project with great care. The question, however, was one for the consideration of the Porte, with whom her Majesty's Government were in communication on the subject.—After some remarks by Lord STRATFORD DE REDCLIFFE, Lord ELLENBOROUGH said two things ought to be done by the Government, and at once, to guarantee our communications with India—first, to lay down telegraphic wires between India, Aden, and Perim; second, that a very numerous and able body of consular agents ought to be established in Egypt to supply the Government with the fullest information on all points. The motion pressing for copies of correspondence on the subject was then withdrawn.

WILLS OF PERSONALITY BY BRITISH SUBJECTS BILL—(7th). Lord LYNDHURST, in a lucid and able speech, but of a very technical character, stated his reasons for supporting the Bill, which was referred to.

HOUSE OF COMMONS.

FROM THE 26TH APRIL TO THE 8TH MAY.

CAPTAIN BRABAZON.—(26.) General PEEL asked what steps the Government had taken to ascertain whether the report of the murder of Captain Brabazon, of the Royal Artillery, by the Chinese was true. He had been requested by the family to bring the matter before the House and the Government. Major Brabazon was dissatisfied with the want of evidence of his son's death, and complained that before Lord Elgin quitted Peking he did not take every means in his power of ascertaining the accuracy or inaccuracy of the report of the death of Captain Brabazon. Lord Elgin, writing to Lord J. Russell on the 26th of October, stated that Captain Brabazon, together with a French gentleman, was beheaded, after the action on the 19th of September, by the direction of a Chinese general who was wounded on that occasion. He added that he was inclined to credit the report, although he had no positive evidence of the facts, and that Captain Brabazon was an officer of much promise. Major Brabazon complained that every step was not taken to prove the truth of that report—that even the most obvious and common methods were not employed. It was reported that after the execution the body of Captain Brabazon was thrown into a canal. Major Brabazon complained that the canal was never dragged, although by such a simple expedient some remnant of clothing or something else proving the accuracy of the report might have been discovered. He also stated the extraordinary fact that our troops entered the town where the execution was supposed to have taken place on the evening of the same day, that they remained there for ten days, held an open market, and were in constant communication with the Chinese, and yet that not a single whisper reached them of such an execution having taken place. It had likewise come to his knowledge that on the 1st of October, the day after the troops left, a British subject was executed by the Chinese, and that either the fact was not known to the English authorities, or they had not thought it worth their while to take notice of it. The man was a private of the 31st Regiment. Upon application to the War-office Major Brabazon was told that they knew nothing of the subject; that the only information they had received was that a man had died on the 1st of October; and it was only on referring to the depot of his regiment that Major Brabazon discovered the man was beheaded by the Chinese. Major Brabazon supposed, very naturally, that the execution of this private soldier might have given rise to the report of the death of his son. There were many other circumstances which led him to the same conclusion. Perhaps he was too sanguine in his confident belief that his son was still alive. We all know how people were apt to cling to the last hope; but he so far agreed with Major Brabazon that, having read with the greatest attention all the evidence which had

Digitized by Google

been produced on the subject, he thought there was no absolute proof of Captain Brabazon's death. He did not wish, of course, to raise any discussion as to the probability or improbability of Captain Brabazon being still alive; but Lord Elgin had not left the matter in a satisfactory state. As long as there was, he would not say a probability, but a possibility of Captain Brabazon being alive, it was the bounden duty of the British authorities in China to take every step in their power that no doubt should be left as to the accuracy of the report of his death. Captain Brabazon was a very distinguished officer, and his loss would be a misfortune to the public service as well as to his friends; but it would have been equally the duty of the authorities to make every possible inquiry if he had been the humblest drummer-boy in the army.—Mr. GREGORY said he was extremely sorry that he had been absent when his right hon. and gallant friend had called attention to the fate of Captain Brabazon. It was a matter of great satisfaction to him that that subject had been taken up by one who was himself not only professionally connected with the army, but who had been a Cabinet Minister and a Secretary of State for War. He understood that the right hon. and gallant gentleman had alluded to the story that Captain Brabazon, having been dismissed by the Tartar general, Sangkolinsin, and having met the Chinese general who was supposed to have been mortally wounded in a recent engagement, was by him condemned to decapitation, and was so decapitated and his body thrown into the canal at Pa-li-chiau. Now, the evidence which had been received of that story was of such a nature that no insurance-office in the kingdom would pay a life policy upon such unsatisfactory information. The story went that Captain Brabazon was beheaded, and that on the same day the British army marched to Pa-li-chiau, where he was said to have been executed, and remained encamped there for ten days. It was a singular circumstance, therefore, that while such an event as the decapitation of an English officer must, if it really occurred, have attracted the notice of the natives, yet, although our troops were in constant communication with the Chinese people, not a word ever reached their ears, during the whole of their ten days' encampment, that one of their comrades had been killed or thrown into the canal. Moreover, if it had transpired that he was thrown into the canal, the question naturally arose, how came it that the canal was not dragged for his body, or some part of his clothing that might have led to his identification? The answer made to that was, that the bodies of several hundred Chinese who had been killed in the late action were thrown into the same canal, so that it would have been impossible to tell whether Captain Brabazon was there or not. Now, he had been given to understand by a military officer of high rank that while our army lay encamped for those ten days he passed close by the canal daily, and never saw the least sign of a human being in it. The right hon. and gallant gentleman had referred to the case of two other Europeans who were decapitated at Ho-se-woo, and whose bodies were subsequently discovered —a circumstance which might have given rise to the tale of Captain Brabazon and the Abbe de Luc's execution. The tale was, however, utterly unreliable, as might be seen from the papers in the Blue-book. The Chinese story was contradicted by Chinese authority. He would put the matter as plainly as possible before the House. The Chinese themselves had stated that twelve days after the reported death of Captain Brabazon that officer was still alive. It would be found from Mr. Parkes' despatch that Hangki spoke to him of prisoners detained in the camp of Sangkolinsin on the 3rd of October, whereas the story of the decapitation was fixed on the 21st of September. From the evidence of the sowar Jowalla Sing it was clear that Captain Brabazon and the Abbé de Luc were separated from the other prisoners, and kept in Sangkolinsin's camp. The despatch of the Prince Kung, the Emperor's brother, addressed to Lord Elgin, also stated that the Chinese had interpreters with them who were quite capable of discussing the points of difference between the two Powers, and among them he mentioned Consul Parkes and a French officer named "I," who was taken to be the Abbé de Luc. Prince Kung's despatch was dated the 3rd of October, while Captain Brabazon's decapitation was reported to have occurred on the 21st of September. To identify the person named "I" with the Abbé de Luc it should be observed that it was notorious there were no Frenchmen with the Chinese army who understood Chinese, and who were taken prisoners, except the Abbé de Luc, who was kept separate from the other prisoners, and placed in conjunction with Captain Brabazon. No tale could be more absurd than that Sangkolinsin dismissed Captain Brabazon on the 18th or 21st of September, for the date was variously stated. It could not for a moment hold water. We knew with what tenacity the authorities at Peking had clung to their prisoners. Discussion after discussion took place between the British and the Chinese as to their surrender, and nothing but our threat to totally destroy the capital enabled us to extricate them from their clutches. Now, here we had it alleged that Sangkolinsin was in possession of an English officer of artillery of high position, and had a foreigner who spoke Chinese along with him; and yet it was stated that, eighteen days before the other prisoners were delivered up by the Chinese with the greatest reluctance, Sangkolinsin dismissed that officer without any stipulation whatever. That story was almost incredible; and certainly not a stone ought to be left unturned before we abandoned our search for this unfortunate gentleman—(hear, hear). For the sake of his suffering relatives the Government were bound to make every investigation in their power in order to obtain some trace of him. In his despatches Consul Parkes particularly alluded to the great anxiety of the Chinese authorities to inquire into the nature of our guns and how far they carried, together with other circumstances connected with our army; and he remarked it as a very notable thing that since General Sangkolinsin had held his command extraordinary attention had been paid by the Chinese to their artillery, which had undergone a marvellous improvement between the affair at Canton and the attack on the Taku forts. It was therefore just possible that this young officer, being known to belong to our artillery, might have been separated from the other European prisoners, and put in conjunction with the Abbé de Luc, who spoke Chinese, for the purpose of assisting the Chinese to improve their own artillery. That was nothing but a mere conjecture; yet we ought not to rest satisfied until we had followed up every possible clue to the discovery of Captain Brabazon—an officer of the greatest promise, whom he had known from his boyhood—(hear, hear). He could not abstain from complimenting the noble lord at the head of the Foreign Department for having shown himself, since the commencement of the unhappy business, most anxious to render any information in his power in order to dispel the incertitude of a bereaved family.—Lord PALMERSTON, in reply to General Peel, said he sympathised with the relatives of Captain Brabazon in their anxiety to ascertain the real truth as to his fate, but he was afraid the only consolation left to them was that he had escaped the lingering and barbarous torments to which his unfortunate comrades had been subjected. At the same time, he assured the House that Lord J. Russell had taken every means that could be employed to clear up the mystery. As far back as February the noble lord sent out most stringent instructions to Mr. Bruce to take every means, official and unofficial, for the purpose of ascertaining distinctly the fate of Captain Brabazon; and he was bound in justice to the Russian Government to say that, as it was sending a new Minister to Peking, instructions were given him by his Government that the first duty he had to perform was to use every means in his own power, and to co-operate with Mr. Bruce, in clearing up the fate of this gallant officer.

THE TAEPINGS.—(8.) Colonel SYKES asked the Secretary of State for Foreign Affairs whether there was any foundation for a statement in recent newspapers from China that a British ship of war had been stationed off the city of Nanking, notwithstanding the opposition of the Taeping Emperor, or whether, as was stated by the last mail from China, amicable relations had been established with the Taepings, and, if so, on what footing; and whether the Secretary of State for Foreign Affairs had received further papers on Chinese affairs, which he could lay before the House?—Lord J. RUSSELL was understood to say that a despatch had been received from Admiral Hope to the effect that a ship of war had been sent up the Yang-tze-kiang to be in communication with Nanking, and that the relations then subsisting were of an amicable nature. The papers would be laid on the table of the House.

MAILS TO CHINA.—(6.) Mr. LONGFIELD asked the Secretary to the Treasury whether, having regard to the estimate for the Post-office Packet Service for the year 1861-2, it was the intention of her Majesty's Government to discontinue the additional mail monthly to and from China, and whether any notice had been given to her Majesty's Postmaster-General to that effect; and, if so, to state what had been the expense to the public for this fortnightly mail, giving credit for the sums received for postage of letters thereby.—Mr. F. PEEL said that the second mail to China was a service that had been voluntarily performed by the company since 1857. At the close of last year, and also the year preceding, the company applied to the Government for remuneration for that additional mail service, and rather than submit to the inconvenience of its sudden discontinuance the Treasury consented to pay a subsidy of £2,000 for the double voyage for a period of six months from the commencement of the present year. Notice had been given to the Postmaster-General that at the expiration of that six months the subsidy would cease. The cost of the subsidy for that fortnightly mail would be at the rate of £24,000 per annum. The whole sea postage from this country upon letters conveyed by the second mail to China was about £12,000 a-year.

JAPAN.—(9.) Mr. COCHRANE gave notice that on Monday next he would move for copies of all correspondence connected with Japan, especially for the papers relating to conferences of all the European Ministers held at Yedo, and the letters that have passed between our Minister, Mr. Alcock, and the American Minister, Mr. Harris.

EXPENSE OF THE CHINA WAR.—(9.) Sir S. NORTHCOTE, in the absence of General Peel, moved an address for account of all sums paid by the Imperial Government to the Government of India for advances or disbursements on account of the war in China; and an estimate of all further claims on the same account up to the 1st day of May, 1861.—The motion was agreed to.

BANQUET TO LORD ELGIN.

Last Wednesday night the Lord Mayor and the Lady Mayoress gave a banquet in honour of the Earl of Elgin on his return from the scene of his diplomatic exploits. The dinner was held in the Egyptian Hall, which presented a brilliant spectacle on the occasion. A company of the Six Feet Volunteers, under the command of Lieutenant Thomson, lined the staircase and entrance-hall, and saluted the Earl and Countess of Elgin on their arrival. The band of the corps was also in attendance and struck up at the same moment the air of "Bruce's Address to his Army."

On the guests passing from the Reception-room to the Banquetting-hall the Volunteers presented arms and formed in the Saloon.

On the right of the Lord Mayor sat the Earl and Countess of Elgin, the Duke of Somerset, the Marquis of Tweedale, Lady Mary Fielding, the Earl of Denbigh, the Earl of Leven, the Countess of Courtoun, the Earl Courtoun, the Countess Kintore, the Earl of Kintore, Lady A. Churchill, Lord A. Churchill, M.P., Lady H. Vane, Lord Harry Vane, M.P., Lord Wodehouse, the Countess of Rothes, the Hon. G. Waldegrave, Lady Camilla Fortescue, and the Hon. D. Fortescue.

On the left of the Lord Mayor were, the Duke of Argyll, Lady Caroline Charteris, the Earl of Minto, the Countess of Minto, the Earl of Durham, the Countess of Durham, Lord Henry Lennox, M.P., Lady Charles Wellesley, Lord Ernest Bruce, M.P., Mr. Locker, Lady Charlotte Locker, Lord Mark Kerr, Lady Hope Grant, Lieutenant-General Sir Hope Grant, the Hon. Mrs. Grey, Major-General the Hon. R. Bruce, and the Hon. T. Bruce.

Among the other guests were:—Lord Thurlow, Major the Hon. A. Anson, V.C.; the Hon. R. Moreton, the Hon. J. Thurlow, the Hon. J. S. Wortley, the Marquis and Marquise de Vinchiaturo, Sir A. Agnew, M.P., Sir R. Anstruther, Sir James Fergusson, M.P., Sir A. Gordon Cumming and Lady Gordon Cumming, Sir E. Grogan, M.P., Sir Roderick Murchison, Sir Charles and Lady Trevelyan, Sir R., Lady, and Miss Mayne; Sir Cusack Roney, Sir J. Yorke Scarlett, Sir J. Shaw Lefevre, Lady Hislop, Sir Henry Rawlinson, Major-General Sir P. Grant, Sir Andrew and Lady Waugh, Admiral Walcott, M.P., and Miss Walcott, General and Mrs. Cannon, Colonel and Lady Jane Dundas, Lieutenant-Colonel Crealock, Colonel and Mrs. Caulfield, Lieutenant-Colonel and Mrs. Hicks, Captain Balfour, R.N., Major Cumming and Lady Elma Bruce, Mr. Edward Ellice, M.P., and Mrs. Ellice, Mr. T. A. Mitchell, M.P., Mr. K. Seymer, M.P., and Mrs. Seymer, Major Edwards, M.P., and Mrs. Edwards, Mr.

Walter, M.P., and Mrs. Walter, Mr. S. Gregson, M.P., Mr. Cobbett, M.P., Mr. Warner, M.P., and Mrs. Warner, Mr. Ball, M.P., Mr. C. and Hon. Mrs. Bruce, Lady Geary and Miss Geary, Mr. and Mrs. William Humphery, Mr. and Mrs. John Humphery, Miss Olliffe, Miss E. Olliffe, Mr. and Mrs. Bowring, Mr. Henry Loch, Mr. J. Loch, Mr. W. Loch, Mr. West, Mr. Alston, Mrs. Parkes, Mr. J. Abel Smith, Mr. J. T. Delane, Mrs. Vivian, Mr. and Mrs. J. Brand, Mr. Strachey, Mr., Mrs., and Miss Gassiott, Mr. J. Shaw Lefevre, Mr. and Mrs. Mowatt, Mr. John Chaplin, V.C., Mr. French, Captain Smithett, Captain Erskine, Mr. Thwaites, Mr. H. Kingscote, Captain Burstall, Mr. and Mrs. Lambton, Mr. and Mrs. Houblon, Mr., Lady Mary, and Miss Nisbet Hamilton, Captain Grant, A.D.C., Mr. and Mrs. Dent, Mr. and Mrs. Low, Mr. and Mrs. Marston, Mr. and Mrs. Matthews, Mr. William Dent, Mr. Wilkinson Dent, Mr. G. Moore, Mr. D. and Mrs. Harrison, Captain Mangles, Mr. G. May, Mr. W. Gladstone, Mr. and Mrs. Wallace, Mr. Grey, Dr. Wadham, Dr. Home, Mr. J. Arbuthnot, Mr. J. Fletcher, Mr. Allaidier, Mr. Akroyd, Mr. Durant, Mr. T. Dent, Mr. C. L. Norman, Mr. T. J. Gibb, Mr. J. W. Baynes, Mr. Prevost, Mr. Magniac, Mr. and Mrs. Morgan, Mr. P. Bell, Mr. J. Bates, Mr. P. Macpherson, Mr. Henderson, Mr. Daniels, Mr. Meinitzhagen, Mr. A. Brand, Mr. Entwisle, Mr. J. Markham, &c., Mr. Alderman and Mrs. Humphrey, Mr. Alderman Wilson, Sir J. Musgrove, Mr. Alderman Sidney, M.P., Sir F. G. Moon, Mr. Alderman Salomons, M.P., Mr. Alderman Finnis, Sir R. Carden, Mr. Alderman Carter, Sir H. Muggeridge, Mr. Alderman Rose, Mr. Alderman Lawrence, Mr. Alderman Gabriel, Mr. Alderman Phillips, Mr. Alderman Mechi, Mr. Alderman and Sheriff Abbiss, Mr. Alderman Lawrence, Mr. Alderman Dakin, Mr. Sheriff and Mrs. Lusk, the Chamberlain, Mr. Commissioner Harvey, the Common-Serjeant and Mrs. Chambers, &c.

The LORD MAYOR, in proposing the toast of the evening, "The Health of the Earl of Elgin," briefly described the noble lord's services in the East, and warmly eulogised his talents and his patriotism.

The toast was received with enthusiasm.

The Earl of ELGIN, on rising to respond, was greeted with loud and continued cheers. He said,—My Lord Mayor, Ladies, and Gentlemen, —At any time and under any circumstances such a reception as that with which you have just honoured me could not fail to awaken in my mind feelings of the liveliest satisfaction and gratitude. But at the present moment, and under existing circumstances, the welcome accorded to me in this place has a significance which I trust I may be permitted to say gives it a double value in my eyes. Little more than a year has elapsed since I was invited to the Council Chamber of the Guildhall to receive at the hands of the authorities of this great city the high and honourable distinction of the civic freedom. And I will confess that when that invitation reached me the first impression which it produced upon me was one of painful embarrassment. I was under a cloud at that time. The Chinese Government had then manifested a determination to resist by force the exercise of the rights and privileges secured for Her Majesty and Her Majesty's subjects by the treaty which had been negotiated by myself at Tien-tsin; and I felt that I could hardly consent, without indecorum, to become the recipient of so signal a favour while the work in which I had been engaged was still disfigured by the mark of incompleteness and imperfection. If, my Lord Mayor, I overcame my reluctance to present myself before the authorities of the city on that occasion, I did so partly because I held their invitation to be a command and partly because I hoped that during the course of the ceremony some opportunity would be afforded me of which I could take advantage to pledge myself to fresh exertions and renewed sacrifices, if such should become necessary, in order to justify the kindness and confidence of which they were then so generously, by way of anticipation, giving me that gratifying proof. My Lord Mayor, I attach a special value to your reception of me this evening, because I trust I may infer from it that in the judgment of your lordship and of this company I have not wholly failed in my endeavour to redeem that pledge—(cheers). It is, of course, perfectly impossible for me, within the limited space of time that can be suffered to elapse between two glasses of wine at your lordship's hospitable board—(a laugh)—to attempt to enter into a detailed explanation or vindication of the policy which has led, thanks to my gallant friend who lately addressed you, and thanks also, I must say to that distinguished man Admiral Hope, to whom we were so much indebted for bringing up our troops to the North of China, and for his admirable organisation and arrangements,—it is impossible for me here to enter into a justification of the policy which took a victorious army to Peking, and dictated a peace there, or to sketch even in outline the vast results, whether as affecting the interests of our commerce, our civilization, or our religion, which may be expected to ensue from international compacts which bring our merchants, our manufacturers, our missionaries, and our mariners into close relations with the teeming and industrious populations of China and Japan. But I am anxious to say a few words on these points, because I think that in reference to both of them some misconception exists, which is very desirable, if possible, to remove. To enable me to effect that object I must, in the first place, request you to perform what, perhaps, some may be disposed to think an extraordinary feat of memory—viz., to endeavour to recall your recollection of the state of feeling prevalent in England with regard to what was then styled the China question, in the spring of 1857, when I was first despatched on a mission to that country. I say that that may be supposed to be an extraordinary feat of memory, for, in truth, the wheel of the world's history has been revolving so rapidly of late—such stupendous events have been occurring since the period to which I refer, that it seems already to be separated from us by an interval that might be measured by ages instead of years. Let us glance at some of the most stupendous of these stupendous events. There was in the first place a dark spot in our Eastern sky not bigger when we first beheld it than a man's hand, but which very shortly assumed the proportions of a gigantic thunderstorm, apparently destined to shatter to fragments the mighty fabric of Britain's empire in the East, and yet which, thanks to the good providence of God, and the courage of our countrymen and countrywomen, served eventually only to bring out into stronger relief and to impart a brighter lustre to those qualities of our race, which enabled us to build up, maintain, and, when necessary, recover that empire—(cheers.) In another quarter of the globe, since that time, we have seen an ancient and illustrious nation shake off the unhealthy sleep by which it has been oppressed for centuries, and, under the chieftainship of heroic warriors and the guidance of wise statesmen, assume in our European system that dignified position to which scarcely any of the lovers of freedom, and the grateful inheritors of Italian civilization, had ventured again to summon her—(cheers.) In another hemisphere we have witnessed scenes;—but, no, the expression is an incorrect one, for it is with heavy hearts and averted eyes that the people of this country have listened to the dismal sounds of fratricidal conflicts which have reached them from America—(hear, hear). What wonder, then, if, with events of such magnitude passing before us, we find it difficult to realise the sensations we experienced four years ago on the occurrence of an event so comparatively insignificant as the Canton quarrel! And, yet let me remind you, that when that quarrel broke out, it produced in England very considerable anxiety and disquietude. In the first place, it affected in a very inconvenient manner the course of our domestic politics. A circumstance which, however trifling in itself, brings a popular and powerful administration into collision with the House of Commons, and then placing the House of Commons itself in apparent antagonism with the constituencies of the three kingdoms, cannot be treated as an indifferent matter. And independently of that there was throughout the country a very anxious feeling as to the complications which might possibly arise from a contest with an empire so vast, so populous, and so little known as China. I remember a very small incident which perhaps I ought not to mention, but it struck me forcibly, occurring to myself as it did, shortly before I left England for the East on my first mission. I happened to go, as everybody else was doing at the time, one Sunday morning to hear a very popular and celebrated preacher in the outskirts of London; and when I was coming out of the church a gentleman with whom I was unacquainted, but who had the kindness to provide a seat for me, said to me, "I hope, my lord, you will excuse me for what I am going to mention, but I was not able to take my eyes off you during the whole service, so engrossed was I with the thought of the enormous responsibilities that are about to devolve on you"—(hear). Well, under these circumstances, and with this sense of responsibility, which, as you may believe, I experienced at least as much as the public did, I started for China. And mark what followed. Before I had left home one month, and before I had approached my destination, I found myself in a position in which I felt it my duty to deprive myself by my own act of the aid of the army which had been equipped by this country to support me in carrying out the policy which Her Majesty's Government had prescribed—(hear). My Lord Mayor, I believe that at that particular moment I was placed in perhaps the strangest dilemma in which any public man ever stood. I had to choose between a course of proceeding which might, no doubt, have very seriously compromised my own success in China, and another course of proceeding which might have deprived my noble and high-minded friend Lord Canning of the most important assistance in his hour of utmost need—(hear, hear). Well, I deliberately, after mature reflection, and with my eyes open, preferred the former of those risks to the latter. I do not wish now to raise the question whether that was a right decision or not; but I think it ought to be borne in mind if I am charged, as I have since sometimes been during my first mission, with having occasionally attempted great things with a force apparently very inadequate. I do not attach very much value to criticism or commendation after the event in a transaction of that kind. But I must say I do attach very great value to a contemporary verdict, which I lately found on looking back to some of my old correspondence, in the shape of a letter addressed to me at the time by the late Sir Henry Ward, who, from his position, character, talents, and public services, was, perhaps, better able than any other man then living to judge of the propriety of the course which I took.—(hear, hear.) Sir Henry Ward was then administering with great honour to himself and great advantage to the colony, the Government of Ceylon, and was therefore both thoroughly aware of the claims which China had upon me and of the wants and necessities of India. I feel some scruple in reading this letter, because, written as it was in the excitement of the moment, the expressions in which he conveys his approbation of the course I adopted are, I well know, unduly forcible and strong; but, at the same time, the document has a great historic value, because it shows what were the very anxious thoughts then entertained by the persons most competent to form an opinion on the state and prospects of India. I will, therefore, quote a very few words. He begins in this way:—"You may think me impertinent in volunteering an opinion upon what, in the first instance, only concerns you, the Queen, and Lord Canning; but having seen something of public life during a great part of my own, which is now fast verging into 'the sear and yellow leaf,' I may venture to say that I never knew a nobler thing than that which you have done in preferring the safety of India to the success of your Chinese negotiations. If I know anything of English public opinion, that single act will place you higher in English estimation as a statesman than your whole past career, honourable and fortunate as it has been. For it is not every man who would venture to alter the destination of a force the despatch of which has dissolved a Parliament, and for changing the disposition of which a general might have been superseded. It is not every man who would consign himself for many months to political inaction in order simply to serve the interests of his country. You have set a bright example at a moment of darkness and calamity. And if India can be saved, it is to you that we shall owe its redemption, for nothing short of the Chinese expedition could have supplied the means of holding our ground until further reinforcements arrived."—(cheers.) I think that is a testimony, coming from such a man, of which any one may well be proud. Well, after this sacrifice had been made I proceeded to China. The Canton quarrel had already become so complicated that it was impossible to come to any terms of arrangement with the local Government in that neighbourhood, and, therefore, the capture of Canton was a matter of absolute necessity. But as soon as that capture was effected—and I am very desirous of impressing this on your minds, because it is not sufficiently understood in England—I deemed it my duty to take every step which I thought possible in order to bring the war to a close, and arrange terms of peace and

LONDON, MONDAY, MAY 13, 1861.

THE FATE OF CAPTAIN BRABAZON.

A GREAT nation like England is bound to protect the meanest of her citizens from wrong, and is bound at the same time to avenge any insult or injury which may be inflicted upon them. Every one of her children should feel when in a foreign country, that so long as he does not wilfully transgress the laws of that country, the parent state is pledged to protect him and that his property and life are still under her guardianship. If this be true of every man who leaves the shores of England, how much more true should it be of those whose lives are especially devoted to their country's service. We maintain that in such a case the Government and people of England are bound to act promptly, generously, even lavishly; if by so acting they can solve a doubt or even confirm a terrible suspicion. The noble efforts made to gain tidings of Sir JOHN FRANKLIN and of his brave comrades, were not made in vain. They did not, indeed, result in saving those valuable lives, but they proved to all Englishmen in the time to come that their country would not forget them in the hour of need, and that even if her help were unavailing, it would not be unproffered. We doubt not that every soldier who left these shores to take part in the recent campaign in China, went forth cheered and stimulated by this conviction, and such comfort ought not to be illusory. In most instances we believe it is not, but a case has recently been brought before the attention of the House, which shows that the claims we have asserted for our countrymen are not in every case allowed, and that the feelings we have described cannot always be justly cherished. We need not here recapitulate all the facts respecting the loss of Captain BRABAZON—they must be perfectly familiar to our readers—neither shall we attempt to prove the probability or even possibility that he is yet alive. We prefer to take our stand on broader and safer ground, and to affirm, what even *The Times* will not dispute, that we have no proof of this gallant young officer's death. In a letter from Lord ELGIN to our FOREIGN SECRETARY in the month of October last, he states, "Of the British subjects captured, Captain BRABAZON of the Royal Artillery is alone unaccounted for. The silence of the Chinese authorities, who always plead ignorance of his fate when questioned on the subject, and rumours which reach us from various quarters, lead us to fear that he must have met a violent death." He then adds, "it is reported" that he was beheaded, that he is "inclined to credit this report," but that he has "no positive evidence of its accuracy." Rumours which Lord ELGIN is inclined to credit, though without positive evidence, may or may not be true. But the real question at issue is, whether we are to treat them as if they were true, and thus by accepting them as undoubted facts, to refrain from action altogether.

The Times is admirably expert in shelving any topic in which it has ceased to be interested; it possesses in perfection the happy or unhappy gift of crushing all enthusiasm or earnestness by a word and a blow just as Giant Despair in the "Pilgrim's Progress" knocked down Christian in the dungeon. It has adopted this course with regard to poor Captain BRABAZON. On the 26th of April General PEEL stated the whole circumstances of the case in the House of Commons and in the absence of the Foreign Secretary Lord PALMERSTON spoke in his usual manner, when he wishes to avoid a precise and definite reply. On the following morning *The Times* took up the ball which the PREMIER had thrown down, and played with it as only *The Times* can play. What matter that on the 11th of December last they had exclaimed that we must even destroy Peking, palace by palace and house by house, "until we obtain our countrymen's release or absolute proof that they are beyond human aid?"—what matter that on the 17th of the same month they declared that "while there is yet no positive proof of death, there is strong probability of life?" Now though the case is not changed, their view of it is altered, and so we are told that "there is no kindness in nursing by encouragement a fond illusion." We are not to withhold our sympathy for Major BRABAZON's distress, but at the same time we shall do well to avoid sharing his credulity. All has been done that can be done; it is better that the matter should be allowed to rest. This is the gist of *The Times'* article, which our readers will find in another portion of this paper. We dissent altogether from the arguments of the writer and from the conclusion to which he arrives. It may be hoping against hope to suppose that Captain BRABAZON is yet alive, but we have a right to demand a full investigation of each circumstance connected with his supposed death, and an explanation of the strange facts which were so clearly brought forward by General PEEL. Why was not the canal dragged into which the body of the unfortunate officer was said to have been thrown?—what steps were taken between the 15th Oct., when the last prisoner was returned, and the 26th October, which was the date of Lord ELGIN's despatch on the subject?—how does it come to pass that the British troops were for ten days in the neighbourhood of the spot where the tragedy is said to have occurred, and yet they heard nothing about it?—how is the discrepancy of dates in the despatches to be accounted for?—why should the two Europeans said to have been beheaded necessarily have been Captain BRABAZON and the ABBE DE LUC, since at that very time an English soldier and a French prisoner were both missing; and finally, what steps did Lord ELGIN take to test the validity of the report to which he refers in his despatch? Far, indeed, are we from wishing to nurse "a fond illusion," but we do say that these questions should be fully answered before the subject ceases to attract the public attention. We are not convinced that every available step was taken at the time, or has been taken since, and we believe that almost every Englishman interested in China is as dissatisfied as we are. It may be too late to hope that Captain BRABAZON will be restored to his friends, it is not too late to demand a more searching inquiry than has as yet been made into all the circumstances of his loss.

THE RUSSIANS AT THE COURT OF PEKING.

SOME further particulars have lately transpired concerning the new Treaty between Russia and China, which at least serve to throw a peculiar light on the policy of Russia with regard to her neighbours in the East. It appears by recent advices received from St. Petersburg that the Treaty drawn up and signed by the then Governor-General of East Siberia, Count Murawieff-Amoorsky—who has lately resigned this important office—though duly executed by the two respective plenipotentiaries as far back as August, 1858, had never been ratified by the Emperor of China, who in spite of urgent and repeated remonstrances had always found some plausible pretext for deferring it from day to day till November last, when the Emperor, panic-struck at the rapid approach of the British and French forces to his capital, fairly fled for safety to the wilds and deserts of Mongolia, leaving his brother, Prince Kung, to act with the delegated imperial authority. It was mainly in consequence of the success of the Allies that Prince Kung implored the mediation of General Ignatieff, and was so importunate as to go to him in person no less than four different times to solicit his friendly offices to stave off the impending danger of the capital of the empire being either burned or pillaged. But the Russian Ambassador was in no hurry to comply with the request, and seizing the favourable opportunity to secure first the interests of his own country, he agreed to act the part of mediator, but required as a preliminary *conditio sine qua non*, the immediate ratification of the Russian Treaty, which had been waiting for that act for more than two years. This was done, and the result is well known. Prince Kung expressed the deepest gratitude to General Ignatieff for the important services he rendered to China as mediator, and in many subsequent documents, such as proclamations, letters of safe conduct, and various ordinances, invariably gave him the flattering epithet of "Saviour of the country."

Digitized by Google

The Russian *Journal of the Academy* lately published a lengthy article, giving a detailed history of the various fruitless attempts at negotiation made by Russia during the last hundred and fifty years, and now finally crowned with success. It is true that within the last ten years Russia has concluded several treaties with China and Japan, but they were mere copies or paraphrases of those made by other countries, and were therefore not adapted to secure for her any exclusive or even preponderating advantages. The ports of China and Japan were opened to the Russian flag as well as to that of other nations, but as the Russians are by no means a great maritime nation, the concession was not of much importance, as the immense extent of their own country sufficed for the limited speculations of the not over-enterprising merchants of Russia. Under these circumstances the object of Government was not so much to awaken a love of maritime enterprise, as to increase the national predilection for land traffic, clear away existing obstacles, and open up new regions for the exercise and development of this their favourite branch of commerce. This was completely obtained by the Treaty of Peking, whilst that of Tien-tsin may be considered both as an anomaly and an anachronism, for on the one hand it permitted the Russian merchants to export tea from Chinese ports, whilst on the other hand they were prohibited from importing that article of merchandise into Russia, such privilege being exclusively enjoyed by the Russian American Company, and that, too, only to a very limited extent to favour the land trade over the frontiers at Kiachta.

The Treaty of Peking has, it is true, not opened any new ports of China to Russian commerce, but it has greatly improved and extended the overland traffic, whilst it cannot be doubted that the permission granted to Russian merchants to establish themselves at Peking will not fail to facilitate and increase the commerce between the two countries by land, to a very considerable extent. Other commodities besides tea—such as silk, spices, and drugs—will now become articles of export over the land frontiers, whilst Russia will also be able to compete successfully with other nations in supplying Mongolia and Mantschuria with goods and merchandise, which were hitherto drawn from China at great expense and loss of time. At the same time the inconsiderable retail trade of Russia on the frontiers cannot fail to receive a favourable impulse, and, above all, the stipulated session of territory on the Amoor and Ussouri has added to the Russian dominions a vast tract of country, containing no less than a million of square versts. This increase of territory, however, would not be of so much consequence as it really is, if it were not accompanied by the possession of the great water-way through the heart of the country to the coast, and of the coast itself, which now gives Russia unlimited access to the Pacific Ocean just opposite the important empire of Japan. Siberia has hitherto been prevented, by her geographical position, from attaining to any great degree of development, but the Treaty of Peking now forms the convenient bridge to civilisation and traffic on the Pacific, by which Russia obtains an unchallenged entrance into the great human network of the commerce of the world.

THE STRAITS TRANSFER QUESTION.

We now proceed to comment further on the contents of the pamphlet forwarded to the Colonial Secretary. In the first place we shall give the scheme for the establishment needed for the several stations of the new colony verbatim; and after a few remarks on the remaining suggestions in the pamphlet, we shall conclude with a scheme of our own, based on the opinions expressed in the document under consideration, and on the statements made by our contemporaries in the Straits.

SCHEME FOR ESTABLISHMENTS PROPOSED BY THE SUBSCRIBERS TO THE PAMPHLET.

	Per Annum. £	s.	d.
Governor, &c.	4,185	0	0
Private Secretary and A.D.C.	405	0	0

Total	£10,107	2	0

A few remarks appear necessary on the whole subject of revenue. It is perfectly clear that the financial resources of the Straits are fully adequate to pay all necessary expenses, leaving a large balance in favour of the Colonial Exchequer. We cannot admit that the naval and military expenditure should be paid from the local revenue. To her Majesty's navy and army must be deputed the duty of protecting our trade; and the Straits Settlements especially, as an emporium of trade for the Far East, is peculiarly a British colony, and should undoubtedly be defended by the Home Government. The charges for troops need not be large, as the colony could be used as a sanatarium for our forces in India and China: convalescents, with the addition of a few effective men on each station, would be ample for self-protection, and the performance of the ordinary duties required of them in peaceful times.

The proposal to raise a local corps is simply absurd, and falls to the ground at once. In India, where the climate is inimical to the European constitution, native troops appear necessary, but in the Straits there is no necessity to have any but English soldiers. No local steamer is required for the conveyance of the governor, &c. Advantage could always be taken of the mail steamers to convey officials to and from the several ports of the colony. In the event of the governor wishing to pay a visit to any of the native States, he should be conveyed thither in a man-of-war. The suggestion regarding the appointment of European Chinese students is a wise one; there should be at least six sent out to form the nucleus of a colonial service from which all the civil authorities might eventually be selected. The remarks on the currency, telegraphs, &c., are also most judicious.

The receipts and disbursements of the Straits, according to the pamphlet, are:—

	Receipts.		Disbursements.
Singapore	£92.965	.....	£39,601
Penang	36,480	.....	18,530
Malacca	16,907	.....	10,107. 2
General	...	.....	7,289
	£146,352		£75,527. 2

Leaving a balance of £70,824. 18s. in favour of the Straits. We would advise the deportation of all the convicts from the Straits to the penal settlement at Port Blair. We believe that all the labour at present performed by them would be more economically done by free labour under a strict contract, and the supervision of the executive engineer. The presence of such a vast number of felons is demoralising in the extreme; and as a matter of political economy alone, it would be better that the refuse of India should be consorted with their companions at the Andamans, than that they should be thrown among a numerous population of comparatively honest citizens, like the Chinese and Malays of the Straits Settlements.

The amount of salaries in the London scheme we do not consider on the whole too high, but we do think some of the appointments unnecessary. We have observed before that the question should not be regarded in an economical point of view alone; the welfare of the colony is of the highest importance, and therefore a staff of well-paid (not extravagantly paid) officials would be more conducive to the end in view than badly

Digitized by Google

paid establishments. The scheme of one of our contemporaries we think visionary and niggardly in the extreme. His principle of centralisation would not succeed in practice, and we therefore must condemn such appointments as Postmasters-General, Commissioners-General of Police, &c., &c. We believe that the system of government prevailing in the Straits is the best that can be devised, for such a peculiarly constituted colony (territorially considered); the only improvement we think necessary would be to make the Resident Councillers or Lieutenant-Governors more independent, so as to relieve the Governor-General of much unnecessary labour, thereby affording the latter functionary more time to visit the various native States in the Malay peninsula, Borneo, and adjacent islands frequently. Such a procedure would, we feel sure, materially increase the trade of the colony and enhance the *prestige* of our country among the inhabitants of the Eastern Archipelago. To the present settlements we would add Labuan, and Sarawak too, if Sir James Brooke is still willing to consign his province to the British Government, and we would constitute the new Governor the first Governor-General of our possessions in the Eastern Archipelago.

We would have a Legislative Council in each settlement for the framing of bye-laws, for the convenience of the public, suitable to each place; but the civil and penal codes should emanate from Parliament alone. The Supreme Court of Judicature in the Straits administers justice by the laws of England at this moment, so that there is no difficulty on that point to contend with.

Our scheme for the heads of the establishments necessary for the good government of the colony, is as follows; it is based on the opinions of old residents and the opinions thrown out by the local press:—

Governor-General, M. L. C.	£4,500
For entertainment	1,000
This sum to be at the disposal of the Lieut.-Governor in the absence of the G.G. for the entertainment of British and Foreign Visitors of Rank.	
Private Secretary and A.D.C. to the G.G.	600
SINGAPORE.	
Lieut.-Governor of, and Colonial Secretary, M.L.C.	1,800
Colonial Treasurer, President of Municipal Commissioners, M.L.C.	1,000
Asst.-Colonial Treasurer	400
Chief Justice, M.L.C.	2,400
Puisne Judge, M.L.C.	1,800
Registrar of the Court of Judicature, M.L.C.	1,000
Attorney-General and Public Prosecutor with private practice	500
Sheriff	500
Coroner	250
Commissioner of Police	700
Chief Police Magistrate	1000
Asst.-Magistrate and Marine Magistrate	800
Commissioner of Court of Requests, with extended jurisdiction	600
Colonial Surgeon, with private practice	500
Assistant do. with do.	250
Supt. of Lands and Surveyor-General of Singapore	700
Colonial Chaplain, Executive Engineer (under military expenditure.)	
Postmaster	600
Master Attendant Registrar of Exports and Imports, and Collector of Light Dues	600
Harbour Master	300
Shipping Master	400
PENANG AND PROVINCE WELLESLEY.	
Lieut.-Gov., Colonial Treasurer, Supt. of Lands, M.L.C., Commissioner of Police	2000
Asst.-Treasurer and Colonial Secretary, M.L.C.	600
Recorder, M.L.C.	2000
Registrar of the Court of Judicature, M.L.C.	800
Police Magistrate and Commissioner of the Court of Requests	800
Sheriff	500
Coroner	200
Commissioner of Police	600
Executive Engineer, Colonial Chaplain (under military expenditure)	
Colonial Surgeon with private practice	250
Surveyor-General	400
Attorney-General and Public Prosecutor with private practice	300
Master Attendant of Marine Magistrate, Postmaster, Registrar of Exports and Imports	600
Wellesley, Province	
Magistrate and Coroner	600
Deputy Commissioner of Police, Magistrate, Coroner	500
MALACCA.	
Lieutenant Governor, Colonial Treasurer, Superintendent of Lands, &c., M.L.C.	1500
Assistant Treasurer and Colonial Secretary, M.L.C.	600
Police Magistrate, Coroner	700
Executive Engineer and Chaplain (under military expenditure).	
Colonial Surgeon with private practice	200
(This amount may be allowed the Military Surgeon of the Station.)	
Registrar of the Court of Judicature, M.L.C.	700
Surveyor-General	500
	£36,550

The disbursements by our scheme would leave a balance of £109,802 for establishments and other charges; a sum more than sufficient to defray all expenses. This surplus may be considerably increased by charging trifling fees for the documents supplied by the various Government officers, which are now issued at some expense free of charge.

THE COLONY OF HONG KONG.

This prosperous colony is every day advancing in importance, and it may interest our readers to give them a variety of well-attested facts, by way of illustrating the progress it has made during the last few years. Our survey may as well commence with the year 1854, when, in consequence of the disturbed state of the adjacent provinces, the Chinese began to settle in the colony and to open up the coasting trade. In that year the population rose from 39,000 to 56,000, in 1855 it reached 72,900, and at the close of last year the exact return of population amounted to 94,917, of which number 92,441 were Chinamen by birth. It is a sad and serious fact, however, that of this large number only 17,251 are females. The mortality amongst the Chinese in the country districts of Hong Kong is now about 2 per cent., but in the city of Victoria it is not more than ½ per cent. A few years since the rate was much higher than this. Of the mortality amongst the Europeans and Americans we are unable at present to furnish any data.

In order to show the importance of Hong Kong as a commercial port, we may mention that on the 31st of December last, 133 merchant vessels were at anchor in the harbour, together with upwards of 2,000 lorchas, junks, and other native craft. In the different bays of Hong Kong hundreds of fishing and other boats might be seen lying at the same time. Our readers will see, therefore, that there is no lack of activity in the harbour and on the shores of Hong Kong. Another proof of this activity will be found in the exports of British manufacture and produce, which amounted in 1860 to £2,506,579. The total amount of produce exported to China in the year was valued at £5,318,428, being more than the exports to France, including Algeria and Bourbon. There is no Custom House at Hong Kong, neither are there any statistics from which we can accurately estimate the amount of trade carried on; but it has been truly said that "this barren and unhealthy rock is now the seat and centre, the directing and controlling place round which the vast commerce of the China seas is gathered. Here are the principal banking establishments, here may be said to be the intelligence and the concentrated wealth of the largest commercial establishments in the Oriental world." The revenue of Hong Kong during the past year amounted to £94,182—being an increase, as compared with the previous year, of £28,957. This sum, however, must not be regarded as a permanent increase since a large proportion arose from sales of land.

The increase of revenue has been chiefly under the following heads—viz., Land Revenue, Opium License, Post Office (which formerly was an Imperial institution), Police Rates, and Fees on Shipping Seamen, which latter amounted in the year to £1,751. 13s. 4d. = 88,408; and, as the fee is still, we believe, one dollar on every seaman shipped, the amount of dollars will represent the number of seamen shipped through the agency of the harbour master; some items, such as licenses to pawnbrokers, salt and stone farms, have been abolished; and we should be more pleased with the returns now under review did they not show that "Ordinance No. 12 of 1857" was made a source of revenue.

The expenditure during the year has been £72,390. 12s. 10d. of which £19,782. 16s. 8d. is for public works, chiefly under the head of Roads, Streets, &c. The surplus on the year, therefore, is £21,792. 3s. 5d.

The revenue collected is as near as possible £1 per head, whilst the expenditure was at the same rate as the previous year—viz., 15s. 2½d. per head. This includes all taxes except those which the community imposes on itself by voluntary contributions, such as just now the erection of a watch tower and a sailors' home, to which latter two brothers, partners in one of the eminent firms, have each, on leaving China, contributed $10,000, whilst, for the former, a member of a like firm has given the ground, situated in the most central and valuable part of the city.

The public works, constructed by the Civil Government, up to the close of last year, have cost rather more than one quarter of a million pounds sterling, whilst the military and naval authorities have also spent large sums for similar purposes; and it may perhaps surprise some of our readers that during the five years,

Digitized by Google

1853—57, fortifications and military defences cost £13,730, whilst barracks cost only £516, or £103. 4s. per annum. The total amount of naval and military charges during these five years amounted to £589, 636 of which, however, a little more than the moiety; was incurred during 1857, the average annual expenditure for these two services during the four previous year having been £73,550.

Amongst the principal public works now carried on by the Civil Government, are the supply of water for the town, and the completion of the "Bowring Praya," an undertaking which for years had met with rather strong and obstinate opposition, but of which the benefit to the Colony seems now at last generally acknowledged. The introduction of gas will, we suppose, soon add to the comfort of the inhabitants of the island. Of the greatest importance to the landholders in Hong Kong is the cession of the peninsular of Kowloong, the shore of which forms the northern side of the harbour, and the possession of which became desirable, if not absolutely necessary, for more than one reason. Its acquisition had been advocated in the early part of 1857, and seems to have been afterwards supported by the Governor, Sir John Bowring, and the Colonial Secretary.

The last land sales in Hong Kong, which took place in December and January last, have shown that as yet the possession of this dependency has not depreciated land in the colony, in fact, lots then sold brought higher premiums than similar ones sold five years ago. The formation of a royal navy yard will no doubt be undertaken before long. The events occurring in the Far East, with the Russians on one side and the French on the other, and a rapidly extending commerce with all parts of the world, tend to make Hong Kong one of the most important of naval stations. The claims of the military authorities for localities on this new acquisition cannot be so extensive, as they possess some of the finest parts of Victoria. Still last mail informs us that they have sent in estimates for £160,000 to be spent on Kowloong, a sum no doubt they will realise by the sale of their property in Victoria, and thus would meet the requirements of the community for more space, by their removal to the opposite shore.

We have heard some fears expressed that property in Victoria will depreciate in consequence of this acquisition; but we believe that these fears are without foundation. As the trade in the East increases in all directions, Hong Kong will assuredly gain in a political point of view, and there can be no question that, as China becomes more accessible to Europeans, the colony will reap the highest commercial advantages, and will, at the same time, influence the spread of civilisation more than any of the open ports.

NEW STEAMERS FOR CHINA.

Of the four companies which have been proposed for running steamers on the coast and rivers of China only one has at present been announced as complete in its preliminary arrangements. The company is styled the "China and Japan (Coast and River) Steam Navigation Company." For farther particulars we refer our readers to the prospectus in our advertising columns.

With the direction and officers of the company there is every guarantee for the successful management of matters on this side. The shareholders have a great advantage in the experience possessed by the members of the firm of Messrs. Robertson and Co., the marine superintendents, all of whom have had long experience in the China waters as commanders of vessels in the first employs; and if equally competent persons are selected to manage the affairs of the company on the other side, there can be no doubt as to it being a profitable investment for the public. Of the opening for steamers in China and Japan there is no doubt. We observe a most refreshing feature in the prospectus, and that is the entire absence of any arguments that the undertaking *must* yield some extraordinary and absurd rate of interest, which, in these days, tend very much to weaken public confidence. We must notice, however, that the information regarding the proposed traffic is too meagre; and some facts and figures on this head will be required by investors, which the directors, no doubt, are prepared to give. It is not stated, but we presume the River Yang-tze-Keang will be the first and most important field of operations. We expect to see the shares speedily subscribed for, as the undertaking is very favourably spoken of on the Stock Exchange. We shall not be surprised to see another similiar undertaking brought forward, the intelligence by the present mail from China being calculated to stimulate such enterprise.

Spirit of the Press.

THE FATE OF CAPTAIN BRABAZON.

It is painful to go back again upon the circumstances which attended the ultimate success of the army that advanced to Peking. Very seldom in the chronicle of conquest have such decisive effects been attained at so small a cost of human life. But the interest of every tragic story lies in its details. The news of a great shipwreck, or of a mighty earthquake, or of a vast slaughter, told as a simple fact, does not excite the same thrill as the sufferings of a single prisoner in whom we have a personal interest; and we can even now recur to the histories of aggregate destruction with a calmer judgment than we can canvass the fate of those Englishmen who were kidnapped by the faithless Chinese, and who were tortured to death by a weak and cruel enemy. Happily, the story is for the most part made so plain that every one must be satisfied there is no more to be known. In every instance but two, the bodies have been recovered, and we can rest upon the certainty that, with these two exceptions, the graveyard of the Cathedral in Peking contains all that now exists of our friends and countrymen. Of these two exceptions there is one case in which the proof is not demonstrative that the captive is actually dead. It is somewhat like the case of Sir John Franklin, wherein for so many years all the weight of probabilities was counterpoised in the public mind by any light possibility which might be suggested. Hoping against hope, the relations of Captain Brabazon refuse to believe that this officer is certainly dead. His body has never been recovered. No European saw his death. All that we think we know of his fate depends upon Chinese testimony, which we believe to be of little worth. Therefore, say sanguine friends, founding the basis of their hopes on their affections, he may still be alive among the Tartars in the North, or even among the Chinese at Peking. He was an artillery officer, and he may have been kept concealed in order to teach the Chinese the secret of those tremendous guns which created such havoc at such impossible distances. Imagination, quickened by affection, may easily fancy a thousand reasons why a barbarous enemy should desire to retain in his possession the living repository of all those secrets which had just worked so fearfully against him. All these points of possibility were put last night in the House of Commons by General Peel and Mr. Gregory, speaking on behalf of the father of this much regretted officer. There is no kindness in nursing by encouragement a fond illusion. No man who with cool judgment reviews the evidence can doubt that Captain Brabazon is dead. The tale told by the Chinese is entirely consistent with all the circumstances of the time, and with all the habits of an Eastern people. That story is, that Captain Brabazon and his companion were being led in captivity through the Tartar camp, that the Tartar soldiers were then gathering after a defeat, and that their leader was wounded to the death. We are told that the general, in the moment of his despair, came upon these two prisoners, and ordered them to be beheaded. This is what would almost certainly have happened under the circumstances stated. There is no reason to doubt that it did so happen. If we reject this account we must make for ourselves some more plausible hypothesis. That which is suggested is that the Chinese have spirited this officer away, and have taken his companion with him as an interpreter. The latter suggestion is absurd, for the Chinese well know that there are thousands of Chinamen speaking Canton English who would make much more trustworthy interpreters than a French Abbé, whose knowledge both of Chinese and English would be much less perfect than that of a "teacher," or even a Chinese servant from Hong Kong. The Abbé Luc could have been of no use to the Chinese. As to the suggestion that Captain Brabazon has been secreted for the purpose of teaching the Chinese troops, the notion is scarcely consistent with the character of the people, and it is nearly incredible that in a country like China, where anything may be obtained for money, a prisoner could be kept in such complete seclusion as to render it impossible for him to communicate the fact of his existence. He must be surrounded by men all of whom would know how valuable such a secret would be. He has been sought for alike by English and by Russian authorities. If he were detained to work, his opportunities of communication must have been frequent. What, then, is there to impeach the only account we have received? We confess we can see nothing deserving any weight. What we have heard seems to be consistent with all the probabilities; what we imagine seems to be inconsistent with any. It is very undesirable that this hopeless hope, which is so respectable when we see it actuating a near relative, should take hold of the public mind, and be pursued as a morbid fancy. So long as Major Brabazon doubts the death of his son he has a right to claim every assistance which our diplomacy can give him in order to remove those doubts. It is not probable indeed, that any efforts will obtain for him the satisfaction of recovering the body from the heap in which it has long since ceased to be distinguishable, and it is, as we think, impossible that he should ever attain the object of finding his son alive. Still, however, every one will desire to help him, and every one will sympathize with him in his search. But let us sympathize with him as a father engaged in a fond and hopeless quest, not as sharing his credulity without the all-sufficient excuse of parental affection. —*The Times.*

THE END OF THE CHINA WARS.

The confidence expressed by Lord Elgin, that we are now done with Chinese wars, will evoke a general response in the hopes of the country. As the soldier has returned his sword to the scabbard, and the diplomatist laid his pen on the shelf, so far as China is concerned, the occasion was not unsuitable to such a review of this Chinese question as the noble lord laid before his auditory. With the matter of his statement there is but little fault to find; with the manner none at all. It was, indeed, in the best tone and spirit, and the modest yet unextenuated appreciation of his own services came with a good grace from Lord Elgin. We have never been at any pains to conceal our dislike of the diplomatic system generally, for we believe it to have been upon the whole injurious rather than beneficial to the country; but if all our representatives abroad were like the subject of the present remarks, the character of the service would have stood as high as is compatible with

Digitized by Google

standing system of influence and interference in the affairs of other nations. Lord Elgin did not make the Chinese difficulty, and if it be really removed, his must be the praise of having done more than any other man to accomplish that end. Utterly condemning as unwarranted and unjustifiable the conduct of the British agents at Hong Kong and Canton, who, five years ago, with the support and approval of the Home Government, committed a violent aggression on the Chinese, and laid the causes from which the subsequent wars inevitably rose, we still recognise the value of the services of him to whose hands was committed the direct conduct of our iniquitous quarrel. Lord Elgin was animated by very different sentiments from those of the Governor of Hong Kong and of the Consul at Canton. If the instructions he received from home enjoined moderation and discretion, as well as firmness, the noble diplomatist may be said to have improved upon them. The admonitory voice which addressed him on that Sunday morning at the door of Mr. Spurgeon's chapel, before his departure for the East, seems to have found an already living response in the recesses of his own heart. There can be no doubt at all of Lord Elgin having undertaken this mission with a deep sense of the responsibility attached to it, and that sense, united with broad views of the true interests of England in China, with a spirit of moderation, with judgment and a humane feeling, has been so far successful as to have restrained to comparatively narrow limits of calamity the fearful disasters of a protracted war which were foreboded. It was a pity that Lord Elgin should have had to leave China after his first mission, and before the ratifications of the Treaty of Tien-tsin were exchanged; for although the Hon. Mr. Bruce is of his blood, he is not of his judgment. We cannot blame the noble Lord for abstaining from expressing disapproval of his brother's rashness at the mouth of the Peiho, while we remember that the Foreign Secretary endorsed it, contrary to instructions as it was, and wantonly provocative of worse complications than ever. But the greatest fear that weighs at the present moment — the most intrusive consideration, weakening those hopes of continuance of peace and friendly relations between this country and China — lies in the fact that the Hon. Mr. Bruce is now at Tien-tsin, the British Plenipotentiary to the Court of the Chinese Emperor. So far as to what has passed, and as to Lord Elgin's share in those events. That statesman has in view great prospective advantages both to the East and West, from bringing China within the family of nations, and so opening up general intercourse between the people of that empire and of Europe. This is the sort of progression that every well-wisher of the human race must ardently desire to see promoted. It is by this extension of mutual knowledge of each other, and this binding of people together by the chains of a common interest which commerce supplies, that the reign of true civilisation and lasting peace on earth is to be brought about, if ever. Lord Elgin has a right to enforce those views; for, although he has carried war to the gates of Peking, and there dictated a peace, the terms of which, how moderate soever, could not be grateful to the ruler of China, yet this his lordship was, under the circumstances, compelled to do, and it is his chief merit that he did it in the least offensive manner possible. The spirit of his diplomacy shows that at heart he must have felt distrust of the means forced upon him to open the way to that humanising beneficial intercourse he looks forward to. Wars of aggression, undertaken without the shadow of a pretext of justification, but, on the contrary, like this which originated in the Lorcha affair, with every circumstance of falsehood and arrogance on the part of the assailant, are not just the instrumentalities for uniting nations in a friendly intercourse. However desirable such intercourse, it is not to be forced. Lord Elgin knows this as well as anyone, and we confidently expect that the influence which he is destined to exercise on the conduct of affairs will be directed against that sort of policy in the East or elsewhere which it was for him to make as innocuous in China as the vice of its original conception permitted.—*Morning Star.*

London Gazettes.

The Queen has been pleased to give and grant unto Major-General Sir James Hope Grant, G.C.B., having the local rank of Lieut.-General in the East Indies and China, and late commanding her Majesty's Land Forces in China, her Majesty's Royal Licence and Permission that he may accept and wear the Insignia of the Imperial Order of the Legion of Honour of the 2nd Class, which his Majesty the Emperor of the French hath been pleased to confer upon him for his distinguished services before the enemy during the late combined British and French operations in China.

The Queen has been pleased to appoint Alexander Perceval and Angus Fletcher, Esqrs., to be members of the Legislative Council of the colony of Hong Kong; also Daniel William Blyth, Esq., to be Master Attendant of Galle, in the Island of Ceylon.

A DOG FROM CHINA.—At the plunder of the Imperial Palace of Yuen-ming-yuen a little dog was found by Captain Dunne, 99th Regiment, who brought it home by the last mail from China. It is supposed to have belonged to the Empress, or one of the ladies of the Imperial family, and is considered one of the smallest and by far the most beautiful little animal that has ever appeared in England. Her Majesty having been graciously pleased to accept the dog, it now forms one of the Royal collection of dogs.

Another letter has appeared on the subject of student interpreters, complaining that the newly-entered students at the universities are to be placed on the same footing as those who have been studying for years at King's College.

AT the next meeting of the Royal Geographical Society, on May 13, the following paper will be read:—"Journey from Yedo into the Interior of the Island of Niphon, and Ascent of the Volcano of Fusigama," by Mr. Rutherford Alcock, her Majesty's minister at Japan; communicated through Sir Roderick Murchison.

Dr. MacGowan has proceeded to Paris to repeat his lectures on China and Japan, and Monsieur Montigny, late Consul at Shanghai, has procured the free entry of all articles used in his illustrations.

Literature.

In the "Dublin University Magazine" for the present month there is an article on China, taking the side of the Taepings and opposing the views advocated in the last number of "The British Quarterly."—A new series of tracts is announced for publication, apparently by the leaders or advocates of the Broad Church Party. The first is by Thomas Hughes, and is entitled "Religio Laici." The second, called "The Mote and the Beam, a Clergyman's Lessons from the Present Panic," by the Rev. F. D. Maurice, is in the press. Macmillan and Co. are the publishers of the series.—There is scarcely anything sadder than the announcement of the sale of a literary man's library. That the books which have been collected with care, and cherished like dear familiar friends, should be dispersed to the four winds by the hammer of the auctioneer is verily a thing to grieve over. This week the noble collection made by the late Richard Ford, of Exeter, was disposed of in this manner. Mr. Ford's "Handbook for Travellers in Spain" is well known, not only as the most useful work on the subject, but also as the wittiest guide-book that ever was written. It is a work for stay-at-home readers as well as for travellers in the Peninsula.—Mrs. (or, to speak correctly, Miss) Agnes Baillie, the well-known and well-beloved sister of the far-famed Joanna, died, a few days since, at her residence at Hampstead. It was the same house in which her sister had lived for many years and had received all the chief literati of the day. Joanna, it will be remembered, died in 1851, at the age of eighty-eight. Her sister was born in 1760 (nine years before Walter Scott, and ten years before Wordsworth), and was, consequently, more than a century old.—Mr. Nichol, of Edinburgh, announces a new edition of the Rev. George Gilfillan's "Library of the British Poets." Twelve volumes will be issued annually to subscribers at the cost of two guineas. The editorship of the edition is placed in the hands of Mr. Charles Cowden Clarke, the first and, perhaps, truest friend of Keats. It is passing strange that a man of his fine taste, and delicate appreciation of all that is noble and of good report in poetry, should be content to follow in the wake of such a critic as Gilfillan, whose biographies and notices are to be retained.—Mr. Money's work, entitled "Java; or, How to Manage a Colony," (Hurst and Blackett), has reached us, but the pressure on our space will not allow us to do it justice in the present number. In anticipation, however, of our review, we may say that Mr. Money writes like a man who has thoroughly investigated his subject in all its bearings. In very earnest words, and by the aid of a vast accumulation of facts, he vindicates the East Indian policy of the Dutch, and asserts the advantages accruing from the culture system as established by General van den Bosch in 1832.—A new and beautiful edition of Longfellow's poetical works has been issued in Bohn's "Illustrated Library." It is a complete and compact collection of the poems, and is charmingly illustrated by Birket Foster, John Gilbert, John Absolon, &c.—A new edition of Mr. Wingrove Cook's "China," with corrections and editions (Routledge and Co.), has just appeared. We shall not attempt to criticise a work which is so familiar to all readers. It has already taken a prominent place in Anglo-Chinese literature—a place from which it is not likely to be thrust by the investigations of future travellers. Everyone who wishes to understand our commercial position with regard to China, should make himself master of this volume. It is a book as pleasant for perusal as it is serviceable for reference.

By way of finale to our literary gossip, we may mention that the Emperor of all the Russias has sent to Mr. Atkinson a splendid emerald ring, set in diamonds, as a mark of the Imperial approbation of his work on "The Amoor." "This gift," says the *Athenæum*," is honourable to Mr. Atkinson as officially proving the accuracy of his delineation of Amoor scenery and life, and is creditable to the Emperor as proving that Mr. Atkinson's many strictures on the policy of Russia in the remote regions of Asia have been received at St. Petersburg in a liberal and candid spirit."

We have received Messrs. Cassell and Co.'s monthly instalment of periodical literature. The "Popular Natural History," "Illustrated History of England," "The Ladies' Treasury," and the "Illustrated Family Paper."—From Mr. S. O. Beeton we have to acknowledge the May number (a double one) of "The Englishwoman's Domestic Magazine," a very useful and apparently well-edited journal, containing several illustrations and a large amount of information of special value to ladies. "The Boys' Own Magazine," a cheap but capital monthly, has reached us from the same publisher.

BANQUET TO LORD ELGIN—*Continued from page* 257.

good understanding with the Chinese Government. With this view I persuaded not only my excellent friend and colleague Baron Gros, the Ambassador of the Emperor of the French, but also the Ambassadors of the United States and of Russia, who were not parties to the war, to join me in addressing a representation to the Court of Peking, asking that Court to send a Plenipotentiary to meet us at Shanghai for the purpose of adjusting all the differences then existing between China and our respective countries. Shanghai is at a very great distance from Peking. It is now, and even then was, a port open to foreigners, and therefore it was impossible to devise a proposition more conciliatory to the Chinese or more respectful towards the feelings and even the prejudices of their Government. The Chinese, however, not only rejected our proposal, but rejected it with contumely; and it was not till we reached Tien-tsin - whither, I must observe, we all, the representatives as well of the neutral as of the belligerent Powers, went together—that we were able to find a negotiator competent to treat with us. As soon as we found such a negotiator we made peace, concluding it with the most solemn sanctions possible. The Emperor of China, as we all know, influenced by the same evil counsellors who had dissuaded him from sending an Ambassador from Peking at our invitation, in the following year interposed obstacles to the carrying out of the treaty; and the consequence of his proceeding was that that great expedition was fitted out and sent from this country which has with such wonderful success and in so short a space of time put an end to and arranged all our difficulties with China at the capital of that great empire itself—(hear, hear). I am quite aware that this narrative, though I have endeavoured as much as possible to condense it, must appear rather tedious to you—("No!")—but I am very anxious that it should be understood in this country that we have not acted harshly or ungenerously towards the Chinese, that at every stage of our proceedings we offered reasonable terms of accommodation, and that we resorted to force only when the obstinate perversity of the Chinese drove us to that alternative. But I know that another question lies behind, which may be more interesting to many present than this review of the past. The question I refer to is this—What are the advantages that we are likely to derive from the new privileges and rights which we have obtained under our treaties with China? That, my Lord Mayor, no doubt opens a very wide field to speculation. If we can succeed in establishing friendly relations not only with the Government, but with the people of China—if we can persuade them to adopt some of our tastes and habits; for although they are very averse to change, they are not, like many other Oriental races, cut off from all communion with us by inveterate prejudices of caste;—if we can succeed, I say, in these objects, it is impossible to set limits to the amount of trade that is likely to grow up between two nations so industrious and so commercial—(hear, hear). But there is one particular advantage which may be expected to accrue from the establishment of the Queen's representative at Peking to which I wish to call your attention, because I think it has been remarkably illustrated by what has occurred very recently in Japan. You have probably observed that a very serious crime was a short time ago perpetrated in that country. An European, but not a British subject, was murdered under circumstances which leave at any rate a charge of culpable indifference upon the Japanese Government. Well, what followed? Our Minister, acting, as it appears to me, with excellent judgment, retired to a short distance from the capital. He did not threaten war, but threatened what we understand in Europe by the phrase a "suspension of diplomatic relations." And, if our former experience of China is any guide to us, I think we may conclude with absolute certainty that such a menace, if it had been made at an outport to a subordinate functionary, would not have produced any effect whatever. That functionary would probably have written to the Supreme Government to say that he had kicked the barbarian out of his town—(a laugh)—and have claimed all manner of rewards for inflicting on him this defeat by diplomacy or force. But Mr. Alcock was at the capital, in relations with the Supreme Government; and that Government, seeing the danger, and having power to act, immediately took alarm at this menace, and accordingly within the space of a week, I think, or at least a very few days, this Government, who, when I negotiated a treaty with them, talked of the residence of a Minister at Yedo as one of the greatest calamities which could possibly befall them, came forward and implored our Minister to go back, offering him at the same time any guarantees for the future which he chose to demand. I am quite aware that there is a very great difference between Peking and Yedo, and that the advisers of the Emperor of China are not such intelligent persons as the advisers of the Emperor of Japan. But I feel very confident that this threat of a suspension of diplomatic relations will have the same effect, as a preventive of war and a preservative of peace, at the Chinese capital as recent events seem to show it has had at the Japanese—(cheers.) My Lord Mayor, I should be very much to blame if, having an opportunity of addressing an assembly in this place, I omitted to call attention to the fact that the occasional misconduct of our own countrymen and other foreigners in China is one of the greatest, perhaps the very greatest, difficulties with which the Queen's representatives there have to deal—(hear.) We send out to that country honourable merchants and devout missionaries, who scatter benefits in every part of the land they visit, elevating and raising the standard of civilisation wherever they go. But sometimes, unfortunately, there slip out from among us dishonest traders and ruffians who disgrace our name and set the feelings of the people against us—(hear, hear.) The public opinion of England can do much to encourage the one class of persons and discourage the other. I trust that the moral influence of this great city will always be exerted in that direction—(hear, hear). In addressing the merchants of Shanghai some three years ago, at the time when I announced to them that it was my intention to seek a treaty in Peking itself if I could not get it before I arrived there, I made this observation,—that when force and diplomacy should have effected in China all that they could legitimately accomplish, the work which we had to do in that empire would still be only in its commencement—(hear). I repeat that statement now. My gallant friend who spoke just now has returned his sword to the scabbard. The diplomatist, as far as treaty-making is concerned, has placed his pen on the shelf. But the great task of construction—the task of bringing China, with its extensive territory, its fertile soil, and its industrious population, as an active and useful member, into the community of nations, and making it a fellow-labourer with ourselves in diffusing over the world happiness and well-being—is one that yet remains to be accomplished. No persons are more entitled or more fitted to take a part in that work than the merchants of this great city. I implore them, then, to devote themselves earnestly to its fulfilment, and from the bo tom of my heart I pray that their endeavours towards that end may be crowned with success—(loud cheers).

THE CAMPAIGN IN CHINA. — We mentioned in our last number, that Mr. Hogarth, of the Haymarket, was about to publish a series of sketches drawn by Lieut.-Col. Hope Crealock, during the recent campaign in China. Since we wrote we have seen the sketches, which were exhibited to a select public on Saturday last. The vigour of the drawing is marvellous, nothing could be more life-like and effective. In all there are thirty-two sketches, which are to be published in a portfolio, or the plates can be procured separately. The history of the Campaign is as it were detailed for us in these sketches. A few bold strokes serve to tell a long story. Such a supplement to the letters of an "Own Correspondent" and to official despatches, cannot be too highly prized.

MESSRS. LOCH AND WADE.—The *Observer* states that the Queen has expressed her gracious intention to confer the Companionship of the Bath (civil side) upon Mr. Henry Loch, private secretary of Lord Elgin in his late mission to China; and Mr. Thomas Wade, Chinese secretary to the mission at Shanghai, who acted as chief interpreter during the late expedition.

Monetary and Commercial.

In consequence of the American civil war, and consequent stoppage of the important trade with this country, business has been much affected, and the improved condition of the general exports, as shown by the Board of Trade Returns for March, will be materially checked. The exports to China and the Far East from Great Britain will not be interrupted, but the direct trade, both import and export, between the United States and China will be liable to the same serious interruption. It is feared that a series of failures will result, similar to that of 1857–8. On this subject the *Money Market Review* says:—

"It will afford some idea of the depreciation which has occurred in the New York stock market if we state that Virginia Dollar Six per Cents., which about ten days ago were quoted 70, now come quoted 36. In London the price to-day was 43 to 47. The London prices are in nearly all instances much above those current at New York. The American quotations, for example, are equal to 46 dis. for Illinois Central shares, and 16¼ for New York and Erie, whilst in London this afternoon the prices were respectively 40 to 39½ dis. and 18½ to 19. This difference is calculated to bring shares over. In some quarters the apprehension is expressed that the English market may be deluged with American stocks. Should the Americans make up their minds to sacrifice them at low prices, English investors will probably absorb them, and wait for the result of the present conflict. A vast number of English buyers are watching for the best opportunity of operating."

Considering the great importance of the American civil war, the funds have been fairly supported. Consols have ruled at 91½ to ⅞. The rate of discount at the Bank of England remains at 5 per cent., and the demand during the past few days has shown a marked increase, anticipatory of a rise in the rate.

A deputation on the subject of the Canton claims had an interview with Lord John Russell at the Foreign-office. The deputation was introduced by Mr. R. W. Crawford, M.P., Mr. S. Gregson, M.P., Sir James Matheson, Bart., M.P., Mr. Moffatt, M.P., and Mr. Buchanan, M.P. The deputation consisted of Messrs. Charles Magniac, Thomas Dent, Hamilton Lindsay, Harry Gordon, Edward Pereira, W. How, T. Jones Gibb, William Vacher, and G. G. Macpherson. The deputation urged that the delay which had occurred in the settlements of these claims was very unreasonable, and the argument of the Chancellor of the Exchequer that the claims should not be paid in full, but *pro rata* with the Government outlay for the war, can hardly be characterised in terms sufficiently strong. To say that his opinions are illogical, unjust, and a gross breach of the pledged engagements of Lord Elgin and Mr. Bruce, is the least that can be said. The parties interested may, however, rest assured that such a flagrant piece of injustice will not be tolerated by her Majesty's Government, and this fact we give on the best authority. The reply given to the deputation by Lord John Russell was to the effect that the matter should receive early and favourable attention; but until replies had been received from Mr. Bruce to certain questions, nothing further could be said. The precise grievance is included in a protest which has been handed to the Foreign Secretary, from which the following is an extract:—

Digitized by Google

"Reference to the wording of the respective treaties of 1858 and 1860, where it will be observed that the indemnity for private claims is invariably placed first, and separated from the amount to be paid to the Government, which is designated a remainder, and therefore that private losses are first to be made good. Such an interpretation is no less demanded by the justice of the case. These claims date from the destruction of the property, a period long prior to the time when the war expenses were incurred, and their non-payment is of excessive hardship to individuals who have already waited four years, while a further indefinite period of suspense is now in prospect. The only reason advanced for the proposed change in the disposition of the funds in hand is, that the war and consequent expenses were undertaken by the people of England for the purposes of the China merchants. Even if this were so, as British subjects, and part of the people of England, we submit that we are entitled to just protection and speedy indemnification against foreign aggression; but we respectfully deny that this was the fact. The war arose out of the case of the lorcha Arrow, with which the merchants had no concern, and their property was destroyed in retaliation for the acts of the British authorities. We conclude by asking no more than we believe to be justly due—viz., that as Englishmen we should not be placed in a worse position than Americans or Frenchmen, who have already received the far larger proportion of the amount of their losses incurred at the same time as our own, and that we should at once be paid out of the money now in hand."

On the subject of the French mail route to China, noticed in our last. *The Times* of this morning says:—

The execution of these services will, of course, involve the necessity of providing not only a powerful fleet, but numerous docking and repairing establishments, coaling stations, agencies and other facilities in Egypt and many other places; and it would seem, from the unusual extent of the advances proposed to be made by the State, and the time to be allowed before commencing operations, that the company and the Government are to some extent alive to the costly character of these essentials to an undertaking of the kind. The amount of the proposed subsidy is also very high, giving a rate of about 20s. per mile, or four times the amount paid to the English contractors for the India and China mail service. It is singular that a scheme which, in consequence of the promised extent of support from the Government, becomes almost divested of a commercial character, has attracted so little notice on this side of the Channel, and also that at the moment of its introduction the English public are about to be deprived of the advantage of a fortnightly communication between this country and China, the English service, as was stated yesterday, being intended to be reduced to a monthly one after the 1st of July next.

In a House of 580 members the proposition of Mr. Horsfall, that instead of the abolition of the paper duty the duty on tea should be lowered from 1s. 5d. to 1s. per lb., was rejected by the small majority of eighteen. Had there been more time for obtaining the requisite demonstrations of the sense of the country upon the question, the Government would probably have been defeated; indeed, there can be no doubt that a very large proportion of the members of the House of Commons voted with the Ministry against their inclinations, the arguments on the other side having throughout been of the most popular character, while those on the part of the Government, even from Mr. Gladstone, who was formerly one of the strongest opponents of the tea duty, consisted mainly of the unworthy and, as it has been thought, long exploded plea that the Chinese labourer, and not the English consumer, would derive the principal advantage of the change.

The death has been announced of Mr. James Malcolmson, one of the senior directors of the Bank of England, and head of the great Bombay firm of Forbes, Forbes, and Co.

Seventy-five guineas per cent. insurance has been paid at Lloyd's on the ship *Bio-bio*, overdue from England to China.

The construction of the Suez Canal is still making progress, but the opinion as to its practicability remains the same in this country. It is purely a French idea.

Telegrams can be forwarded through Corfu and Smyrna to catch the mails for India and China at Alexandria by the Submarine Telegraph Company in Threadneedle-street.

The East Indian Railway Company have agreed to empower their board to raise £6,000,000 by debentures at 5 per cent., convertible into stock at the option of the holder. The expenditure of this amount will be spread over a considerable period.

An interesting lecture was delivered on the evening of the 8th, at the Society of Arts, by Mr. P. L. Simmonds, on the trade, &c., of the Eastern Archipelago. The report will appear in our next.

The exact amount of specie shipped by the Pera, on the 4th inst., was £169,293, of which £132,190 is for Calcutta (including £103,990 in silver on Government account), £5,198 for Madras, £4,200 for Ceylon, £12,450 for Hong Kong, £12,255 for Shanghai, £1,200 for Singapore, and 1,200 for Alexandria. £156,995 is silver, and £12,298 gold. The amount on mercantile account is very limited, as was anticipated.

The steamer *Malacca* with the first portion of the cable to connect Malta with Alexandria, has left for Malta; and the *Rangoon*, it is expected, will be ready to follow on the 12th. As already announced, the *Malacca* will return for the remainder of the cable.

ARTICLES OF IMPORT.

TEA.—Low to fair common Congous have been difficult of sale at reduced prices, the arrivals having been large; good common has only been in limited request, and quotations are lower, say about 1s. per lb.; flavory kinds, under 1s. 3d. per lb., have been much depressed, and show a reduction of fully 1d. per lb. Fair to good Kaisows are in steady demand at full prices. Fair to good Ho-hows and Ning-chows have been sold to some extent at rather irregular prices, and, on the whole, may be quoted rather easier. Good and fine Monings and Wopaks have been firmly maintained. Fine Kaisows are scaree, and command extreme prices. Common Tayshans continue very heavy, but good descriptions are saleable at 1s. 1d. to 1s. 2d. per lb. Fair to good Souchongs remain without alteration; fine have met with a moderate inquiry, Common to good Oolongs have been saleable at the low prices established; fine have been wanted. Flowery Pekoes continue most difficult of sale, even at very low prices. Common Scented Capers are still abundant, and the price remains about 9d. per lb. for clean kinds; good and fine have been more inquired for. Scented Orange Pekoes show but little change, except in medium Foo-Chow kinds, which have been sold at 1d. per lb. lower. In Green Teas the demand for export to New York and Canada has cleared off all the common descriptions of Twankay and Young Hyson at fully 2d. per lb. higher, and those of Japan growth have been taken in the absence of China kinds. Hysons have also been in better demand at full prices to 1d. per lb. advance. Gunpowders under 2s. per lb. are very scarce, and realise 1d. per lb. advance; in the grades over 2s. per lb. there is less decided change, but the tendency is to higher prices for all Moyune kinds. Ping Sueys maintain former rates. Canton Young Hysons and Gunpowers show a rise of 1d. to 2d. per lb., and the commoner kinds have been taken for export, and in these the rise has been greatest. The *Ocean Gem* arrived on the 23rd ult. with the first direct cargo of Tea from Japan, consisting of Oolongs and Green Teas of the same quality as those previously received *via* Shanghai. The great bulk of the Green Teas has been realised at full prices, but the Oolongs are difficult of sale. The public sales during the month comprise 60,000 packages, of which 14,226 packages were sold, including 7,224 packages without reserve. The stock on the 1st of May of all descriptions of Black was in London 69,608,997 lbs., and of Green, 5,232,465 lbs. The total delivery was of Black, 23,956,467 lbs., and of Green, 3,679,073 lbs. The stock at Liverpool was of Black, 3,699,443 lbs., and of Green, 65,659 lbs. The total delivery was of Black, 2,458,870 lbs., and of Green, 189,681 lbs. The imports in London to the 1st of May have been, of Black, 36,913,292 lbs., and of Green, 2,760,612 lbs., and at Liverpool, 4,047,265 lbs. of Black and 224,387 lbs. of Green. According to the circular of Messrs. Mitchell, Aspinall, and Skipper, the amount of Tea afloat at the present time is 16,349,298 lbs. against 16,992,348 lbs. at the same period in 1860.

SILK.—We have to report a changed market for Silk. All was going well to the close of April—unusually large deliveries, diminished arrivals, and comparative ease in the money market, all tending to a restoration of confidence and general purchase at gradually stiffening prices—but with the first bad news from America the demand began to slacken, and is now reduced to a very moderate scale. The deliveries, too, appear to be relapsing to a very average rate. The improved prices are at present fairly maintained. Japan Silk shared in the general currency of demand while it lasted, and now shares in the general slackness, except for quite the highest closses, of which some few small parcels have lately been landed. Chinese thrown silk has continued throughout entirely unnoticed.

SUGAR.—The market has been particularly heavy, and prices mostly show a decline of 6d.; 750 bags of Penang sold at 33s. to 36s. for good mid. to fine brown, and 36s. 6d. to 39s. for low and mid. yellow.

COFFEE.—Market quiet and sales at easier rates. Native Ceylon 61s. 6d. to 62s. for good ordinary plantation, 67s. to 74s. for fine ordinary.

Digitized by Google

RICE.—Speculations have entirely withdrawn. Sales of Necranzie at 10s. 3d., Bassein 9s. 6d.

PEPPER.—Sales of 1,800 bags of Batavia at 3½d. to ⅝ for mid. to fair, 500 bags of Singapore black at 3⅞d.

SAGO.—Market is still dull; a parcel of 2,000 boxes sold at 17s. for fair small, 17s. 6d. to 18s. 6d. for good and fine bright. 15s. 6d. to 16s. for fair medium of 1,800 boxes of Borneo Company's Pearl; nearly all were retired. FLOUR.—Small sales at previous rates.

SPICES.—Cinnamon.—The quarterly sales comprised 1,350 bales of Ceylon, which sold at 1d. to 2d. a pound higher; superior fetching 2s. 6d. to 3s. 1d.; seconds, 1s. 2d. to 1s. 9d.; thirds, 11d. to 1s. 4d.; fourths, 7d. to 9d. Cassia Lignea: 1,500 boxes at auction, mostly sold at 85s. to 92s. Cassia buds: 70 cases very common sold at 64s. to 72s. Cloves: No public sales, and only small private. Mace: Part of a lot of 40 cases of Penang sold at auction at 9d. to 1s. Nutmegs: Sales of a portion of 50 cases Penang, and 5 Singapore, at 1s. 2d. to 1s. 8d. for fair small.

HEMP.—Sales of Manila to a fair extent at £21 to £22. 10s. for fair to good roping. 1,200 bales at auction—nearly all were retired.

COTTON.—A large business has been done. Prices are fully ¼d. a lb. higher. Sales of Surat at 5¼d. to 6¼d.

JAPAN WAX.—Market steady. 900 boxes have been sold at auction at 53s. to 54s. 6d. for middling block, and 58s. to 58s. 6d. for fair.

TOBACCO.—No transactions in Manila.

TIN.—Sales of Straits at 125s. but 123s. is now the quotation. Banca 126s. to 127s. Antimony ore, no change.

GAMBIER.—Of 1,700 bales at auction, about one-fourth sold, 15s. to 16s. for damaged. Cutch: Very flat. Of 2,500 bags at auction, a few only sold, at 22s. to 24s.

MISCELLANEOUS.—India Rubber: Small sales at 1s. 3¼d. to 1s. 4½d. Camphor: Sales of 150 chests, at 220s. to 230s. Higher prices are now demanded. Sapanwood: 43 tons of Siam sold at £8 5s. to £8 15s.; prices on the rise. Soy: 230 casks of China at auction, all returned. Private sales at 2s. 4d. 258 tubs of Japan sold at 8d. to 10d. Rhubarb: 18 chests at auction, retired. Mother-o'-Pearl shells: Singapore scarce; Manila no sales. Star Anniseed: 300 boxes at auction, all retired; market dull. Sticklac: 70 bags sold at 70s. Gum Benjamin: sales of fourth quality Sumatra at 50s. to 51s. Damar: about 200 cases sold at 45s. to 46s. 6d. Gamboge: quiet, and no sales. Rattans: 15,000 bundles of Singapore, 13,000 Penang, and 4,000 Batavia sold at 1s. 7d. to 1s. 9d. per 100. Elephants' teeth: no sales. Vermillion: of 35 cases at auction, a few only sold at 2s. 5d. to 2s. 6d. for good genuine. Galangal Root: prices lower; sales of 400 bags at auction, about half sold at 15s. to 15s. 6d. Cubebs: sales at an advance of 30s.; £7. 10s. to £8. 10s. is now quoted. Dragons' Blood: no sales. Galls: China and Japan are in demand at 40s. to 45s. Rum: sales at 1s. 8½d.

ARTICLES OF EXPORT.

IRON.—The quotations in London are for Welsh bars, £6. 5s. to £6. 10s.; nail rods, £7 to £7. 17s. 6d.; hoops, £9 to £9. 7s. 6d.; sheets, single, £9. 5s. to £9. 15s.; Staffordshire bars, £8 to £8. 7s. 6d.; rails, £5. 5s. to £5. 10s.

STEEL.—Swedish keg, £17. 10s. to £18.

COPPER.—Sheet and sheathing, 11d.; yellow metal, 9¼d.

TIN.—125s. for block; 126s. for bar. The plates, best charcoal, I.C., 29s. to 30s. per box.

LEAD.—English pig, £20. 15s, to £22. 5s.; shot, patent, £24. 10s.; sheet, £22; spelter, £18. 10s.; zinc, English sheet, £24; quicksilver, £7 per bottle.

The export of metals from London and Liverpool up to the 30th April has been as follows:—To SINGAPORE: Yellow metal, 52 tons; copper, sheet and sheathing 40; iron, bars 87, nail rods 300, foreign 52; spelter, 25; tin plates, 300 boxes; lead, pig, 70 tons; steel, English 2, foreign 15. To HONG KONG: Yellow metal, 126 tons; copper, sheet and sheathing, 24; rods, 2; iron bars 55, hoops 3, sheets 12, nail rods 712; spelter, 25; tin plates, 3,500 boxes; lead, pig, 896 tons, sheet, 12; steel, foreign, 20; quicksilver, 22,116 lbs. To SHANGHAI: Yellow metal, 12 tons; copper, sheet and sheathing, 3; rods, 2; iron, bars 215, hoops 96, sheets 29, nail rods 1,017; spelter, 99; tin plates, 710 boxes; lead, pig, 1,143 lbs.; steel, English 1, foreign 15; quicksilver, 1,600 lbs. To MANIDA: Iron, bars, 241 tons, hoops 17, sheets 24; lead, pig, 51. To BATAVIA: Copper, sheet and sheathing, 65 tons: rods, 2; iron, bars 252, hoops 15, sheets 104, nail rods 17; spelter, 25; zinc, 6; tin plates, 490 boxes; steel, English 3, foreign 10.

EXPORT OF BULLION TO CHINA, &c.

The following return shows the shipments of bullion from Southampton during the present year by the P. and O. Company's mail steamers:—

	Gold.	Silver.

MANCHESTER MARKETS.

The market both for yarns and for piece-goods has shown greater quietness than can be recollected in either department for a very long time back. In yarns buyers are holding aloof, mainly from the high prices asked by spinners, whose quotations are still rising since the end of last week, cotton being again dearer. In the cloth market there is next to no business at all. Buyers will do nothing at present prices and with the unfavourable accounts they receive from abroad; while, on the other hand, manufacturers seem almost equally unwilling to press their productions for sale. The last advices received report heavy losses both at Calcutta and Bombay, and no doubt these will have a tendency to make buyers more cautious than ever. The dearness of discounts has also to be taken into consideration. The following is from the circular of Mr. Mendel, of the 7th inst.:—"The limited demand reported last week has become still more so; the few sales practicable were made at some slight concession from the quoted rates, which remain nominally unaltered; more especially does this apply to goods. Yarns are better maintained with very little doing."

COMMERCIAL POSTSCRIPT.

CITY, MONDAY AFTERNOON.

A company has been proposed by Mr. J. A. Boulton to run a line of screw steamers *viâ* the Cape to Australia, China, and Japan. The shares of the China and Japan Steam Company are quoted at ½ to ¾ premium.

ARRIVALS NOT INCLUDED IN TABLE.—Off the Wight, from Tjilatjap, Ida Maria de Raath. May 9, at Falmouth, from Akyab, for Antwerp, Leopold Cateaux, leaky. April 23, at Boston, from Manila and Batavia, Eloisa, with damaged rudder, &c.; 25, at Boston, from Manila Revere; 11, at Deal, from Macao, Standard; 28, at Cadiz, from Manila, America; 11, at Penzance, from Maulmain, Wm. Brown.

DEPARTURES.—May 6, from off South Foreland, for Batavia, Doctrina en Amicitia; 8, from Deal, for Batavia, Wilhelmine and Clara; 7, for Macassar, Gustav and Ernst; 7, from off the Start, for Batavia, Jacob Anna, from off Dungeness, for China, Breden Eek; 11, from London, for Singapore and Penang, Hulla; 8, from the Lizard, for Sourabaya, Holland.

SPOKEN.—Alfred, Amsterdam to Batavia, 13th March, 30 s., lon. 25; Ralston, Singapore to Liverpool, 27th March, 2 N., 23 W.; Rocket Boston to Batavia, Jan. 12, 5 N., 22 W.

LAID ON.—At Liverpool, for Hong Kong and Canton, Queensberry; for Singapore, Amathea.

From SINGAPORE.—At London: Reward, Balaklava, Patriotess, Xiphias, Maldon, Robert Small, Knight, Lincelles, Rajah of Cochin. At Liverpool: Ralston, Mary Spencer, Jacatra. At Outports: Virginie, America, Johan Hermann.

From MANILA.—At London: Fanny, Mary. At Liverpool: G. B. Carr, Graham, Albion, Sales, Queen of the East. At Cork: Bonaventure, Agamemnon. At Queenstown: Mercia, Eliza Stewart, Glendoveer, Agamemnon.

From PENANG.—At London: Clara, Zenobia, Isabella Harnett.

From BATAVIA.—At London: West. At Falmouth: Koning Willem III.

From BANKOK.—For Falmouth: Main, Pauline.

FREIGHTS AND CHARTERS.

Current freights to Shanghai, 40s. to 50s. per ton weight and meast; to Hong Kong, 35s. to 40s.; Singapore and Penang, 30s. to 45s.; to Manila, 35s. to 40s.; to Batavia, 45s. weight, 40s. meast; to Japan, 65s. weight and 60s. meast.

In coal freights to the East there have been very few transactions. One ship has been fixed Cardiff to Singapore at 29s. per ton, and the contractors now offer [27s. 6d.; for Shanghai, 50s. The quantity of coal exported in this direction the first three months of this year was 55,000 tons less than last, but the consumption is likely to be materially increased by the boats of the Messageries Imperiales, who will probably get a subsidy from the French Government and run a monthly line of steamers.

At Hamburg freights for the Eastern ports have a rising tendency, vessels of 400 to 600 tons being in much demand, and prices will probably rule higher as there is no lack of produce, manufactures, and other shipping articles. A vessel has been chartered here to sail from hence to Singapore at £2 15s. per ton, and all harbour expenses extra. £1,600 was paid in a lump for a vessel from hence to Nicolayeffsky on the Amoor, and thence to one or several Chinese ports at the choice of the super-cargo at a subsequent rate of £150 per month and all harbour expenses reimbursed. Vessels of about 400 tons have been taken up to load for Batavia and then proceed to another port of Java at £2 per ton.

INSURANCE.

The following are the current rates of premium at Lloyd's, according to the class of vessels, &c.:—To Hong Kong, 40s. to 50s. Shanghai, 50s. to 60s. Singapore, 30s. to 45s. Batavia, 30s. to 40s. Manila, 50s. to 60s. Nominal quotation for Yedo, 70s. to. 80s.

At Hamburg, for Batavia and Singapore, 40s. China and Manila, 40s. to 50s.

WAR RISK on American ships cleared or about to clear, from 20s. to 40s. per cent. extra.

CASUALTIES.

ST. HELENA, 14th March.—The Eagle of London, Malone, from Cardiff to Manila, was abandoned Feb. 2, off Mauritius. She had experienced a hurricane on 29th Jan., had been thrown on her beam ends, and obliged to cut away her masts.

NEW YORK, 12th April.—The Hankow (s.,) hence to Hong Kong, put into Norfolk Va. yesterday, leaky; she had encountered a heavy gale, which carried away rudder, stove bulwarks, and did other damage.

BALTIMORE.—The Howqua steamer, from New York for China, arrived here previous to 15th April for repairs.

The Sancho Panza, Hall, which arrived at New York 13th April, from Foo-Chow-Foo, experienced a typhoon from E. to N.E. and N.N.W., on 4th Jan., in lat. 17 N., lon. 115 E., had bowsprit sprung, rudder-head split, and cabins filled with water, and on the 9th April while running in a heavy gale from S. to E.N.E., shipped a sea which stove house and filled the cabin.

The Canton, (Dutch barque) Kettle, from Rotterdam to Batavia, put into Table Bay 9th March, leaky.

The Indomitable, (s.,) Carew, which arrived at Portsmouth 6th May, from Hong Kong had encountered a heady N. N. W. gale, near the Western Islands.

The Robert Small, (ship) Darke, from Singapore, was towed into the Mauritius by a steam tug 27th March, with loss of all three masts and rudder, having experienced a severe hurricane 3rd and 4th March, which commenced at E.S.E., veered to S.S.E., moderated for four hours, and then blew again from N.N.W.

The Gorilla, (British ship) from Newport to Hong Kong, with fore and mainmasts sprung and the ship very leaky, having had bad weather running down the Easting, was spoken 5th Feb., in lat. 40 S., lon. 106 E. by the Star Queen, which arrived at Mauritius previous to 6th April.

The Eloisa, from Manila to Boston, 233 days out, was spoken 21st April, sixty miles E. of Cape Cod, short of provisions and with loss of rudder, mizen topmast, foretop gallant mast and jibboom.

The Catharina Maria, Schuchard, from Banjoewangie to Rotterdam, which put into Simons's Bay 27th Feb., leaky, has been condemned there.

At ST. HELENA.—West Hawkins, from Batavia. March 27, Brouwershaven, from Batavia, and sailed 30 for Rotterdam; Amsterdam, Wilgmink, from Java, and sailed 30 for Amsterdam. 29, Minister Pahud, Kievit, from Batavia, and sailed, 30 for Rotterdam; Alice Thorndike, Thorndike, from Canton, and sailed 30 for Havana. 30, Oithon, Holmes, from Canton, and sailed for London.

At TABLE BAY, March 15.—Red Riding Hood, Nicholson, from Canton, and sailed 16 for Demerara. 19, Francis P. Sage, Ingasoll, from Macao, and sailed 20 for Havana.

At MORSEL BAY, March 12.—Emma Arentzer, for Singapore.

At ST. VINCENT, C.V., March 27.—Morge (Russian gunboat), from Plymouth, and sailed 31 for the Amoor.

THE SAM MENDEL.—An exceedingly handsome new iron ship, named the *Sam Mendel*, after the well-known commission agent, at Manchester, has just been added to the fine fleet of vessels trading between Liverpool, India, and China. She is 1,117 tons register.

LIGHTHOUSES IN THE RED SEA.—The operations for erecting three lighthouses in the Red Sea are temporarily suspended, partly on account of the approach of the hot season. Some difficulty has been found in erecting one of the lighthouses, which was intended to be placed on a dangerous shoal, on account of the foundation being sand. The Peninsular and Oriental Company have contributed a very handsome sum towards the undertakings.

SPANISH STEAMERS.—Contracts have been made with Messrs. Thomson and Messrs. Caird, of the Clyde, to build two mail steamers of 2,000 tons for the Spanish Government. Mr. Mare, of Millwall, and Mr. Green, of Blackwall, have contracted to build also for the Spanish Government two screw steamers of fifty guns.

OFFICES,—No. 12, OLD BROAD-STREET, LONDON, E.C.

This Company is formed for the purpose of supplying what has long been urgently required, and which, from the increased, and constantly increasing, growth of our commerce, is daily becoming more and more necessary; viz., regular, speedy, and safe communication along the extensive line of coast and in the inner waters of China.

For conducting an immense coasting trade, the Chinese possess nothing but unwieldy junks, which are unable to perform their voyages except with the favourable monsoon; while European commerce, in the China waters, is carried on in sailing vessels, with the addition, recently, of a very limited number of steamers owned by private firms; the postal and passenger traffic being confined to the semi-monthly service of the Peninsular and Oriental Company between Hongkong and Shanghae.

To meet the necessities of both Foreign and Native trade it is proposed to construct a fleet of steamers, which shall be the means of establishing regular communication between the ports and places to which foreigners will have access, and of providing for the conveyance of passengers, mails, and general merchandise.

It is intended to commence with the construction of six steam vessels, as the Directors propose to limit the operations of the Company until experience has proved in what way they can be best extended with advantage to the Shareholders.

Power (under the control of the Shareholders in General Meeting) will be taken by the Deed for a future increase of Capital; and provision will be made for extension of the Company's operations between China and Japan, as found expedient.

The extent of the trade already existing—its certain expansion—*and the manifest necessity for the use of steam*—warrant the conclusion that the Company may rely upon being able to find ready employment for their vessels at a scale of charges that will make the profits ample.

Forms of Application for Shares addressed to the Directors, may be obtained from the Secretary, at 12, Old Broad-street, London, E.C., or from the Brokers of the Company; but no application will be considered, unless a Deposit of 5s. for each Share applied for shall have been previously made with the Bankers of the Company.

AGRA and UNITED SERVICE BANK
(Limited.)

Established in India, July, 1833.

Incorporated by Royal Charter, 1857.

27, CANNON-STREET, CITY.

Paid-up Capital—£1,000,000 sterling.

NOTICE TO PASSENGERS BY THE OVERLAND ROUTE, via EGYPT.

PHILIP ZECH, Proprietor of the two well-known Hotels in Alexandria, the Hotel d'Europe, and the Peninsular and Oriental Hotel, begs to inform his friends, and Travellers in Egypt in general, that he has purchased SHEPHEARD'S HOTEL in CAIRO, which will still continue to bear the same name; and in returning thanks for the extensive patronage enjoyed by his two houses in Alexandria, hopes that the preference may likewise be extended to his house in Cairo, which will be managed in first-rate style, and in a manner intended to give every satisfaction to its frequenters, both as far as table, wines, internal and external service are concerned. Many alterations and ameliorations are being carried out at the present moment.

THE COLONIAL LIFE ASSURANCE COMPANY.

WAREHOUSE, 30, WALBROOK, CITY, LONDON.

List of sizes and prices forwarded on application.

DR. J. McGRIGOR CROFT, M.R.C., Physician, London, Fell. E.S.; Fell. O.S.; late Staff-Surgeon and Medical Officer of H.M. Ceylon Rifles in China, and Ceylon (retired), may be consulted by his China and Eastern friends returning home suffering from tropical disease. Address, Mandarin Villa, 8, Abbey Road, St. John's Wood, London.

HOLLOWAY'S OINTMENT and PILLS.—Tumours, Scrofulous and Glandular Swellings, Abscess.—At this season of the year, while the atmosphere is so variable, such diseases are constantly presenting themselves in sanguine and feeble frames. All have placed within their reach the antidote to those dreadful scourges, which, at their commencement, may be readily checked and cured, but, when neglected, resist for a long time the most appropriate remedies. Holloway's Ointment, rubbed on or near the affected parts, will thoroughly eradicate the cause of these maladies, and expel their seed from the system. Scurvy, scrofula, and all kindred disorders disappear before this cleansing ointment and these purifying pills, which cleanse and invigorate.

FOREIGN CORRESPONDENCE!

THE greatest novelty of the Day in Paper is the NEW INDIA PAPER, which is an entirely New Fabric, possessing a peculiar surface which renders it admirably suited for rapid writers. It is further distinguished from the usual kind of Foreign Paper, by its being as pleasant to write upon as stout writing paper, whereas with any other than a very light hand the pen is very liable to catch in the thin paper used ordinarily for Foreign Correspondence. It may be had in various note and letter sizes, plain, ruled, and black-bordered. The New India Envelopes possess two most valuable qualities, viz., lightness, and the strength and toughness of stout Cartridge Paper. They are less than half the usual price of Foreign Envelopes.

Three Sheets of India Note and Envelope, weigh under the ½-oz. The Envelopes may be had plain, or printed "via Marseilles," or Southampton. Ostend, France, Belgium, Liverpool, Halifax, Trieste, Lisbon, or in any other manner to order, and likewise with Mourning Border.

Sold only by E. TOWNSEND HAMBLIN, Stationer 421, Oxford-street, London, W.

THE PEN SUPERSEDED.—Mark your Linen. The best and only method of Marking Linen, Silk, Stockings, Coarse Towels, or Books, so as to prevent the Ink washing out, is with CULLETON'S PATENT ELECTRO-SILVER PLATES. By means of this novel invention a thousand pieces of linen can be marked in a few hours. Initials, 1s. each; Name, 2s. 6d. Set of Moveable Numbers, 2s. 6d; Crest Plate, 5s., with the necessary directions for use. Post free. Certificate from the eminent Dr. Sheridan Muspratt, F.R.S., Professor of Chemistry, &c.

"Several trials with Mr. Culleton's Patent Electro-Silver Plates, for marking linen, induce me to pronounce them excellent; the letters are beautifully marked in a deep black colour, without blotting, and after a long boiling, with either potass or soda, they remain unaltered. Other plates which I tried decomposed the ink, and in many cases burned holes in the linen. I can testify Mr. Culleton's Plates are incorrodible, and will not hurt the finest fabric.—(Signed) "SHERIDAN MUSPRATT.

"College of Chemistry, Liverpool.

"May, 15, 1854."

All orders to be sent to the Patentee and Sole Maker.

T. CULLETON, 25, Cranbourn-street, corner of St. Martin's-lane, London, W.C.

DR. CURTIS'S MEDICAL WORK, "MANHOOD."

An Essay on Nervous and Generative Diseases.

The 11th Thousand, with numerous plates in a sealed envelope, price Half-a-Dollar,

MANHOOD: the CAUSE and CURE of PREMATURE DECLINE IN MAN, with plain directions for perfect restoration to health and vigour, being a Medical Essay on Nervous and Generative Diseases, their Prevention and Cure, with the Author's experience in the Treatment of the various Disqualifications of Marriage—whether resulting from Youthful Abuse, the Follies of Maturity, the Effects of Climate or Infection. The result of Twenty-five Years' successful practice. By Dr. J. L. CURTIS, 15, Albemarle-street, Piccadilly, London.

Consultations, Ten till Three and Six till Eight.

REVIEWS OF THE WORK.

"We feel no hesitation in saying, that there is no member of society by whom the book will not be found useful—whether such person hold the relation of a Parent-Preceptor, or Clergyman."—Sun, Evening Paper.

"Dr. Curtis has conferred a great boon by publishing this little work, in which is described the sources of those diseases which produce decline in youth, or more frequently premature old age."—Daily Telegraph, March 27, 1858.

The Book concludes with numerous varied and interesting cases, to which is added the Author's Receipt of a Preventive Lotion.

Dr. CURTIS may be consulted, as usual, either by letter or personally, at his residence, as above. Patients in INDIA, CHINA, and the COLONIES can be cured by correspondence only, and have their medicines sent with secrecy and despatch. The efficacy and harmless nature of the remedies employed by Dr. CURTIS, having been demonstrated by the most complete success during a practice extending over a period of Twenty-five Years, nervous sufferers of every class have a perfect guarantee that the utmost skill and experience will be made available in the treatment of their cases.

THE WORK SOLD BY HINNAM, QUEEN'S ROAD, HONG KONG.

Manilla (Spanish ship)	Wm. Prowse	W.I.D.	May 15.
	Prudencia		

London, 5, Newman's-court, Cornhill; or Yorkchambers, 55, King-street, Manchester.

WITH QUICK DESPATCH.

FOR SHANGHAI DIRECT, the well-known clipper-built ship MERSE, A 1, 13 years, 628 tons register, FRANCIS MOORE, Commander, loading in the East India Docks. This fine clipper has excellent cabin accommodation, and is confidently recommended to shippers and passengers.

Apply to the owners, Messrs. John Willis and Son, East India Chambers, Leadenhall-street, E.C.; or to W. O. Young, Newman's-court, 74, Cornhill, E.C.

WITH DESPATCH.

FOR SHANGHAI DIRECT. The new British-built Clipper, CAPIOLANI, A 1, 10 Years, 533 tons register, JOSEPH W. SWANKIE, Commander, lying in the London Docks. This fine ship has just completed her first voyage from China.

For freight or passage apply to PHILLIPS, SHAW and LOWTHER, 2, Royal Exchange-buildings, E.C.

TO FOLLOW THE "LAUDERDALE."

FOR HONG KONG and CANTON, the splendid fast-sailing ship ALBUERA, A 1, 13 years, 729 tons register, JAMES A. ELMSLIE, Commander, loading in the East India Docks. This vessel presents a favourable opportunity to shippers, and has excellent accommodation for Passengers.

For freight or passage, apply to Mr. Edward Gellatly, with Messrs. Duncan Dunbar and Sons, 95, Fore-street, Lemehouse, E.; or to W. O. Young, Newman's-court, 74, Cornhill, E.C.

JEAN MARIA FARINA Cologne; London, 2, Salters'-hall-court, and 16, St. Swithin's-lane, E.C., begs to recommend his Stock of EAU DE COLOGNE and LAVENDER WATER in Bond — Double, at 9s.; Single, at 5s 6d. per dozen. Duty paid—Double, at 21s. Sparkling Hock, Moselle, Champagne, and Claret, in Bond and Duty Paid.

TUPPER AND COMPANY

MANUFACTURERS OF PATENT GALVANISED IRON, in Sheets, Tiles, Iron Roofs, Sheds, Cisterns, Pails, Gutters, Wire for Fencing, &c.

WORKS AT BIRMINGHAM AND LONDON.

OFFICES: 61A, MOORGATE STREET, LONDON

Merchants' orders executed with despatch.

BOTTLED PORTER AND STOUT.

BRIDGES AND SONS

CONTINUE to supply orders for Barclay, Perkins, and Co.'s PORTER, and STOUT, also PALE and STRONG ALES. This brand is now well known for its uniform good quality and careful packing.

WINES AND SPIRITS SHIPPED IN WOOD OR BOTTLE,

5, WARNFORD-COURT, LONDON, E.C.

BOTTLED ALES AND WINES, &c.

"NO BUYERS for the BEST BRANDS, unless RE-PACKED," in consequence of repeated BREAKAGE.—"Melbourne Journal of Commerce," Nov. 16. Heating and Breakage entirely prevented, and 15 per cent. saved in Freight of Cases, by using SEYMER'S BOTTLE PACKINGS AND COOLERS.

Price 7½d. per doz. Bottlers contracting for large quantities, effect so great a saving in labour, &c., that they can supply them at one-third less price to Shippers, who will find it most profitable to order their goods to be so packed in future.

SEYMER & Co., 27, Eastcheap, E.C.

JOHN POOK,

COMMISSION AGENT,

46, LIME-STREET, LONDON, E.C.

H. FOGG & CO.,

SHIP CHANDLERS, GENERAL STORE-KEEPERS AUCTIONEERS, AND GENERAL AGENTS, SHANGHAI.

Agents for THE LONDON AND CHINA EXPRESS, and THE LONDON AND CHINA TELEGRAPH.

HEDGE AND CO.,

GENERAL STOREKEEPERS, AUCTIONEERS, AND COMMISSION AGENTS,

FOO-CHOW-FOO.

Agents for THE LONDON AND CHINA EXPRESS, and THE LONDON AND CHINA TELEGRAPH.

TALBOT DEVINE AND CO.,

SHIP CHANDLERS, AUCTIONEERS, AND COMMISSION AGENTS.

Importers of all descriptions of Ship and Private Stores, from Europe and America.

HONG KONG AND WHAMPOA.

THOMAS KEPPELL

SHIP BUILDER, NAGASAKI.

Repairs promptly executed. Constantly on hand Masts, Boats, and Blocks. Ironwork Fitted to Order.

JOHN ROBERTS & SON,

AUCTIONEERS AND COMMISSION AGENTS, HONG KONG.

Agents for THE LONDON AND CHINA EXPRESS, and THE LONDON AND CHINA TELEGRAPH.

KILLICK AND MARTIN,

SHIP AND INSURANCE BROKERS, 29, NICHOLAS-LANE, LOMBARD-STREET, LONDON, E.C.

JOHN LITTLE AND CO.

GENERAL STOREKEEPERS AND COMMISSION AGENTS, SINGAPORE.

Agents for THE LONDON AND CHINA EXPRESS, and THE LONDON AND CHINA TELEGRAPH.

E. ST. J. FAIRMAN,

GENERAL AND COMMISSION MERCHANT, SHIPPING AND FORWARDING AGENT, ALEXANDRIA, EGYPT.

Agent for THE LONDON AND CHINA EXPRESS, and THE LONDON AND CHINA TELEGRAPH.

F. BLACKHEAD & CO.

AUCTIONEERS, SHIP CHANDLERS, AND COMMISSION AGENTS, HONG KONG.

THOMAS HUNT AND CO.'S

SHIP, DOCK, AND SPAR YARDS, WHAMPOA AND HONG KONG.

Every facility for Heaving Down, Docking, Repairing and Sparring Vessels of every size. Sheathing Copper and Metal constantly on hand.

ALLSOPP'S INDIA PALE ALE.

GEORGE JONES, of No. 8, Billiter-street, London, appointed Bottling Agent of the above celebrated Ale. Orders to be accompanied by cash, credit, or reference. Price 7s. 6d. per dozen quarts; 4s. 9d. per dozen pints. Free on board in London.

Printed for the Proprietors by WOODFALL and KINDER, Angel-court, Skinner-street, London, and published by WM. TWEEDIE, at No. 337, Strand, in the parish of St. Mary-le-Strand, London.—Monday, May 13, 1861.

List of Passengers.

PASSENGERS INWARD.

By this Mail.—From Hong Kong for Suez: Mr. C. Bandini. For Marseilles: Dr. and Mrs. Bridges and child, Mr. and Mrs. Lay, Mrs. Fey and child, Messrs. Sutherland, T. K. Ashton, R. D. Tucker, Schmidt, R. Jardine, Capt. Ely (99th Regiment), and Don Jose Caravaca and daughter. For Southampton: Mrs. Howell and child, Dep. A. C. Gens.. Lewis and Wiuter, Messrs. Gibbon and Maxwell, Comr. Innes, Ensign Ward (99th Regiment). Mr. and Mrs. Greig, Messrs. J. Lockhart, T. Crawford, and Baker, and six sergeant conductors M.S. Department.

PASSENGERS OUTWARD.

Per P. and O. str. Ceylon, 20th May.—From Southampton to Hong Kong: Mr. Fenwick, Mr. S. Watson, Ens. Cotton, Mr. Piecope, Mr. Wilkinson, Mrs. Randall and infant, Mrs. Trimmer. To Shanghai: Mr. Westall. To Penang: Mrs. Scott, three children and governess. From Marseilles, 28th May, to Hong Kong: Mr. Perceval.

Per P. and O. str., 4th June, from Southampton to Shanghai: Mr. John Mackillop, Mr. E. C. Essex. To Hong Kong: Mr. Sheppard, Mr. Palmer. From Marseilles, 12th June, to Hong Kong: Dr. W. Lockhart, Mrs. Percival. To Shanghai: Mrs. Parkes.

Per P. and O. str., 20th June, from Southampton to Hong Kong: Mr. Maintz. To Shanghai: W. A. J. Whalley, Mr. Lucas, Mrs. Findlay and two children.

Per P. and O. str., 20th August.—From Southampton to Hong Kong: Mr. and Mrs. Woods.

PASSENGERS ARRIVED OUTWARD.

At Hong Kong, per Eureka, from New York: Messrs. Porter, Ladd, and Frinck. Per Rajah of Sarawak, from London: Mrs Huffum and two children, Mrs. Keppel, and Mr Austin. Per Traveller, from London: Rev. R. and Mrs. Lechler, R. A. Krolczyer, and Mr. Charles Gaupp. Per Madras, from England, &c.: Messrs. Woolley, Wilkinson, Clark, Parr, Toole, Power, Kingdom, Amore, Wilson, Wright, Cumming, Lieuts. Bond and Atkinson, Mrs. Leech, Mr. and Mrs. Mackenzie, Mr. and Mrs. Lawrence, Messrs. Eaceleca, Petel, Jenny, Reed. For Shanghai: Messrs. Love, Ward, Jackson, Overweg, Copper, and Mr. and Mrs. Warden. Per Fiery Cross, from Calcutta: Mr. Shella, and two children, Dr. Lyster, and Mr. Hortman.

Summary of News from the Far East.

RETURN OF THE YANG-TSZE EXPEDITION TO SHANGHAI.

The *Coromandel*, bearing the flag of Admiral Sir James Hope, K.C.B., with the *Cooper* and *Atalante*, have returned from the expedition up the Yang-tsze. H.M.S. *Snake* was left at Hankow, the *Havock* at Kiu-Kiang, the *Centaur* at Nanking, and the *Banterer* at Chin-kiang. Mr. Parkes, who remained to settle some details at the different ports in his way down, arrived here in the *Bouncer* on the 5th April.

A very long and important letter in the *North China Herald* gives us varied and minute details of the expedition up to the latest date. From this letter we shall transfer to our columns every point of information likely to prove interesting to our readers. Hankow, which will, probably, ere long, become a great emporium of British trade, stands on the junction of the two rivers Yang-tsze and Seyang. The latter river is crowded with every kind of sailing craft. The main objection to Hankow as a trading city arises from the lowness of its position. From July to September the whole of the neighbouring country is under water, and about every fourth year the rivers rise so high that "many of the inhabitants have to take refuge in the upper stories of their houses, and the poor in lower houses find such shelter as best they may upon the few narrow hills in the neighbourhood." The aspect of Hankow is striking. The streets are numerous and in the best Chinese style, and a thoroughly business-like air pervades the place. British cotton manufactures of all kinds are sent here from Canton and Shanghai. In woollen cloths it is expected that we shall encounter a strong opposition in the two great companies which monopolise the Russian trade. The route for this traffic is up the Seyang River for about 300 miles to Seyang, which is the great port for trans-shipment for Tien-tsin and Peking. The country trade in Hankow is enormous, and there is no idle population. Many of the merchants' families reside at Woochang-foo, a walled city surrounded by fine ranges of hills, some of which are 2,000 feet in height.

On the 13th March Admiral Hope proceeded on an excursion up the river, as far as the Tung-ting Lake, which is 160 miles above Hankow. Yoh-Chow, at the mouth of the lake, was once a flourishing city; but it has been, in great measure, destroyed by the insurgents. It is in the midst of large tea-growing districts, but the most important place seems to be Siangtan, some distance down the river of the same name, running from the south, where teas are collected for manipulation and packing for foreign markets. It has been in communication with Canton, but the dealers say they would, of course, come to Hankow were that place open as a foreign depot. Great Kishan, a hill on which a small quantity of tea is grown for the Emperor's own use, is to the south of the lake. The price for it is said to be 6,400 cash per catty—about twenty shillings a pound—but it is not to be had for money. Changteh, a short distance up a river on the west of the lake, and Changshan on the east, are subsidiary ports to Siang-tan; Siute, on the left bank of the river, is also a place of activity and importance.

Digitized by Google

During the short time that the expedition remained at Hankow a report was spread that the rebels were approaching. The scene became one of complete panic and confusion. Everybody was eager to escape from the city, and two days after the alarm had been given almost the whole fleet of junks had disappeared, and the streets lately so full of life were deserted save by a few stragglers and coolies. It is this constant fear of attacks which bids fair in some measure to counteract the advantages we expect to derive from a wider intercourse with China. In the present instance the Imperialists acted promptly and vigorously in their endeavours to restore order. No fact of noticeable importance is related on the return of the expedition, which reached Shanghai on the 20th of March, having been forty-nine days up the river. We need scarcely say how much this expedition is indebted to the ability and energy of Mr. Parkes, who, undaunted by the perils and sufferings he had undergone at Peking, has been as active as ever in his endeavours to promote the interests of his country. Mr. Parkes has now left Shanghai for Peking, but it seems uncertain what position he will ultimately hold in China, the Consulship at Shanghai, to which he was officially appointed, not having been yet filled by him, owing to his services being in demand at so many places. The fears entertained with regard to the navigation of the Yang-tsze have been entirely removed by this exploration of the river; and there can be no doubt that the steam companies now forming for the purpose of establishing regular communication with the different ports have every prospect of success. We may mention, in conclusion, that an expedition under Commodore Stribbling will shortly proceed up the Yang-tsze to make arrangements for the carrying on of the American trade.

REPORT TO THE SHANGHAI CHAMBER OF COMMERCE.

SHANGHAI, 30th March, 1861.

SIR,—We have the honour to transmit to you, for the information of the Chamber of Commerce, our report on the voyage which we have just completed up the Yang-tsze river as far as Hankow, dividing our remarks under separate heads.

1. THE NAVIGATION OF THE YANG-TSZE.—The chief difficulties are below Nanking, and the most critical part of the river is the Lanshan crossing, forty-two miles from Woosung, where the channel is crossed from the southern to the northern side of the broad bed of the river. A small staff of permanent pilots will probably be required for this portion of it. Beyond Nanking it is quite possible to make the way up to Hankow by aid of the chart and sailing directions alone; but as strangers, especially such as are unused to river navigation, would be very likely to fall into mistakes, we would recommend that pilots should be taken by masters of vessels until they shall have made themselves personally acquainted with the landmarks.

At this season the current is moderate. It has not been found to exceed at any place 3½ knots an hour, and the average is about 2. The waters, however, begin to rise early in the year, and by July or August an immense extent of land about Hankow is flooded until September or October, and the depth of the river is increased, certainly by as much as [illegible] feet above the level in December, 20 feet, and occasionally by 25 to 30 feet above the [illegible], when it is at its lowest.

We have had no means of obtaining any specific information regarding the effect of this rise on the force of the current; but, from all we can hear, there is no season in which junks cannot ascend, aided, no doubt, by the favourable winds which blow steadily during the summer.

Local pilots might be of essential service in taking vessels through channels where sufficient water might be found, without meeting the full force of the stream. The distances to the chief places are, to

Chin-kiang	... ...	138½ nautical miles.
Nanking, 435	... ...	182 „
Kiu-kiang, 251	... ...	433 „
Hankow, 137	... ...	570 „
Yoh-chow, 157	... ...	727 „

2. CHIN-KIANG.—Trade at this place is completely at a standstill, the city only being in the hands of the Imperial Government—the rebels ranging over the country on either side of the river. The Grand Canal also is obstructed in its southern course, but to the northwards as far as the old bed of the Yellow River it seems to be open to commerce, and is to be entered from Itching, Kwachow, opposite to, and a large creek leading directly to Sin-new-miow, below Chin-kiang.

The rich country to the eastward of this portion of the canal and traversed by its branches is still undisturbed, and the security afforded by the British flag may enable dealers to come to this port who could not venture on the longer voyage to Shanghai.

We append a statement of market quotations obtained here, which is significant, both as showing the nature of the demand which is from the camp only, and that prices here and at Nanking are quoted the same. There is reported to be a place on the river between the two, which is practically neutral ground for such traffic.

3. NANKING.—There seems no prospect for the development of commerce with this city, or the districts controlled by it, while under its present rulers. The people are enslaved. The soldiery, unpaid, but habituated to plunder, are little likely to engage in any industrial pursuits. The rulers, so far from being able to govern the country, do not even admit within the walls of their capital the shopkeepers necessary for the supply of the daily wants of the residents.

The proclamations which occasionally appear, apparently designed to encourage trade, must be read with regard to this state of affairs. Their design can at present extend no further than to bring in provisions at cheaper rates, or supply a market for the soldiery, which, commercially speaking, can only be on a very small scale.

It remains to be seen how far these evils can be mitigated by foreign influence. The present design of the Taepings seems to be to seize all places where British settlements have been made, to enforce the recognition of their pretensions.

4. KIU-KIANG AND HUKOW.—Both these places were visited and examined with regard to their capacities for the site of the second new port on the Yang-tsze. The latter is just at the mouth of the Poyang Lake, but the place is small, and the steepness of the hills on which it is built gives no space for the requirements of a trading depot, while, on the opposite shore, the alluvial soil is liable to be flooded in the summer. It is not, nor has it ever been, a place of trade.

Kiu-kiang has always been a port of some consequence, though even before it was devastated by the rebels it was somewhat on the decline. Both equally command, practically, the navigation of the Poyang Lake.

Into this lake fall numerous navigable streams, running through the rich Black Tea districts to the westward: the rivers Fu and Kan, which run through Kiang-si from the neighbourhood of the Mei-ling pass, the great high road to Canton, and what, under existing circumstances, is more important than all, the rivers flowing from the eastward are connected by canals with the creeks traversing Fychow, Moyune, and, in short, the whole of the Green Tea districts, which are thus as accessible from this lake as from Souchow and Shanghai. It is, in short, a centre of a most extensive and important network of river and canal communication, brought to a very high state of perfection by the Chinese in more prosperous times.

The chief commercial city on it is Woochow (or Woochin) on the western side. The dealers speak of this as of another Souchow; and those who visited it describe it as exhibiting every sign of prosperity. Nanchang, the provincial capital, is not spoken of as a place of much importance.

The partial running survey of the lake shows that it is generally shallow, but the bed of the river running through it is sufficiently deep, but so narrow, that it would not be easy to navigate vessels of any size.

As regards the goods likely to be in demand here, we need only say that all that the Green Tea dealers have hitherto taken from Shanghai they would equally be able to take from Kiu-kiang, where these districts approached from the latter instead of the former port. The dealers speak very confidentially of being able to bring teas to Kiu-kiang, notwithstanding the presence of the rebels in the districts, saying that they "know the roads," and it is obviously very unlikely that an irregular force could cut off communication with places to be approached from so many different directions, though we have most ample testimony that the presence of these rebels most grievously impoverished and depopulates the districts which are subjected to their visitations.

The following distances have been given to us:—

From Kiu-kiang to	Ningchow,	by land,	300 le—by water 500 le.
„	Fychow	„	500 „
„	Moynne	„	480 „
„	Tingkai	„	570 „
„	Taiping	„	600 „

But by water, through rivers and canals, the distance to all is said to be about the same, viz., about 1,000 le. (Three le are nearly equal to an English mile.)

If peace were restored throughout the country, this port would be of less importance, but if will always be useful and desirable, securing, as it would do to a great extent, a competition between native boats and foreign vessels for the conveyance of tea to Shanghai, and further affording a check on attempts to enforce an extortionate levy of Customs duties in the interior by the choice of routes which would be kept open to foreign settlements.

We append a list of prices, which may be found of some interest, but can afford no criterion of what they may be when trade is fairly opened. The exchange is in favour of imports, 100 taels of sycee in Kiu-kiang being equal to 102 Shanghai taels. The tael was worth 1,640 cash. Mexican dollars did not pass freely at 1,000 cash each.

Coal of good quality is said to be procured near Woochow, where it is largely used by distillers and others who have large factories in and near the city.

Weights appear to be the same as those used in Shanghai and Canton.

There was a small consumption of silk in the neighbourhood for the manufacture of braid for local use. The supply was drawn from Huchow.

5. TOWNS AND PLACES ON THE RIVER.—Regarding these we had no opportunity of obtaining reliable and specific information. Speaking generally, from Chin-kiang to Ngan-king, where the rebels are now being besieged by the Imperial troops, we saw everywhere traces of misery and destruction; few, if any, of prosperity. Beyond this, signs of improvement gradually began to appear, and the towns marked on the chart showed indication of activity and revival, which warranted the expectation of a large demand from local dealers in support of our trade in the larger depots. Numerous well-built junks were seen above Kiu-kiang.

6. HANKOW.—We shall proceed to lay before you the imperfect results of our investigations in this most important emporium of Central China.

The Poyang Lake, as we have already shown, is the centre of one extensive system of water communication which has always been connected with Shanghai. Hankow is the head of another and probably larger system of communication by river and land routes, both up the Yang-tse and its tributaries, including those running into the Tung Ting Lake, to which more special reference is made hereafter, and up the River Han (called also Seyang), from the city of that name about two hundred and fifty miles up its course, which is the port of transhipment on the route to Tien-tsin and Peking.

Woo-chow-foo, on the opposite, the right bank of the Yang-tsze, is a large provincial city, which was regaining its prosperity, but it has no special connection with commerce.

Hang-ang is a place of no importance.

Digitized by Google

Our reception has been entirely satisfactory. The Treaty of Tien-tsin has been duly published, and supported by other proclamations. The dealers were free in giving information, and were looking forward to a rapid extension of their trade in the coming season.

You will already have heard that these three places were deserted on the 19th and 20th inst., on an alarm consequent on the advance of a rebel army to Hwang-chow, within forty-five miles of Hankow, on the same—the left or northern—bank of the river. The abandonment was most complete: not a house or a shop was open, and it became equally impossible to purchase goods to check quotations, or to pursue inquiries upon any subject of doubt or interest.

This most sudden and unexpected change will account in some measure for the deficiencies of the following portion of our report, which in all matters of detail refers to a state of affairs, which, at least for the present, has completely passed away. The last reports are up to the morning of the 22nd inst. The measures taken by the authorities for the protection of the deserted property seemed sufficient to secure it from plunder by local robbers, but no confidence can be restored while it is threatened by an insurgent army.

A. CURRENCY.—It is impossible to get exact and reliable information without entering into actual transactions, but we believe 100 tacls sycee in Hankow will give 103 to 103.3 in Shanghai taels. So many different accounts are given of the way in which this is made up that we cannot venture to put forward any explanation. Some even make the outturn less by about 1 per cent. The sudden flight prevented any of the party securing a set of bullion scales.

Should it appear when business is resumed that different methods are used, we would strongly recommend the first residents to insist on one uniform scale for transactions in foreign commodities.

B.—WEIGHTS and MEASURES are as in Shanghai and Canton. The Che, or foot of 14 inches, is in common use, and woollen goods are retailed by it.

C.—EXCHANGE was, 1,600 or 1,650 cash per tael, 1,040 to 1,100 cash per tael for the Mexican dollar, not however current, 15½ tacls sycee, —1 tael Peking gold.

D.—COTTON GOODS—Foreign: The supply this year was chiefly drawn from Canton. Last year the communication seemed more open with Shanghai, which would probably be by river and canal to the Poyang Lake, to Woochin and Kiu Kiang, and thence by junks up the river. The former part of this route would be closed when the rebels took Souchow.

The goods coming from Canton are mostly repacked in boxes containing about half the original packages, but we saw all the marks and chops of English fabrics and American drill with which we are familiar in the seaports.

The prices, considering they were quoted in a market avowedly bare of stock, are not excessive, and would rebut the impression that British goods have been subjected to any heavy "squeeze" *in transitu*, in addition to the necessary cost of conveyance.

Both staples and chintzes, handkerchiefs, damasks, and other fancy goods, command attention. A list of prices is appended. They are such as dealers said they would give; and of staples, they seemed quite prepared to make large purchases.

E.—We further lay before you musters and descriptions of the native-made staple grey cotton cloths, the prices cannot be considered low as compared with British manufactures. Native-made yarn is quoted 30,000 cash for white, 20,000 to 26,000 cash for yellow. Cotton, which is very good quality, 16,000 to 18,200 cash; all per picul of 113 catties. The spinning wheel is to be seen in every cottage in the neighbourhood.

F.—We did not hear of nor see any British yarn.

G.—WOOLLENS.—It cannot be denied that our manufacturers have strong competitors in the Russo-American and Amour companies, who have a monopoly of the Russian trade with China. The descriptions they supply compete directly with our medium and army cloths, and Spanish stripes are injuriously affected. Some samples accompany this report, from which members will be able to judge of their quality.

The best is 72 inches within the list. 19⅝ yards long (5 chang); 30⅝ lbs. weight (23 catties) the price of which was given as taels 27 per price, or taels 1.3.7 per yard, or by retail 7 mace per che, or taels 1.8.0 per yard. The second quality measures 70 inches only within the list, but is about the same weight and length. The price was taels 23 per piece. Taels 1.18 per yard, or retail 6 mace or taels 5.15 per yard.

The route for these goods is from Tien-tsin partly by river and partly by land, in which transit we hear packhorses carrying loads of about 300 catties each are used, to Seyang, on the Han river.

Long ells are largely used, and do not seem to be interfered with by Russian cloths. Camlets also are a staple, but the better qualities only seem to be liked.

H.—JAPANESE SEAWEED.—Even so bulky an article as this has found its way to Hankow, and is quoted Tls. 4.7.5. to 3.0.0 per picul.

I.—COAL.—Is to be had of various qualities, 300 to 700 cash per picul (the latter an absurd demand) is asked for it. That it can be used for steam purposes is certain, but its value and quality can only be ascertained by experiments.

K.—SILK.—The crop of Sz-chuen silk we heard estimated at from 1,000 piculs to 2,000 bales. The quality quoted at about 200 taels is very low, equal at best to Leyangs or No. 3 Taysaams. We hear also that the silk used for embroidery, a branch of village industry followed in the neighbourhood of Woo-chow-Foo, is brought from Huchow, which is a strong confirmation of the general assertion that finer qualities, at all events at present, are not produced in Sz-chuen.

L.—TEA.—Dealers agree in saying that, if Hankow be opened, that hitherto grown and prepared in the neighbourhood of the Tung Ting Lake would be sent there instead of to Canton. We learn that the great industrial centre of this district is Siangtan, about 500 le from Hankow, at the mouth of the Siang-suey running from the southward. Here teas are collected for manipulation and packing for Canton—Chang-teh, up a small river to the west, and Chang-shah on the east of the river and south of the lake, being subsidiary depots, all drawing considerable supplies of English goods from Canton. Yoh-chow, close to the entrance of the lake, is in the midst of a rich tea-growing district, but it was devastated by the rebels in 1853, 1855, and 1857, and has never recovered from the last blow, and is so poor a market for imports, that silver has to be sent there generally for all the tea collected in the neighbourhood. Sin-te, on the left bank of the Yang-tsze, thirty-seven miles below Ao-chow, is described as a large and flourishing city.

We do not hear of any green tea grown in this direction; nor is any tea grown in the vast alluvial plains about Hankow, nor as far as we could hear or observe in the isolated hills rising up above them.

We can afford no special information about any field which can be regarded as actually new to the European trade in this or any other branch of commerce, though there can be no doubt that a rapid expansion will be the result of our free intercourse with Hankow, if it be not crippled by the operations of the insurgent army.

M.—OPIUM—Native drug is so much cheaper than Indian that it commands the market. There are three kinds, viz.:—

Szetn, grown in Shan si and Shensi, is very strong, but not liked, worth 25 taels; Nantu, grown in Kwei-chau and Yunnan, 23 taels, and Chuentu, grown in Sz-chuen, 20.6 taels per 100 taels weight, about 8¼ lbs. avoirdupois; but owing to the sudden panic we were unable to get the exact weight by a known scale.

Malwa is worth 20 to 21 taels per bag of three catties, but the high price checks the sale.

Patna is not appreciated.

Of the native produce the Nantu is most liked, and some say is also most largely used, while other reports state that the lower price of Chuentu secures for it the larger sale.

We are told also that the Nantu gives 60 per cent. of extract used for smoking, Chuentu, 70, and Malwa, 75, but have no means of verifying the statement.

N.—NATIVE PRODUCTS.—Iron is largely produced, but the quotations obtained differ very widely, and owing to the sudden exodus of all those who could give explanation, are now quite inexplicable. Rough iron in small bars or "pigs" was variously rated at 1¼ to 3 taels per picul. Steel at 9 to 18 taels per picul. Lead from Sz-chuen was quoted 5½ to 7½ taels, copper from the same quarter, 23 to 29 taels, and white copper at 42 tacls. It likewise supplies sugar, quoted here at 4 taels for brown up to 6½ for very good white, and candy at 8¼ taels; all apparently from the cane.

Excellent vegetable tallow is to be had at 3.9 to 4.5 taels per picul, but we could not ascertain in what quantities. Flax of superior quality is abundant, and is largely made into cordage of a very good description.

The manufacture and consumption of oils also is very extensive. A large trade is done with Canton in the produce and manufactures of the south of China. The fabrics of the unfortunate city of Souchow were common in the shops. Merchandise of the most various kinds and from all quarters of China were to be found in this so lately flourishing port, and the loss entailed by its abandonment must be felt throughout the whole empire.

It is to be apprehended that the expected advance of the rebels westward along the south bank of the Yang-tsze, may seriously affect the trade with Canton; and we cannot conclude our report without expressing our strong opinion that this movement can in no just sense be considered political, still less patriotic or constructive, but unhappily in the present lamentably weak and corrupt state of the Imperial Government it is impossible to foresee how far the ruin, desolation, and actual depopulation which have hitherto marked the course of the Taiping rebellion may be extended, or how long the advantages reasonably expected from the opening of the Yang-tsze may be counteracted by the anarchy and disorganisation which entail such dire evils on all classes of society in the Chinese Empire.

We have the honour to be, sir, your most obedient servants,

ROWLAND HAMILTON.
A. MICHIE.
T. FREDK. BALLANCE.

To R. C. Antrobus, Esq., Chairman, British Chamber of Commerce, Shanghai.

MEMORANDUM OF PRICES AT CHIN-KIANG.—Saltpetre, 20 taels per picul 100 catties. Gunpowder, fine, in tins, 2 taels per tin; do., common, 4 tub. (28lbs.?). Guns, caps, spy-glasses, pistols, &c., much wanted. Opium, Malwa, retail, 48¾ taels per bag 3 catties. Souchow crape silk, much wanted at very dear prices; shirtings, grey, do., bleached, not wanted; do., red, yellow, blue, 4 taels per piece, other foreign goods not wanted; Canton silk, 16in., 40ft., 8 taels, worth there about $4½; colours, Chinese, for house painting, wanted; salt (in Sin-now-meow about half), 2 taels per picul; sugar, 12 taels per picul; rice, common, broken, 4 taels per picul; Carolus dollars, 1,450c. (same as the tael of Shanghai sycee; Mexican dollars, 1,000c.; coal, not to be bought; American drills, said not to be wanted, though we saw them in use for tents; provisions, dear; fowls, 300c. per catty; ducks, 250c do.; beef, 150c. do.; mutton, 160c. do.; fish, 20c. to 60c. do.

QUOTATIONS AT KIU-KIANG.—Grey shirtings, 6½ catty, 1 tael 8c. per piece, do., 7 catty, 2 taels, do., 8 catty, 2 taels 7c. White, do., 60 reed, 1 tael 7c.; fine, 2 taels to 2 taels 20c. American drills, 3 taels. Brocades and spot shirtings, white, 2 taels 4c. to 2 taels 8c. per piece. Brocades, assorted colours, 2 taels 8c. to 3 taels 4c. Chintzes (old patterns), 1 tael 6c. to 1 tael 8c. Handkerchiefs, blue and bronze, 70c. to 100c. each. Long ells, scarlet, 8 taels per piece; assorted, 7 taels; Spanish stripes, 9c. Camlets, inferior to common, 15 taels to 21 taels per piece; do., best, 21 taels to 22 taels. Lastings, 14 taels. Opium, Malwa, 24 taels per bag of 3 catty; do., Patna, not in demand. Cotton, good, 10 taels per piece of 140 catty. Rice, common, 3,600c. per 145 catty. Sugar, 14,000c. per 100 catty. Flax, clean yellow, 11,000c. per 100 catty. Gold, 20,000c. per tael, same as Soochow tael. Sycee, 1,640c. Mexican dollars, 1,000c. each. 102 Shanghai taels; 109 Kiu-kiang taels. Wages of carpenters, bricklayers, &c., 160c. a day. Wages of coolies for earthwork, 20c. per picul weight. 35,000 cash now asked for land for building purposes. Wood for building to be had in abundance at Woochow. These quotations represent only transactions on a very limited scale.

PRICES AT HANKOW.—Grey shirtings, 6½ catty, 2 taels 5c. per piece,

Digitized by Google

do., 7 catty, 2 taels 6c. to 2 taels 7c., do., 7½ catty, 2 taels 7c. to 2 taels 8c.; do., 8 catty, 2 taels 8c. to 3 taels. White, do., 56 reed, 2 taels 2c. to 2 taels 3c.; do., 60 reed, 2 taels 4c. to 2 taels 6c.; do., 64 reed, 2 tael 8c. T-cloths, grey, common, 1 tael 8½c. to 2 taels 2c.; do., fine, 64 reed, 2 taels 4c. to 2 taels 6c. American drills, 3 taels to 3 taels 2c. Spot shirtings, white, 2 taels 4c. to 2 taels 5c.; do., assorted colours, 3 taels 2c. to 3 taels 4c. Brocades, white, 2 taels 5c. to 2 taels 6c.; assorted colours, 3 taels 2c. to 3 taels 4c. Damasks, 6 taels 2c. to 6 taels 4c. Long ells, scarlet, 9 taels, 5c. to 10 taels; assorted colours, 8 taels to 9 taels. Camlets, inferior and common, 16 taels to 18 taels; do., best BB, 21 taels to 22 taels. Lastings, 14 taels to 16 taels. Spanish stripes, scarlet, 1 tael to 1 tael 1c.; do., assorted, 0.8.5 to 0.9.0. Chintzes, inferior, 1 tael 3c. to 1 tael 8c. per piece; common, 2 taels 2c. to 2 taels 4c.; cochineals, 2 taels 7c. to 2 taels 8c. Handkerchiefs, blue and bronze, 7c. to 1 tael per doz.

Oils, 6 taels to 6 taels 4c. per picul of 95 catty; do. common sorts, 3½ taels to 5 taels; flax, white, 6 taels; do., best yellow, 6 taels 2c.; China paper, 15 taels to 16 taels per bale, 60 sheets of 35 piculs; black pepper, 11 taels per picul; rhubarb, very coarse, 7½ taels to 9 taels; Sz. Chuen varnish, good lacq., 25½ taels; do., common, 19½; bees' wax, 30; tallow vegetable, good quality, 3 taels 9c. to 4 taels 2c.; sugar, Sz Chuen, brown, 4 taels to 4½ taels; do., white, 6 taels to 6½ taels; do., candy, 8 taels to 8½ taels; silk, Sz Schuen, very course yellow, 19 taels 2c.; lead, Sz Chuen, 5½ taels to 7½ taels; quicksilver, Sz Chuen, 55 taels; copper, common, 23 taels; do., red, 29 taels; do., white, 42 taels; steel, first quality, 18 taels; do., second do., 14 taels; do., third do., 11 taels; do., fourth do., 9 taels to 10 taels; ginseng, 11 taels per catty; Japanese seaweed, first quality, 8 taels per picul; do., second do, 6½ taels per picul; do., third do., 4½ taels; cotton, 10 taels to 13 taels per picul, 113 catties; wool, 1,900c. 100 catties; yarn, native white, 30,000c. per picul, 113 catties; do., yellow, 20,000c. to 26,000c.; Russian cloth, 72in., 19½ yds, 22 catties, first quality, 27 taels per picul; do. cloth, 70in. 19½ yds., 22 catties; second quality, 21 taels per picul; native cloth, 12in., 12 yas., 15oz., Kinkoow, 780c.; do. cloth, 15½in. to 16in., 12 yas., tlb. 13½oz., Hufung, 650c.; do. cloth, 14½in. to 15in. 12 yas., tlb. 13½oz., Ianlow, 610c.; do., cloth, 16in. 12 yas., tlb. 4½, or Manghan, 480c.

We had no means of checking these quotations of produce, nor of ascertaining whether the picul by which they were sold contained more or less than 100 catties. Discounts amounting to a very heavy percentage are allowed on some articles, but of these, owing to the fight on the 19th, we could obtain no reliable information.

JAPAN.

There is no intelligence of any consequence. The British and French Ministers were installed at Yedo, and business was recovering slowly from the late untoward events. At Nagasaki the new godowns and residences of the foreign community were progressing, and the import and export trade increasing. The following appears in the *Daily Press*:—

The gold, silver, and copper mines of Japan are a monopoly of the Government, and they never get out more copper than is wanted for local consumption, and only occasionally does a surplus exist for export. The coal mines are owned partly by the Government and partly by wealthy individuals, and there exist no appliances for working the coal mines to any great depth.

The tea districts are extensive, and the production could be increased to any extent if foreign demand required it. Among the Japanese, for their own use, green tea has the preference.

Rice is abundantly cultivated in all parts of Japan, and forms the chief article of food. The export is prohibited under the belief that a large export, such as would be likely to occur, would advance price, and thus operate oppressively on the common people.

As to the production of raw silk, as with tea, the production could be largely increased if trade with other nations required it.

CHINA.

TIEN-TSIN.

Dates from Tien-tsin are to 30th March, brought down by H.M.S. *Ringdove*. Mr. Bruce left for Peking on the 22nd with a small escort, and Mons. and Madame Bourboulon had gone there also. The Emperor was expected from Zehol on the 29th.

The rebels were said to be about 300 or 400 miles from Tien-tsin, but not much fear was manifested by the people, who relied upon the fact of a large Imperial army being between the insurgents and them. The inland traders had not yet come forward, and were not expected for ten or fifteen days; consequently but little business was doing. There had been very little rain during the past two months, and the ground was very dry, the weather very fine, warm and fresh by day, but still cold at night. It, however, has undergone some sharp changes; on the 13th ultimo there were twenty-six miles of the river frozen below Tien-tsin, on the 14th it broke up, and on the 16th the weather was so mild that the peasants were stripped to the waist working in the fields. The races were to come off on the 3rd inst. It is not likely that the troops will leave till next autumn, and it appears the Chinese authorities are now rather anxious for their continuance there to overawe the rebels on the Yellow River. H.M.S. *Reynard*, which left Shanghae on the 22nd March, arrived on 27th. The firm of Messrs. Grant, Mellon, and Co. had been established for commission business.

Vessels in the Peiho were the *Louis, Alma, Sterling, Eamont*, and the *Martha and Emily;* the two latter vessels had cleared from Tien-tsin, the one for Canton and the other with ice for Hong-Kong.

A letter, dated 14th March, in the *Hong Kong Register*, says:—Our mails up to the 26th December have at last been received, *via* Chefoo, and that of the 10th January is reported to be now at Taku. The ice on the coast broke up about the 1st, and n the river at Tien-tsin on the 12th. It set in on the 20th December, so we have had nearly three months of it. The thermometer in December ranged from 45 to 5; in January, 34 to 3 below Zero; in February, 35 to 4 below Zero.

CHEE-FOO.

Dates from this port are to the 1st April. There was some demand amongst the Chinese for foreign goods, and every prospect of a brisk trade springing up. The merchants and capitalists were however rather nervous in consequence of the position of the Honan rebels, who have formed a coalition with and sworn allegiance to the Taiping insurgents, and have advanced as far as Tse-nang-foo a large and rich town lying at a right angle between Peking and Che-foo, and about equi-distant from those places. Their most probable intention is to work their way northward to Tien-tsin and from thence to Peking: failing in that they may file off to the eastward on Chee-foo. Certain it is that they are in the ascendancy in those parts. Sangko-linsin is in the field against them, but has been defeated on several occasions, and by last accounts is gradually giving way.

NANKING.

A blasphemous proclamation has been issued by the rebel king for the protection of foreigners. We subjoin only a portion of it.

PROCLAMATION FROM TEEN WAN.

Chum—(equal to the royal We) proclaim to nephew Ho, *i.e.* the Western King, and nephew Fuk; the brother Yuk, *i.e.* Ying Wang; the brother Sew, *i.e.* Chung Wang; the brother Ngen, *i.e.* Tsan Wang; nephew Yung; the brother Hien, *i.e.* Shi Wang; the brother Poo, *i.e.* poo Wang; the brother Chong, *i.e.* Chong Wang; nephew Wang, with the officers of the army of the five highest degrees; the general who protects the city; the director and assistant directors of the six boards; foreign merchants in and out of China, with the whole world, forming one family; one body politic, with all officers and peoples that they may know. The foreign merchants engaged in trade are to be looked upon as brethren. Any who disorderly kill foreigners shall certainly pay the forfeit of their lives. Ye nephews and others respectfully regard the law without screening, forbearing, partiality. In a former proclamation, We gave foreign transgressors into the hands of the Leng-chow (*i.e.* Minister of Foreign Affairs), together with the Consuls to be judged in the premises, and after judicial consultation and decision, to request our final confirmation. One body politic should exercise benevolent harmony for ten thousand years.

Now We proclaim the additional establishment of a Mandarin Judge, who, together with the Minister of Foreign Affairs, shall manage the cases of foreign transgressors. Let the foreigners publicly recommend a candidate for the office of judge, avoiding partiality, and invite us to confer the office and seal on him.

The Sire and Brother (meaning God the Father, and Christ), myself, and son, are the great united Lord over the family of man, dispensing benevolence and love throughout. Let each country appoint its own official Consul, to unite with the Leng-chow Minister in managing the concerns of foreign merchants; besides whom let them publicly recommend a just, upright, unselfish man to become the official Judge. Without distinction of nations, as to the recommendation, it is altogether desirable that he should be upright, straightforward, good, and true. One who will not help the Imperialists should be put into this office. The said officers, together with the Leng-chow Minister and Judge, shall decide upon each case of all foreign affairs, and then request our ultimate confirmation of their decision.

Let the officers of the civil service obey this proclamation, and prepare a seal for the Leng-chow Minister of Foreign Affairs received into the nobility of heavenly righteousness; also a seal for the Official Judge, *i.e.*, the Lieutenant Minister, and each of the Consuls.

Digitized by Google

Christ's sacred decrees say, "Be publicly sincere; not privately selfish." Regard this.

Of this proclamation print many and circulate them everywhere, even among the western foreigners. Regard this.

As Lord, it is not proper for *us* to attend to ordinary affairs; nephews and others addressed will henceforward obey injunctions. Exert yourselves in all matters, uniting in consultation to bring them to decision, and report the same to the young Lord for ultimate confirmation. Observe this.

The following letter addressed by the Rev. I. J. Roberts to the editor of the *North China Herald*, contains, in answer to the queries of a correspondent, the view which he has formed of the rebels, after long intimacy with them:—

Question: What is their (the revolutionists') government?

Answer: Martial law, as far as I have yet been able to discover from common observation. They have lately issued a law book, but I am sorry to say I have not had time to read it. I am studying the Nanking dialect, and that keeps me rather busy.

Question: Do the people, the better classes, accept their rule?

Answer: They simply have the choice between doing so, or yielding up their heads. And of two evils (should they think their rule such), of course they would choose the least; and without venturing to grumble, submit to their rule.

Question: Will you state what seems to you their present position?

Answer.—This is rather an intangible question to work out. It seems to me—1. That Nanking is secure against imperial attack, without foreign assistance; this is the first and foundation position. 2. That they are yet in a revolutionary state, without any treaty relations with foreign nations, or other government than comes under martial law. This is their political position. 3. They worship God daily under the name of Heavenly Father Shangti, and heavenly elder brother Christ, but not according to New Testament usages. They have no regular immersion or Lord's Supper; and the doxology and hymn which I taught Hung Siu-taiuen when he was with me at Canton in 1847, I fear they are using (some of them at least) as the Jews did Moses's serpent, worshipping them formally instead of the God whom they praise. They are at any rate now sung I presume by millions every day. This is their religious position. And now, our position is to stand still and see the glory of God. We cannot control this matter. We can only pray that God will overrule it for good.

SHANGHAI.

The report of the Inspectors of Customs for the half-year ending December 31, 1860, has been issued, from which it appears that the foreign imports from all parts have been of the value of £5,063,250 for general cargo, £2,866,580 for treasure, and £2,722,250 for opium; and of exports, £6,040,120 for general cargo, and £139,300 for treasure. The duties paid on imports amount to £62,000, and on exports £150,000.

The three travellers who accompanied the expedition up the Yang-tsze, with the view of proceeding overland to British India, have received such substantial assistance from the Chinese authorities, that they will have fewer difficulties to contend with than anticipated.

In compliance with the 13th article of the French Treaty, a proclamation has appeared, that all restrictions on Chinese subjects embracing the Roman Catholic religion within this province are cancelled, and that protection will be given to their converts.

FOO-CHOW.

A correspondent of the *China Mail* writes:—

"Our foreign community is rather dissatisfied at the incoming state of affairs as regards the custom-house.

"Tug steamers on this river would soon turn in a profitable sum to their owners. There is more danger between Pagoda Anchorage and the White Dogs group—outside the river—than from the White Dogs to the East India Docks in London. Indeed if steam were here, insurance offices would, I think, take off ¼ of cent. for ships taking steam to the White Dogs."

AMOY.

The crew of the Spanish ship, the *Bella Carmen*, came into Amoy in their longboat, reporting the loss of their vessel in How-e-too Bay on the 26th March.

Another shipwrecked crew also arrived in a junk on March 30th, their brig, the *Albatros*, having been totally lost on the Pescadores on the 27th, during the very thick fogs. She was bound from Amoy to Ningpo. Tosbee, her master, arrived with the crew.

SWATOW.

The *Hartford*, U.S. steamer arrived at Swatow, from Hong Kong on the 3rd April, and was to remain a few days. The *Cockchafer* is lying off the town, instead of at Double Island.

The Acting U.S. Consul has now a permanent residence in the town, and the English Consul has taken lodgings there in a Chinese merchant's house, so that the flags of the two countries are flying over a place where six months ago it was not considered safe for a foreigner to be seen.

It is reported that it will not be long before the whole community remove thither. Thus the extra 5c. per package now paid for conveyance to Double Island will be saved to the merchant, and trade at the port take a fresh start.

It is reported that the Commissioner of Customs is about to transfer his office from Double Island to Swatow.

HONG KONG.

The following emigrants have been despatched by the British West India Agency from December 1860, to April 1861. The depots at Canton, under the charge of Mr. Austin, are now closed during the south-west monsoon, and will re-open in October: The last ship cleared was the *Whirlwind*, for Demerara, on the 7th of April, and Dr. T. A. Chaldecott, of Hong Kong, has proceeded in her in medical charge. Mrs. Chaldecott and child have also taken passage in the *Whirlwind*.

The *China Mail* and *Daily Press* have noticed at length the letters of Mr. Macdonald, which appeared in the London *Daily News*. The former is full of praise, and the latter of condemnation.

No progress has been made in the Caldwell case, owing to the sickness of two members of the council.

The *Hong Kong Register* has again changed hands, and is now possessed by Messrs. Brown and Jeffery. Mr. Robert Strachan, the late proprietor, proceeds to England shortly with Mrs. Strachan.

The *Daily Press* affirms that Mr. M. C. Morrison, while on his way from Chefoo to Tien-tsin, was taken prisoner by Sanko-lin-sin's forces, and kept in durance for some weeks, on the ground that he had been consorting with the rebels. The journal adds that he was well treated during his imprisonment.

The American steamer *Fire Dart* had sailed for Shanghai.

Mr. Henry Caldwell, late of Singapore, has joined Mr. Owen, and succeeds to the business of Dr. Bridges, Burnster, &c.

Mr. Turner holds the office of Registrar-General, vice D. R. Caldwell.

We have received the following from a correspondent:—

"Affairs in the North and Japan are going on quietly. Admiral Hope has just gone to the former place in the *Scout*, to pay a flying visit to Mr. Bruce at Tien-tsin, after which he returns back here, and hoists his flag in the *Imperieuse*, Admiral Jones changing his to the *Chesapeake*, and taking that ship to England. They expect to start about the middle of May. The captains of those two ships do not change, I believe, but remain in their ships. Commander Gibson, of the *Chesapeake*, remains out here. The expedition up the Yang-tsze was very successful. The rebels had promised not to molest foreign vessels trading up there with passes from our consul at Shanghai. *Centurion* is left to look out off Nanking. *Encounter* and *Vulcan*, with *Pioneer*, are at Japan; *Odin* off Peiho. *Pearl* goes to lay in the Canton river, relieving the *Simoon*, which ship takes the 21st Madras Regiment from here on to Penang and Singapore, taking others on from there to India. *Sphinx*, just come out of dock at Whampoa, goes up to lay as senior officer at Shanghai, relieving the *Urgent*, which ship takes the Loudoniah regiment from there on to India. The 60th Rifles are under orders for England. The weather for these last two weeks, until to-day, has been very bad, raining and blowing constantly—the breaking up of the monsoon.

"Everyone out here was very much disgusted at the very shabby promotions given to the navy for the campaign. Certainly it was a very bad compliment to Admiral Hope, and a very very bad reward for all their toil and starving day and night for months.

From a recent *Gazette* we learn that Government supports ten schools in the city or suburbs, and ten in the villages on the island—the number of pupils educated being 902 boys and 46 girls.

Digitized by Google

CANTON.

The following paragraphs of news are extracted from the *Friend of China*:—The great cricket match between "all Hong Kong" and the "Canton Garrison" came off on the 2nd of April. This was followed by the races, on the 5th and 6th of the same month.

A party, consisting of eight officers and eight mounted police, were to leave Canton on the evening of the 8th April, on a week's expedition into the country, and there was every prospect of their having a fine patrol, the weather having just changed to something quite cool. The Commissioner, Major Dowbiggin, heads the expedition, which also includes an officer of Engineers to map the route. Tsing-yu-an on the North river will probably be the terminating point of the journey—a city which has never been visited by Europeans.

The overland expedition from Canton to Hankow would start on the 14th April. The four gentlemen composing it are: Dr. Dickson, Mr. Thorburn (of Messrs. Turner and Co.), Rev. W. R. Beach, and Mr. S. W. Bonny. Their proposed route is, to go by boat to the Meiling Pass, cross the mountain in chairs, and then take the river down to Hankow. From Hankow they will return to Hong Kong by sea. They expect to be absent about six weeks or two months.

COCHIN CHINA.

By H.I.M.'s steamer *Granada* dates from Saigon are to the 14th of March, and it is stated that "the outer forts of Mitho are already in possession of the French, and reinforcements having been sent, the fall of that very important place for rice may be hourly expected. In the meantime great quantities of cash have been sent thither; but as these, under existing circumstances, lessen the quantity in Saigon, the value thereof was considerably increased, to which fact the present very extreme rates for rice may be said to be also attributable to a large degree." Rice was quoted $2 10c. New Benares opium, $1,300. The French schooner *Magenta*, bound to Hong Kong sunk at Cape St. James while at anchor.

MALACCA STRAITS.

SINGAPORE.

A shock of an earthquake was felt on the 7th April.

The late high sheriff's coach was attacked one evening by a buffalo. The beast butted and followed the vehicle for a considerable distance.

Captain Ames has been appointed Deputy Commissioner of Police.

The Resident Councillor of Malacca has been violently attacked by a Malay while visiting an outpost. The man is secured, and will take his trial at the next criminal session.

The *City of Nantes* has arrived from England, and sailed for Bangkok, on the 10th April with the usual mails.

The Rajah of Tringaun proceeded to Mecca, on the 9th April, in the mail steamer, accompanied by several followers.

A notification has been issued by the French Consul, announcing that the whole coast of Cochin China is blockaded, and Saigon is the only prot open.

The *Pioneer*, 426 tons, has been sold at Bangkok for $30,000.

A supplementary charter has settled the long vexed question regarding the disposal of the fees received by the officers of Her Majesty's Courts of Judicature; they are in future to be paid over to Government and the sheriffs, coroners, registrars, &c., are to receive fixed salaries in lieu thereof. Two proposed Legislative enactments attract some attention. The first is a "Bill to Extend the Provisions of Act 1 of 1859" (for the amendment of the law relating to merchant seamen); and the other is a "Bill to Regulate the Occupation of Land in the Settlement of Malacca." The first is objected to on the grounds that it will entail additional labour on the Courts of Judicature. This is to be deplored; but the power to remove masters and mates of ships possessing certificates from the Board of Trade, when convicted of bad conduct, has been long felt in the Straits Settlements, and we consider the Bill will confer a great benefit on the public. No objections have been offered to the second Bill.

The *Singapore Free Press* of the 4th April extracts an article from the *Friend of India*, of the 14th March, on the Straits Settlements, and writes a whole column in condemnation of the opinions set forth by his contemporary of Serampore. We think the *Friend* has made out a strong case in favour of the transfer of the Settlements to the Colonial Office. It is true that they have not benefited India much; but they have the world at large, and therefore, as we have observed before, they are peculiarly marked out for imperial protection. The *Friend* agrees with us in much we have said on the subject, especially with reference to adding Labuan and Sarawak to the colony, and electing such a man as Sir James Brooke the first governor under the new *régime*. He also agrees with us in making the Lieutenant-Governors more independent, so as to leave the Governor free "to arrange our relations with the native powers, to visit all the settlements, and generally advance the interests of England in the Eastern Sea."

We have shown that the finances of the Straits are sufficiently prosperous to justify the immediate transfer to the Colonial Office, and we think the inhabitants of the Settlements need be under no apprehensions as to the imposition of taxes so ingeniously suggested by the *Friend of India* in his splenetic humour.

The *Free Press* has clearly shown the *Friend* to be in the wrong with regard to the Dutch Policy in Java, and other places. Mr. Money's new book on Java will enlighten the editor of the *Friend* somewhat.

PENANG.

It is reported that Colonel Babington will succeed Brigadier Burn, who leaves, on sick certificate.

The steamers *Arracan* and *Tubal Cain* have arrived from Madras with the 20th Native Regiment, to relieve the 22nd, which returns to India.

A supposed secret state paper on our late operations in China and Japan, is published in the *Penang Argus*.

Births, Marriages, and Deaths.

Digitized by Google

Orleans, figured, $7; spelter, $8 50c. to $9; tin plates, $10 to $10 50c.; lead, $11 to $12; vegetable wax, per picul, $11 to $11 50c.; beeswax, $35; gall-nuts, $6 50c. to $6 70c.; rapeseed, $1 80c.; mother o'pearl shells, $1 25c.; iron, $2 80c.; copper, $20; tobacco, common, $3 50c. to $4 50c.; tobacco, good, $5 to $7; mushrooms, $20 to $25; isinglass, best, $20 to $23; camphor, $20; sulphur, $2; coir, $2 50c. to $3 50c.; matting, $2 80c. to $3; coal, $4 60c. to $4 70c., for best; silk, best, $500 to $510; silk, inferior sort, $300 to $450; tea, of good quality, $18 to $30. The above quotations are in Mexican dollars at per picul.

CHINA—IMPORTS.

SHANGHAI.—The amount of business transacted has been small—and principally done by foreigners for transhipment. The *John Norman* from Liverpool and the *Sir R. Abercrombie* from London have been the only arrivals with manufactured goods during the fortnight, for which period the clearances have been as follow:—Shirtings, 26,250 pieces grey, and 2,850 pieces white; T-cloths, 17,500 pieces—these are wanted at quotations; spotted shirtings, 2,400 pieces; white taels, 1.8.3 to 1.8.8; assorted taels, 2.5.0 to 2.6.5, dull; brocades, 1,000 pieces, white taels, 1.8.4 to 1.8.5; assorted taels, 2.5.5 to 2.7.0; chintzes, 3,250 pieces, taels, 1.3.5 to 1.7.8.; scarlet taels, 1.6.0 to 1.6.5; American goods, drills, 3,500 pieces; (stock, 281,000 pieces); sheetings, 2,200 pieces; (stock, 35,000 pieces); jeans, no deliveries; (stock, 19,000 pieces); Spanish stripes, 558 pieces, dull; long ells, 150 pieces, quotations a shade lower; camlets, 120 pieces; lastings, 120 pieces; lead in limited demand; iron, dull, (stock heavy); tin, saleable at quotations; tin plates, saleable for Japan; rattans, saleable in small quantities; pepper, scarce and wanted; sapan wood, Siam wanted for Shantung.

CANTON.—The following sales are reported for the fortnight:—Yarn, 207 bales; shirtings, 1,900 pieces grey and 1,400 pieces white; T-cloths, 900 pieces; long ells, 1,000 pieces; lastings, 100 pieces; lead, 1,600 piculs; iron, 4,700 piculs nail rod and 1,800 piculs bolt and bar; iron wire, 250 piculs; quicksilver, 100 flasks; betel nut, 1,300 piculs.

FOO-CHOW FOO.—The following small sales are reported during the fortnight, at rates not generally remunerative:—T-cloths, 3 500 pieces, at $1 60c. to $1 85c; American drills, 800 pieces, $3 50c.; brocades, 700 pieces, at $3 20c. to $3 60c.; Spanish stripes, 150 pieces, at $1 20c. to $1 40c.; camlets, 170 pieces, at $19 50c.; chintz, 400 pieces, at $1 40c.; lead, 600 piculs, at $9; sandal wood, 100 piculs, al $7.

EXPORTS.

TEA.—At Shanghai transactions in Black comprise only 900 chests of all kinds, besides about 1,500 chests Congou shipped on owner's account. The season was virtually at an end, leaving a stock of 4,000 chests Congou, and about 2,000 Flowery Pekoe on hand. Greens.—As might have been anticipated, the evil tidings from North America had caused buyers to display less eagerness in their desire to operate, and prices had in consequence suffered a reduction. Purchases continued, however, to be made. 2,900 half-chests of Japan, and 11,500 half-chests China sorts, having found buyers. A large proportion of these were, however, contract teas, received *via* Ningpo. Prices displayed a downward tendency. Stock, 6,800 chests China, and 3,500 half-chests Japan.

FOO-CHOW-FOO.—At Foo-chow the settlements of the fortnight are reported as under:—Congous, 10,000 chests and 7,000 half ditto, at 8 to 14 tls. for trash to fair common; 14½ to 18½ tls. for good common to medium; 15 to 20 tls. for Hohows and Ningchows. Flowery Pekoe, 180 chests at 24½ tls. The stock unsold upon the market is computed at 6,000 ch. Congou, 260 chests. Flowery Pekoe, 400 half chests Oolong, and about 2,000 pkgs. of the new Greens (above alluded to) which are held at extravagant rates. At Canton—The new Tyshan Congous are expected shortly—it is said that the quality will be very fine this season. The few country Greens which are upon the market are held at excessive rates. The stock of Canton-made Greens is the refuse of the season. The following are the settlements of the fortnight:—Congou, 10 chops Oopack, at 25 to 31 tls. 21 chops Oonam at 18½ to 23 tls.—5,000 chests Canton packed at 17 to 21 tls. Scented Orange Pekoe, 800 boxes at 28 to 29 tls. Canton Gunpowder, 500 boxes at 20 to 22 tls. Canton young Hyson, 200 half-chests, at 16½ tls.

SILKS.—The news from England to 26th January, and subsequently that to 11th February, led to a comparative suspension of business for some days. Declining exchange, and a concession of from 15 to 20 taels on the part of the teamen, had, however, tempted purchasers to come forward to the extent of 800 to 900 bales. There was a desire exhibited by the silkmen to effect further sales, but it could not be done except at a reduction on following quotations:—Tsatlee, No. 3, 400 to 415 taels; do., No. 4, 375 to 390 do.; Taysaams, No. 2, 300 to 315 do.; do, No. 3, 280 to 290 do.

DRUGS, &c.—Cassia Lignea: The season's supply has been bought up and shipped. A small lot of 50 piculs arrived at Macao, and was immediately taken at $18. 25c. Cassia buds are quoted $35 at Macao and $40 at Canton, but there is no stock at either place. Cassia oil is dull—there are full supplies at Macao, for which $260 to $265 is the figure asked. Star aniseed—at Canton none; at Macao 200 piculs are offering at $15½ to $15¾. Galangal and alum—none in stock. Matting, fire crackers, and vermillion as last quoted, with very little doing.

SINGAPORE.—Imports since our last have very considerably increased, and the last news from Europe having induced holders to realise, we have to report an unexpected decline in prices. The sales that have been effected, however, are small, which we must attribute to the fact that our junk traders cannot sell their teas and other China produce here as usual, owing to the depressed rate of the produce trade in Europe and America, and consequently they are restricting their purchases of manufactures to actual wants. The comparative statement of stocks made up to end of last month will show how much they have increased; and to them we must add the cargoes of four vessels which have arrived since it was made up. In exports sales have been limited to the staple articles, such as gambier, sago, and pepper, all of which have been bought at a further decline in price. More business would have been done, however, if tonnage did not remain scarce; and, although we have now some vessels loading for Great Britain, great difficulty is experienced in finding light freight.

MANILA.—Hemp has fallen in value about 25 cents. per picul owing to the stoppage of shipments to America. Sugar and coffee remain at former rates.

The picul is 133⅓ lbs. weight; the tael at Shanghai is equal to 1 dollar and 40 cents; and is divided into decimal parts of ten.

EXCHANGES ON LONDON.

[For dates, see first page.]

		Bank.	Private.
At Shanghai (per Tael.)	6 months sight.	6s. 1d. to 6s. 1¾d.	6s. 2¼d. to 6s. 3d

CASUALTIES.

The steamer Yang-tsze was damaged in going up the Yang-tsze River, and is undergoing a thorough repair in Whampoa.

The Fearnought has been raised from her unenviable position on the Lema, and sunk again in a more serious position. The contractors are working at her, and are to receive 8,000 dollars if she is taken to Lamont's Dock, and 9,000 if to Whampoa.

The Florence Nightingale passed close to a sunken ship with top-gallant masts out of the water, on the 14th March, when off Pulo Oby, bearing E. by N.

The Albatross has been wrecked on the Pescadore shoals; crew and passengers have been saved and arrived at Amoy.

The Bella Carmen, from Manilla to Amoy, was lost on the reef off Dodd Island, Hoeton Bay. All hands arrived safe at Amoy in the long boat.

No tidings having been heard of the Joseph Steele, which sailed from Calcutta for Hongkong in November last, it is feared she is lost.

The Schiller struck on a reef on the 13th February, at the S.E. end of the island of Wanga-Wanga, and has become a total loss.

FREIGHTS AND CHARTERS.

At SHANGHAI.—To London: Tea, £2 10s.; silk, £4 10s. To New York: Tea, $10; silk, $20. A fair amount of business has been done during the past fortnight, small vessels earning high rates up the Yang-tsze and the ports at the North. Large vessels have been in inquiry for Swatow and the South. The principal settlements are:—Steamer Theodosius, at $2,500 per month; Egean, at $1,500 per month. To Swatow and back (with fifty lay days), Magnolia, $6,100; Charlotte Anne, $4,650; Kent, $4,350; Albis, £3,500; Julianne, 45 lay days, $3,500; Auguste and Meline, to Amoy and back, 40 lay days, $3,300.

At AMOY.—Remunerative rates are still maintained at this port, and all arrivals find ready employment. The following charters have been made:—Asia, to Takow and Shanghai and back, 55 lay days, $5,000; Typhoon, to Keeling and back, 30 lay days, $2,300; Horatio, to Shanghai, 30 lay days, $3,600.

At HONG KONG, MACAO, and CANTON.—For London, £2. 10s. The demand for tonnage that has lately been experienced here has somewhat abated, owing to the fall in rice and the emigration season being at a close. Small craft is likely to be in demand for the coast trade, although the initiation of the new order of things has not realised the expectations formed. Should grain be required at the North, a large demand will, no doubt, be experienced to carry it out. Amongst the charters reported, are Petchellee and Geelong, to London, at current rates; Podesta, to Europe, at £3; St. Clair, to Bordeaux, at 140f. to 150f. per ton; New Great Britain, to Sydney and Melbourne, at £2,500; Geo'hee and Astarte, to Australia, at £3 10s. and £4 4s.; Dictator, to San Francisco, at 17,800 dols.; Eureka, to San Francisco, at 12,000 dols.; John Stephenson, Kosmos, Norseman, Maria, Eagle, Spirit of the North, and Albers, to Saigon and back, at 62c. to 70c. per picul; Archimedes, Jorgen Bruhu, and Heroine, to Bankok and back, at 65c. to 72½c. per picul; J. C. Humphreys, for 12 months, at $1,400 per month; Whirlwind, to Demerara, at £11 per head. The Windeck, Russian, 196 tons, has been sold for $11,000.

At MANILA.—To London: Sugar, £3; hemp, £4. To New York: Sugar, $8; hemp, $10. The number of vessels expected to arrive here are so few that the above rates are likely to be maintained. The Kate is reported for London, the Jumna for Boston, and the Sherwood for New York at the above rates.

At SINGAPORE.—To London, £3 10s. to £4. There is more inquiry for vessels of convenient size, and they are still wanted to load home from the rice ports. The Elizabeth is reported to load for a port between Havre and Hamburg, at £3 10s. dead weight, and £4 light.

At PENANG.—To London, £3 10s. to £4. The small arrivals here has caused a scarcity of tonnage, and it is much wanted, as vessels would find ready employment for China and London, at advanced rates.

PASSED STRAITS OF SUNDA.

From England and Continent to China: March 30, Ethereal; April 7, Fiery Cross. To Batavia: 12. City of Glasgow. From Japan to London: 11, Medina. From China. 1, Corea. To New York: Comet, To Havana: 9, Fides; 10, Messenger, Leonidas. From Batavia to Holland: March 30, Hebe; April 2, Windward. From Manila to Sydney: 7, Talbot; 10, Nelly. To Cork: 10, Melancthon. To London: 11, Avalanche. From Singapore to England: 10, H.M. steamer Nimrod, H.M. steamer Roebuck.

Continental Intelligence.

RUSSIA.

(FROM OUR OWN CORRESPONDENT.)

ST. PETERSBURG, May 23.

After a long and severe winter it is a satisfaction to be able to report that the navigation is at length open for the season, three screw steamers from Messina with fruit having come up to the city from Cronstadt on the 10th inst., which were followed the next day by more than twenty others, and this has tended not a little to enliven our hitherto stagnant trade.

There are all sorts of rumours in circulation here respecting the Emperor of China. Some say he has been seriously advised to remove his court and seat of government from Peking to Shen-si, in order to avoid returning to his humiliated capital, and to allow the British Envoy to reside there, as stipulated in the Treaty, without the annoyance of being obliged to see him.

Digitized by Google

Another account says the Emperor intends shortly to pay a visit to Peking, give audiences to the foreign ambassadors, and then retire for the summer to his country palace at Jehol, which is a considerable distance from Peking, and requires a whole week to perform the journey.

An Imperial decree in the *Peking Gazette* describes Prince Sankolinsin and his inferior officers as "wanting in resources," and requires them to reinstate their military reputation which they have forfeited by their unfortunate operations against the two hundred thousand Shantung rebels. The immediate reason assigned in the decree for its publication is a fresh defeat suffered by the prince from the victorious rebels.

Letters from Kiachta report a further rise in the prices of tea, in consequence of the total failure of the crops in the northern provinces of China, and the general insecurity of the country. To this must be added that the payment of the war indemnity to France and England has greatly enhanced the value of silver, and induced the merchants to raise the price of tea 10 per cent., so as to make the "red barbarians" pay with one hand what they are receiving with the other.

The fears entertained in many quarters that the permission to import tea from China by sea would ruin the Russian land trade with Central Asia, and render nugatory the late Treaty with China, the acquisition of the new territory, and the colonisation of the Amoor district, on which so much labour and expense and time have been spent—are by no means general, and appear to be promulgated by monopolists and supporters of the protective system at Kiachta and Moscow, who make a great cry and anticipate ruin. But the Emperor and the Government of this country were not to be thus frightened into abandoning a measure calculated to increase our relations with China, and open new channels of wealth and mercantile prosperity. In truth the danger to which the tea trade is exposed by the new competition has been greatly exaggerated and purposely misrepresented. As a set-off for the expenses of the land conveyance they have a countervailing duty of from seven to twelve roubles per pood, according to quality, in their favour; and as long as the Suez Canal is not completed, the sea voyage must always be long and dangerous, involving many risks and expenses—such as insurance, collision, average, and salvage—from which the land traders are exempt. But our tea merchants in this country, who have been accustomed hitherto to make money without any trouble, must now bestir themselves, particularly as they obtain permission to postpone the payment of the duty at the frontiers till the arrival of the teas at Nishky-Nowgorod and Moscow, and the other principal marts for the article. I may, perhaps, be allowed to give your readers a better insight of the case by the following figures. Let us say that two merchants at Shanghai buy each 50,000 poods of tea, costing a million of roubles. The one ships his tea in a sailing vessel at a freight of one rouble, whilst the other sends his by the land route at a cost of seven roubles; the first paying 50,000 roubles, and the latter 350,000 roubles. But on the arrival of the former by sea, the importer has to pay immediately 700,000 roubles for duty, whilst the other has only to pay 300,000 roubles, and then only on its arrival at the central mart, and not at the frontiers. It follows, then, that there is a differential duty of from six to ten roubles in favour of the overland route, and this has been fixed with due attention to the exigencies of the trade and the interests of that branch of commerce. The carriage from Kiachta to St. Petersburg costs six roubles per pood; and it is this city alone, that has to fear anything from the competition by importing tea by water. As I informed you in a former letter, the tea merchants of Kiachta have already shown a laudable activity in getting up caravans of goods, accompanied by their confidential and intelligent agents, to be sent into the interior of Eastern China and Mongolia, whilst the development of the trade with the western parts of China, Mongolia, Turkistan, Thibet, and the neighbouring districts is reserved for the enterprise and activity of the merchants of Moscow, Tula, Vladimir, and Kasan. I may here remark that the trade with China over the frontiers is not restricted to Kiachta, as was at first generally supposed, but according to the Chinese text of the Treaty, "to and from any other part of China, entering or departing by any other frontier town."

An alteration in the tariff of this country is in contemplation by which the import duty on sugar is to be considerably reduced. This has had a favourable effect on the sugar market, which is in consequence very firm.

The extension of the electric telegraph across Siberia to the Pacific Ocean has progressed so far during the past four years that at the commencement of 1861 the Russian Government had ordered the construction of lines extending 6,000 kilometres, 2,000 of them being in the country lately ceded to Russia by China—that is, along the shores of the Amour and Ussuri, from the town of Nicolaewsk, through Chabarowska to the port of Nowgorod, the most southern point of the new Russian territories on the sea of Japan. The Minister of Marine is ordered to provide the funds necessary for the construction of these 2,000 kilometres. At the same time a line of telegraph has been commenced from Kasan in Europe to Siberia. During the present year there will be opened to the public a line of 2,000 kilometres, from Kasan to Omsk in Siberia, and shortly afterwards this line will be extended 2,500 kilometres further to Irkoutsk. Thus, within two or three years, a network of telegraph lines will be extended from Europe on the one side to Irkoutsk in Asia, and on the other the Russian possessions on the Amour and Ussuri will be put in communication with the principal Russian ports on the sea of Japan. Of the whole distance, estimated at 10,000 kilometres, there remains only that portion between Irkoutsk by Kiachta as far as the town of Cabraouka to be undertaken. But when the works now in hand have been concluded this last line will be proceeded with immediately. Thus, within four years we shall see realised the gigantic project of putting the whole of Europe in direct communication with the furthest shores of the Pacific Ocean. Besides the incalculable advantages which the Siberian line of telegraph will confer upon Russia, upon its commerce with China, and upon the whole of Europe, by the easy and speedy communication with China, Japan, and other countries bordering on the Pacific Ocean, it will be a great step towards the completion of a Russian-American line of telegraph by Siberia and the islands of the Pacific Ocean.

HOLLAND.

(FROM OUR OWN CORRESPONDENT.)

AMSTERDAM, May 23.

Since my last communication the most important of the debates in the Second Chamber have turned on Art. XI. of the Budget (the colonies) which the Ministers for Foreign Affairs and for the Colonies required to be passed without alteration or discussion, and, in fact, wanted it to be considered as a vote of confidence in the present Government; but several members expressed their unwillingness to bind themselves in this way, and made an onslaught on the Ministers, accusing Baron von Zuylen van Nyevelt of political coalition with Mr. van Hoevell as far as concerned the colonial affairs, which, however, the Baron indignantly denied. Ultimately, the Budget was passed all but unanimously, Mr. van der Linden making himself very ridiculous by persisting in dividing the house, when there appeared for the passing, sixty-four votes; against it, 1—his own.

The new postal law mentioned in my last has now passed the Second Chamber, and is to come into operation on the 1st of September next. The only novel feature in it, though a very important one, is the introduction of a uniform rate of postage (5c. for a single letter) from any one part of the kingdom to another, the sum at present rising from 5 to 5 cents. for each distance of 30 kilometers or its fractional part. Another facility is the permission to frank parcels going through the Post-office by means of postage stamps.

One would imagine that in this isolated corner of Europe we were quite out of harm's way, and that the best thing the country could do would be to attend to its commercial affairs in a peaceable manner, without mixing itself up in European quarrels. It has, therefore, caused some surprise to learn that by Royal Decree of the 2nd of May, No. 53, the King has given orders to put in commission and fit out for immediate service the floating battery *Neptune*, at Helvoetsluys. The command of this formidable craft has been given to Captain-Lieutenant W. A. de Gelder, and a full complement of officers (three lieutenants, three mates, and as many middies, a first-class or full surgeon, with purser and other idlers), and a crew of men appointed to her. It is perhaps in connection with the above that orders have been given to complete, without delay, the fine steam-frigate *Adolph, Duke of Nassau*, now in course of construction in the Royal Dockyard at Flushing, and to launch her, if possible, on the 13th of June, the birthday of H.R.H. Prince Henry of the Netherlands. These unexpected symptoms of approaching warfare have naturally made a great sensation amongst the quidnuncs of this city, and there are all sorts of rumours afloat to the effect that a treaty of offensive and defensive alliance between England, Prussia, Belgium, and Holland, is on the point of being concluded in the event of certain contingencies taking place. But I believe that the true grounds of these proceedings is to be found in the necessity for sending some ships of war to North America to watch the proceedings of the Belligerent States, and protect the Dutch commerce and shipping in those waters, in case the war should assume more dangerous proportions and increase in magnitude as the summer approaches.

It appears that the charitable appeal made to the sympathy

Digitized by Google

of the nation in favour of the sufferers by the late inundations, earthquakes and landslips in Netherlands India, has not been made in vain, though their own countrymen at home, whose losses by the breaking of the dykes in the winter are officially known to exceed six millions of florins, or half-a-million sterling, were, of course, the first to require assistance. From all parts of the kingdom subscriptions have been received and are daily pouring in, whilst the journals teem with articles relating the greater or lesser success of concerts, lotteries, theatrical representations, and other amusements got up in different parts of the country for the above charitable purpose. This decided willingness to relief the distresses of their fellow-subjects, both at home and in the colonies, is a favourable trait of national character, and is well worthy of being recorded in your columns.

The Municipal Council of Delft has received a rescript from the Minister of the Interior, intimating the necessity of their making extensive alterations in the buildings of the Royal Academy in that city, to furnish accommodation for a number of young men, expected from Netherlands India, to prosecute their studies at that high school in order to qualify themselves for the civil service in the colonies. A meeting was held in consequence, at which it was unanimously agreed to accede to the wishes of Government, though attended with considerable expense. The new building, which is to be called the "Indian House," is to be fitted up, in the first instance, for the reception of five hundred young men, who are to undergo a course of instruction for two years, at the expiration of which and on passing their examination they will receive their appointments.

Whilst the latest accounts from Java announce the publication of the large Atlas of the Indian Archipelago from the triangulations and surveys of the late Baron Melvill Van Carnbee, Capt. R.N., the last finish is being put to the monument about to be sent out, and erected to the memory of that lamented and distinguished officer over his grave in Java. It is paid for by a subscription amongst his brother officers, who have formed a committee for that purpose. The monument is in the shape of a pyramid, ornamented with palms, and military and naval trophies. It is ten feet high, and seven feet and a-half wide on each side at the base.

A letter from Leyden states that the Colonial Minister has forwarded to the Numismatic Department of the University Museum in that city a complete set of the twelve gold and silver coins at present current in the kingdom of Siam. They are of nearly spherical shape, and bear an impressed stamp, whilst their intrinsic value is estimated collectively at about fifty-seven florins.

From Utrecht we learn that a handsome memorial, consisting of an elegant silver tea and coffee service, has been presented to Mr. D. F. Schaap, late Governor of Celebes and its dependencies, by a commission in the name of the mercantile body at Macassar, in token of their admiration and gratitude for the highly satisfactory manner in which he administered the affairs of that colony, and the facilities granted by him for the development of commerce.

By Royal Decree of 2nd inst., No. 40, the King has given his Royal license to Messrs. R. and A. van Eibergen-Santhagens, of this city, directors of the Asiatic Marine Insurance Company at Amsterdam, to extend the capital of the association, with a view to increasing their business, but only as affects their insurances in this country. With regard to an extension of their operations in Netherlands India, the concessionaires are directed to make application to the Governor-General.

Native air and home treatment appear to have acted favourably on the health of the crew of the frigate *Evertsen*, suffering from ophthalmia, as reported in my last, for I am happy to state that three officers, eight midshipmen, and forty-eight sailors have been discharged from the Naval Hospital at Nieuwe Deep as recovered and able to return to duty.

By Royal Decree of the 14th inst., No. 65, the first-class steamer *Djambi*, lately returned from the East India Station, after undergoing a searching examination and overhauling, is ordered to be put in commission on the 1st of June for foreign service. The whole of the officers are appointed, and the command given to Captain-Lieutenant M. H. Hansen. It is understood in naval circles that this fine steamer is to form part of the squadron fitting out for the protection of the Dutch trade and interests in North America, should the course of events render such a step advisable.

Accounts from the Hague state that the examination of non-commissioned officers invited to compete for sub-lieutenancies and further promotion in the East India army, in conformity with the regulations and conditions mentioned in a former letter, commenced on the 7th inst., under the presidency of Lieutenant-General Duycker, with the candidates belonging to the grenadiers and jagers in garrison there, and the 4th Regiment of Infantry quartered at Bergen op Zoom. The examinations are still going on, and will last some time longer, to allow the competitors in all the different regiments an opportunity to prove their ability for the promotion thus held out. Up to the present time more than a hundred have passed.

The king has been pleased to award a pension of 4,000 florins per annum to Mr. J. S. Lotsy, late Minister of the Navy, and another of 2,495 florins to Mr. Boscha, Ex-minister for the affairs of the Reformed Church.

From Harderwyk we learn that there have been no further reinforcements shipped off to the East since my last letter. The number of recruits received at the depot there since the commencement of the present year was as follows:—In January 91, in February 116, in March 320, and in April 293; total 820. The municipal council of that town has petitioned Government for the construction of a port, the absence of which is much felt as a serious inconvenience. Plans have been prepared, and the execution of the works are estimated to cost 430,000 florins.

The following twenty-eight vessels have been chartered for India by the Netherlands Trading Company:—

To sail from	Ship.	Captain.
Amsterdam—	Telegraph	Rolufs.
„	Estaffetta	Oepkes.
„	Theodora Mechtelda	Boelhower.
„	Provincie Drenthe	Hoekstra.
„	Jacoba Cornelia	Deeliseur.
„	Bellatrix	Sandberg.
„	Wilhelmina and Elisa	Priebee.
„	Rynbrand	Lange.
„	Nicholas Wilsen	——
„	Quatrebras	Newenhuys.
„	Elshout	Akerman.
„	Doggersbank	Kerkhoven.
„	Peter Schoenmakers	Varelen.
„	Scheveningen	——
„	Copernicus	Visser.
„	Boni	Moller.
Rotterdam—	Zwerver	Franzen.
„	Hendrik Ido Ambacht	Byl.
„	Josepha Louisa	Muyson.
„	Gov.-Gen. Duymaer van Twist	Hoeksima.
„	Hendrika	Aalborg.
„	Antonia Petronella	Voorendyk.
„	Nieuw Lekkerland	Hoffman.
Middelburg—	Catharina Maria	Omkens.
„	Grondwet	Kamminga.
Schiedam —	Vincent de Paulo	Vassen.
„	Janette and Cornelia	Verhoeven.
„	Jan van Hoorn	Barghorst.

The company has further advertised for tenders for a vessel of about 400 tons to carry a cargo of piece goods, with 12 tons of dead weight and a quantity of gunpowder from a port in this country to Macassar, touching first at Batavia, and to bring back a cargo of produce. The vessel to be ready to load on the 10th of June, either at Amsterdam or Rotterdam as may be ultimately decided on by the Company.

COMMERCIAL.

For East India coffee there is a steady demand both at Rotterdam and in this market, and favourite qualities command a slight advance on last sale's prices. A private transaction of 7,628 bags of Padang has been done at 38c.

Raw sugar firm at the figures of the Company's last sale. More attention is being paid to E.I. rice. Java buffalo and ox hides held higher owing to short stocks, but this tends to check the demand, and the market is quiet. No alteration in tea. Two cargoes ex *Thetis*, from Hong Kong, and *Catharina*, from Foo-chow-Foo, will be brought to the hammer on the 29th inst. at Rotterdam. Drugs firm. At public sale 321 packages India-rubber fetched 82½fl. for fine, and 80—82 for good; 9,127 slabs gutta-percha, AA 85½c., B 70½—71, BB 61; 115 tubs Japan camphor, 135—136 cents., which is considerably higher than last post; 830 chests Japan vegetable wax, A 36—37, B 34½—34¾, C 33½—34, and D 31¼ to ½; 226 chests and 23 bags gum Damar, ¾-prime 26 cents, ¼ ditto 23¾—24, elect 29; 135 bags sago flour, 10fl. 25c.; 360 chests pearl sago, 8fl. 25c.—9fl. 25c.; 357 packages cassia vera, 30c.—36c.; 19 bags cubebs, 25¼c.—30¾c.; and 49 bottles cajaput oil, finest quality, 172c. All sold. Java indigo is in great favour, and in spite of the considerable rise at the Company's sale, 15 cents. further advance is freely offered, but the temptation to sell is not sufficient, and holders demand 20 cents. profit on sale prices.

For Banca tin the demand has subsided and the market is quiet. Purchases might be made at 75¼fl., but holders are by no means anxious to sell.

The Company's sugar sale to take place on the 28th inst. will comprise:—

Digitized by Google

29,989	kranjangs of	Java	in warehouse at	Rotterdam.
19,120	,,	,,	,,	Amsterdam.
2,623	,,	,,	,,	Dordrecht.
5,537	,,	,,	,,	Schiedam.
6,192	,,	,,	,,	Middelburg.
63,461	kranjangs.			

The valuation according to the present market prices is as follows:—No. 5, 26; No. 6, 27½; No. 7, 29; No. 8, 30½; No. 9, 31½; No. 10, 33; No. 11, 34; No. 12, 34½; No. 13, 35½; No. 14, 36½; No. 15, 37; No. 16, 37½; No. 17, 38; No. 18, 38½; No. 19, 39; and No. 20, 39½.

MR. CRAWSHAY AND THE WAR WITH CHINA.

The following correspondence has been published in the *Newcastle Chronicle*:—

"26, Tyne-street, North Shields, April 11, 1861.

"Sir,—I am given to understand by Mr. Rule, who I presume to be your private secretary, that it is not your intention to pay the demand made upon you by me for the sum of nine pounds eight shillings and eight pence assessed taxes. Will you, sir, with as little delay as possible, give me (briefly) your reasons why you refuse payment?

"I am, sir, your obedient servant,

"T. D. HADAWAY.

"G. Crawshay, Esq., Tynemouth-house."

"Tynemouth, April 13, 1861.

"Sir,—In reply to your inquiry, my reason for refusing to pay your demand upon me for the sum of nine pounds eight shillings and eight pence assessed taxes, is the misapplication of the public money by Parliament, and the special instance which has driven me to this step is the expenditure recently incurred, and still going on, in China. Our hostilities there have been unjustifiable from the beginning. They have been waged without declaration of war. They are piracy and murder by the law of England no less than in the sight of God. The constitution requires that money shall be voted by Parliament before it is spent. The effect of this is that the Crown cannot make war without the consent of Parliament. In the present case large sums of money were spent first and voted afterwards. An expedition was equipped and sent forth without the advice of either Lords or Commons having been asked. Earl Grey protested, but he stood alone. Thus were the law and constitution overthrown together by the invasion of China. Had a special tax been imposed by Parliament for the purposes of defraying the expenses of this invasion, I should not only refuse payment, but should appeal against a distraint upon my goods. I believe that the collection of such a tax could be successfully resisted in a court of law on the ground that it cannot be lawful to levy taxes for unlawful purposes. But the wholesome custom of raising special rates for special purposes, which is still maintained in our local taxation, has fallen into disuse with respect to taxes raised for the service of the State. Deprived in this way of any legal remedy, and nearly the whole of my taxation being taken from me indirectly, I take that small portion which I am called upon to pay in my own person, and I refuse to pay it.

"Thanking you very much for the opportunity which you have given me of explaining my reasons for doing so.

"I am, sir, your obedient servant,

"Mr. T. D. Hadaway." "G. GRAWSHAY.

The above correspondence was followed by a seizure of some furniture at Tynemouth House for the amount of taxes due, £9. 8s. 2d.; and a sale was held in Mr. Crawshay's mansion. The first article offered was an elegant work-table, which was knocked down to a furniture broker for 16s. A moreen damask chair, which cost Mr. Crawshay £6 two years ago, was knocked down to an auctioner for £1. 18s. Two elegant velvet-covered arm chairs, apparently of considerable value, were knocked down for £2. 16s. each. A large mahogany dining-table was sold for £5; and a feather bed, for £2. 17s., concluded the sale, the amount realised being £15. 13s.

Naval and Military.

The following vessels with troops have arrived from China:—

The *York*, hired sailing ship, arrived at Spithead on the 15th. She left Hong Kong on the 21st of December, Singapore on the 1st of January, and St. Helena on the 8th of March. She brings home nine officers, sixteen sergeants, eight drummers, and 341 rank and file of the 87th Regiment, who have been quartered in Dublin.

The *Alfred*, hired sailing troop-ship, arrived from Hong Kong, which place she left on the 20th of December, and the Cape of Good Hope on the 3rd of March. She brings home 13 officers, 20 sergeants, 17 corporals, 12 drummers, and 330 privates of the 2nd Queen's, under the command of Lieut.-Colonel Addison. They will disembark and join the other division of the regiment, which arrived in the *Indomitable*, and is quartered in the Cambridge barracks at Portsmouth.

The *Powerful*, No. 16, screw transport, Capt. Richards, with invalids, passengers, and military stores. On the 2nd of March the *Powerful* fell in with a violent hurricane, which lasted two days, and continued of the same violent character throughout. The *Powerful* being on the outer edge of the hurricane, Capt. Richards kept her before it, and thus escaped with but little damage. Her Majesty's ship *Esk*, Capt. Sir Robert M'Clure, which, on the *Powerful's* arriving at the Mauritius, was found at anchor there, had been caught more in the centre of the same hurricane, and had, consequently, suffered more severely. The *Esk* was on her way home to England.

The *Highflyer*, 21, screw, Captain Heath, was officially inspected and ordered into Portsmouth Harbour to dismantle and be put out of commission. She brought home as passengers, Count Waldersee, of the Prussian navy, Lieut. Maresceaux, R.N., and Lieut. Broughton, R.M.L.I., Messrs. Payne, Algar, and Gair, assist.-engineers, and ninety-four supernumaries, Naval and Royal Marines, consisting of the crew of Her Majesty's gunboat *Opossum* and men from the Royal Marine battalion lately on service in China.

The *Khersonese*, which arrived at Spithead on the 16th from China, sailed from Hong Kong on the 7th of February, Singapore on the 17th, and Anjeer the 21st, Cape of Good Hope, April 3rd, and St. Vincent's, April 28th. Her passenger-list comprises Lieut. W. F. Johnson, R.N., A.D.C. to Major-General Sir James Hope Grant, G.C.B. She brings detachments of the 44th and 99th Regiments.

The officers of the *Acorn*, a vessel condemned in China, were transferred from the vessel to her Majesty's ship *Victoria*. She has on board nearly 1,000 tons of artillery stores, with which she is ordered to proceed round to Woolwich, at which port the detachment of the 99th and 44th Regiments will disembark from her.

The Adelaide, No. 18, screw transport, Captain Bird, proceeded from Portsmouth to Woolwich, with invalids and stores, after landing a division of the 2nd Queen's, to join head-quarters in that garrison, and a detachment of the 87th Regiment, who were forwarded to head-quarters at Dublin by steamer. She has been much delayed during the latter portion of the voyage by strong northerly and N.E. winds. This vessel has brought home some interesting specimens of natural history, presented by the Hon. George Grey, Governor of the Cape of Good Hope, to the Royal Zoological Gardens, Regent's-park, and brought to England in charge of Mr. Banister.

The *Herald*, surveying frigate, Capt. Henry Mangles Denham, F.R.S., sailed from Spithead for Chatham, to strip and pay off.

Capt. Sherard Osborn, C.B., took command of the *Donegal*, 101, screw, at Spithead, Capt. H. Broadhead, lately commanding the *Donegal*, being appointed to the command of the Steam Reserve at Portsmouth, vice Capt. G. T. Gordon, superseded at his own request on account of continued ill-health.

Captain Sir Frederick W. E. Nicolson, Bart., R.N. (1846), has been appointed to succeed Rear-Admiral Horatio T. Austin, C.B., as one of the Conservators of the River Thames.

Major the Hon. W. C. Yelverton, of the Royal Artillery, is placed on half pay, and his name has been removed from the effective list of the regiment.

Sir Hope Grant proceeds to the Madras command in July.

The Indian and European armies are now amalgamated, but the particulars have not yet been made known. The distribution of regiments in India will be as follows, until further orders, viz.:—Cavalry: 8 service troops, of 3 field-officers, 8 captains, 8 lieutenants, 8 cornets, 8 staff, 40 sergeants (exclusive of schoolmasters), 8 farriers, 9 trumpeters, 32 corporals, and 496 privates; one depot—1 captain, 1 lieutenant, 1 cornet, 9 sergeants, 4 trumpeters, 8 corporals, and 49 privates. Infantry: 10 service companies, 3 field-officers, 10 captains, 12 lieutenants, 8 ensigns, 7 staff, 47 sergeants, 21 drummers, 40 corporals, and 810 privates; two depots—2 captains, 2 lieutenants, 2 ensigns, 10 sergeants, 4 drummers, 10 corporals, and 90 privates.

The subscriptions towards Sir James Outram's memorial are at present between £3,000 and £4,000, which seems a small sum.

In consequence of the death of General Sir Ashe A'Court Repington, Colonel of the 41st Foot, Lieutenant-General Sir R. England has been transferred to that command from the 50th, and General Eden has been presented with the colonelcy of the latter regiment.

Lord Herbert has appointed Major-General Sir E. Lugard, K.C.B., to be permanent Under Secretary to the War Department, for the Military Division of the office.

THE MAY MEETINGS.—We noticed in our last issue a few of the meetings which had taken place early in the month; since then every day has witnessed one or more large gatherings for religious or social objects in Exeter Hall, St. James's Hall, and in other large Metropolitan buildings. A few of these meetings shall be briefly chronicled. The Christian Vernacular Education Society for India appears to be gradually working its way throughout India. At the annual meeting the Secretary stated that four Auxiliary Societies had been formed, and that schools had been opened in the presidencies of Madras, Bombay, and Bengal, as well as in the island of Ceylon. The society has also founded a training college for native teachers. The receipts of the past year amounted to £2,792, of which £1,219 had been contributed in India. The Foreign Aid Society held its twenty-sixth annual meeting on the 15th instant. The meeting was addressed by the French Pastors of the Paris and Normandy Evangelical Societies, giving an account of the state of Protestantism in France. The receipts for the year were £3,000. The National Temperance League held their annual meeting this year at Exeter Hall; Samuel Gurney, Esq., M.P., acting as chairman on the occasion; George Cruikshanks, the well known artist, and other gentlemen, spoke in favour of total abstinence. Another similar Association, the British Anti-Tobacco Society has, we are surprised to learn, reached the seventh year of its existence. Yet the "gorging fiend," as the Dean of Carlisle terms tobacco, appears more vigorous than ever. Certainly the arguments used at the meeting were not of a powerful character, and we imagine that unless others more convincing can be adduced, this well-meaning society will ultimately end in smoke. At the annual meeting of the Peace Society, the Rev. R. Richard spoke at some length on the late China war, and denounced that "act of barbarism," the burning of the palaces of Peking, as quite as gross as any of those acts for which the names of Vandals and Goths have become a reproach throughout England. The cry had been raised, he said, on every missionary platform that China was now opened to Christianity, but past experience taught us to look upon that cry as more sanguine than sober. It was raised even more triumphantly than now at the close of the war of 1840, but there were unquestionable facts to prove that the cost of that war, owing to the increased armaments we have had ever since to maintain in the Chinese waters, has been ten if not twenty times more than all the profits we can have possibly derived from our increased commerce with that country. He also feared that the immense development which had been given to the infamous opium traffic, and the opportunity afforded by treaties to dishonest traders and ruffians to set the people against us, had done more to dishonour the Gospel in the eyes of the Chinese, than all the exertions of our missionaries had done to promote it.

The London & China Telegraph.

LONDON, MONDAY, MAY 27, 1861.

THE OPENING OF THE YANG-TSE RIVER.

THAT man must be either very presumptuous or very wise who will venture to foretell the glorious future which is in store for British merchants and British interests in China in consequence of the opening of the Yang-tse, and the establishment of Consular establishments on that river. The money that has been lavished, the blood that has been shed, have not been expended in vain. We have at length gained access to the heart of a mighty nation—mighty in size and capabilities, if not in power. That nation has felt our strength, and by acts at least has acknowledged its own weakness. It now remains for us to prove to the cunning and clever race which has been forced to own its inferiority to the barbarians, that our interests and theirs are identical, that we ask for nothing on the one side which we cannot repay on the other, and that as Christian men and English merchants we are bound to act fairly and honourably by them. Amidst the general congratulation at the result which has been thus happily attained by our arms and diplomacy, we must not conceal the fact that the advantage which we may derive from the opening of new ports and the consequent extension of trade depends in great measure on our own conduct. We shall be continually thrown into contact with the insurgents as well as with the imperialists. There is every reason why we should keep on good terms with both, but such a course, although certainly right, will not always be easy, and we can well believe that occasions will arise demanding great promptitude, wisdom, and forbearance. However we are not disposed at this fortunate juncture to "cast the shadows of uncertain evil."

MR. WINGROVE COOKE said truly, in his correspondence to *The Times*, that the great thing to be done in China, was to break down the wall of partition which separated us from the people of the country, and to establish a feeling of mutual regard. "At any cost," he wrote, "we must have free and unrestricted intercourse." We have gained that boon now, and though the cost has been great, we cannot think it has been too great for the occasion. This alone will prevent future wars; this alone will enable us to test, by practical experience, the vast resources of the land; this alone will help us to gain that accurate and extended knowledge of the people, as well as of the Empire, which is so essential to our mercantile position. In truth, up to the present time, Englishmen who are perfectly familiar with the five ports will frankly confess that their knowledge of China is almost bounded by them. The interior of the country is to them as much a *terra incognita* as the heart of Africa. Now and then a zealous Missionary, or an adventurous traveller, have ventured among the once busy and thriving cities which lie upon the banks of the Yang-tsze or its tributary streams, and they have come back and told the world a marvellous story of what they have seen there; but the world has proved incredulous, or, at least, indifferent, thinking, perhaps, that it was unwise to cherish a curiosity which it was impossible to gratify. Now we may indulge it to the utmost, and while we trade with the people on "the richest river in the world," we shall, at the same time, be gaining much curious information, and removing any false impressions which have been instilled into the minds of Chinamen. To gain immediate access to the natives without official intervention, will be enough to satisfy our most sanguine expectations. Chinamen are remarkably sagacious and thoroughly alive to their own interests, we have only to show them how these interests can be advanced, and their friendship is secured.

One word in conclusion. It is impossible to realise the fact of such a vast Empire being thrown open to British merchants, without remembering that it is also open to British missionaries. These good men will no longer be compelled to pitch their tents upon the fringe of the kingdom; they may now penetrate its recesses, or at any rate reside at the new ports under the protection of our Consuls. Their position will require discretion as well as zeal, tact as well as wisdom. They should be men of learning as well as piety, large-hearted, loving men, who have faith enough to be patient, and energy enough to overcome the obstacles which will ever beset the path of a missionary in China. We have had men of this stamp in China before now; we cannot have too many of them. They are the true pioneers of civilization, and as such, for the sake of our own countrymen, as well as of the Chinese, we heartily wish them "God speed."

MR. MOSS'S CASE.

IN our last issue we noticed the communication made to Mr. Moss by the residents at Kanagawa, in which they acquitted him of any blame in the late shooting affair, and presented him with the amount of fine imposed on him by Mr. ALCOCK ($1,000). By a reference to our Parliamentary intelligence it will be seen that Mr. SALOMONS asked Lord JOHN RUSSELL if he had received a copy of this document. Lord JOHN did not answer the question, but let out what was more important—namely, that the opinion of the law officers of the Crown had been given on this case, but the course to be adopted had not been decided. If this does not imply that a compromise of Mr. Moss's case will be offered to quash the proceedings entered against Mr. ALCOCK in the Court at Hong Kong, we are very much mistaken. If the law officers' opinion had been in favour of Mr. ALCOCK, we may be quite certain that Lord JOHN RUSSELL would have said so.

THE CHINA MAILS.

The Government subsidy to the Peninsular and Oriental Company will either be continued, or other arrangements will be made for the conveyance of the mails with the same regularity as hitherto. The East India and China Association have the matter in hand, and, while negotiations are pending, any further particulars may be unadvisable.

THE CHARTERED BANK OF INDIA, AUSTRALIA, AND CHINA.

THIS Bank was projected in 1852, and obtained a Royal Charter with the usual privileges granted to Indian Banks. In consequence of legal proceedings taken by a portion of the shareholders, the capital of the Company was not paid up in due course, and not until February, 1858, did operations commence, with half the paid-up capital amounting to £322,000.

That the opinion of the directors was tolerably correct as to the opening which existed for this establishment, was proved by the result of the first year's operations, which enabled the directors to declare a dividend of 5 per cent., and also to pay off the whole of the preliminary expenses incurred in this country, and for its branches abroad. This created such confidence that the remaining half of the capital was shortly paid up, making in all £644,000. The second year's dividends amounted to 6½ per cent., the last portion being declared at the seventh general meeting, held on the 28th March, at the London Tavern. The following report was then issued by the directors:—

The directors have now to present to the shareholders a report on the operations of the Bank during the past year, which they trust will prove satisfactory. The result exhibited by the general balance-sheet submitted is a net profit, for the year ending 31st December last, of £45,552. 4s. 3d., and a balance now disposable of £27,502. 17s. 11d.

The directors, at the meeting in September last, expressed their opinion of the propriety of increasing the reserve fund, even at the expense of the dividend, in the early stages of the Bank's existence. On the present occasion, therefore, they recommend an addition of £5,000 to the reserve fund (which will then stand at £10,000), and a dividend for the past half-year, at the rate of six per cent. per annum, free of Income-tax—making, with the distribution of the previous half-year, a dividend at the rate of six-and-a-half per cent. for the whole year—and leaving £1,632 8s. 5d. of undivided profits to be carried to new account.

It has not yet appeared to the directors advisable to increase the number of their branches abroad; they will be quite prepared, however, when the proper time arrives, to extend the business of the Bank in this manner.

The Charter confers the privilege of issuing Bank notes in the Queen's Colonies in the East, but not in the territories formerly under the govern-

Digitized by Google

ment of the East India Company. The directors, however, consider it very desirable that the Bank should possess this privilege at Singapore, and they propose accordingly to apply for it to the Lords Commissioners of Her Majesty's Treasury. In terms of the deed of settlement, two extraordinary general meetings must sanction this application.

LIABILITIES AND ASSETS, 31ST DECEMBER, 1860.

At a subsequent meeting it was resolved to petition Her Majesty's Government for the privilege of issuing notes at Singapore, and the necessary authority having been granted, the circulation was forthwith arranged for.

The Bank has its head-office at No. 20, Threadneedle-street, and conducts its banking operations through the City Bank, which it adjoins. The branches consist of the following:—In India: Bombay, Calcutta. In the Straits of Malacca: Singapore. In China: Hong Kong and Shanghai.

Spirit of the Press.

OUR PROSPECTS IN CHINA.

¶ Every successive mail brings proof of the soundness of our latest policy towards China, and verifies the predictions of those who urged on the advance to Peking. The telegrams we publish to-day announce nothing but prosperity. The Tartar Government at Peking has so entirely renounced its old policy of ignoring the existence of foreigners within the empire that it has established a special board for the management of foreign affairs. Thoroughly awakened by that loud knocking at the gates of the capital, the Tartar princes have put aside the old Chinese officials, and have come out to meet these foreigners themselves. They have not only seen them to fear them, but also to appreciate them, and it would seem that at this moment it is the Tartars, and not the English, who are most anxious to come into close relationship. Prince Kung has, we hear, pressed upon Mr. Lay the entire control of the Chinese Customs at the foreign ports, and has sent him a commission conferring the fullest powers and the most absolute authority. Canton has received official intimation that she is no longer to be considered as the only channel of communication with foreigners, and the direct diplomatic relations of the Government at Peking with the ambassadors there resident are not only defined in treaties, but—what is by no means the same thing in China—are introduced into the practice of the nation. A little time ago we found ourselves combating a very general objection, that an English ambassador could not reside in or near the capital, without danger of outrage; we now see that a special department has been created to do him all formal honour. Not many months ago we had to argue against prophetic warnings of the enduring hatred which any appearance in arms at the Capital would occasion, and we now see that the Tartar dynasty has cast all its confidence upon an Englishman who never hesitated for a moment to show himself conspicuously zealous and most effectively useful among the invaders. We are now reaping the reward of a policy which was at once wise, and bold, and humane. Nor are the commercial advantages slow to follow. While the advices from Australia report that "trade is dull," and while India sends us only tidings of mischievous misgovernment, China from all her ports calls only for more British manufactures. We know not whether this is the first sign of that flood tide which ought now to set in steadily, and to go on and on without an ebb until it has saturated that mighty land with English goods. Perhaps not. It may possibly happen that our European cotton manufacturers may have bought up much of the mass of East Indian cotton which China annually takes, and that China may be only thereby obliged to make up the ordinary insufficiency of her own produce by manufactured goods instead of by raw material. This, however, would account only for the improved demand in one class of imports, whereas the increase announced by the telegrams is general. We have reason, therefore, to hope that this is not temporary, but permanent. If it really occurs as a consequence of the opening up of the country, if the ruling powers are at last in good faith facilitating the transit of our goods, then this increased demand must creep on with ever-accelerating pace, until it outstrips our power of production. When Mantchooria comes down to bargain with us at Neuchang, and Peking admits us frankly to her markets; when our merchants, under the protection of the admirable provisions of the Russian Treaty, shall find it safe to journey in companies through the country; when our teas and silks shall find their natural channels to the coast, and shall be protected by the presence of the European owner from being mulcted by every Mandarin on the way, then we shall begin to enter upon the fruition of our new relations with China. Then we may with some good purpose call upon our Chancellor of the Exchequer for a reduction in the tea duties; for it will depend only upon the English Minister to say whether tea shall be dear to an English cottager, or whether it shall be almost as plentiful as the leaves of the English hedges. Then also we may raise our mills, and put forth our arms to gather cotton from Italy, and Africa, and the islands of the West Indies, and the coasts of India, for we shall have customers whose name is numberless, whose necessities will never fail, and whose industry will always enable them to make it well worth our while to serve them. Our budget of good news is not yet exhausted. Not only are our relations with the Chinese Government amicable and even cordial, not only are our commercial operations with China prosperous, but the people themselves, and notably that faction which represents all the discontent of the people, are anxious for our favour. "The rebels," says the telegram, "are evidently anxious to conciliate the foreigners." This has been recently tested in many ways, but especially by that very sagaciously planned expedition up the Yang-tse-Kiang. In former days the Taepings were so inexcusably ignorant as to believe that the Roman Catholic priests were idolators, and committed the more important practical error of putting them to death as such. While labouring under this frightful error it was, of course, not possible that they could be looked upon as friends by the French, and hence the misunderstandings which have occurred between the French and the Taepings in the Chinese city of Shanghai. Recent circumstances have, however, we hope, induced these furious iconoclasts either to revise their convictions, or, at any rate, to restrain the practical application of them. Our ships, when they anchored off the capital of this rebel sovereign, found him abounding in professions of amity, and loud in his expostulations against the uncivil return made to his pacific overtures. He promised the fullest protection for all commerce upon the river, and was rather hurt that we should think it necessary to leave a vessel of war to look after him at Nanking. It is true that he sent off an expedition up the bank of the river to try to reach Hangkow before we could get up; but this might have been merely to show us how necessary his alliance is in those parts. That fact, however, needs no such proof, seeing that he has already taken this commercial capital of China five times: and we hope that when Mr. Dunlop moves his address upon this subject, he may receive a satisfactory assurance that this *de facto* sovereign, who has now been for ten years enthroned in the southern capital, may be at least acknowledged in his belligerent rights. He holds the great waterway of China in his power, and we must either treat with him or fight him. The first seems easy, the alternative would be madness. The expedition up the Yang-tse has reached Hangkow—the great city—the Birmingham and Liverpool and Sheffield of China rolled into one. The telegram, making a sad hash, as usual, of Chinese names, tells us that the trading ports chosen upon this mighty river are Hinkiang and Hewkiang, where consuls have been left and commercial relations established. These names evidently indicate Chinkiang, which is below Nanking, and Kewkiang, which is a great city in an admirable position for commerce. The map will show it upon the southern bend of the river, about half-way between Nanking and Hangkow. It is situated upon an angle of land between the Poyang Lake and the river; and, by means of the lake and the canals, it commands communication with all the southern privinces. When Captain Osborn's expedition was up here, as appears from a survey contributed by Mr. Oliphant, and published in the Transactions of the Geographical Society, there was an Imperialist camp on the opposite bank of the river. This position is therefore, we may hope, as well protected as it is important. We want nothing more in this quarter but a few gunboats on the river, prudent men as consuls at the new ports, and amicable relations with the great brigand king who commands the banks. All this is very encouraging to those who have taken an unflagging interest in this subject, and have pressed it forward with a never-failing confidence. A little longer and China will be out of our hands. She will go alone, faster, perhaps, than we shall be able to keep pace with her. Of course, there will be blunders enough made on this side. The Post-office, with a perversity which amounts almost to genius, has chosen this special time to reduce the frequency of the mails by one-half, and it is by no means unlikely that we may send out some orders which may close up the opening Yang-tse to our commerce, or that we may even destroy the new system of European Customs' collection, which, paying enormously as it does, has been the real origin of all the Tartars' new kindness. It will be odd if official

Digitized by Google

sagacity should miss such opportunities of mischief as these afford; but if it should so happen we have made the first step into a great future destiny in China.—*The Times.*

COMMERCE WITH CHINA.

The most recent accounts from China fully justify—if that were needed—the most sanguine expectations that were formed as to the results of the policy which has brought about a direct communication between the representatives of England and the Imperial Government, in the Chinese capital, as well as opened up to the enterprise of our traders the great river Yang-tse-Kiang. All the reluctance of the high Mandarins to enter into relations with us on terms of equality seems to have disappeared. Instead of being looked upon as barbarians, whose presence was only tolerated through fear, and with whom treaties were only made, to be broken at the first opportunity, the Imperial Government of China is eager to enter into closer relations with our representatives than the Treaty required, or than is necessary for our own purposes. They are discovering that we are useful to them in other ways than merely carrying on a commerce lucrative to them as well as to us. The control of their Customs duties is pressed upon our *employés*, and a special department of State is created especially to conduct business with foreigners. Such a change has come over the spirit of these slippery, tricky, mendacious celestials, that the edict for the establishment of the Peking Foreign Office concludes with the significant warning that "not the slightest concealment or glossing of facts will be allowed." The truth has been made to penetrate to Peking by great exertions on our part, and at a heavy cost to them, but the lesson is now bearing its fruit, and more rapidly, too, than the most sanguine could have anticipated. While such satisfactory tidings come to us of the relations between our officials and the Government at the capital of China, we have the most gratifying intelligence also of the expedition which was despatched up that great commercial highway, the Yang-tse-Kiang river, for the purpose of opening commercial relations with large centres of population with which hitherto our traders have had no direct intercourse. So far, the expedition led by Admiral Jones has been an entire success. Wherever the elements of commerce existed, the people were not merely willing but eager to open a trade. Our Consuls were established at Chin-kiang, Hew-Kiang, and Hankow; and it was evident that there would be full scope furnished for the exercise of their functions, in the business about to spring up at those places. The blight of civil war, aggravated by the peculiar ferocity with which the Chinese have added new horrors to what is always one of the greatest scourges to any people, had indeed cast a blight upon the pursuits of industry at many places on the banks of the great river, formerly important points of commerce. The Taepings, or rebels, were in full possession of a great stretch of territory, and deserted towns and uncultivated lands were the results of the warfare in which their success had been gained. Nanking, from being the prosperous seat of a population of half-a-million, is described as reduced to a heap of ruins. Here the Taepings have their head-quarters. The rebel leaders, however, although their operations seem to have paralysed industry for the present in many places, are quite anxious to cultivate friendly intercourse with our people, and the free passage of the river, and the trade with the towns upon its banks, will rather be facilitated than obstructed by them. The chief of the many kings in whom the Taepings rejoice entertains at his court a Christian missionary, probably an American. This circumstance is said to be rather indicative of a wish to conciliate the goodwill of the English than of sincere attachment to the principles or practice of Christianity; but, looked at in either light, it is a favourable omen. There was already employment found for trading steam-vessels suited to the navigation of the river, and a great demand for such vessels was springing up. When some obstructions, not difficult of removal, are got rid of, the navigation will be easy enough for vessels even of considerable size; for as far as Hangkow the draught of water was reported to be twenty feet. The river will give our traders direct access to the principal tea-producing districts, and to a population anxious to purchase goods of British manufacture. Thanks to the firm and able pursuance of a judicious policy, a new field is opening for our commerce in these distant regions, and there is an entire end to the vexatious and even humiliating conditions under which English trade has heretofore been carried on in China.—*Observer.*

Literature.

In *Fraser's Magazine* for the current month there is an article on "Soldiers and their Science," which is the title of an interesting work written by Captain Brabazon. The article is, of course, based upon the volume which the writer praises. Beyond question the chief book of the fortnight is Du Chaillu's "Explorations and Adventures in Equatorial Africa," (Murray), a narrative which reads like a romance, but which we dare believe is as true to facts as it is admirable in style. Some people, however, think differently, and one well-known scientific man is bold enough to doubt whether Du Chaillu has ever penetrated the country at all. Mr. John Edward Gray declares that "the book is replete with improbable stories." M. du Chaillu retaliates by saying that Mr. Gray stated to him that "Dr. Livingstone was a great humbug," and observes, sensibly enough, that he is quite willing to be placed on a par with that illustrious explorer. A fierce war is raging on both sides, and, in the meanwhile, the book is read and re-read, and is likely to be all the more popular for the abuse it has received.

Dr. Charles Mackay, who was the originator and editor of the *London Review*, has, apparently, given up his interest in that admirable journal, and is about to start a new periodical, assisted by Mr. Lascelles Wraxall.

We have received a little volume entitled, "Guide to the Art of Illuminating and Missal Painting," by W. and G. Audsley, architects, (G. Rowney and Co.), containing the most minute directions on the subject, which are rendered still more clear by a variety of illustrations. We learn from a correspondent that Mery's French work, "Les Damnés de Java," has been translated into German by Frederick Cossmann, and is just published by H. Huebner, of Leipzig, under the title of "Countess Aurora Despremonts; or, Scenes of Colonial Life in Java." The German critics speak very favourably of the translation, a good deal of the equivocal contents of the original having been suppressed.

Narrative of the Circumnavigation of the Globe, by the Austrian Frigate "Novara," in the Years 1857-8-9. By Dr. Karl Scherzer. Vol. I. Saunders and Otley.

In many respects this is a very remarkable volume. It contains the record of an expedition undertaken by command of the Austrian Government for the great object of enlarging the boundaries of science, and at the same time giving both to officers and men an opportunity of acquiring a practical acquaintance with naval affairs. Other nations—our own especially—have frequently despatched vessels round the world for similar objects. Spain and Portugal in olden time, and France a century ago, vied with England in these peaceful and noble enterprises, but we believe that the *Novara* is the first vessel ever despatched by Austria for a like purpose. This fact adds a zest to our curiosity in perusing Dr. Scherzer's volume. The *Novara* is a 42-gun sailing frigate of 2,630 tons. It was fitted up with every appliance requisite for scientific research, and with every comfort necessary for the health of the passengers and crew. Valuable instructions were drawn up by the veteran Humboldt, who concludes them with a prayer to the Almighty for the success of the expedition, and with the touching remark that long before the return of the *Novara* to Trieste he shall have ceased to be numbered with the living. This belief, however, was not realised, for Humboldt lived to witness the return of the expedition in 1859.

Perhaps a great part of the interest with which Dr. Scherzer's narrative will be perused by an English reader may be traced to its German parentage. It is curious to view well-known scenes from a German stand point—very curious to meet the representatives of a great inland nation on an element so familiar to ourselves, but of which they are comparatively ignorant. The purely scientific results of the expedition are to be published separately. The volume before us contains a lively, readable, and well-written narrative of the voyage itself. The reader, however, must not expect any great novelty in the descriptive sketches with which the work abounds. Can anything new be said of Gibraltar or Madeira, of Rio de Janeiro or the Cape of Good Hope, of Ceylon and Madras? And yet Dr. Scherzer tells his tale so pleasantly, and describes with such freshness and good humour all that passed before him, that we can recommend the book as a traveller's story, while forgetting for a moment the peculiar importance that attaches to it on other and higher grounds. In his account of Brazil Dr. Scherzer touches upon topics which might escape the attention of an Englishman. In strong, earnest words he speaks of the absolute neeessity of free labour in the country, and tells us how alive the Government is to the advantage of encouraging free immigration. In the warmer Northern provinces we are told that the effort was made "to replace the deficiency of negroes by Chinese coolies, who were imported from different parts of China but they could not stand the climate, and were not found capable of advantageously replacing the negro in his various and often very heavy labour." Great attention is, therefore, paid to European immigration, and "in Brazil the conviction is pretty general that only an emigration *en masse* of white labour can save that splendid country from ruin." At present, however, Dr. Scherzer affirms that there are several reasons why emigrants should not go to Brazil; but let the half-profit system be abolished, let the settler be enabled to purchase land at a cheap rate, and let other necessary concessions be made in his favour, and then he believes that "the glorious dawn of a magnificent future will burst upon German emigrants." There are several suggestive topics in this volume, on which, did space permit, we would gladly dwell. We have

Digitized by Google

here only a portion of a great work, but Dr. Scherzer has written enough to show how capable he is of acting the part of historian to the expedition.

We shall expect with interest the second volume of "The Voyage of the *Novara*," and cannot conclude this brief notice of the book without commending the manner in which it is got up. The publishers have done Dr. Scherzer justice, and we have no doubt that he is well pleased to see his Narrative in so becoming a dress.

Java: Or, How to Manage a Colony. By J. W. B. Money. 2 vols. Hurst and Blackett.

We have read this book with some interest and more curiosity. It is a sensible, well-digested work, written by a very sensible man, but Mr. Money like most men of *nous* has his weak point; and we demur altogether to his conclusion that the culture system, which is apparently so successful in Java, affords "a practical solution of the questions now affecting British India." To General Van der Bosch, and the bold system he inaugurated in 1830, Mr. Money attributes all the prosperity which Java now enjoys. Under his survey the Japanese have been forced to be prosperous in spite of themselves. He has acted the part of a good despot, and achieved a marvellous success, yet we cannot forget that it is a success which only despotism could accomplish. Mr. Money has described every detail relative to the culture system clearly and circumstantially; and those of our readers who wish to investigate it may safely refer to him as an authority. We cannot undertake to follow him over so wide a field, but we must be content to state in passing that the principle which General Van der Bosch has so fully reduced to practice is not one which tallies with the respect for personal liberty entertained by most Englishmen. Compulsory labour, however advantageous to the peasant himself, is not a feature which we should wish to see introduced into any of our English colonies. It may be true that the natives of Java "see nothing tyrannical in this order," it may be true that "the ordinary principles of political economy and the advanced doctrines of unprotected and uncontrolled private enterprise" on which we have acted in India are not so conducive to material prosperity as coercive measures might be; it may even be true that the natives of India would have been happier for awhile without the privileges we have awarded them, just as a little wholesome restraint is serviceable to children; but this much is at least certain that having once granted to our fellow-subjects in India the privileges we most prize ourselves, it would be utter madness and folly to retrace our steps in order to follow in the wake of a Dutch despot. We do not desire material prosperity at the loss of everything that is higher and nobler, and we dare aver that it would be better for us to lose India altogether than to retain her on the same tenure as that by which the Dutch hold Java. At the same time we are willing to allow, and, indeed, Mr Money's carefully collected satistics compel us so to do, that the success of the culture system is indisputable. Everything is carried on under the immediate supervision and by the direct aid of the Government. Government starts the contractor and compels the native "to assist in developing the resources of the soil." Altogether, the Dutch sway in Java is a paternal despotism under which the natives fatten and thrive in body, but are utterly dwarfed in soul. On the one hand, we find that the revenue has been raised in twenty-five years from £2,000,000 to £9,500,000, that the imports are raised from a yearly average of about 1 two-third million sterling to over £5,000,000, that the exports have increased from £2,000,000 to upwards of £8,500,000, and that the population of the island has nearly doubled itself; on the other hand, foreign traders are subject to absurd restrictions, the press, is not free, education is forbidden, and all missionary efforts unconnected with the Government are strictly prohibited.

Mr. Money's book is not a volume of travels to be read with pleasure in an idle hour and forgotten in the next. It is a work which could only have been written with immense labour and the most protracted inquiries; it is a work to which all who are interested in the subject will refer again and again for statistical information, and which should be carefully studied by every one who is engaged in Eastern trade.

AMERICANS IN PARIS.—A large meeting of Americans, summoned at a short notice, was held on the 18th inst., at the rooms of the Hon. Mr. Sandford, U.S., Minister to Belgium, for the purpose of sustaining, the Federal Government. Addresses were delivered by the Rev. Dr. M'Clintock, of the American Chapel, Paris; Dr. M'Gowan, from China; and Mr. Sturgis, of New York and China, chairman of the meeting and a large amount of money was subscribed.

CHANGES AND PROMOTIONS IN HER MAJESTY'S ARMY AND NAVY.

ADMIRALTY, MAY 6.

Corps of Royal Marines—First Lieut. Henry Dickonson Nightingale to be captain, vice Buck, to half-pay; Second Lieut. Andrew Donald to be first lieut., vice Nightingale, promoted.

WAR-OFFICE, MAY 10.

Royal Artillery—The Queen has been pleased to appoint General his Royal Highness the Duke of Cambridge, K.G., Commanding-in-Chief, to be col.

Royal Engineers—The Queen has been pleased to appoint General his Royal Highness the Duke of Cambridge, K.G., Commanding-in-Chief, to be col.

41st Regiment of Foot.—Lieut-Gen. Sir Richard England, G.C.B., from the 50th Regiment, to be col., vice General Charles Ashe A'Court Repington, C.B., deceased.

50th Regiment of Foot—Major-General George Morton Eden to be col., vice Lieut.-Gen. Sir Richard England, G.C.B., removed to the 41st Foot.

2nd Regiment of Dragoon Guards—Captain Musgrave James Bradley Dyne to be major, by purchase, vice Henry Miles Stapylton, who retires; Lieut. Thomas William Sneyd to be captain, by purchase, vice Dyne; Cornet Howard James Barton to be lieut., by purchase, vice Sneyd.

3rd Light Dragoons—Charles Stephen Walker, gent., to be cornet, by purchase, vice Willes, promoted.

5th Light Dragoons—Francis Henry Hamilton, gent., to be cornet, by purchase, vice Ewing, promoted.

8th Light Dragoons—Cornet Sebastian White Rawlins to be lieut., by purchase, vice Robert William Jenkins, promoted, by purchase, to an Unattached Company.

10th Light Dragoons—Cornet Wilfrid Brougham to be lieut., by purchase, vice Richard Lomax, who retires.

12th Light Dragoons—Samuel Perry, gent., to be cornet, by purchase, vice Vandeleur, promoted.

14th Light Dragoons—John Mather, gent., to be cornet, by purchase, vice Edward William Pritchard, appointed to the 17th Light Dragoons; Surgeon William Arden to be surgeon-major.

18th Light Dragoons—John Groves, gent., to be cornet, by purchase, vice Malet promoted.

Royal Artillery—Lieut. Sir John William Campbell, Bart., to be second captain, vice Harward, placed on temporary half-pay.

The undermentioned Gentlemen Cadets to be lieutenants, viz.:—

Henry Lees Smith.	James Wall.
John Keith.	Samuel Pym.
Alexander Grubb.	Francis Thomas Bircham.
Edward Duncombe Shafto.	

Royal Engineers—Brevet-Col. Edward Thomas Lloyd to be col., vice Gordon, removed as a General Officer; Lieut.-Col. Arthur Henry Freeling, from the Seconded List, to be supernumerary lieut.-col.; Supernumerary Lieut.-Col. Arthur Henry Freeling to be lieut.-col., vice Lloyd; Captain Ben Hay Martindale, from the Seconded List, to be supernumerary captain; Lieut. John Edward Toller, from the Royal Artillery, to be lieut. with temporary rank; Lieut. James Gore Booth, from the Royal Artillery, to be lieut. with temporary rank; Lieut. Henry George Pilleau, from the Royal Artillery, to be lieut. with temporary rank; Gentleman Cadet Alfred George Foot to be lieut. with temporary rank.

The Lieutenants whose appointments bear date November 1, 1860, to stand on the list of the corps as follows, viz.:—

Lieut. Percy Rix Barber.	Lieut. Albert Charles Smith.
Lieut. Thomas Glancy.	Lieut. John Edward Toller.
Lieut. Arthur Clitherow Ward.	Lieut. Archibald Henry Kildah

Military Train—Capt. C. J. Tuffnell Oakes has been permitted to retire from the service by the sale of his commission.

Grenadier Guards—The promotions of the officers in succession to Brevet Col. the Hon. James Lindsay, promoted to the rank of Major-Gen., have been antedated to the 12th of March, 1861.

5th Foot—Surg. William Kilner Swettenham, M.D., to be surg.-major.

6th Foot—Capt. Alfred Austin, from the 66th Foot, to be capt., vice Richard Sheil, who exchanges.

11th Foot—Lieut. William Joseph Tibbs to be adjutant, vice Lieut. Francis W. Osborne, who has retired; Lieut. Edward Henry Hare to be instructor of musketry, vice Lieut. Frederick James S. Whiteside who has resigned that appointment.

13th Foot—Lieut. Philip Edward Victor Gilbert to be capt., without purchase, vice George Henry Cobham, deceased; Ensign Henry King Fenwick to be lieut., without purchase, vice Gilbert; Richard John Woodhouse, gent., to be ensign, without purchase, vice Fenwick.

19th Foot—Lieut. George Digby Barker, from the 78th Foot, to be captain, without purchase, vice William M'Gregor Archer, deceased.

25th Foot—Lieut. Raymond South Paley to be capt., by purchase, vice George Robertson, who retires; Ensign James Long Watson to be lieut., by purchase, vice Edward Charles Mallet De Carteret, who retires; Ensign Reginald Blewitt Dowling to be lieut., by purchase, vice Paley.

36th Foot—The second Christian name of Ensign Priee is Edwin, and not "Eden," as stated in the *Gazette* of the 23rd of April, 1861.

45th Foot—Ensign Robert J. Callwell to be lieut., without purchase, vice Blair, promoted; Lieut. Robert J. Callwell to be adjt., vice Blair, promoted; Edmund Lombard Hallam Kyle to be ensign, by purchase, vice Callwell; Ensign Henry Hodson Hooke to be instructor of musketry, vice Lieut. Robert J. Callwell, appointed adjutant.

48th Foot—Ensign Reginald Pennell to be lieut., by purchase, vice Edward Benbow, who retires; George Hastings Brooke, gent., to be ensign, without purchase, vice Bowlby, promoted.

53rd Foot—Capt. William Henry Campion, from the 72nd Foot, to be capt., vice William Henry James Clarke, who exchanges.

58th Foot—Capt. Leslie Jenkins Thompson to be major, by purchase, vice George Henry Wynyard, who retires; Lieut. Bertie Beiffner to be

Digitized by Google

capt., by purchase, vice Thompson; Ensign Henry Nizzoli Reeve Storks, to be lieut., by purchase, vice Shiffner.

61st Foot—Lieut.-Col. and Brevet-Col. St. Vincent William Ricketts, upon half-pay, unattached, to be lieut.-col., vice Brevet-Col. Henry Garner Rainey, who retires upon half-pay; Major John Patrick Redmond to be lieut.-col., by purchase, vice Brevet-Col. Ricketts, who retires; Captain and Brevet-Major William Edward Durand Deacon to be major, by purchase, vice Redmond; Lieut. Thomas Casement to be capt., by purchase, vice Brevet-Major Deacon; Ensign John Darwin Wedgwood to be lieut., by purchase, vice Casement.

66th Foot—Capt. Richard Sheil, from the 6th Foot, to be capt., vice Alfred Austin, who exchanges; Charles Stuart Campbell, gent., to be ensign, without purchase, vice Edward Richardson, deceased.

72nd Foot—Capt. William Henry James Clarke, from the 53rd Foot, to be capt., vice William Henry Campion, who exchanges.

75th Foot—Capt. and Brevet Lieut.-Col. Charles E. P. Gordon, to be major, without purchase, vice Brevet Lieut.-Col. Edward Knollys, deceased; Lieut. Thomas Carlisle to be capt., without purchase, vice Brevet Lieut.-Col. Charles E. P. Gordon; Ensign George Benjamin Singer to be lieut., without purchas , vice Carlisle.

76th Foot—Lieut. Edward William Frederick Acton to be capt., by purchase, vice Edward Garmonsway Waldy, who retires; Ensign Albert E. Pearse, to be lieut., by purchase, vice Acton.

WAR-OFFICE, MAY 17.

Corps of Royal Engineers—Lieut.-Gen. William Redman Ord to be colonel-commandant of a battalion, vice Gen. Sir Charles William Pasley, K.C.B., deceased.

2nd Regiment of Life Guards—Lieut. John William H. Cunninghame to be captain, by purchase, vice Brevet Col. Thomas Ogilvy, who retires; Cornet and Sub-Lieut. Lambert Houlton Ward to be lieut., by purchase, vice Cunninghame.

Royal Horse Guards—Cornet Thomas Charles D. Whitmore to be lieut., by purchase, vice Cecil Edward Martyn, who retires.

3rd Dragoon Guards—Capt. Conyers Tower to be major, by purchase, vice Sir Henry Marsh, Bart., who retires; Lieut. George Romney Rawlinson to be capt., by purchase, vice Tower; Cornet Thomas Dawson to be lieut., by purchase, vice Rawlinson; George Coulson Childs, gent., to be cornet, by purchase, vice Hockin, promoted; Charles Addison Davies, gent., to be cornet, by purchase, vice Elliot, promoted.

6th Dragoon Guards—Frederick Betty, gent., to be cornet, by purchase, vice Benyon, promoted.

3rd Light Dragoons—Lieut. Henry Henzell Unett to be capt., by purchase, vice Robert Dymond, who retires; Cornet Daniel Henry Doherty to be lieut., by purchase, vice Unett.

8th Light Dragoons—Cornet Frederick Henry Maitland, from the 2nd Dragoon Guards, to be cornet, vice Pulleyne, promoted; William Henry Field, gent., to be cornet, by purchase, vice John Gaspard Watkins Le Marchant, appointed to the 7th Light Dragoons.

11th Light Dragoons—Ensign Michael Edensor Heathcote, from the 22nd Foot, to be cornet, vice Thomas Stark Christie, who retires.

12th Light Dragoons—Lieut. Francis Theophilus Blunt to be capt., by purchase, vice Brevet-Major Chandos F. Clifton, who retires; Cornet Adolphus John Spencer Churchill Chichester to be lieut., by purchase, vice Blunt.

Royal Artillery—Sergeant-Major Charles Serbutt to be quartermaster.

Grenadier Guards — Lieut. and Capt. Robert Anstruther to be captain and lieut.-colonel, by purchase, vice Sir John Montague Burgoyne, Bart., who retires; Ensign and Lieut. Thomas Ferdinand Fairfax to be lieut. and captain, by purchase, vice Anstruther; William Young Lautour, gent., to be ensign and lieut., by purchase, vice Fairfax.

1st. Regiment of Foot—Lieut. Alexander W. Low to be capt., without purchase, vice Spencer Peel, deceased; Lieut. James William Hassell to be captain, without purchase, vice George Taafe, deceased; Ensign William M. Davey to be lieut., without purchase, vice Low; Ensign Thomas Arthur Mills to be lieut., without purchase, vice Hassell.

3rd Foot—Lieut. Alfred Benwell Letts to be instructor of musketry, vice Lieut. Harry Arthur Alexander Breedon, deceased.

8th Foot—Lieut Frederick Anderson Stebbing to be captain, without purchase, vice George Corry, who retires upon full pay; Ensign Edward Emerson to be lieut., without purchase, vice Stebbing; Marmaduke Stourton, gent., to be ensign, by purchase, vice Skinner, promoted.

10th Foot—Edward Arthur Illingworth, gent., to be ensign, by purchase, vice Nicholas Whitton, who retires.

12th Foot—Adjt. J. Kyle, from half-pay, late Land Transport Corps, to be lieut., vice Julius Henry Stirke, promoted, without purchase, to an unattached company; Lieut. William Henry Crawhall to be instructor of musketry, vice Lieut. James Fielding Sweeney, promoted to an unattached company, without purchase.

13th Foot—Capt. Gustavus Adolphus Hartman, from half-pay, unattached, to be capt., vice A. G. Bell Martin, appointed to the 92nd Foot.

17th Foot—Major Alexander M'Kinstry to be lieut.-col. by purchase, vice Brevet-Col. Gilbert William Francklyn, who retires; Captain Clement H. J. Heigham, to be major, by purchase, vice M'Kinstry; Lieut. John Moore Clarke Travers, to be captain, by purchase, vice Heigham; Ensign Henry B. Jackson to be lieutenant, by purchase, vice Travers; Ensign Lambart Francis Wilson Dwyer, to be lieutenant, by purchase, vice Robert George Wynne Wrench, who retires; William Lonsdale, gent., to be ensign, by purchase, vice Duesbury, appointed to the 75th Foot.

22nd Foot—Richard George Lucas, gent., to be ensign, by purchase, vice Michael Edensor Heathcote, appointed to the 11th Light Dragoons.

38th Foot—Edward Ditmas, gent., to be ensign, by purchase, in succession to Lieutenant Mayo, who retires upon half-pay.

40th Foot—Ensign Martin Morphy to be lieut., without purchase, vice Denis Jackson, killed in action.

56th Foot—Ensign Michael Clare Garsia, from the 1st West India Regiment, to be lieutenant, without purchase, vice Augustus Spiller, appointed Paymaster.

NAVY.

PROMOTIONS.

To be CAPTAINS.—Commanders G. H. Gardner, C. W. Hope, J. C. Byng, J. Bythesea, and H. T. Burgoyne.

To be COMMANDERS.—Lieutenants P. G. Nettleton, C. T. W. G. Cerjat, W. H. Pym, A. Morrell, J. H. Bushnell, F. Harvey, C. B. C. Dent, J. G. C. Evered, R. C. Mayne, and C. A. P. V. Robinson.

To be CHIEF ENGINEERS.—J. H. Trelwing, Henry Brown, W. W. Fabian, R. Wemyss (acting).

APPOINTMENTS.

CAPTAIN.—G. P. Mends, to the Edgar, vice Katon, superseded at his own request.

COMMANDERS.—G. Blane, to the Illustrious, vice Harston, whose period of service has expired. E. Lacy, to the Castor, for service with the Royal Naval Reserve in the Brilliant, vice Gardner, promoted; W. H. Anderson to the Flying-Fish, vice Hope, promoted.

LIEUTENANTS.—Algernon G. Wootton, from the Donegal to the Excellent, gunnery-ship, at Portsmouth; N. Osborn to the Marlborough; H. P. Gilbert to the Trafalgar; E. F. Ricards to the Hero; F. T. Thompson to the Hero; Alexander Buller to the Edgar; John P. Cheyne to the Asia; William Spratt to the Royal Adelaide; William F. Gregory to the Blenheim.

MASTERS.—Richard C. Dyer (additional) to the Impregnable for the Avon; William H. Parker, Richard C. Dyer (additional) to the Asia for the Euryalus.

SURGEON.—William N. Brake from the Formidable to the Challenger, at Sheerness.

PAYMASTER.—Edwin Jago to the Cumberland, in lieu of clerk.

ASSISTANT-SURGEONS.—P. Mansfield, M.D., to the Wellesley, Edward F. Mills, to the Donegal; Edward M'Carttey, to the Steady; F. L. W. Wright (additional) to the Victory.

SECOND MASTERS.—Jesse Dixon, to the Cygnet; William Long, to the Dasher.

MASTER'S ASSISTANTS.—Edgar C. Baker to the Cygnet; Daniel M. Browne to the ady.

ASSISTANT-PAYMASTERS.—Clarence Aylen to the Mars; Edward Tesdall and Alexander C. Young to the Donegal; Alexander G. Young to the Imaum; Edward Tisdale (for disposal) to the Nile; Henry M. Bernard (in charge) to the Cygnet; William K. Horne (in charge) to the Steady.

ACTING SECOND-MASTER.—Edward B. D'Arcy, supernumerary, to the Victory.

ACTING ASSISTANT-SURGEON.—W. J. Thomason to the Challenger.

CHIEF ENGINEERS.—John Lear (confirmed) to the Cumberland, for the Galatea; William Wotton to the Cumberland, for the Leander; Thomas F. Simmons to the Gorgon; Owen Jones to the Asia, for charge of the machinery of the Retribution.

ASSISTANT ENGINEERS.—First Class: William Dark to the Cygnet; George Wynhall to the Britannia, for service in the Bullfinch; Joseph Rothery to the Diadem; Wm. B. Fabian to the Driver, in lieu of a chief engineer; John Syder to the Rinaldo, in lieu of a chief engineer; William H. Rundle to the Indus, for service in the Buzzard; William J. Warren to the Havock; John H. Binns to the Majestic, for service in the Dapper; Edwin Pearce to the Asia, for service in the Escort; G. H. Benton to the Driver; Henry A. Henri to the Spiteful; Richard Holman to the Electro. Second Class: John Ker to the Driver; James Ireland to the Rinaldo; W. H. Grose to the Steady; W. H. Nurse to the Fisgard, as supernumerary. Third Class: William J. J. Spry to the Indus, as supernumerary; Alexander Reid to the Mars; Francis H. Dormison to the Hawke; Lambert J. Croome and David Storrar to the Cygnet; Lawrence Steele to the Steady; Alexander Brown to the Indus, as supernumerary, for hospital treatment; Joseph Knight to the Hero; E. Keen to the Rinaldo; G. Kave and T. N. Crowder to the Driver; E. E. Williams to the Rhadamanthus; T. Ritchie and W. A. Stewart confirmed to the Ariadne.

ACTING ASSISTANT-ENGINEERS—Second Class: G. Roe to the Steady; J. W. E. Baron to the Indus, for service in the Steady. Third Class: J. Fawcett to the Indus, for service in the Princess Royal; James Nelson to the Rinaldo; R. M. Griffith to the Fisgard, for service in the Vivid; E. J. Miller, J. Dunlop, and H. T. Smeddle to the Asia; W. G. Archbold to the Desperate; Thomas F. P. Shelley to the Neptune; William J. Grant to the Cæsar; John Richardson to the Liffey; John A. Cawley to the London; William Bremner to the Doris; John Franklin to the Melpomene; Nathaniel F. Hockerstone to the Terrible; William F. Rowe to the Lapwing; James Legate to the Fisgard for the Monkey; Joseph Bamford to the Asia for the Euryalus.

SUPERHEATED STEAM.

The passage of the Peninsular and Oriental Company's large iron-built screw-steamer *Mooltan*, from the Thames to Southampton, has supplied us with some fresh figures for calculations on the superheating of steam. The *Mooltan* is fitted with engines of the nominally estimated power of 400 horses; and it is asserted that with four small boilers they can be urged to four times that power, or 1,600 horses. The Admiralty formula is 7,600 feet of boiler surface, and 280 feet of furnace, to an engine of 400-horse power. This is 27 1-7 feet of boiler to every foot of furnace. The *Mooltan* has 160 feet of fire-grate to 4,800 feet of boiler, or 30 feet of boiler to each foot of furnace. With a diminished fire-surface to every foot of boiler, in the proportion of 27 1-7 to 30, the engineer who has supplied the machinery, guarantees that he will drive the ship at an average speed of 10½ knots per hour. To gain power the steam is superheated, on Lamb's principle, by running the steam pipes through the funnel; and it enters the cylinders at 320 to 330 degrees, the pressure in the boilers being 20lbs., and in the engines 17lbs. to 18lbs.

Digitized by Google

The cylinders are jacketed, or doubled, to act expansively. The upper ones are described as 43 inches diameter, in which the dry or superheated steam is first used, at a pressure, it is stated, of 20lbs., and is then passed to an outer cylinder of 96 inches diameter, to be worked expansively, and then passed to the condenser, to be taken back again to the boilers. There are undoubted novelties in these engines, for a pressure in the pipes of 320 degrees gives but 20lbs. in pressure in the cylinders, or, as described in a second reference, only 17½ to 18lbs. Heated steam turned into a cylinder at 320 degrees, according to this description, gives a working pressure of 17½ to 20lbs. Now, 320 degrees Fahrenheit is equal to what is termed six atmospheres, when its elastic force is 179·4, and its pressure by ordinary rules of reckoning should be 71lbs. Steam is generated at 212 degrees, and, till it is converted into steam, remains at this heat. When vapour is generated by constant application of fire, every cubic inch of water gives out 1,728 inches, or a cubic foot of steam, if free from saline particles. In estimating the power of the *Mooltan's* engines by the water in the boilers, we require to know their exact cubic contents, and then the old and new methods of measurement might be applied. We know by force of steam what amount of pressure is required to lift a piston of a given diameter and stroke, but this superheating plan upsets all tabulated data. A 400-horse power single-acting engine in former days—for we may bid adieu to all reckonings in the old style—demanded 3,994lbs. of coal per hour, and 444·7 of water, when working expansively, and a double-action engine 2,816lbs. of coal per hour, and 312·8 of water. Messrs. Tennant and Humphreys intend to drive the engines of the *Mooltan*, which are of 400-horse power, with one ton of coals, or 2,240lbs. per hour. If her engines can be worked, to attain the speed calculated upon, with a ton and a-half per hour, or 3,360lbs., an immense saving will have been effected, for we must take into consideration the driving of such engines non-expansively, when their consumption would be 5,912lbs. per hour.

Judging from the ship's run round to the Solent, we should say that the average of 10½ knots will not be consecutively maintained, and that a failure to the extent of the maximum speed may be foretold. With fifty-nine revolutions of the engine ten knots were not attained, although the ship was in light trim. When she is provisioned, and all her weights, in cargo, coals, and provisions, are on board, her displacement will be greater; and if she could not reach 10 knots in smooth water, she will never sustain 10½ in a sea-way. But her horse power on an average of nine knots would be a great success, for it may be pronounced a decided triumph to propel a ship of her tonnage with one horse power to about every eight tons. Fifty-nine revolutions of a screw engine are quite enough for economical purposes. If you go beyond this the friction is great, and the wear and tear of machinery out of proportion to the results gained.

This raising of a diminished quantity of steam from, as a matter of course, a smaller quantity of water, is making up for the loss of volume by density, and herein consists the advantages of superheating. The *Mooltan* is not fitted with pipes through the furnaces to bake the steam till upwards of 400 degrees, and thus doing mischief to the machinery. Three hundred and twenty degrees, or about 100 degrees above the temperature of the saturated steam, is a safe point to work at. Beyond that the gain is more apparent than real. Superheated, or dry steam, at this temperature, is productive of several advantages. Less water is needed, and, consequently, smaller boilers. With less requisition for boiler surface, space is economised and fuel saved; but whether the principle has not been carried too far in the *Mooltan*—that is to say, whether too much reliance has been placed on the high pressure gained by dried steam, and in the discarding of volume—remains to be proved by further and more practical experience. As a mail packet destined to move through the water at high speed, we incline to the opinion that she will prove a failure. The principle, we conceive, has been carried too far in this instance. If she fail in speed, however, this may not be altogether attributable to the smallness of her boilers, for the form and pitch of the screw, the length of stroke of the piston, the lines, and draught of water, may each have a place in the consideration of her retardation, or in the miscalculated velocity. But should she answer the expectation formed by the company, then a success will be achieved which will have an appreciable influence upon the interests of steam navigation.—*Steam Shipping Journal.*

Parliamentary Intelligence.

HOUSE OF COMMONS.

CASE OF MR. MOSS.—(13.) Mr. Alderman SALOMONS asked the Secretary of State for Foreign Affairs if he had received a copy of the communication addressed to Mr. Moss by the English merchants of Yokuhama, on the sentence of fine, deportation, and imprisonment at Hong Kong recently passed by Her Majesty's representative at Japan upon that gentleman; and if he intended to lay upon the table any papers on this case for the information of the House?—Lord J. RUSSELL replied that all the papers connected with the case of Mr. Moss had been referred to the law officers of the Crown for their opinion upon the facts. An opinion had been given, but it had not yet been settled what course should be taken. He doubted whether it would be convenient to lay the papers upon the table, but he would consider the point and communicate with the hon. member.

COMMERCIAL TRAFFIC ON THE YANG-TSE-KIANG.—(14.) In reply to a question from Mr. DUNLOP, Sir G. LEWIS said the Admiralty had received a letter from Sir James Hope, from which he would read an extract. The letter was dated:—"On board the *Coromandel*, Feb. 25, 1861. . . . . You will be pleased to acquaint the Lords Commissioners of the Admiralty that I left Woosung on the 9th inst., and after some detention, occasioned by the grounding of the *Centaur* in a difficult part of the river, I arrived at Nanking on the 20th, after having located the Consul at Chin-keang-foo on my way up. From the communications I held with the chief authorities of the Tae-pings, I have reason to expect that every point necessary for the unmolested passage of British vessels up the Yang-tse will be readily granted, but I have refrained from coming to any distinct arrangement on the subject until I should have the assistance of Mr. Parkes. On my return down the river for the purpose of taking up the *Centaur*, I was joined by Mr. Parkes, whom I forwarded to Nankin, where he will put matters in train and wait my arrival. I propose to-morrow to proceed up the river, and foresee no difficulty in completing the arrangements for opening the Yang-tse, detailed in my letter of the 2nd inst."

THE MAILS TO CHINA.—(14). Mr. BAILLIE wished to know whether it was the intention of the Government to withdraw the fortnightly Post-office communication with China before the British troops were withdrawn from Tien-tsin.—The CHANCELLOR of the EXCHEQUER recommended the hon. gentleman to move for the correspondence that had taken place. The question put to the Government was as to the matter of a subsidy, and whether the fortnightly communication was to be withdrawn or not he could not say. The Government never had adopted the view that it would be necessary or desirable to prolong the double mouthly subsidy upon the ground of the continued occupation of Tien-tsin.

HER MAJESTY'S LEVEE.

His Royal Highness the Prince Consort held a Levée by desire of the Queen on the 15th May in St. James' Palace. Among others the following gentlemen were presented to the Prince Consort:—

Captain Henry Grattan, on his return from China, by General Viscount Gough.

Thomas George Knox, interpreter, British Consulate, Bangkok, by the Earl of Erne.

Mr. John Markham, Her Majesty's Vice-Consul, Shanghai, China, by the Earl of Malmesbury.

Colonel Reeves, on return from China, by the Deputy Adjutant-General.

Lieut. C. E. Servanté, on return from foreign service in China, by Major-General Wesley.

Lieut. G. C. Sinclair, R.N., on return from China, by his father Vice-Admiral Sir J. Gordon Sinclair.

Captain Grant Suttie, on his promotion and return from China, by Sir George Grant Suttie.

Colonel F. C. A. Stephenson, on promotion, on return from China, and on being nominated a C.B., by his Royal Highness the Duke of Cambridge.

Major H. T. Wilmot, V.C., on return from India and China, by the Duke of Newcastle.

Lieut.-Colonel Andrew Browne, on return from China, and being appointed a C.B., by the Deputy-Adjutant-General.

Commander John Byng, on return from China, by the Hon. Frederick Byng.

Lieut.-Colonel W. W. Barry, C.B., on return from China, by Col. Charles Bingham.

COMMERCIAL POSTSCRIPT.

CITY, MONDAY AFTERNOON.

ARRIVALS NOT INCLUDED IN TABLE.—May 25 at London, from Penang, Clara. 21, off Cape Clear, from Rangoon, Neptune; 25, at Deal, from Singapore, Balaklava; at Falmouth, from Sourabaya, Louise; from Akyab, Fanny Mitcheson; at Liverpool, from Maulmain, Free Trade; 22, at Hamburg, from Macao, Mathilde; Cat uxhaven, from Singapore, Caroline; 23, at Texel, from Banjoewangie, Dionysia Catharina; from Batavia, Acadia: 23, at Brouweishaven, from Banjoewangie, West Capelle; at Flushing, from Banjoewangie, Walcheren; April 30, at Havana, from Macao, Francis P. Sage; May 27, in Downs, from China, Monica; from Akyab, Empress; 26, at Cork, from Akyab, Haddassah; at London from Foo-chow-Foo, Spray of the Ocean; from Manila, Fanny Mc Henry.

DEPARTURES.—May 18, from off St. Alban's, for Sourabaya, Koninklyke Nederlandsche Yacht Club; 19, from off South Foreland, for Batavia, Madeira; 23, from Sunderland, for Singapore, Blondel; 25, from Deal, for Hong Kong.

SPOKEN.—Julie, Rotterdam to Batavia, May 11, 48 N., 7 W.; Broedertrouw, Batavia to Amsterdam, March 28, off Cape of Good Hope Celebes, Amsterdam to Sourabaya, March 24, 2 N., 23 W.; Quatre Bras, Amsterdam to Batavia, April 22, 4 N., 22 W.: Olbers, Java to Amsterdam, May 9, 34 N., 36 W.; Johann Christian, Batavia to Amsterdam, May 14, 43 N., 26 W.

At ST. HELENA.—April 1, Encarnacion, Manse, from Macao, sailed 2 for Havana 9, Cornelia Witt, from Sourabaya; Kate Hooper, Johnson, from Macao. Sailed April 2, West, Hawkins, from Batavia for London.

Monetary and Commercial.

THE NEW STEAM COMPANIES FOR CHINA.

We noticed in our last the completion of the "China and Japan Steam Navigation Company." On the 11th inst. the undertaking was formally announced, and on the 30th the allotment of shares will take place. The particulars of this undertaking will be found in our advertising columns.

The organisation of the "China River Steam Navigation Company," noticed in the London journals of last month, is nearly completed.

The prospectus states:—

This Company is formed for the purpose of exercising the rights acquired by the Treaty of Tien-tsin and the Convention of Peking, and for developing without delay the most extensive and profitable field in the world for steam navigation.

All the principal Chinese ports are now open for trade, and British steam vessels are permitted to traverse the inner waters of China. The inmost parts of China to which Europeans have never yet had access, may be approached by the Yang-tse-Keang River.

Digitized by Google

Some idea of the vastness of the Chinese native or home traffic on the Yang-tse may be formed, by considering that the grain trade with Peking alone affords employment for more than three thousand junks, manned by one hundred thousand sailors, the capital invested being upwards of seven millions sterling. (*Vide* Report from Shanghai Chamber of Commerce to Mr. Bruce).

It is confidently anticipated that the receipts for freight of British manufactures from Shanghai to the populous inland cities on the shores of the Yang-tse, and for the conveyance of return cargoes of teas and silks to depots on the coast or alongside of merchant ships loading for Europe, cannot fail to be large, and to rapidly augment, irrespective of the passenger traffic.

The towage of Chinese trading and passenger vessels will also form a fertile source of constant and remunerative employment to the tug steamers of this Company, about to be established for the occasional use of sailing ships on those parts of the Yang-tse where the current is so strong that no native boats can ascend the stream except by tracking—a rude, dilatory, and expensive system, which will now be superseded.

Lord Elgin has remarked, in one of his latest speeches, that between two nations so industrious and so commercial as Great Britain and China, "It is impossible to set limits to the amount of trade that is likely "to grow up;" and referring to the triumphant close of his own labours, this eminent diplomatist stated, on the same occasion, "that the great task of construction—the task of bringing China, with its extensive territory, its fertile soil, and its industrious population, as an active and useful member into the community of nations, and making it a fellow labourer with ourselves, in diffusing over the world happiness and well-being, is one that yet remains to be accomplished."

Whilst sedulously endeavouring to act up to the spirit of Lord Elgin's well-timed address, it will be the object of this Company to bring the privilege of free intercourse with every part of the Chinese empire into immediate operation, and to put in practice all our treaty rights, for it has been well observed by *The Times*, that "The prospects of future peace with China are very much in proportion to the activity now displayed in gathering the fruits of war."

The Bank of England rate was raised on the 16th to six per cent., and but for timely intelligence of the advance in the rate of exchange at New York from 104 to 106½, the rate would probably have been again raised. The public funds have been fully maintained, and Consols have continued to range at 91⅛ to 92. The demand for money has been rather pressing, but during the past few days it has subsided, and good bills at long dates have been done at six per cent.

The privateers now equipping in the Southern States of America, are likely to place in jeopardy the vessels bound from India and China to the Northern ports of New York and Boston. Ha Great Britain earlier consented to the doctrine that "neutral flags make free cargoes, vessels under the English flag would now reap the benefit of the carrying trade between these countries. As it is, English shipowners must be content to see it borne off by continental vessels. It was not until the Crimean war broke out that this policy was admitted, but no steps were taken to bind the United States to its provisions and decisions in all such cases, when brought to a legal tribunal, have always been based on the law and practice of English courts. The vessels now on the way from China comprise the Starr King, Snow Squall, Samuel Russell, Haze, Flying Scud, Sportsman, Onward, Comet, Lord Clarendon, Eliza and Ella. From Manila: Horizon, Sultan, Kit Carson, Storm King. From Singapore: Game Cock, Ferdinand and Louis. From Penang: Humboldt.

The *Economist* on this subject has the following:—

"There can be no doubt that under the present law of America, both in the North and in the South, our ships may be at any moment stopped by a vessel of war of either of the now hostile Republics. America has on various occasions contended in diplomacy for the principle that neutral ships should make neutral goods; but her courts of law have always recognised the reverse principle. America derived her jurisprudence from England, and in England until lately it was considered a matter of national dignity, an inherent element in our sovereignty of the seas, to enforce the right of taking enemies' goods in neutral ships. We fancied that we should generally be the belligerent power and also the stronger belligerent power. We imagined that we should have the command of the seas, and tried to augment the recognised powers of that command both by the influence of our diplomacy and the decisions of our judges. It happens, moreover, that we shall be exposed to these privateers, and that other nations will not. America has made express conventions with various States—with Russia, with Peru, and with others—to admit, as respects them, the principle that the 'neutral flag' shall make 'neutral goods."

In a trial lately made of the comparative strength of Russian and Manila rope, it was proved that the former could only bear a strain of one ton per pound per fathom, while the latter stood two tons per pound per fathom. The use and manufacture of Manila rope is rapidly increasing, and Messrs. Garnock, Bibby, and Co., have special machinery which will produce 1,000 tons per annum.

According to a meeting held lately of the shareholders of the *Great Eastern*, it appears that the vessel must be put up for sale and realised, to pay off Mr. Scott Russell's and other claims. By the latest advices from New York, however, it appears that there is a probability of her being chartered by the Northern Government.

The following notice of the growth of tea in India is from the *Money Market Review*:—

"The rise and progress of the Assam Tea Company illustrate in a remarkable manner the benefits that would accrue to India if the Indian Government would encourage rather than impede investments in land. Tea has become to us as much a necessary as cotton. It is a proverb in China, that without tea the outer barbarians would die. Years ago, when the fear arose that through some squabble with China our supply of tea would be cut off, it was discovered by the East India Company that some portions of India were quite as capable of producing good tea as China, if they were but cultivated. This discovery led the East India Company to establish a tea garden at Assam. Their efforts ended as is usual in such cases. In the year 1840 they made over their tea gardens to the Assam Company, and the result has been that, whereas in 1841, the first year after the Assam Company took possession, they sent 80,000 lb. of tea to London, in the year 1860 their crop yielded no less than 880,000 lb.; and the crop of 1861 is estimated to produce but little under 1,000,000 lb. Instead, therefore, of tea-growing in Assam resulting in a miserable failure as it did under the paternal management of the East India Company, it has now become a great success under the judicious management of a private company. The success will be still greater should the Company succeed in purchasing the fee simple of the land which they clear and cultivate. It is capital that is wanted, and this is the best way to attract it, not from the home market, which is already sufficiently pressed upon, but from the hoards of the natives themselves. They will buy land eagerly, if the opportunity be given them of obtaining it for their own, whilst the most florid assurances from the financial department will fail to induce them to touch Government securities."

The shareholders of the Isthmus of Suez Canal held their annual meeting a few days back at Paris. From the report presented by the Directors, it appeared that the sum disbursed in the year from the 30th April, 1860, to 30th April, 1861, was 13,336,643 f., of which 10,830,671 f. were for works, the rest for interest on shares, expenses of management, &c. What has been done under the head of works was represented to be this:—

"The completion of the preparatory operations indispensable for assuring the occupation of the lands conceded and the organisation of works; the digging of a canal about seventeen miles long for carrying the water of the Nile to the centre of the Isthmus; the construction of storehouses, sheds, and houses covering a superficies of 6,000 square metres; the purchasing of a large *materiel* for earthworks, &c.; the opening of the quarries of Mex, near Alexandria, for the extraction of materials destined for the construction of Port Said; the purchase of wood, iron, coal, lime, cement, provisions, &c., required in the works; the conveyance to the central point of the Isthmus of 13,800 wheelbarrows, of machinery for sawing, and of more than 20,000 planks a the preparations for the works from Lake Timsah to the Mediterranean,; length of 47 miles; and finally, the assembling of 8,000 workmen and the concentration of all that is necessary for executing the earthworks at the rate of 25,000 cubic metres per day."

The dollars by the Mexican steamer have been disposed of at 59¼d. per ounce, being the same price as that obtained for the previous large arrival at the beginning of last month.

It appears that the irregularities in the service of the Galway American Steam Company have resulted in the withdrawal by the Government of the contract granted by Lord Derby's Cabinet to Mr. Lever, under which a subsidy of between £70,000 and £80,000 per annum was payable to that undertaking After the warnings already given to the Company the Chancellor of the Exchequer was bound to take this step.

The annual meeting of the Provincial Bank of Ireland has been held, Sir Minto Farquhar, M.P., in the chair, when the report, announcing a distribution at the rate of 20 per cent. per annum, free of Income-tax, was adopted unanimously.

A Parliamentary return shows the quantity of tea annually consumed in the United Kingdom. In 1801, when the average price per lb., inclusive of duty, was 4s. 2½d., the quantity of tea consumed in the United Kingdom was 23,730,150 lbs., and the amount of duty received thereon was £1,423,660. In 1860 as much as 76,816,394 lbs. was consumed, the average price per lb., including duty, being 2s. 10¾d. The average quantity consumed by each individual of the population was 2lb. 10 oz. in 1860, and 1lb. 8 oz. in 1801. The average rate of duty per lb. paid by the consumer was 1s. 2½d. in 1801, and 1s. 5d. in 1860.

The annual meeting of the Chartered Mercantile Bank of Imdia, London, and China, took place on 21st inst., when the report announcing dividends for the past year at the rate of 10 per cent., free of Income-tax, was unanimously agreed to. With reference to the comparatively unsatisfactory result of the operations of the last twelve months—the total profit of 1860 having been £51,274 against £74,560 in 1859—it was explained that the diminution is attributable to the low

Digitized by Google

rates of interest in India and China, and a falling off in the exchange business. The Bank has also experienced serious disappointments, the principal being the large loss by bad debts, more than £21,000 having been written off on this account against about £3,000 in the previous year. Extra charges have also been increased, including the cost of starting two new establishments at the Mauritius and Penang, to the amount of £8,000, and the business in China has suffered from the sickness of some of the principal officers. It was also mentioned that the cause of the bank not having subscribed to the Indian Famine Relief Fund here arises from their having already contributed in India. A proprietor having made some observations on the character of the management, it was replied that the Directors exercise a close supervision over the whole of the affairs of the establishment, and encourage the zeal of the officers in every way. It is not intended to declare a bonus until the present reserve of £50,000 shall have been raised to £100,000.

The steamer *Malacca*, with the first portion of the Electric Cable, to connect Malta with Alexandria, has arrived at Malta, but owing to the damaged state of the *Malacca*, the laying of the cable would be delayed until her repairs were completed. The *Rangoon*, it is expected, will be ready to leave the Thames with the second portion about the 5th proximo.

The amount of bullion by the *Ceylon*, from Southampton, in gold, is to Alexandria, £4,000; Ceylon, £2,000; Madras, £3,987. In silver, to Calcutta, £179,728 (£100,282 on Government account); Hong Kong, £17,619; Foo-chow-Foo, £5,600; Shanghai, £33,647; Sydney, £500.

ARTICLES OF IMPORT.

TEA.—During the past fortnight our market has been very quiet, the principal transactions having been at the public sales, of which there have been four, but prices of all kinds, except the low and common descriptions of Congou, have been fairly maintained. The advices from China have been such as should have made a favourable impression on the market; but the general stagnation of business with the rise in the Bank rate to 6 per cent., and the large public sales, have prevented any improvement in the demand. Low and common broken leaf kinds have sold as low as 7d. to 8d. per lb., being in over supply; the flavory kinds under 1s. 3d. per lb. continue very difficult of sale. Common to fair Ho Hows and Ning Chows under 1s. 5d. per lb. have been heavy at rather lower prices. All grades of Congou above 1s. 6d. per lb. maintain full prices. Tayshans are without change. In Oolongs, Souchongs, and Flowery Pekoes there is no new feature. Common Scented Capers have been in improved demand, and a few thousand boxes sold at 9½d. per lb. [Scented Orange Pekoes remain much as before, with a rather better inquiry for good kinds. In Green Teas business has been moderate, full prices are paid for all descriptions, those offered at public sale yesterday selling with spirit. The supply is now very limited. The public sales comprised 54,114 packages, of which 18,179 packages were sold, including 1,300 packages Assam, and 11,700 without reserve.

SILK.—The market has been very weak since the departure of last mail, but a slightly increased demand has sprung up during the last few days. Prices are about the same as last quoted.

SUGAR.—Sales of about 3,000 bags Clayed Manilla, at 34s. to 35s. A general dullness prevails over the colonial and foreign sorts.

COFFEE.—In fair demand, and sales at full rates. Plantation 68s. to 72s. for fine ordinary to low mid. One lot of fine middling at 79s. A sale of 577 bags Java has been made at 60s.

RICE.—Small sales at reduced rates. The sales of 4,000 bags of damaged Rangoon realised 6s. to 10s. Sales of Java are reported at 14s. 3d. to 14s. 6d.

PEPPER.—Of 2,600 bags of Penang, black, at auction, about one half sold at 3¼d. to 3⅜d. for fair, and 117 bags Singapore at 4d. Of White 600 bags of Singapore fetched 6¾d. to 7¼d. for good to very fine, and 5½d. to 6d. for middling mixed.

SAGO.—845 boxes of small pearl at public sale realised 17s. to 18s. 6d. for good to fine bright.

SPICES.—Cinnamon. The last ruling rates at the quarterly sales are current; of 74 bales at auction a portion sold on these terms. Cassia Lignea: A lot at auction retired at 89s. Casssia Buds: Scarce, and wanted. Cloves: No transactions. Mace: 19 cases Penang, and 3 Singapore, chiefly sold at 11d. to 1s. 8d. Nutmeg: Nearly 100 cases Penang and Singapore sold at auction at 2s. 9d. for fine bold, and 1s. to 1s. 9d. for ordinary small to good medium.

HEMP.—Of 300 bales at auction the greater part was realised at £21 to £22. 12s. 6d.

COTTON.—Fair to good Tinnevelli has fetched 5⅝d. to 6 3-16d.; Broach, 6¼d.; fair Dhollera, 5¼d. to 5⅝d.

JAPAN WAX.—No transactions reported. Quotations about as last.

TOBACCO.—No transactions in Manila or other sorts.

TIN.—Market dull. Quotations for Banca 126s. to 127s., and Straits 122s. to 123s.

GAMBIER.—Of 1,300 bales at auction sold at 16s. 3d. for fair, and 15s. 9d. to 16s. for heated.

CUTCH.—Of 3,500 begs at auction one-third sold at 22s. 6d. to 23s.

MISCELLANEOUS.—India Rubber: Small business done at 1s. 3½d. to 1s. 4d. Camphor: Sales of a few chests at 240s. Sapanwood: 50 tons of Siam sold at £9 to £9 2s. 6d., and 9 tons of Manila at £6 5s. Soy: Large sales at 2s. 4d. to 2s. 5d.; at auction part of 180 hogsheads sold at 2s. 3d. to 2s. 5d., and 40 tons of Japan at 10d. Mother-o'-pearl Shells: No sales of Manila and no Singapore in the market. Star Anniseed: 200 boxes at auction all retired. Sticklac: Sales of a portion of 132 chests at 85s. to 90s. Gum Benjamin: Of 59 cases of Siam nearly all sold at £35 per cwt. for very superior. Damar: No sales. Gamboge: Sales at auction retired. Rattans: Sales of about 20,000 bundles of Singapore at Penang at 2s. 3d. to 3s. 5d. Elephants' teeth: No sales. Vermillion: Buyers are offering 2s. 4d. Galangal Roots: 50 bags at auction, all retired. Cubebs: Sales at £8 10s. for a parcel at auction, and subsequently at £7 to £7 5s. Dragon's Blood: No sales. Galls: China and Japan are now worth 45s. to 60s. Of 500 packages at auction a few sold at 48s. 6d. Rum: Sales of East India at 1s. 8d.

UNITED STATES.

TEA.—No speculative sales have taken have taken place, and transactions are confined to immediate wants at previous rates.

SUGAR.—Market more firm. Sales of 11,600 bags of Manila at 3⅛ cents.

TIN.—Market dull. Quotations nominally, 24⅛ cents. to 25¼ cents.

RICE.—Moderate sales at reduced rates. 3,000 bags of Siam were placed on private terms.

ARTICLES OF EXPORT.

IRON.—The quotations in London are for Welsh bars, £6. 2s. 6d. to £6. 10s; nail rods, £7. 5s. to £7 17s. 6d.; hoops, £8. 15s. to £9. 10s.; sheets, single, £9. 5s. to £9. 15s.; Staffordshire bars, £8 to £8 10s.; rails, £5. to £5. 10s.

STEEL.—Swedish keg, £17. 10s.

COPPER.—Sheet and sheathing, 11d.; yellow metal, 9½d.

TIN.—125s. for block; 126s. for bar. The plates, best charcoal, I.C., 29s. to 30s. per box.

LEAD.—English pig, £20. 15s. to £22; shot, patent, £24. 10s.; sheet, £22; spelter, £17. 10s. to £18; zinc, English sheet, £24; quicksilver, £7 per bottle.

EXPORT OF BULLION TO CHINA, &c.

The following return shows the shipments of bullion from Southampton during the present year by the P. and O. Company's mail steamers:—

Carolus Dollars	0 6 6

MANCHESTER MARKETS.

This has been almost a blank week in Manchester business, the races and other amusements occurring in the towd, and most buyers and sellers being, accordingly, absent. Where prices have been tested, they have been rather against spinners and manufacturers both for home and export; but as extremely little production is going on this week throughout the district, sales have been inconsiderable, and no attempt made to induce them. The state of the cotton market prevents many sellers from coming down in price, but has no effect whatever in stimulating the excessively inert demand.

COMPARATIVE STATEMENT OF THE COTTON TRADE.

RAW COTTON.	Price May 28, 1861.	Price May, 1860.	Price May, 1859.	Price May, 1858.

CASUALTIES.

The Leopold Catcaux, which arrived at Falmouth, May 9, from Akyab for Antwerp, was leaky.

The Eloisa, which arrived at Boston, April 23, from Manila and Batavia, had damaged rudder, &c.

At TABLE BAY.—March 28, Crouch Brothers, Crouch, from Sourabaya. 31, Neckar, Brolin, from Samarang. April 2, Cæsarewitch, Jorgan, from Shanghai. March 26, Zodiac, Jarvis, sailed for Batavia.

FREIGHTS AND CHARTERS.

Freighting business is quiet, and merchants in general show little disposition for large transactions. American ships thrown out of their regular trades obtain employment with difficulty, and, where fixed, accept in most instances considerably below the market rates.

The Admiralty received tenders on the 24th inst. for about 400 tons of stores for Hong Kong and Canton. Coal ships are a little more in request for the Cape of Good Hope, Bombay, Hong Kong, and Shanghae.

Current freights to Shanghae, 40s. to 50s. per ton weight and meast; to Hong Kong, 35s. to 40s.; Singapore and Penang, 30s. to 45s.; to Manila, 35s. to 40s.; to Batavia, 45s. weight, 40s. meast; to Japan, 65s. weight, and 60s. meast.

INSURANCE.

The following are the current rates of premium at Lloyd's, according to the class of vessels, &c.:—To Hong Kong, 40s. to 50s. Shanghai, 50s. to 60s. Singapore, 30s. to 45s. Batavia, 30s. to 40s. Manila, 50s. to 60s. Nominal quotation for Japan, 50s. to. 60s.

At Hamburg, for Batavia and Singapore, 40s. China and Manila, 40s. to 50s.

113, CHEAPSIDE, LONDON.

HOLLOWAY'S OINTMENT and PILLS.—CHILDREN'S COMPLAINTS.—While the weekly return of mortality shows a decrease of deaths from small-pox, it displays an alarming increase in fatal cases of measles and scarlatina. Such unfortunate issues would not result were mothers and nurses to rub Holloway's Ointment upon the glands of the neck and upper part of the chest when symptoms of scarlet fever or measles first appear, or even after the eruption has come out. The Ointment, penetrating through the skin to the glands, always stimulates them to throw out a full eruption, which is the safety-valve of both diseases. Holloway's Pills also should be given to lessen the fever, to reduce the irritation of the throat, and to quicken the cough, which are most distressing to all suffering from these complaints.

HARMONIUMS (ALEXANDRE'S).—New FIVE GUINEA HARMONIUM in oak, with four octaves; and the new Six-Guinea Harmonium in oak, with five octaves, and two foot pedals, equally adapted for school and home use; also all the other varieties of Harmoniums from Six to Seventy Guineas. Merchants and shippers supplied on the lowest terms. City Depot KEITH, PROWSE, and Co., Agents, 48, Cheapside, E.C.

MUSICAL BOX DEPOT, 48, Cheapside London.—Messrs. KEITH, PROWSE, and Co. importers, have just received from Messrs. Nicole, Freres, a large assortment of their newest boxes, some of which are with flute, bell, and drum accompaniments, the expressive effects of which upon the ear are exceedingly novel and beautiful. The ordinary boxes 4 to 12 airs at one guinea each air. Remittances direct will receive prompt attention.

FOREIGN CORRESPONDENCE!
THE greatest novelty of the Day in Paper is the NEW INDIA PAPER, which is an entirely New Fabric, possessing a peculiar surface which renders it admirably suited for rapid writers. It is further distinguished from the usual kind of Foreign Paper, by its being as pleasant to write upon as stout writing paper, whereas with any other than a very light hand the pen is very liable to catch in the thin paper used ordinarily for Foreign Correspondence. It may be had in various note and letter sizes, plain, ruled, and black-bordered. The New India Envelopes possess two most valuable qualities, viz., lightness, and the strength and toughness of stout Cartridge Paper. They are less than half the usual price of Foreign Envelopes.
Three Sheets of India Note and Envelope, weigh under the ½-oz. The Envelopes may be had plain, or printed "via Marseilles," or Southampton, Ostend, France, Belgium, Liverpool, Halifax, Trieste, Lisbon, or in any other manner to order, and likewise with Mourning Border.
Sold only by E. TOWNSEND HAMBLIN, Stationer 421, Oxford-street, London, W.

DIVING APPARATUS.

NOTICE TO PASSENGERS BY THE OVERLAND ROUTE, via EGYPT.
PHILIP ZECH, Proprietor of the two well-known Hotels in Alexandria, the Hotel d'Europe, and the Peninsular and Oriental Hotel, begs to inform his friends, and Travellers in Egypt in general, that he has purchased SHEPHEARD'S HOTEL in CAIRO, which will still continue to bear the same name; and in returning thanks for the extensive patronage enjoyed by his two houses in Alexandria, hopes that the preference may likewise be extended to his house in Cairo, which will be managed in first-rate style, and in a manner intended to give every satisfaction to its frequenters, both as far as table, wines, internal and external service are concerned. Many alterations and ameliorations are being carried out at the present moment.

JOHN TANN'S PATENT RELIANCE LOCKS and FIREPROOF SAFES are the best and cheapest safe-guard against Fire and Robbery.

DR. CURTIS'S MEDICAL WORK, "MANHOOD."
An Essay on Nervous and Generative Diseases.
The 140th Thousand, with numerous plates in a sealed envelope, price Half-a-Dollar,
MANHOOD: the CAUSE and CURE of PREMATURE DECLINE IN MAN, with plain directions for perfect restoration to health and vigour, being a Medical Essay on Nervous and Generative Diseases, their Prevention and Cure, with the Author's experience in the Treatment of the various Disqualifications of Marriage—whether resulting from Youthful Abuse, the Follies of Maturity, the Effects of Climate or Infection. The result of Twenty-five Years' successful practice. By Dr. J. L. CURTIS, 15, Albemarle-street, Piccadilly, London.
Consultations, Ten till Three and Six till Eight.
REVIEWS OF THE WORK.
"We feel no hesitation in saying, that there is no member of society by whom the book will not be found useful—whether such person hold the relation of a Parent-Preceptor, or Clergyman."—Sun, Evening Paper.
"Dr. Curtis has conferred a great boon by publishing this little work, in which is described the sources of those diseases which produce decline in youth, or more frequently premature old age."—Daily Telegraph, March 27, 1858.
The Book concludes with numerous varied and interesting cases, to which is added the Author's Receipt of a Preventive Lotion.
Dr. CURTIS may be consulted, as usual, either by letter or personally, at his residence, as above. Patients in INDIA, CHINA, and the COLONIES can be cured by correspondence only, and have their medicines sent with secrecy and despatch. The efficacy and harmless nature of the remedies employed by Dr. CURTIS, having been demonstrated by the most complete success during a practice extending over a period of Twenty-five Years, persons sufferers of every class have a perfect guarantee that the utmost skill and experience will be made available in the treatment of their cases.
THE WORK SOLD BY HINNAM, QUEEN'S ROAD, HONG KONG.

THE PEN SUPERSEDED.—Mark your Linen. The best and only method of Marking Linen, Silk, Stockings, Coarse Towels, or Books, so as to prevent the Ink washing out, is with CULLETON'S PATENT ELECTRO-SILVER PLATES. By means of this novel invention a thousand pieces of linen can be marked in a few hours. Initials, 1s. each; Name, 2s. 6d. Set of Moveable Numbers, 2s. 6d.; Crest Plate, 5s., with the necessary directions for use. Post free. Certificate from the eminent Dr. Sheridan Muspratt, F.R.S., Professor of Chemistry, &c.

"Several trials with Mr. Culleton's Patent Electro-Silver Plates, for marking linen, induce me to pronounce them excellent; the letters are beautifully marked in a deep black colour, without blotting, and after a long boiling, with either potass or soda, they remain unaltered. Other plates which I tried decomposed the ink, and in many cases burned holes in the linen. I can testify Mr. Culleton's Plates are incorrodible, and will not hurt the finest fabric.—(Signed) "SHERIDAN MUSPRATT.

"College of Chemistry, Liverpool.

"May, 15, 1854."

All orders to be sent to the Patentee and Sole Maker.

T. CULLETON, 25, Cranbourn-street, corner of St. Martin's-lane, London, W.C.

All Orders executed by Return of Post.

IMPORT AND EXPORT SUPPLEMENT.

With the present number we publish in a supplement the usual statement of exports to China, Japan, and other parts of the Far East, and also the exports from those parts to Europe and America, mostly brought down to the period ending 31st March, but in some cases later. This statement will in future be continued quarterly. Subscriptions, 12s. per annum; Single copies, 9d.

Summary of News from the Far East.

THE ENTRANCE OF THE BRITISH AND FRENCH AMBASSADORS INTO PEKING.

On the 26th of March the English and French flags were hoisted at Peking, and the Ambassadors of the two greatest European nations took up their residence in the capital of the Celestial Empire. It will not be uninteresting to mark the progress of the Embassy towards the Imperial city. On the 22nd of March, their Excellencies the Hon. F. Bruce and Monsieur de Bourboulon, accompanied by Mr. Wade and Staff-Surgeon Dr. Rennie, left Tien-tsin, and arrived the same evening at Yang-lung. The following day they went on to Ho-see-woo, and slept there, reaching Tung-chow on the afternoon of the 24th. At Tung-chow, the other members of the Legations were waiting the arrival of the Ministers, having preceded them one day. They were—Lieut.-Colonel Neale, secretary, and Messrs. St. Clair and Wyndham, attachés, of her Majesty's Legation; Count Klecskowsky and Baron de Meritans, secretaries of His Imperial Majesty's Legation. The progress of the Embassy to Peking was the following:—M. de Bourboulon made his entry into the capital on the 25th, accompanied by his Secretaries of Legation. On the 26th Mr. Bruce entered, attended by an escort of Sikh Cavalry, and accompanied by his secretary and attachés. The citizens looked on in silence, and evinced no surprise or annoyance at this act of the barbarians, perhaps the most significant one which has as yet taken place in our connection with China. The present is the first occasion of M. de Bourboulon having visited Peking, and his official introduction to Prince Kung took place on the day after his arrival. In Mr. Bruce's case the same formal recognition was unnecessary, as he was previously introduced to the Prince by the Earl of Elgin during his brief visit to Peking. On the 2nd April, however, Mr. Bruce visited Prince Kung at the office for Foreign Affairs, and introduced to His Imperial Highness the officers attached to the Legation. The interview is described as having passed off satisfactorily, and conversation was confined to non-political topics. On the 4th April the Prince returned Mr. Bruce's visit at the Leang Koon-foo, a yamun in the Tartar city, where Her Majesty's Legation is established. Meanwhile the Emperor remains at a distance from the city to which he is, or feigns to be, too ill to return until the warm weather is over; but it is rumoured that the Court will be removed to Shensi, and this is not at all improbable, as His Celestial Majesty may well feel some repugnance at dwelling in a city in which his dignity has been so compromised by the Europeans. We sincerely trust now that we have gained our object in having an Ambassador at Peking that the conduct of Englishmen will be regulated by courtesy and moderation. Unfor-

Digitized by Google

tunately, news of an opposite nature has already reached us. The *China Mail* states that a commissariat officer of the name of De Fontblanc, who had the charge of provisions for the Legation escort, has "proceeded so much in the spirit of a Cockney tourist, as to have afforded ground to the local authorities for making an official complaint." Mr. Bruce has, in consequence, directed the Brigadier commanding at Tien-tsin, not to grant leave for the present to any officer to visit Peking. This is unpleasant, doubtless, to non-offending officers, but the lesson may prove a useful one, and it is absolutely necessary, at the outset of our diplomatic relations with Peking, to show the Chinese that it is the intention of our Ambassador to act with justice and impartiality, and to attend to any reasonable complaint that may be brought before him by the Imperial authorities.

JAPAN.

Dates from Japan are to the 18th April, from Nagasaki, and 10th April, from Kanagawa. Mr. Alcock has left for Hong Kong. The French Minister is about leaving for Europe. Trade is said to be dull, but political tranquility prevails.

CHINA.

THE YANG-TSZE-KIANG.

The insurgents have, it is said, threatened to capture Hankow, Kiukiang, and Chinkiang, because they have been opened to foreign trade. It is reported that Hankow is already in their hands, and that half of the city has been burnt, but no direct communications have been received. "There can be no question," says the *Overland Trade Report*, "about these reports being true in the main, for the trade on the Yang-tsze has become completely paralysed." The same journal affirms that in consequence of the movements of the rebels near Hankow, trade is stagnated at all the Southern ports, as well as in the neighbourhood of the Yang-tsze.

Several steamers have commenced running on the river, including the *Yang-tsze* and *Governor-General*, for Messrs. Dent and Co., and the *Fire Dart* (Am.) for Messrs. Augustine, Heard and Co.

PEKING.

Sangkolinsin, the well-known commander of the Imperial forces, has addressed a memorial to the Emperor, advising him to go to a hunting palace far away in Tartary. He states that it will be difficult to make the barbarians submit; that if fighting should take place near Tungchow, the minds of the inhabitants of Peking will be agitated, and that should a reverse take place the effect might be momentous—that is to say, the Celestial Monarch would very likely be taken prisoner. Sangkolinsin considers that in conjunction with the princes and others of the six leagues, he could act more vigorously and fearlessly in the absence of the Emperor. "Without any doubt," he says, "he would then sweep the wild brood from off the earth." On the other hand, Kia Ching, a Principal Secretary of State, has addressed a counter-memorial, signed by twenty-five others, denouncing Sangkolinsin's proposition respecting the hunting tour. "If the capital," say these memorialists, "which is encompassed with a strong and uninterrupted line of fortifications, is not secure, what shelter is to be looked for in open and unfenced hunting-grounds?" And they add that His Majesty's departure would excite the wildest agitation in the people's minds.

It has been resolved by the Chinese Government to open schools in Peking for instruction in the English tongue, and it is proposed to send a few Chinese youths to England to acquire our language. It appears that only a very few of the fine collection of books in the Imperial Library of the Summer Palace, have been saved by Mr. Wade. Fortunately, the Chinese have three or four duplicates of this collection.

TIEN-TSIN.

It is said that the Northern rebellion is gaining ground in the province of Shantung, the insurgents, according to the last accounts, having turned Sankolinsin's left flank and reached the Poo-tai district in the north-east of the province, about one hundred and eighty miles from Tien-tsin, the people of which city do not exhibit any alarm.

The intelligence from Tien-tsin, in a commercial point of view, is satisfactory, and a large proportion of the business of the fortnight in imports has been transacted in that quarter, including Chefoo and New-chwang. A notice of prices will be found under our Commercial Report.

The forces stationed at this port are said to be in good health and enjoying the return of spring.

The *Hong Kong Register* has the following:—

"Two officers lately visited that part of the Great Wall forty-five miles north-west of Peking, which is called the Chu-jung-kwan. They were received everywhere with the utmost civility by the Chinese, and found every convenience for travelling at the inns, which in every town and village in this part of the country offer good refreshment for man and beast. The road from Peking to the small city of Nan-k'ou is broad, and in dry weather good, but from Nan-k'ou where the Kwankou pass begins, the road for fifteen miles runs along the bottom of a ravine, full of rocks and stones, impassable excepting to the ponies of the place, or to pedestrians. The scenery is wild and barren. Between Fan-k'ou and Pa-ta-ling, the highest peak and that over which the Great Wall runs, there are no less than three curtains of the wall, but the whole fortifications add little to the natural difficulties opposed to the passage of an army through the ravine. The dimensions of the wall differ at many places. At the Chu-jung barrier it is nearly twenty-three feet high by sixteen broad, and though broken down in some places, is in wonderfully good order, considering its age. A considerable traffic is carried on through the pass by means of camels, park mules, and ponies. The inhabitants of the three or four small walled cities depend upon this traffic, as also the small garrison of the cities, for their livelihood. Previous to this visit the passport system had not been brought into operation, and officers and others had repeatedly travelled from Tien-tsin to Peking and from Tien-tsin to Choofoo without passports. Prince Kung has, however, complained about the excursion to the Great Wall."

It is stated that there are nearly a dozen English firms opened at this port already.

SHANGHAI.

H.M.'s gunboat *Bouncer*, has brought down thirty runaway sailors as prisoners. They were demanded by Captain Aplin, H.M.'s senior naval officer at Nanking, and delivered up by the Taiping insurgents. The *Attalante* is expected in a few days with seven more. Captain Hire, H.M.'s senior officer at this port, and a strong party, proceeded up the river this morning in H.M.'s gunboat *Janus*, in search of several other deserters who are known to be in the Imperialist camp. He had an interview yesterday with the Chinese authorities and obtained an order for them to be surrendered without hesitation.

By the last advices from the gulf of Petchelee, it is reported that Admiral Hope and Mr. Parkes arrived at Chefoo on the 13th April and left on the 15th for Tien-tsin. It appears that business at Tien-tsin has already commenced with every prospect of becoming a large mart.

The annual races have just been celebrated; the meeting was a very good one.

The following notifications have been issued by H.M.'s Consul, Mr. T. T. Meadows:—

"The nomination of C. Treasure Jones, Esq., as Acting Vice-Consul, having been confirmed by M.M.'s Envoy and Chief Superintendent of Trade, he is now charged with all the usual duties of the Vice-Consul."

In consequence of the removal of H.M.'s Legation to Peking, the Consular buildings have reverted to their original uses, and the Consul's Office, the Court-room, and the Judicial Office are now again in the chief building, in front of which stands the Consulate flagstaff.

The circular of the 8th February last is, in so far as it placed certain function of this Consulate in abeyance, is hereby cancelled.

The *North China Herald* says:—H.M.S. *Sphinx* has arrived from Hong Kong, having on board a detachment of troops for Tien-tsin, to fill up vacancies caused by casualties. She will leave for the Gulf of Pecheli in a few days, and then proceed to the Gulf of Liau-tong with H.B.M. Consul for Newchwang.

The *Actæon* and *Dove* arrived from the river Yang-tsze on the 25th, having surveyed the Lang-shang crossing, where so many vessels have lately grounded. In a few days the gunboat will return to that spot to lay down some buoys, which are being made for the purpose. The *Actæon*, with two or three gunboats, will shortly afterwards proceed to survey the coast of Japan.

H.M.'s Transport *Urgent* has left for Hong Kong with the Loodianah Regiment on board consisting of Col. Walsh, Captains Glasse, Maxwell, Ruggles, and Cavanagh; Lieutenants Skinner, Ripley, Christian, and Kitson; Drs. Reid and Banbugy, and 560 rank and file. The garrison remaining now consists of the 11th Punjaub Native Infantry, about 650 strong, and

Digitized by Google

80 men and officers of the Royal Artillery. The Sin-ta-kee barracks will be given up in June.

Chapoo is said to be in the hands of the Rebels.

The London mails of March 11 reached this, per *Ly-ee-moon*, in the shortest time yet, being only forty-five days en route.

H.M.'s ship *Couper* was put up at auction and bought in at Taels 47,000. She left for Hong Kong yesterday, and is intended to run between Canton and that colony, in Her Majesty's service. The *Waterman* was also put up at auction, and bought in at the limit, namely, Mex. $25,000.

The American Commodore, it is rumoured, will very soon proceed with his squadron, the *Hartford*, the *Dacotah*, and the *Saginaw*, up the Yang-tsze. This will be a move in the right direction; and it is to be hoped that he will not return till he has ascertained how far up, in the interior, the Great River will admit vessels of light draught. If it be true, as some affirm, that the river is navigable, by steam-boats, a distance of 2,000 and more miles, and this whole course is opened up, it will be one of the most valuable openings ever made in the East for foreign commerce.

The shortest passage on record from Hong Kong to Shanghai was made by the steamer *Ly-ee-moon*, Captain Norman Hill, on her last trip—the distance having been run in 66½ hours from the time of weighing her anchor in Hong Kong harbour until she dropped it in this river.

AMOY.

A correspondent of the *Friend of China*, writes, under date the 5th April:—The Native authorities are greatly afraid that the Rebels intend to pay Amoy a visit, and have consequently enrolled an extraordinary force of militia men, who parade the streets at night, with gong and bamboo.

Mr. Pedder, our new Consul, has arrived, and we hope will prove as good and just a man as Mr. Gingell, who has just left us to assume the duties of Consul at "Hankow." Mr. Swinhoe is also here, though appointed vice-Consul for "Tai-wan-foo," Formosa, and expects shortly to leave for that port—port I can hardly call it, for I hear no vessel even of ordinary draught can enter there; and the roadstead is unsafe at all seasons of the year. I cannot divine the reason for placing a Consul there, unless he is to pry into Chinese "pidgin," for there are no European residents, and what European goods are imported are mostly conveyed overland from Takow, Tamsui, or Keilung.

The wreck of the French transport *Isere* has baffled all the attempts that have been made hitherto to raise her from her position on the rocks off Ku-lan-soo; and I am sorry to say that she is likely to prove a dead loss to those who thought they had a rare bargain when she was sold at auction.

Bellamy and Co. are building a dry dock between Amoy and the village of Amung Kong. Some people think it will be a failure, on account of the approaches thereto being strewn with sunken rocks, which it would be extremely dangerous for a vessel to attempt to pass through.

SWATOW.

The *China Mail* states, that the gunboat *Cockchafer* has been out on a raid of a questionable character, under the direction of A-Hok, the noted Coolie broker. A-Hok, it seems, a short time since, had a junk plundered by some people from a village near Namoa, and has been endeavouring to obtain indemnity from the villiage to which the robbers belonged. They were at first disposed to treat with him, fearing his threats to bring down upon them the British Consul and the gunboat. They would not, however, pay all he demanded, and an application was made for the gunboat to come to the assistance of the mandarins, who were to compel the villagers to submit to A-Hok's terms. The gunboat, it would appear, was to aid only by her presence, and in capturing the junks that might attempt an escape from the village; but the brave Imperialists expected her to do all the fighting, or bear, at least, the brunt of the battle. The villagers, however, were not to be thus coerced. The attack failed; the boats sent out by the *Cockchafer* to lead the mandarin junks into action were fired upon; they returned the fire, killing, it is said, one old woman; but not being permitted to fire upon the town, the gunboat has returned to Double Island to await further instructions from the Admiral.

HONG KONG.

Mr. Alcock has arrived at Hong Kong, the Supreme Court of the colony having issued a writ against His Excellency at the suit of Mr. Moss. This confirms the statements made in another portion of this paper.

A report is given of an expedition after pirates by the gunboat *Firm* in the vicinity of Hong Kong, in which she captured several junks said to be piratical.

The decision in the case of Mr. D. R. Caldwell, the Registrar-General, does not appear to have been given yet. An advertisement appears from this gentleman, as follows:—"The undersigned has opened an office at No. 442, Stanley Street (at the back of the former Central Police Station), as General Chinese Agent in communication with foreigners, Interpreter and Translator of the Chinese language, and Interpreter in the Malayan and Hindoostani languages. (Signed) D. R. CALDWELL."

A notification has been issued from the Post-office to the effect that the postage of 3d. on newspapers and circulars to Europe will be payable in advance on the 1st of January next.

The want of gas is noticed by the *China Mail*. A reference to our commercial article will show that a company is about to be formed for supplying Hong Kong with gas.

The south-west monsoon is now prevailing at Hong Kong, and the change of weather has rendered sickness rather prevalent. A regatta club has been instituted in the colony.

The best part of the Kow-loong cession, about which there has been much said in behalf of three contending claimants, has been granted to the naval authorities in preference to the civil and military. The navy had made their application much earlier than the others.

The Chief Justice is still at Shanghai recruiting his health.

Mr. Consul Meadows has informed the Postmaster at Hong Kong that he will not, after the current month, undertake to deliver postal matter from the British Consulate at Shanghai; and that as the Hong Kong Government has taken over all business of this kind, it must make arrangements complete by the appointment of sufficiently paid agents.

We are sorry to learn that the disruption of the United States has caused a stoppage in the supplies to the missionary efforts in China.

CANTON.

Mr. D. B. Robertson, the Consul at Canton, in consequence of his appointment as Allied Commissioner, vice Parkes, has taken up his residence in the yamun in the city.

Mr. W. H. Fittock, who was officially appointed Vice-Consul at Whampoa, has assumed the duties of Vice-Consul at Canton.

It appears that the native merchants and brokers look with considerable anxiety on the opening of Hankow and other ports on the Yang-tsze, and it appears that the days of the powerful and troublesome Canton are numbered. The European residents enjoy free ingress to the interior, but it is considered doubtful if such journeys would be safe after the withdrawal of the British troops, of which, however, there is no prospect at present.

Building at Shameen proceeds but slowly, and some owners would be glad to realise their investments even at a loss, which is, however, scarcely possible.

We mentioned in our last issue that four gentlemen proposed to start from Canton to Hankow on the 14th April. It now appears that they commenced their expedition three days previously.

We take the following interesting account of the country they have travelled, from the *Daily Press*, to which it was forwarded:—

"We left Canton on Thursday night, the 11th inst., about twelve o'clock, and reached Fatshan at six next morning, landed, and had a walk. The country all round is covered with mulberries and paddy; saw a good many brick-works and tanneries. Got to Sei-nan on Saturday morning; here, the river divides into three branches fully half-a-mile broad, but rather shallow—small islands and banks seem to be forming everywhere. Passed a great many rafts of wood floating down; got to Sam-Shuy in the afternoon, where there is a fine pagoda. Banks of the river twenty to forty feet high, much carried away by force of the water. Hills all covered with flowers—mulberries and paddy on all sides. Some of the villages very prettily situated, being built in the midst of magnificent trees, and almost entirely surrounded by water. On Sunday reached Sei-kong; the country now becomes more hilly and barren-looking; bamboo plantations and paddy. Monday—blowing hard from the North, which obliged us to anchor nearly all day. Walked to some odd-looking hills in the distance; found one to be a solid mass of rock 300 or 400 feet high. and 2,500 to 3,000 feet round the base. Arrived at Shek-Lock on Sunday; maize, paddy, and buckwheat, with sugar-cane patches—the river in July and August rises three feet all over the country. Got to Tsing yuen on Wednesday, large town about half-a-mile long, on banks of the river; considerable trade carried on; river eight to ten feet deep. Leaving this place, we gradually approach the regular hill-country; passed through Tsing-Yuen-hap, a pass about six miles long and 300 yards broad, with hills 1,400 to 2,000 feet high on each side, covered with fine trees and brilliant flowers; river about 160 feet deep, current running four to five miles. Very fine temple about the middle of this pass surrounded by

Digitized by Google

trees and water falls. Next came to Tai-Ming-hap, a similar pass through another range of hills, and finally through Wong-Shing-hap, a third pass with very high hills covered with wild flowers; one called the Swallow's Hill is exactly like a bird flying. Passed many boats laden with limestone, which is got from this neighbourhood. Last evening walked to the quarries, and found the hills nearly composed of limestone. Seven large masses of rock stand here by themselves fully 300 feet high. We next reached Ying-tuck, a walled town very neat and clean, but not large. The walls are the best we have seen, and all the gates have handsome ornamental buildings over them; the streets are well paved and clean. Some ten miles further on we come to the celebrated rock Quun Yune San, fully 600 feet high with a large natural cave in it, which has been converted into a restaurant and Joss-house. Ascending about 60 steps we reach the first room, some 30 feet square with the rough rock for walls and roof, where some ten or twelve fellows were chow chowing and drinking, playing at the Chinese game with their fingers, shouting and yelling like demons. The cave lighted up with dingy lamps; the damp walls, &c., gave it a strong resemblance to the scene in "Der Freischutz," where Caspar makes the magic bullets. The country all around is very wild and mountainous, with immense cone-shaped masses of rock scattered about in all directions; the Chinamen say there are tigers about here, but we have not seen any. One Saturday we passed another fine rock, San Tsze Kan, or, the rock which stands by itself, where some old philosopher is said to have lived 300 years ago. Plenty of partridges about here, as large as grouse. On Sunday we got amongst smooth green hills, much like those in Cumberland at the Lakes, with pretty clumps of trees and masses of wild flowers at the foot. The river continues a fine stream, but occasionally shallow and full of sandbanks. About twelve miles from Sewquan the coal districts commence; but, so far as we saw, they only work the surface coal, which is more like slate.

"We have had no adventures of any kind, the people all civil and well-behaved, and the Mandarins, who had been informed of our coming up, always send men to receive us. The Rebels were all about here five years ago, and have, as usual, done all the damage they could to the villages, all of which are more or less destroyed, and the suburbs of this place (Sewquan or Shaou Chaou) bear evidence of their having been here. We hear nothing of Rebels being at Ping Suck now, so suppose there was no truth in the previous reports we had of their presence."

A frightful tragedy has occurred on board the *Mee-Lee* (Am.) while on her way from Canton with a cargo of tea. The following is another account taken from the *Friend of China*:

"The American steamer *Me-Lee*, Captain Ricaby, which left her anchorage off the Custom-house at three P.M. on the 23rd of April, bound to Hong Kong, returned a little after six A.M. on the 24th. The steersman, engineer, comprador, steward, and passengers (all Chinese), reporting the following catastrophe:—

"Four Chinese came on board at Canton, one at Sha-tow (off the Allied Landing Place), and three at Whampoa, all of whom prove to have been in league. Off second bar, about half-past eight, the purser, Mr. Coit, was leaning on the rail outside the cabin door, when he was struck across the nape of the neck with a sharp chopper, producing a huge effusion of blood, bestrewn on the rail and on the side of the companion ladder-case, up which the unfortunate young man appears to have run to tell the captain, whom he would have passed on the way from the wheel-house, which he left, telling the Chinese steersman that he should go below to see what the noise was about.

"The steersman says that he believes the captain, on meeting the armed pirates, jumped overboard from the port quarter; and that if he could swim the half a-mile which they then were from the shore, it would be possible for him to reach it. And of Mr. Coit he thinks the same; the mark of his fingers, stamped in blood, being visible on the deck-beam as he would have dropped on the deck abaft the windlass, from which it is presumed he sprang overboard.

"Masters of the vessel, the desperadoes then told the steersman to proceed in shore towards Min-fa-shan, which he did, until they struck the mud. They then rang the bell until a square-sterned mat-sail boat came along side, manned (by their dialect apparently), with Nam-tow men. The engineer, comprador, steward, and non-piratical passengers (half a-dozen) were in the meantime driven into the forehold, and kept down with baskets of cargo on the hatch, and then the pirates commenced breaking up the trunks and places where money was likely to be (amongst other stow holes being the lining under the upper deck in the comprador's cabin, from which they took upwards of $200.)

"The Engineer says they perfectly understood how to stop the machinery and set it a-going without his aid. The rest has only to be told of by what is seen. The purser's boxes were closely overhauled, and the same with trunks in the captain's cabin. As we write, but little is known of what has been taken of the cargo. It is supposed that about sixty are gone out of 339 packages of a Chowchow parcel shipped principally, by one Toong-foong-le, for trans-shipment at Hong Kong, to be thence sent to Pecheli—among these being some cases of silk ribbon, vermilion, grass-cloth, &c. But the value of the whole that has been taken is not great; including money from passengers and ship, not over two thousand dollars perhaps,—a most inconsiderable sum when the risk to get it is borne in mind.

"About two hours were expended in ransack, and then the boat left; the steersman on that returning towards Canton, and obtaining a boat from the American ship *Matilda*, with which five men went to search for the missing Americans. The steamer *Sir J. Jejeebhoy* passing up at a little before twelve, stopped alongside the *Mee-Lee*, and brought up the Comprador to report the matter to Akye (joint owner with the missing, and it is feared deceased, Captain Ricaby), by whom information was given to the United States Consul, who instantly waited on the Governor-General, and received the promised aid of two Mandarins to go in the Customs steamer *Cumfa* and search for the culprits.

"Mr. Coit was the son of a respected clergyman in the United States—Captain Ricaby was a native of Ohio, and much esteemed by those who had the pleasure of his acquaintance.

"The boat lent by the *Matilda* to search for Capt. Ricaby and Mr. Coit, was unsuccessful, although enquiries were made along both banks of the river about the place where they went overboard. On an examination of the men and boy that went in the *Matilda's* boat, the latter, who is very intelligent for his age, gave the following additional particulars—Capt. Ricaby had told him about half-past eight to get a cup of tea made, and bring to him where he was sitting before the wheel-house on the upper deck. That he was in the act of taking the tea from the galley, when he was almost knocked down by the rush forward of the honest passengers, Chinese engineer and firemen, who were pursued by four men, three with blackened faces; though he thinks he should know them all again. That he jumped back into the galley and was in there when he heard Mr. Coit's screams in the water alongside, and that, as he looked out of the galley window, he saw a spear thrust into him from the deck before the galley.

"The pirates on discovering the boy at first put him down in the hold with the others, but had him up afterwards (as well as the engineer, to keep water in the boiler), and made him point out where the captain and purser kept anything of value. Having got all they thought (including a nice stand of arms) worth taking, spiked two six-pounder guns in the gangways, and drove a hole through the bottom of the captain's gig hanging to a davit on the port quarter; they then left.

"The presumption appears to be that the captain was going down the port staircase as Mr. Coit, cut and bleeding, as before described, was getting up the starboard; and, being unarmed, he acted on the most likely first impulse, to jump overboard directly he was assailed. Indeed, one of the passengers says he saw the captain at the port gangway as they were being driven forward.

"The *Cumfa's* search was unavailing also; and on overhauling the cargo, only fifteen cases are short, namely—one case of refined camphor, shipped by Akie, the Canton agent (and, as we always understood from Captain Ricaby, largely interested in the vessel), ten cases of white lead and four of red lead This three or four hundred dollars from passengers, and $200 from steward, make the amount of robbery to be, as before stated, about $2,000."

We take the following items of news from the *Friend of China*:—

The Chinese Customs steam cruiser *Cum-fa*, Captain Graves, has made several captures of native boats in inner waters during the past month, one of three met coming from Hong Kong being found to have a good deal of opium stowed away in secret places.

Mr. J. G. Veitch, the well-known botanist, has just left Hong Kong for Sumatra, but will return to China before the year is over. Mr. Veitch sent home by the *Weymouth*, on the 6th of April, in charge of a gardener who came out from England for the purpose, no less than twenty-three cases of collections made in the Phillippine and Japan isles, and we are told that he has secured from the Hong Kong hills, in a state fit to be introduced to the gardens of England, specimens of the Woodwardia Harlandi, Dissoehacta Barther, Lysimachia Alpestris, and Ainsliaca Fragans; the first-named by Sir W. Hooker, the second by Dr. Hance, and the two last by Captain Champion.

The departure of Dr. Bridges, the late Colonial Secretary, calls forth a biographical narrative from the editor of the *Friend of China*, by no means favourable to the Doctor of Civil Law.

The best map of China we know of, was prepared by Major Sherwill, Surveyor-General, Calcutta, and is entitled, "A Map of the Coast of China, and Rough Sketch of the Provinces between Canton and Peking."—The little steamer *Bo-Peep* has been sold for $16,000, and, deeply laden with coals, has proceeded towards the Yang-tse-Kiang for traffic on which she is well adapted.

MACAO.

The plan for a school, to which we referred in a recent issue, bids fair to be successfully carried out. The Baron do Cercal, in founding his "New School Macaense," has conferred a vast benefit on the colony. Those of our readers who feel a special interest in this scholastic establishment will find a translation of the statutes in the *Friend of China*, of April 27th.

Macao was recently, it is affirmed, the scene of a "meeting" between two Frenchmen. The reporters state that "they measured distance at thirty-five paces, and the locality selected was the rear of the Chruch of Santa Clara. The gentleman challenged, after delivering his shot, was grazed by his antagonist's ball in the lower region of the abdomen, but the wound did not prove serious, as he was able to walk out on the following evening."

PHILIPPINES.

MANILA.

Sickness is somewhat prevalent. The Archbishop H. E. Fray Jose Aranquron has died of dysentery. He is said to have been a man of unbounded charity, and, in spite of his large income, has died poor. There have been several devastating conflagrations in the provinces.

Digitized by Google

COCHIN CHINA.

SAIGON.

The following particulars with reference to Saigon and the operations of the French in Cochin China, will be read with interest. We abstract them from a long account in the *Singapore Free Press*. The condition of the troops is on the whole satisfactory, but among those who formed part in the expedition to Mitho several were attacked with fever and cholera. An expedition to Hué is talked of, and it is said that General Montauban will take the chief command. General Vassoigne has recovered from his wound received in the battle of the 24th Feb, The lines of Ki-oia which were then attacked, show that the art of fortification is thoroughly understood by the Cochin Chinese. The gaining the interior of the works cost the French two hours and a-half of hard fighting, and upwards of 400 killed and wounded. Tranquility prevails at present, and the people are returning to their usual pursuits. The province of Saigon which the French intend to occupy, is said to combine every possible advantage. Rice, tobacco, coffee, and the sugar cane, will all yield plentiful crops. The far interior has not yet been explored; the only French station being at Teignhin, about one hundred miles north of Saigon. It is said to abound in minerals, tin, copper, zinc, &c.

JAVA.

The Java papers inform us that the results of the inundations are not so serious as was anticipated, and that there is reason to expect that the people will ere long recover from the disasters they have undergone. The Government has freed rice this year from the import duty, and the Government Commissioner has adopted various measures for giving work to those who have been thrown out of employment.

At Banjerwassing the Rebels remain unsubdued, and troops are scattered over the country trying to keep them in check.

Several violent earthquakes have taken place in Sumatra.

MALACCA STRAITS.

SINGAPORE.

H.M.'s steam corvette *Charybdis* arrived from England in the roads on the 6th May, and will remain on the station. Her commander is now the senior naval officer in the Straits.

On the charge made against Mr. C. Pemberton Hodgson, the late Consul at Hakodadi, in the *China Mail* and the *Straits Times*, the latter journal has the following:—

"We were considerably astonished to learn that one of the British Consuls in Japan, a Mr. C. Pemberton Hodgson, now in London, has instituted legal proceedings against us for an alleged libel published in the *Straits Times* of the 29th of December last. This information reached us only through the London journals (no legal notice having as yet been served upon us), and we were scarcely disposed to credit the extraordinary intelligence, inasmuch as we did not remember ever having alluded to Mr. Hodgson, in any way, in our columns. But, on turning up our files, we find that on the 29th December last, we copied into our paper an article from the *China Mail*, in the course of which a very abominable charge is made against Mr. Hodgson. But so cautious were we in receiving the singular story of our Hong Kong contemporary, that we stated in some editorial remarks at the time, that we hoped 'there was some mistake,' and that 'we could scarcely credit the truth' of his statements. It seems we are now subjected to a prosecution for libel, because we copied into our journal a matter of public news, from a highly respectable public journal, without any way endorsing it. While we exceedingly regret any injury which may have resulted to Mr. Hodgson from such publication, and while we disclaim all malice in the matter, we must add that it would have been more seemly had that gentleman looked for redress to the *China Mail*, who led us into the error, and who was the only real offender. If a public journalist is to be held responsible for every item of public news and gossip which he publishes, and of the truth of which he can form no opinion, then the liberty of the press is at an end, and all newspapers might as well be discontinued at once. But we believe that there are many cases in the books, in which the most learned English jurists have not so laid down the law; and as we have been guiltless of any premeditated libel on Mr. Hodgson, we shall accept the responsibility which he would throw upon us, without fear of the result.

"A conscientious public journalist, however, is always willing to admit a mistake when pointed out to him, and to render every reasonable apology to any man whom he has unwittingly injured. With this spirit, and with the desire to do justice in the premises, we give the letter from Mr. Hodgson, which was published in the *London and China Express* of the 10th of February, and which, we suppose, is intended as a denial of the charges against him. Should Mr. Hodgson at any time wish to publish a more intelligible disclaimer of the truth of those charges, we shall cheerfully give him space in our paper for that purpose."

The races, which had been postponed in consequence of the weather, came off on the 9th April, and appear to have given general satisfaction.

Messrs. Buyers and Riach, of Teluk Ayer, are engaged on the construction of a steamer to run between Penang, Singapore, and Malacca. She will have a commodious saloon for passengers, and will, it is said, make the passage between here and Malacca in twelve hours.

Births, Marriages, and Deaths.

(Announcements for Subscribers are made free of charge.)

BIRTHS.

BARCHAM.—On the 27th May, at Hill House, Mundesley, the wife of Capt. Robert Barcham, of China, of a daughter.

BRANDT—On the 11th inst., at Woodford, the wife of Robert Brandt, Esq., of a daughter.

CARGILL.—On the 26th ult., at 14, Lansdowne-road, Notting-hill, Mrs. Francis A. Cargill, of a son.

CRAWFORD.—On the 2nd inst., at No. 1, Charlotte-square, Edinburgh, the wife of Col. R. F. Crawford, Royal Artillery, of a son.

DENNIS.—On the 5th inst., at Cairnbrock Villa, Upper Norwood, the wife of John Dennis, jun., Esq., of a daughter.

GILBERT—At Northam-road, Penang, on the 2nd May, the wife of Mr. H. O. Gilbert, of the Public Works Department, of a daughter.

LONGDEN.—On the 4th inst., at her father's residence, Lamport Rectory, the wife of Lieut.-Colonel Longden, Royal Artillery, of a daughter.

LAWRENCE—On the 9th inst., at 18, Abbey-place, St. John's-wood, the wife of Major R. C. Lawrence, C.B., Military Secretary to the Punjaub Government, of a daughter.

LEVESON.—At Singapore, on the 5th of May, the wife of Edward Leveson, Esq., of a son.

LOVELL—On the 9th inst., at No. 6, Granville-park villas, Lewisham, the wife of Capt Hy. P. Lovell, P. and O. Company's Service, of a son.

MACKENZIE.—At Shanghai, on the 10th of April, Mrs. James Mackenzie, of twin sons.

MEEKING.—On the 2nd inst., at Rock-park, Rock Ferry, Cheshire, the wife of Mr. Thos. Meeking, of a daughter.

MILDMAY.—On the 5th inst., at Lapworth Rectory, the wife of the Rev. Arundell St. John Mildmay, of a daughter.

PROBST.—On the 4th inst., at 2, Victoria-road, Clapham-common, the wife of Peter E. Probst, Esq., of a son.

PUSTAU.—On the 1st inst., at 19, Palmaille S. S. Altona, the wife of W. Pustau, Esq., of Hong Kong, of a daughter.

TOOMER.—On the 28th inst., prematurely, the wife of W. H. Toomer, Esq., of Grove Lodge, Twyford, Berks, of a daughter.

MARRIAGES.

BOSANQUET—CRAWFORD.—On the 16th April, at Ahmedabad, India, by the Rev. R. Easum, Arthur Bosanquet, Esq., Bombay Civil Service, to Isabella Matilda, eldest daughter of Major A. Crawford, Assistant-Adjutant-General, N.D. of the Bombay Army.

FAUCHEY—TURING.—On the 29th May, at Rotterdam, by the Rev. T. K. Charter, Pierre Charles Jean, second son of P. T. M. Fauchey, Esq., of Rotterdam, to Ellen Young, daughter of the late Sir T. H. Turing, Bart.

MILDMAY—CLIVE. On the 4th inst., at How Caple, Herefordshire, by the Rev. Archer Clive, Humphrey Francis Mildmay, Esq., M.P., to Sybella Harriet, daughter of George Clive, Esq., M.P.

PECHELL—DERBY.—On the 6th inst., at St. Paul's, Knightsbridge, by the Rev. Henry Fludyer, Mark Robert Pechell, Commander, R.N., to Ellen Maria, youngest daughter of C. Derby, Esq.

DEATHS.

ANDERSON.—On the 1st inst., at 18, Bon Accord-square, Aberdeen, aged 76, Harriet Lane wife of Charles Anderson, Esq., late Chief Justice at the Mauritius.

CLEVERLY.—On the 1st inst., at 15, Cunningham-place, St. John's-wood-road, London, after protracted suffering, caused by a wound received in China, on board the steamer Queen, Osmund Cleverly, Esq., aged 47.

DELRIDGE.—At Hong Kong, on board H.M.S. *Imperieuse*, on the 13th of April, Noel Delridge.

DOUGLAS.—On the 1st inst., at Clifton, Marianne, wife of General Sir James Douglas G.C.B.

JOHNSON.—At the Victoria Gaol, on the 20th of April, William Johnson, police constable.

MACLEAN.—On the 29th May, at Southampton, Commissary-General Sir George Maclean, K.C.B., in the 67th year of his age.

RYRIE—On the 10th inst., Catherine, widow of Capt. Phineas Ryrie, of H.M.'s 78th Highlanders, aged 73.

STACE—On the 8th inst., at Manchester, Howard, the beloved and youngest son of Joseph Stace, Esq., Southampton, aged 29.

WULFF.—On the 30th May, at Woodford, Essex, Sarah, widow of G. H. Wulff, Esq., in her 60th year.

COMMERCIAL REPORT.

JAPAN.

KANAGAWA.—The import market is almost at a stand, and quotations are too nominal to quote. In Tea a good business has been done. In Silk the prices are lower, and settlements have been made at Ida, $500 to $525; Mybach Nos. 1 and 2, $510 to $525; Nos. 1, 2, and 3, $490 to $505; inferior, $470 to $480; Sodai, Nos. 1 and 2, $480 to $500; Nos. 2 and 3, $450 to $479; Re-reeled, No. 1 and 2, none; No. 2 and 3, $430 to $460; inferior, $360 to $420; other kinds, $380 to $440. The total export of silk from 1st July, 1860, to 2nd April, 1861, is as follows:—England, 1,676 bales; Shanghai, 7,330 bales; Hong Kong, 191 bales. Total, 9,197 bales.

NAGASAKI.—There is no alteration to notice in the report given in our last.

CHINA—EXPORTS.

TEA.—The stock of Black Tea at all the ports being reduced to the lowest possible ebb, the amount of business done has been small. The teamen are firm holders, owing to the high cost of their Teas and to the uncertainty attending the coming crop—whilst foreigners in the face of a large comparative export and of unfavourable advices from London, are chary buyers. Prices meanwhile maintain their former standard. Green Teas continue to arrive in very small driblets, and as they incur heavy expenses in the transit, the prices demanded and paid continue excessive.

SHANGHAI.—Black: There has again to be reported a fortnight of almost complete stagnation. Settlements of Congou are represented by one purchase of 470 chests Ningchow at 26½ tls.; some enquiry has again existed for Flowery Pekoes, and 1,828 chests have been settled at from 22 tls. to 34 tls.; very few of these parcels have any quality, while most of them are out of condition. The stock is now 3,500 chests Congou, chiefly common and Hoochow kinds, and 1,100 chests of Flowery Pekoe. Settlements to date, 72,600 chests; same time last season 269,201 chests. Stocks of all kinds 4,600 chests, same time last season 4,700 chests. Greens: Business for the American market still continues to take place on about the previous scale, and at about previous rates. Settlements amount to 4,160 half-chests China, and 4,575 half-chests Japan Teas, making to date 104,549 half-chests of the former and 47, 170 half-chests of the latter, against 437,567 half-chests at corresponding period last season. Stocks, 4,300 half-chests China, and 4,000 half-chests Japan, also an estimated stock of 20,000 half-chests of the former at Ningpo.

CANTON.—The business of the fortnight has necessarily been restricted, owing to the paucity of stock and the firmness of the teamen. Latterly, owing probably to the absence of desirable Teas, the tendency

Digitized by Google

of prices has been downwards, but no settlements are reported at any reduction. The business of the fortnight is comprised in the following:—Congous, 7 chops at 21½ taels for common Oonams to 32 taels for fine Oopacks. 2,500 half chests Canton, packed, at 17 to 20 taels. Souchong, 1 chop in small lots, at 43 tls. Scented Teas, 4,000 boxes Or. Pekoe, at 19 to 25 taels, and 1,700 boxes Caper, at 16 to 16½ taels. Canton Greens, 200 half-chests and 1.200 boxes. Young Hyson at 17 to 24 taels, 1,400 boxes. Gunpowder at 19 to 23 taels. Some contracts in New Tayshan Congous are reported at 22½ to 23 taels.

RAW SILK.—Shanghai: The firmness of the dealers spoken of in last report continued till the arrival of the gloomy accounts of 26th February reached, and a very active business has been transacted in the fortnight at fully last quotations. The hope of a settlement of the American difficulties causing a favourable change in the home market, combined with reports current amongst the dealers of an expected deficiency in the next crop, and the very low rate of exchange inducing some to prefer silk as remittances, led to a brisk demand, and the settlements of the fortnight are estimated at 1,330 bales, including the arrival of 215 bales Japan silk. The prices paid for the late settlements have been, Tsatlees, No. 1 and 2, none; No. 3, 400 to 410 taels; No. 4, 370 to 395 taels; No. 5, 340 to 360 taels; Yuenfa, 320 to 370 taels; Hainings, 260 to 325 taels; Taysaams, Nos. 1 and 2, none; No. 2, 320 to 330 taels, nominal; No. 3, 275 to 300 taels; Nos. 4 and 5, 250 to 270 taels; Sewhings. 290 to 335 taels; Laeyongs, 250 to 265 taels; Throwns, 350 to 400 taels.

CANTON.—The following are the current rates at which some 50 piculs in all have been place during the fortnight:—Cumchook, re-reeled, $440 to $450; Loonkong, $410 to $420 for the best; Kowkong, $375 to $385 for No. 1. The new crop is expected in a month, and is reported large. At Macao 60 piculs Cumchook are on the market at $400.

DRUGS AND OTHER EXPORTS. Cassia Lignea: at Canton there is no stock, and no settlements are reported; at Macao the settlements of the month are stated at 2 000 piculs, at $17.75 to $18.25, and the unsold stock at 700 piculs. Cassia Buds: no supplies nor sales either at Macao or at Canton. Casssa Oil: there is a little at Canton, but there have been no settlements; at Macao there is a stock on the market of 60 piculs, but there are no settlements reported—the quotation is $260. Star Anniseed: the trade in this article is confined to Macao, where settlements during the month have been made to the extent of 200 piculs at $14 50; the stock on the market is stated at 400 piculs. Anniseed Oil: at Canton, no settlements; at Macao, 40 piculs have been placed during the month at $162, leaving 50 piculs for sale upon the market. Galls are scarce and wanted; 100 piculs are reported as settled at Canton at $17. Galangal Root: at Macao, 300 piculs have been placed at $3.75 to $4. Rhubarb: 100 piculs new have arrived at Canton, for which $60 is asked.

CHINA—IMPORTS.

TIEN-TSIN.—Shirtings: Grey, 5½ to 7 catty, Tls. 2.1.0. to 2.4.5.; 9 catty, Tls. 2.9. White, 60 reed, Tls. 2.4.0. Blue, dyed, Tls. 4. Teacloths, Tls. 2.5. to 2.6. Sheetings. 40 yards, 11 and 12 catty, Tls. 3.1 to 3.3. Drills, Tls. 9. Jeans, 30 yards, Tls. 2.7. Brocades, white, Tls. 2.1.5. to 2.3.0; assorted, taels, 1.4 to 1.5. Damasks, Tls. 5 to 6. Chintzes, Tls., 1.4 to 1.5. Handkerchiefs, blue and bronze, mace 6 per dozen. Long ells, scarlet, Tls. 6. Camlets, Tls. 22 to 28. Lastings, Tls. 12 to 14. Woollens in no demand. Tin plates, Tls. 6, and Glass, Tls. 4 per box. Spelter, Tls. 8. Steel, Tls. 17 per picul. Rice, Tls. 1.7 to 1.8 per picul. Sugar, white, Tls. 6.5; brown, tls. 3.1. Wool Tls. 5 to 10 per picul. Oil, Tls. 5 per picul.

SHANGHAI.—The *Ziba*, from London, and the *T. G. Bunker*, from New York, have been the only arrivals during the fortnight with manufactures. The local demand is very dull indeed; the shipments up the Yang-tsze have been insignificant, owing to the menacing position of the rebels. Most of the business done has been for the North on foreign account, the advices thence being favourable. The following are the clearances of the fortnight:—Grey longcloths, 29,700 pieces; white ditto, 4,000 pieces; T-cloths, 18,000 pieces; Spanish stripes, 108 pieces; long ells, 300 pieces; camlets, 200 pieces; lastings, 80 pieces. American goods:—Drills, 7.500 pieces; stock, 270,000 pieces; sheetings, 5,000 pices; stock, 30,000 pieces; jeans, 1,000 pieces; stock. 18,000 pieces; spotted shir ings, 4,000 pieces at 1.8.4 to 1.8.8 for white, and 2.5.0 to 2.6.5 for assorted; brocades, 200 pieces, at 1.8.4 to 1.8.8 for white, and 2.5.0 to 2.6.5 for assorted; damasks, 330 pieces, at 4 4.0 to 4.6.0; handkerchiefs, 1,200 dozen, at 0.5.0 to 0.6.2; chintzes, 4,200 pieces, at 1.3.0 to 1.8.0; lead is quiet; iron very dull; tin plates, ditto; window glass in excessive stock, and dull.

CANTON. The sales have been quite insignificant during the fortnight, being reported as under:—Yarn, 150 bales; grey shirtings, 5,600 pieces; White ditto, 1,000 pieces; white brocades, 500 pieces, at $2.20 to $2.30. Spanish stripes, 48 pieces; sapanwood, 100 piculs; lead, 400 piculs; quicksilver, 60 flasks; nail-rod iron, 840 piculs.

HONG KONG.—The business of the fortnight has been most insignificant—in fact trade has been all but stagnated. The probability is that the Canton dealers have become alarmed at the unfavourable intelligence from Hankow, and are forcing their stocks upon the dealers of the adjacent places, which usually draw their supplies hence. The following are the only sales reported for the fortnight. except sales of damaged goods at auction:—Cotton yarn, 250 bales; shirtings, grey, 1,000 pieces; white, 2,500 pieces. Provisions, &c.; flour, Gallego and Harall are worth about $9 to $9 50 per barrel; American beef is quoted $9 to $10 per barrel; American pork, $15 per barrel. The market is glutted with articles under this denomination. Coals have arrived freely, and last quotations are hardly obtainable.

MANILA.—In the absence of fresh arrivals, the import market has been excessively dull, and few transactions have taken place. The *Soberano* and *Nueva Engracia*, from England, have not arrived. In Exports the rates for hemp have not recovered the fall of 25 cents. per picul, owing to the stoppage of orders for United States, and about 26,000 piculs from the country had been stored. Sugar could be had for $4.75 for current quality.

SINGAPORE.—In imports a small business has been done, but little or no fall has taken place in rates generally, and most of the junks loading have already sailed on their homeward voyage, and the season may be said to be over. A large quantity of sea-damaged piece-goods have been thrown on the market lately, which has also contributed to lessen the amount of wholesale transactions. In exports a moderate amount of business has been done in some of the staple articles of produce. Gambier, black pepper, pearl sago, sago flour, hides, and horns, are in good demand, and purchases to a fair extent have been made. Tin, sugar, coffee, rice, and tea, are not much inquired for.

BATAVIA.—Business has taken a decided change for the worse, owing to the native new year having passed over and with it the stimulus that it always gives to trade, and large quantities of damaged goods ex Britannia and F. Brumm being sold off at auction.

BANGKOK.—The business of the last fortnight has been on a moderate scale. Buffalo horns, rice, silk, and black pepper, being the principal articles that any trade has been done in. The other articles of produce are extremely dull of sale.

The picul is 133⅓ lbs. weight; the tael at Shanghai is equal to 1 dollar and 40 cents. and is divided into decimal parts of ten.

EXCHANGES ON LONDON.

[For dates, see first page.]

		Bank.	Private.
At Shanghai (per Tael.)	6 months sight.	6s. 1¾d. to 6s 2d.	6s. 2¼d. to 6s. 3d

At PENANG.—For London: Parsee.

FREIGHTS AND CHARTERS.

At KANAGAWA.—To London: Tea, £5. Silk, £7. Copper, £3.

At SHANGHAI.—To London: Tea, £2 10s. to £3. Silk, £4 10s. To New York: Tea, $15. Silk, $25. A good business has been done during the past fortnight, and nearly all tonnage is engaged, owing to the decline in the price of bean cake. The principal settlements reported are Amalia and Syrian at $1,500 per month; Argus, $1,200 per month. Anna Maria to Nagasaki and back, at $4 per ton. To Swatow and back: John Norman, $6,000, and 50 lay days; Elizabeth, $4,800, and 50 lay days.

At AMOY.—Rates are still maintained, but there is less demand for tonnage. The Henry and Oscar has been chartered at $1,800 per month for 6 months. Ellen Masters for 4 months, at $2,000.

At HONG KONG, MACAO, and CANTON.—To London: £2 10s. to £3. To New York: $9 to $9 50c. The export season to the above places being almost at a close, little business has been done. Hired emigration to the West Indies is entirely closed, owing to the monsoon, and the prospects of a good business being done on the Yang tsze River as soon as the ports were opened has been entirely frustrated, and consequently the business of the past fortnight has been smaller than for many months past. The principal charters reported are, Golden Eagle to London, at £3. Independence to New York, at $9 to $9 50c.; Matilda to Melbourne, £2,450, and £150 extra, if to Sydney. Conflict, at £1,900 Cimber to San Francisco, $20,000; Moonlight, at $28 per passenger, and $6 per ton. Harkaway, $23 per passenger, and $6 per ton. Rajah of Sarawak to Ningpo and Shanghai, at $4,600.

At MANILA.—To England: £3 to £4 5s. To New York: $8 to $10. Tonnage has become more abundant, and there are a few ships in harbour disengaged. The Regina Moris has been chartered to London, and Saracen to New York, at above rates. Wild Gazelle, to Australia, at £3 10s., and Anna Dignea to Sydney, at £2,600.

At BANGKOK. There is good demand for tonnage, and vessels are wanted to carry rice to China, freights having advanced to 70c. and 80c. per picul. The Vater Gruner and Rapids have both been chartered to Hong Kong at these rates.

At BATAVIA. To England, £3 10s. to £4. Rates are still well maintained, although there is a scarcity of produce, which will continue for three or four months yet. The Princess Louise has been chartered to Hamburg at the above rate, and the Henrica and General Michiels to China, both at 53c. per picul.

At SINGAPORE.—To London, £3 15s. to £4 5s. The engagements of the past fortnight have been small, owing to the few disengaged ships in port. The charters reported are:—Britannia to London, at above rate; Titania to Hamburg, at £3 12s. 6d. to £4 2s. 6d. The Gottorp, to load from rice ports to Europe on private terms.

At PENANG.—The Sirocco has been chartered at Singapore to load from here to London, at £3 12s. 6d. to £4 5s., taking 2,000 piculs of gambier from there at £3 12s. 6d.

CASUALTIES.

The Magenta (late the Zephyr) has been totally lost at Cape St. James, near Saigon. All the crew were saved.

The Japan (Brit.) struck on Oriental Rock, while under charge of a Chinese pilot, on the 23rd of April, and bilged, but has since been got on shore by the European pilot, where she now lies full of water. Only two tons of tea have been saved dry, and it is feared she will become a total loss.

The steamer Viscount Canning fell in with the Malakoff in the Gulf of Siam on the 12th April, and found that the crew had mutinied, but they had no firearms or irons on board which the captain supplied them with, and left her.

The Shooting Star got on shore off Cape St. James, and remained there for four days, when she was got off, and great difficulty was experienced in keeping the increase of water in the well subdued.

The second engineer of the steamer Bo-Peep, got his head into some part of the machinery when off Dodd Island, and was killed instantly. Captain Dodd immediately put back to Amoy.

PASSED STRAITS OF SUNDA.

From England and Continent to China: April 7, Pacific; 22, Runnymede. To Singapore: 6, Boni. To Manila: 6, Joaquina Victoria. From China to New York: 25, Eliza and Ellen. To Melbourne: 21, Melbourne. From Manila to New York: 6, Sultan. From Batavia to Holland: 21, Maarten van Rossem; 25, Nieuw Holland. From Singapore to Liverpool: 23, Crisis. From New York to Shanghai: 25 Union.

THE TRADE OF SHANGHAI.

WE are in receipt of the Returns of the Import and Export Trade carried on under foreign flags at the port of Shanghai for the half-year ending Dec. 31, 1860, published by the Foreign Inspectors of Customs at that port, which, coming in continuation of the previous half-yearly returns, of which we gave a digest a few months ago, enable us to frame an estimate of the value of the trade of Shanghai for the past year; at least as far as carried on in foreign vessels. This abstract is the more interesting just now, as it may be many months before the Board of Trade issues any statistical return of the trade of the Chinese ports. The opening of the empire, more generally to foreign commerce, necessarily gives a greater degree of interest for our merchants, manufacturers, and shippers, to all tradal returns; and it is fortunate that the statistics of imports and exports are now so promptly made up and issued at the principal ports. There is but little doubt that a very large share of the carrying trade, coasting and river, will come into our hands, and the proportion of American tonnage employed in those waters, is more likely to decrease than increase, owing to the civil discord prevailing in the States, which will circumscribe mercantile enterprise in the East. British merchants and shipowners, on the contrary, are directing their energies to that quarter, both for steam and sailing vessels. Exploring expeditions by land and river are being made into China, and particularly towards the Western provinces and the borders of Thibet, in order to ascertain what probabilities of trade, or of the collection of trade products there may be.

The importance of the trade of the port of Shanghai is shown in the Returns for the past year, from which it appears that the import and export trade carried on in foreign vessels exceeds £29,000,000 per annum, exclusive of that conducted in Chinese vessels. The trade of the last half-year generally shows an increase, as will be seen by the following comparative statement:—

VALUE OF IMPORTS INTO SHANGHAI IN FOREIGN VESSELS IN 1860.

General merchandise, first half	£3,476,242
,, second half	5,063,251
Opium, first half	2,115,114
,, second half	2,722,251
Treasure, first half	2,082,993
,, second half	2,866,580
	£18,326,431

VALUE OF EXPORTS.

General merchandise, first half	£4,172,363
,, second half	6,040,196
Treasure, first half	427,403
,, second half	139,357
	£10,779,319

The value of the goods re-exported in the last half-year was £3,234,272.

The duties paid in the last half-year for tonnage, and on imports and exports, amounted to £245,323, against £314,144 in the first half-year. The entries of foreign vessels in the six months ending December were 558, registering 175,158 tons. Excluding the Ningpo or native boats flying foreign flags, the tonnage was thus divided:—75,976 British, 57,120 American, and 30,522 Continental, &c. The clearances numbered 526 vessels, and 161,461 tons. Of the square-rigged vessels, &c., 162 were British, 92 American, and 82 other foreigners. 17 American vessels arrived in ballast, and 18 cleared out in ballast.

Glancing down the imports in the last six months of 1860, we find that cotton and linen goods reached the value of about £1,500,000, and woollens about £250,000. Nearly half of the general imports (in value) are of European or American manufacture. Taking the leading exports, there is a large decline in the tea shipments as compared with the previous half-year, but this results, in a great measure, from the crop season falling early. The exports in the six months were, 32,230 piculs of black, and 35,980 of green; or, reduced to pounds, 9,194,761 lbs., thus distributed:—

	Black.	Green.	Total.
Great Britain ...	3,752,916	2,271,916	6,024,832
United States ...	327,706	2,582,868	2,910,574
Hong Kong and Coast ports...	40,638	42,565	83,203
Australia	176,152	—	176,152
	4,297,412	4,897,349	9,194,761

The silk shipments in the half-year were 56,219 bales, of which 25,390 bales went to Great Britain direct; 29,867 to Hong Kong, for England, the Continent, and Bombay; and 735 to the United States. There were also shipped 182 bales of coarse silk, 50 of refuse ditto, and 506 bales of cocoons, all to Great Britain.

Continental Intelligence.

FRANCE.

The papers announce that the Minister of Finances has recently entered into a convention with the Company des Services des Messageries Imperiales, by virtue of which a postal service will shortly be established between Suez and the Indo-Chinese establishment at Saigon, with the embranchment of Aden to Reunion and the Mauritius, from Point de Galle to Calcutta, touching at Madras and Pondicherry, from Singapore to Batavia, from Saigon to Manila, and, finally, from Saigon to Hong Kong. This postal service will be carried on by means of twelve steamers of 3,625-horse power, accomplishing annually twelve voyages. It is thought that this maritime service will be a means of developing French industry and commerce. It is said that there is in circulation in the countries bordering the Indian Ocean 500,000,000f. of French capital. The establishment of a telegraphic line is also in contemplation, which, passing through Persia and the southern coasts of Asia, will permit merchants in the most extreme points of Europe to know in a few hours the rises or depressions of the prices of silk, tea, cotton, &c., in the Indian or Chinese markets, and to make instantaneous orders according to the demands of industry and Western consumption, as well as gain several months which are lost by the ordinary means of communication in ordering the shipments of goods.

The 5th Regiment of Marines which is to be formed will have its head-quarters and depôt at Toulon, and will be employed to garrison the new French possessions in Cochin China. The effective force of the garrison is fixed at 2,500, under the command of Vice-Admiral Charner, exclusive of the sailors on board the squadron of the station. The force will consist of—Marine Infantry, 1,400; Marine Artillery, 200; Engineers, 150; Military workmen, 50; Gendarmes, 50; Native Infantry, 500; Native Cavalry, 150, with 200 horses. Opinions differ among military and naval men respecting the value of this new conquest, or, as it is termed, the French province of Saigon; but the more general belief is that under an intelligent, firm, and friendly administration it will become, in a few years, the most important of French colonies, Algeria, of course, excepted. No fear is entertained of resistance or revolt on the part of the natives. The country is remarkable for the rich and varied character of its products, no less than for the advantages of its topographical and geographical position. It is traversed in all directions by navigable rivers, in which the tide flows and ebbs for a distance of 186 miles from the sea-board. Some have an average width of a mile, and are navigable for vessels of the heaviest tonnage for a distance of from 80 to 100 miles from the coast. Nowhere else on the Indo-China seas is there a place to be found that offers advantages equal to Saigon for the establishment of the centre and head-quarters of a naval station. It satisfies all the requirements of strategical science; will allow of the cheap construction of graving docks, while the uplands will supply abundance of shipbuilding timber, and St. James's Cape is accessible to sailing-vessels coming from north or south, no matter what wind may be blowing. Occupying Metho, the whole of the trade of Camboja, it is anticipated, will pass by French hands, who will thus possess the supply of salt fish to the great markets of India and China, without counting the other products of the country, such as rice, ivory, silk, &c.

RUSSIA.

(FROM OUR OWN CORRESPONDENT.)

ST. PETERSBURG, June 5.

That part of the new tariff relating to imports is finished, and the plan published to elicit public opinion. The second part, touching the export articles, is now being worked out, the main principle of which is the abolition of all export duties

Digitized by Google

favours the national flag without breaking any treaty, or giving other States reason to complain. In order to favour the Danish flag and enliven the trade with distant countries, Denmark has reduced the import duty on produce direct from China and the East Indies to the extent of 25 per cent., but subject to the condition that such vessels sailed from a Danish port with cargo, one-half of which must have been shipped in such port. This measure has been tried in Finland, and a premium of 15 per cent. is now conceded on goods imported there direct from transatlantic ports. But the Finnish ship-owners find it more advantageous to ship their timber to Denmark, land half the cargo there and take in Danish produce, in order to enjoy the reduction of 25 per cent. on the goods imported into that country on the return voyage.

Letters from Kiachta state that satisfactory accounts have been received from the caravan that started from that place for Peking on the 11th of March. It has proceeded by the new route, which lies more to the eastward than that taken by the Russian Embassy. At the fourth station from Urga the road approaches the river Kerulen, winding for a considerable distance along its banks, and then turns to the south-east. On this road no scarcity of water or fodder is experienced, there being found plenty of lakes and rivulets, and the surrounding country is more densely populated than that on the western road. The caravan had proceeded through Sastave, Duschikau, and Tschado, at which latter place it joined the other high road to the capital. By taking this route the Russians can in future pass through Dolonnor, which is celebrated throughout all Mongolia for its Fair. It is situated not far from Schehe where the Bogdochan at present resides. The caravan consisted of two hunded camels laden with sundry merchandise, and fifteen two-wheeled vehicles for the passengers, drawn by camels. With this caravan the Russian-America Company sent 30,000 roubles in coin, and goods to the value of 130,000 roubles. Mongolians have contracted to carry the convoy to Peking, but only after throwing great difficulties in the way. The price demanded, however, was very moderate, viz., for each camel-load, 30 lans (one lan being 2 roubles and 15 copecks); for silver, 100 gins (each gin 3½ poods, or 140 lbs.), 6 lans, 5 for furs and 4 for other articles. The agent Iwan Alexowitch Nerpin is to remain at Peking as resident representative of the merchants of Kiachta, and, in the absence of a Consular Agent at Urga, the former Burate Kowrigin, who has been converted to Christianity and been baptised, and served for some time as a Cossack officer, is to reside at that place in a similar capacity. It is expected that the Russian Government will shortly appoint a Consul there, as it is already beginning to become a place of some commercial importance.

With reference to the late act of emancipation of the serfs, the Senate of the Empire has voted an address of thanks to the Czar. It is stated on good authority that the Senate has also passed a vote unanimously conferring on his Majesty the present Emperor the title of "the Emancipator," by which style he will be known and remembered in future ages.

Rear-Admiral Kosakewitsch I. is confirmed in his appointment as Military Governor of the newly acquired coastern provinces in Eastern Asia, and Commander-in-chief of the Russian ports on the Pacific Ocean. At the same time the distinction has been conferred on him of Aide-de-Camp in the Emperor's suite, which gives him the privilege of sending in his reports direct to the Autocrat.

From official documents we learn that the quantity of precious metals obtained from the Imperial mines in the Altai Mountains in 1859 was 958 poods, 11 lbs., 20 zolotniks of pure silver, and 40 poods, 30 lbs., 72 zolotniks of gold, together with 31,000 poods of copper.

Vice-Admirals Iwanoff, Balk, and Count Heiden (who commanded the Russian squadron at Navarino, and assisted Sir Edward Codrington in destroying the Turkish and Egyptian fleets in that port in 1826 during the war of Greek independence), are promoted to the rank of full Admirals; Rear-Admirals Struchoff, Istomin, Zavoyka, and von Glasenap to be Vice-Admirals, and seven Captains of the Imperial Navy to be Rear-Admirals. Such a large promotion is exceedingly rare in the naval annals of Russia, especially in a time of profound peace like the present.

A letter from Irkutzk of the 11th of April has been received in this city, giving another practical proof of the prospective advantages to be derived from the treaty with China. Native commercial agents from that country were expected to arrive very shortly for the purpose of examining what articles of trade were to be had at Irkutzk, with the prices, quality, and stocks, and to study the system of payments now in use. They proposed making a considerable stay there, and then intended to proceed to the great annual fair at Nischny-Nowgorod.

HOLLAND.

(FROM OUR OWN CORRESPONDENT.)

AMSTERDAM, June 10.

In the First Chamber of the States-General the Colonial Budget passed after some discussion but without a division. On the other hand the new postal law to which the whole country was looking forward with such evident satisfaction and with no doubts as to its coming into operation on the 1st of September next, since it passed the Second Chamber by a triumphant majority of 54 to 6, was thrown overboard by the Upper House by 20 votes against 12. The Finance Minister warned the members that a rejection of the Bill would create a profound sensation throughout the country, and he was perfectly right in his premises. Great indignation is everywhere openly expressed at the conduct of the First Chamber in thus opposing the general wishes of the people, as the Bill contained the principle of a uniform rate of postage for all distances, and was justly very popular. The Dutch are by no means an excitable nation, and are generally disposed to take things coolly, but on this subject they feel very strongly, and in many towns "indignation meetings" are being organised, to give vent to an expression of public feeling and draw up petitions to the Chamber to revoke their decision. If the question should again be brought under discussion it will in all probability be passed, as many of the members, favourable to this measure, not anticipating this defeat, were absent from the House when the division took place.

In the great antagonistic question of free cultivation and free labour in Netherlands India, a deputation consisting of Messrs. Reynst, J. O. Hemert, and J. R. Couperus, arrived in this country some months since from Java. The first of these gentlemen was formerly the Vice-President of the Court of Netherlands India, the second is Director of Revenues and Domains, and the third a member of the Supreme Council. All three are connected with each other by marriage. The Colonial Minister, being able to offer much assistance to men of such experience and influence, was obliged to look seriously about him for support, and obtain the countenance even of protectionists, *quand meme*, and has found a certain Mr. Bartolo, who has published a pamphlet entitled "Free Cultivation and Free Labour," in opposition to that of Mr. Couperus, called "A Word in Reply to the Statements of the Ex-Governor-Generals Rochussen and A. J. Duymaer Van Twist concerning Free Labour."

An unfortunate accident has happened at Rotterdam to the barque *Zwerver*, Capt. B. F. Franzen, one of the vessels lately chartered by the Netherlands Trading Company. After discharging her homeward cargo, and whilst taking in ballast for Samarang, to which port she is bound, she had the misfortune to caut over, when she filled with water and sunk. Fortunately no lives were lost on board, as the crew were enabled to escape by the jib-boom of the brig *Tonia*, that was moored astern of her, but a landsman that was employed to carry out an anchor into the stream, capsized his boat and was drowned. It happened very providentially that a gang of twenty hired hands, who were engaged in ballasting the barque, had gone to dinner a few minutes before the accident happened, or else the loss of life might have been serious. The vessel has since been got up and pumped dry. She does not appear to have received any damage, but her owners have thought it prudent to have her hauled up on a slip for close examination.

A detachment of twenty-five men, most of them non-commissioned officers, under the command of Major P. G. Anemaet, returning from leave of absence, and accompanied by Lieutenants J. Boelsums and H. W. Genger, embarked last week, at Rotterdam, on board the Dutch chartered barque *Tollens*, Capt. B. Verhagen for Java, calling at St. George d'Elmina, to take on board a further detachment to complete the reinforcement. In reply to a question put by Mr. Rickevorsel in the First Chamber a few days ago, the Minister of the Marine stated that a squadron was fitting out and would be sent with as little delay as possible to the coast of North America, for the protection of the Dutch interests in those waters. This confirms what I wrote in my last. In addition to the *Djambi*, Captain-Lieutenant Hansen, which is under orders to sail on the 16th inst., the steam-corvette *Apeldoorn*, Lieut.-Commander J.

Digitized by Google

on native produce with the exception of rags, timber, leeches, and bones. A semi-official article in the *Morsky Sbornik* contains some excellent proposals as to the means of evading the difficulties in which Russia is placed by her reciprocity treaties with other nations, and instances the case of Denmark, which Hugenholtz, is getting ready for sea with the utmost dispatch, and will sail on the 10th inst. Both these fine ships of war will proceed in the first instance to Curaçoa, which is the point of rendezvous for the whole squadron.

The king has confirmed the appointment made by the Governor-General of Netherlands India, of Mr. D. C. Noordzieck, as resident of Madoioen.

In addition to the late increase in the number of salaried Protestant clergymen in India, the king has ordered by Royal Decree of the 28th ult., that two military chaplains be appointed to the European troops serving out there, at a salary of 400 florins per month, and 40 florins for forage, with a rise of 100 florins per month after each period of five years' service, and the right to claim a pension at any time on retiring after ten years' service, at the rate of 120 florins for each year of service, but not exceeding 2,400 florins.

The number of cadets entered at the military academy for the East India Army this spring, in conformity with the announcement of the Colonial Minister, as mentioned in a former letter, is far more numerous than was anticipated, being twenty-four for the Infantry, two for the Cavalry, twenty-four for the Artillery, and twenty-six for the Engineers.

Subjoined is the list of passengers to and from India :—

PASSENGERS SAILED.

Per Holland, Capt. Aufmorth, from Amsterdam to Sourabaya.—Mr. J. F. Hagedoorn.

Per Willemina Clara, Capt. Abrahams, from Amsterdam to Batavia.—Mrs. Morbotter and three daughters, Miss de Ruyter, Miss Willems, Miss Eymers, Mrs. Braams and daughter, Mrs. van Mulken, Mr. Mulder, and Mr. van Borst.

Per Cornelia, Capt. Jaski, from Amsterdam to Batavia.—Messrs. J. A. Ameln and A. Ricordo.

Per Gebroders, Capt. de Groot, from Amsterdam to Batavia.—Mr. H. J. van Munster.

Per Kosmopoliet, Capt. Bouten, from Rotterdam to Batavia.—Mrs. van Gennep, child, and servant, Miss de Vos, Miss E. Epp, Miss A. Rudolph, Miss E. Indewey, Miss A. H. Indewey, Mr. J. C. Casembroot and son, Mr. and Mrs. L. J. van Beers de Sonnaville and two children ; Messrs. H. E. van der Hout, D. Bowyer, C. A. Halverhout (Lieutenants, R.N.), A. L. Thierens (Purser, R.N.), B. Perk, H. de Val, A. Bastian, P. J. van der Heyde (Rittmeester E. I. Cavalry), F. C. Burgers and F. de Steenhuyzen (Second Lieutenants of E. I. Infantry), J. Jongblood (Military Apothecary); a Java female, several servants and one hundred and fifty soldiers.

Per Diligence, Capt. Smit, from Amsterdam to Batavia.—Mrs. M. J. Deutz van Reen.

Per Sophie Amalie, Capt. Lourens, from Amsterdam to Samarang.—M. J. L. Schnitzler.

Per Tylingsie, Capt. Auwehand, from Amsterdam to Batavia.—Mr. K. Dei.

PASSENGERS ARRIVED.

Per Doelwyk, Capt. van der Putte, at Rotterdam, from Banjoewangie.—Mr. and Mrs. Doormar and family.

Per Amazone, Capt. Abbink, at Nieuwe Deep, from Batavia.—Capt. A. van der Windt.

Per Dyonisia Catharina, Capt. Berkelbach, at Nieuwe Deep, from Java.—Messrs. H. J. van Spanje and J. Lambregt.

Per Eva Johanna, Capt. van Bochove, at Brouwershaven from Batavia.—Mr. Kamerling, two sailors of the shipwrecked bark Twee Jeannes, and twenty-seven invalided soldiers.

Per Johanna Christina, Capt. Obelt, at Amsterdam, from Batavia.—Mr. and Mrs. J. Spukerman van Wezelenburg, two children, and attendants, Mr. and Mrs. W. J. Havenga, Mr. and Mrs. P. Diepenbrink, Mr. de Bruyn, Mr. G. P. Binder, Mr. H. van der Watering, Mr. T. Blumentrit, Mr. J. Brudersen, Mrs. A. Klusmann, and Miss W. de Guay-Fortmans.

Per Jan van Brakel, Capt. de Bawer, at Nieuwe Deep, from Banjoewangie.—Messrs. C. C. and J. G. Schot.

COMMERCIAL.

COFFEE is remarkably firm, and if the transactions have been somewhat limited, it is not owing to want of orders from purchasers, but rather in consequence of the more popular qualities beginning to get scarce, and not keeping equal to the demand. Some parcels of Java and Pedang, ex *Noach* and *Joseph and Louise*, that were still in first hands, have been sold at higher prices. Ordinary and good ordinary may be quoted 1 to 1⅛ cents. above sale prices. To execute orders on hand common greenish Java of doubtful taste has been taken at 38 and 38½ cents. Fine coloured blue and green Java have been sold freely, and the market is cleared of these descriptions.

In RAW SUGARS the transactions in East India were large, but the prices paid were ½fl. to ¼fl. below the figures of the March sale. The result of the company's sale of 63,461 kranjangs Java sugar at Rotterdam, on the 28th of May, was as follows :—

Standard sample.		Kranjangs.	Valuation.	Sold at
No. 9	Yellow ...	1,298 ...	31¾ fl. ...	31¼ fl.
10	„ ...	1,585 ...	33 ...	32¾
11	„ ...	2,225 ...	34 ...	35
12	Grey	2,796 ...	34¾ ...	35
13	„ ...	2,507 ...	35¼ ...	35½
14	Half white ...	2,903 ...	36¼ ...	36¾

18	„ ...	7,272 ...	39 ...	38¾
19	„ ...	550 ...	39½ ...	39¼

All sold; the inferior qualities and the highest numbers went rather below the valuation, whilst the middle descriptions fetched better prices, establishing a rise of from ½ to 1 florin, but still not equal to those of the March sale.

TEA in good request, but without alteration in prices. At a sale of 2,495 quarter-chests. 714 eighths, and 36 sixteenths, ex *Catharina* from Foo-Chow Foo held at Rotterdam this week, the whole quantity sold with spirit at following prices:—Congou, common, 75—81, fine, 85—93; Souchong, superfine, 116—118. Oolong, extra fine, 128; Gunpowder, 151 -154; Hysant, extra fine, 192. At another sale 800 packages of Congou ex *Thetis*, from Hong Kong, were offered, but only a part sold, 92 being paid for finest new seasons.

In DRUGS no alteration to report.

About 1,000 blocks of BANCA TIN have changed hands at rather easier rates than in my last report, the highest price obtained being 74 fl. The company have advertised 138,553 blocks for sale on the 26th inst., after which about 7,700 of Billeton tin will be submitted to public competition. The following figures will show the fluctuations in the prices of Banca tin in this market for the last twenty years:

1842	44 fl.	1847	55 fl.	1852	51 fl.	1857	86½ fl.
1843	36½	1848	45½	1853	68	1858	67
1844	41	1849	55	1854	72	1859	77
1845	55	1850	41¼	1855	67	1860	80
1846	53	1851	46½	1856	82	1861	74

THE EARL OF ELGIN AND THE GROCERS' COMPANY.

On the 5th of June the Earl of Elgin was admitted "a brother Grocer," and entertained at a magnificent banquet in the hall of the Grocers' Company. About one hundred and twenty gentlemen sat down to dinner, among whom were the Right Hon. the Lord Mayor, the Earl of Hardwicke, General Peel, Colonel M'Murdo, Mr. Thomas Bowring, &c. In reply to the Master's toast proposing his health, Lord Elgin spoke as follows :—"About this day last year was that on which the vessel which was carrying out to China the whole special Embassy met with the disaster which very nearly resulted in bringing the mission to a premature close. However, I think I may now say that we have succeeded in bringing the war with China to a termination—a result which was, in the first place, due to the gallant army, and in the next to the gallant navy, which accompanied the Embassy; for I must here repeat what I have said several times before, that though the services of the army were more conspicuous, those of the navy were not a whit less important. I believe that this country regards the Treaty with China as of sufficient consequence to have justified the risk of shipwreck to twenty embassies. As showing what would have been the feeling if the war with China had been protracted, I may mention that at a most critical moment of my proceedings I received a letter written by a friend of mine, a most eminent statesman, who stated to me that the war was most unpopular in this country; that there had been a discussion on it in a place for which I have a most profound respect, though I dare not mention it, and that in that place not one single individual said a word in favour of the war, though many said a great deal against it. That was a most agreeable communication for a public servant to receive in reference to an affair with which he had to deal at a distance of ten thousand miles from his own country. The letter went on to say that the universal opinion was that what we wanted in this country was, not political relations, which led to war, but trade, which did not. I confess for myself that I entirely adopt that sentiment; but after my experience in China I must be permitted to doubt that you can have trade with that country without political relations. You may have trade with a civilised country without political relations, but in China, if there was no convention, the authorities might at any moment refuse to allow merchants to trade at all, or impose regulations that virtually would amount to a prohibition. Some years ago a vessel was anchored in Canton, and an anniversary—the King's birthday, perhaps occurring, the men fired a salute. A woman was killed by a wadding from one of the guns, and the Mandarin at that port said, "We will have no more trade with you till the man who fired the shot which caused the woman's death is given up." If I am correctly informed the man was given up. I should like to know what master of an English ship would in the present day give up a man for having discharged his duty, to be disembowelled, or consigned to perhaps a still more cruel fate? I repeat that I agree with those who think that it is not political relations, but trade that we want with China; but we adopt political relations as indispensable to trade. We may congratulate ourselves in having secured these; and I am happy to say that all the news which I have received from China since my return home induces me to believe that our relations are established on such a footing as that they are not liely to be disturbed in future.

Correspondence.

CHINESE IMMIGRATION TO BRITISH GUIANA.

(To the Editor of the *London and China Telegraph.*)

SIR,—Trusting that they will not be unacceptable to your readers, I enclose you a few notes anent the immigration of Chinese coolies to British Guiana.

It may be remembered that, some six or seven years since, the *Lady Elgin* and several other ships were despatched from Amoy or Hong Kong with coolies for Demerara. These were private adventures, and considered to be failures; for, as the vessels left late in the season, they made long passages, and met in consequence with a very serious amount of mortality. The present season is the second during which this emigration has been revived and carried on under the auspices of the Demerara Government. During the year 1859-60, there were despatched from Canton and Hong Kong six vessels, conveying to George Town 1,974 emigrants; of these 299 were women, and 108 male and female children; for it should be known that the promoters of this emigration insist upon its being, as far as possible, a *family* one. The casualties among the emigrants were less than would have occurred, on an average, among an equal number of persons on shore; a fact speaking volumes in favour of the agent, the inspectors, captains, surgeons, and all concerned in the transit. The first ship dispatched this season was the *Sebastopol*, which left Canton late in December, with 330 coolie passengers in medical charge of the writer. We arrived at George Town on March 28, 1861, a passage of 95 days, which includes a detention of five days at the Cape. We lost on the passage, one man and two women. During my stay at Demerara (about a month) two other ships, the *Claremont* and *Red Riding Hood*, also with coolies, arrived from China. The three vessels augmented the population of British Guiana by at least 900 male and female adults and children, their aggregate mortality having been *less than one per cent.!*

British Guiana, as your readers may be aware, is a rich and fertile portion of South America, watered by the Oronico, the Essequibo, the Demerary, the Berbice, and other fine rivers, and extending from 6 deg. or 7 deg. north; southward, how far no one seems to know. Rich, I have said, but not rich in labour; fertile, I have said, yet nine-tenths of it is bush. Even now it exports 70,000 tons of sugar yearly, but has the potentiality of producing ten times as much; and had it the supply of muscle, could add another cypher to the figures used. The aboriginal Indians are few and averse to active industry; the freed negroes are lazy and averse to industry, either active or passive. Subsisting sumptuously on salted fish, with a few plantains, the negro can earn by two or three days' toil, enough to keep himself for a week. The planters of British Guiana fighting this, their battle of life, competing on the one hand with Little Barbadoes possessing a population large as their own; on the other with Cuba with its slave labour, prudently put their shoulders to the wheel, and procuring from Europe the best machinery, look towards India and China for their supplies of free labour. The Chinese immigrant's history may be considered in three stages, his engagement in China, his passage out, and his condition and prospects on arrival at his new home. Into the latter I made it my business to inquire, so far at least as the short period of a month's stay afforded opportunity. The operations of the Demerara Government by their agent, Mr. Austin, are so well known at Canton and Hong Kong, that it is almost superfluous for me to refer to them here; his depots at those places are open, and the machinery by which they are conducted, patent to all. Many in their simplicity believe that in carrying on this work, Mr. Austin has the co-operation and active assistance of the Allied Commissioners at Canton, as well as of the Hong Kong Government officials. Such, however, is by no means the case; unless, indeed, a change has of late come o'er the spirit of their dream. Sir John Bowring declared that female emigration from China was a chimera, and Sir John having prophesied, was loth to be found a false prophet, and has apparently inoculated his successor with his ideas. The Allied Commissioners, who ought to have known better, made no distinction between this free emigration, under the British flag, to one of our own colonies, and that to Cuba or to Callao; and appeared to proceed on a uniform principle of throwing as many impediments in the way of emigration in general, as they could. It is to be hoped that Lord Elgin, on his return to the South of China, may have improved matters somewhat, if only for the sake of many hundreds of starving Chinese who may be removed from a sphere where their labour is superabundant and earnings precarious, to one where men are needed and labour is remunerated.

A starving Coolie seeks admission to, say, the depot at Canton; he is received and fed, and if he has a family in the country, may also get a loan of the dollars necessary to bring them to Canton. After an interval of some days, for consideration, he is called upon to enter into articles of agreement; this is done, both in Chinese and English, in the presence of the emigration officer attached to the British Consulate, whose duty it is to see that all its provisions are fully understood by the intending emigrant. By these Fokei engages himself to work and serve as an agricultural labourer in British Guiana for five years from the date of his reaching that country. Seven and a-half hours is the time specified for labour during six days in each week; with a reservation of not less than five days to be set apart as holidays at the Chinese new year. In return for this he is to receive a free passage, a supply of clothing, and wages at the rate of four dollars per month, with food, house, garden-ground, medical attendance, and the means of corresponding monthly, free of expense, with his relatives in China, and of remitting money to them. Thus far the arrangements are proper enough; but when the ship is ready for sea, with all her passengers on board, the Custom-house authorities step in and cause needless detention, by inspecting and re-examining all the emigrants who have already been thoroughly sifted by the consular officer. This work of supererogation is avoided when ships take in their passengers at Hong Kong. During the voyage Fokei is an object of unceasing attention. The authorities have taken care to have his ship well found and ventilated; water, chow-chow, fuel, oil, medicines, are in abundance; and the surgeon is instructed to take in at the Cape such quantities of fresh vegetables, &c., as he may think advisabie. Few of those on board the *Sebastopol* ever lived so well in their lives before, and some who embarked half-starved were landed at Demerara, fat as pigs. The principal sickness was from want of hard work. Arrived at their destination, the immigrants are visited and inspected by the harbour-master, the health officer, and the immigration agent-general; the name, age, birth-place, previous occupation, &c., of each one is carefully recorded; and they are allowed to form themselves into groups of twenties, thirties, &c., for distribution to such estates as they may be allotted, and in the course of a few days are conveyed in small schooners, or steamers, or by railway, to their new homes. Families, of course, are never separated; and on some of the larger estates there are schools for the children.

The Demerara Government having passed what it calls a "Heathen Marriage Act," insists upon re-marrying each newly-arrived husband and wife, and the registrar having performed the ceremony, presents each party with their "marriage lines!" a part of the story rather puzzling to my celestial friends. This functionary, however, is a veritable Cresswell, and as readily unties the knot, should either party plead "incompatibility of temper;" the only stipulation being that the man and woman must go to the same estate.

It is at the option of the coolie at any time within a year of his arrival, to elec *to be paid for his services by the task*, and thus be placed on the same footing as any of the non-indentured labourers of the colony; in such a case he still gets house, garden, &c., but waives his claim to food. The industrious ones soon find it their interest to avail themselves of this option, for by it they can earn 75c. per day. Their chow-chow, &c., will at first cost them as much as $10 a month, but as soon as they get their gardens under cultivation, and with the assistance of their yams, plantains, and sweet potatoes, raise a pig or two; their expenses will be much reduced. At the end of his first year's apprenticeship the coolie can release himself from his indenture by a payment to the colony of $75—the cost of his passage from China. The women are not indentured, but can always find remunerative employment.

British Guiana is by no means so unhealthy a *locale* as is sometimes believed, although a stranger might imagine the reverse on inspecting the numerous well-arranged hospitals on the various estates, and the ample provision of medical attendance insisted upon by the authorities. To the Chinese, especially, the climate seems well adapted. Periodical visits are made by Government inspectors to the estates; it being the duty of these gentlemen to see that the provisions of the law are carried out, and to ascertain from the labourers if they have causes of complaint. Riding one Sunday afternoon on the railway, extending now from George Town some twenty miles towards Berbice, I was pleased at meeting with three Chinese, who got in at the Beterverwagling station: they had been out for a holiday, and had each got a piece of fresh sugar cane, five or six feet long. These men had been a year in Demerara, and pronounced it a "No. 1 fine country." On other occasions I met with those who complained that their money did not go so far as in China. Possibly the selection of emigrants made in China has not always been judicious. Generally speaking, the Hakas make better immigrants than the Puntis; as a Norfolk or Dorsetshire labourer would be preferred in the Far West to a Spitalfields weaver or Manchester spinner. One planter complaining to me of the batch allotted him ex *Sebastopol*, said he had got nine pedlars, eight barbers, one umbrella maker, one soldier, one professional gambler, but not one agricultural labourer! Surely the district between Swatow and Amoy would afford better men than can be got out of a large city like Canton; but, wherever obtained, equal care should be taken in the selection of the female as the male emigrants; small-footed women do not make the best sailors; and low as the mortality has hitherto been on board Mr. Austin's ships, it has been chiefly among the women: this should not be lost sight of.

There is, and has for some time, been a large immigration of Indians from Madras and Calcutta, but in British Guiana there is room for all. Soon after the emancipation the planters introduced Portuguese from Madeira, but the supply of these is limited. The latter have prospered remarkably, and the majority are in independent circumstances, and having accumulated money, have by degrees got much of the internal trade of the colony into their hands. I am credibly informed of one Portuguese gentleman, who now owns two or three estates and much house-property ir George Town. He was originally an indentured agricultural labourer. Walking up and down Water-street, the Queen's-road of George Town, we see numerous small stores owned by Portuguese, and is it too much to expect that the industrious dollar-worshiping Chinaman will, in due time, get his share of the loaves and fishes? He must not, however, expect every thing to be *couleur de rose*, or to obtain the advantages I have pictured without a fair amount of toil and labour.

May, 1861. W. J. P.

THE EARL OF ELGIN AND SIR HOPE GRANT.

The members of the Special Embassy to China and of the China staff entertained the Earl of Elgin, K.T., G.C.B., and Lieutenant-General Sir J. Hope Grant, G.C.B., at a banquet on Thursday evening, at the Albion, Aldersgate-street. Among the company were Colonel the Hon. St. George Foley, C.B., the Hon. J. F. Stuart Wortley, the Hon. T. J. Havell Thurlow, Lieut.-Colonel Crealock, Major H. B. Loch, C.B., Dr. Home, V.C., Mr. John Loch, Donald Cameron of Lochiel, Lord Richard Grosvenor, Colonel Mackenzie, C.B., Colonel Stevenson, C.B., Major the Hon. J. Dormer, Major Biddulph, Major the Hon. Augustus Anson, V.C., Major Wilmot, V.C., Major Greathead, C.B., Captain Frank Grant, and Lieutenant-Colonel Wolseley, C.B.

MACADAMISED STREETS IN CHINA.

A French periodical, *Le Journal pour Tous*, states that the system of road-making introduced into England by Mr. MacAdam, has been in common use for centuries in China. The journal pretends to account for our becoming acquainted with the system in the following plausible manner:—When Lord Macartney went on his celebrated mission to Peking in 1792, his secretary was Sir George Staunton, whose father was a wealthy landed proprietor residing at Bristol, and employed Mr. MacAdam as his architect and engineer. Sir George returned to England in 1799, and communicated many things to the Royal Society of London, and, amongst others, this Chinese mode of making roads, which was first executed by Mr. MacAdam at Bristol, in 1801, from the descriptions given him by Sir George Staunton. The experiment proved so successful, that it has since been everywhere adopted.

Suggestions for the insertion of information required by our subscribers will have due attention and acknowledgment.

Any information required by Subscribers, in reference to Commercial or General matters in CHINA, JAPAN, SINGAPORE, *and other parts of the* FAR EAST, *will be supplied on application at the Office, where files may be seen of the Journals published in those countries.*

Post-office orders should be made payable at the Lombard-street Office, to MORTIMER WRIGHT.

The London & China Telegraph.

LONDON, FRIDAY, JUNE 14, 1861.

THE TAEPINGS *VERSUS* THE IMPERIALISTS.

MR. DUNLOP, the Member for Greenock, and learned in the law, called the attention of the House, on the 31st ult., to the position of the REBELS in China, and our neutrality towards them. In substance he moved "An Address to HER MAJESTY "to instruct the British Ambassador in China to afford equal "facilities for trading with the IMPERIALISTS and REBELS, and "to preserve a strict neutrality between them." After the explanations furnished by Lord PALMERSTON and Lord JOHN RUSSELL, the motion was withdrawn. Mr. DUNLOP appears to have derived his information from the official correspondence which has been recently published. Had he been guided more by the narrative of events which have been published in connection with Admiral HOPE'S expedition up the Yang-tze-Kiang, through the heart of the Rebel districts, we think he would have found more satisfactory proof that our policy in China has been distinguished by a desire to treat the REBELS as the *de facto* rulers of the provinces of which they have gained possession, the only stipulation being, "Do not oppose our pro-"gress through your dominions." This was placing them on the same footing as the IMPERIALISTS, our course towards them having been precisely similar. A reference to the notification issued by Commander APLIN, of H.M.S. *Centaur*, published in the *London and China Telegraph* of the 13th May, very clearly illustrates this. The notification of Mr. PARKES also says, "that all intercourse held with any place in their (REBEL) pos-"session will be conducted under such conditions as the in-"surgent authorities, with the approval of the senior naval "officer, shall think proper to prescribe."

That we should lay ourselves out to trade with both powers is undoubtedly the only correct course open to us, but in a case similar to the threatened attack on Shanghai where the lives and property of British subjects were at stake, we could not have acted otherwise than to warn them off. We may venture to say that no resident at that port, at the time, thought otherwise, excepting a small number who had an interest in the spoliation which would have followed a REBEL occupation of the city. Had the Insurgents shown more fitness to govern when in possession of Shanghai in 1854 it might have been otherwise, but, unfortunately, all our experience proves that the main object which incites them to action is far indeed from being a patriotic one, and that a desire to plunder and grow wealthy on their spoils, is the ruling motive by which they are actuated. The discussion which has taken place in the House will probably give a more decisive character to the instructions issued to our Ambassador in China, on the necessity of maintaining a neutral policy; it will certainly do good, by giving greater ventilation to a subject on which so much misconception exists at present in this country. It is only gross ignorance, or the indulgence of a delusive dream, which can lead any Englishman to vindicate the part now being enacted by the Insurgents. It will not do to say that the Tartar Government being evidently rotten, any other Government will prove a boon to the Empire. The Devil, in "Paradise Lost," speaks of finding in the lowest deep, a lower deep, and certes that lower deep is at present occupied by the Taepings. If by any happy chance a change should, in the future, come over the REBELS, it may be expedient for us to alter our policy towards them; as it is, it would be injurious to the commercial interests of England to swerve in the slightest degree from the strictly neutral attitude we have assumed.

AFFAIRS IN JAPAN.

THE correspondence arising out of the recent disturbances in Japan has just been printed and presented to Parliament. It will serve to refresh the memory of those who have been already made acquainted with the facts to which it refers, but these documents will afford but a partial view to readers who bring no previous knowledge to bear upon the subject. If, as we have all along maintained, Mr. ALCOCK and his colleagues committed a blunder in leaving Yedo and taking up their quarters at Yokuhama, they have the rare advantage to boast of that that blunder has apparently resulted in success. The man who makes a foolish venture and gains in spite of his folly is certain to proclaim to all the world how wise he has been, and Mr. ALCOCK'S official correspondence betrays a somewhat undignified exultation when he relates how, in spite of the American Minister's predictions, he has been able to return to Yedo with flying colours. We give our British Envoy credit for being a very clever man,—

> "He knows what's what, and that's as high
> As metaphysic wit can fly."

He has a considerable command of language, great facility in detecting any flaw in the arguments of an opponent, and a happy art of giving a plausible colouring to his own. In a long letter to Mr. HARRIS, he seizes with rare dexterity upon the weak points of that gentleman's arguments in favour of remaining at Yedo, and throws into the background the really strong reasons which induced him to stay at the capital: and this is done so ably that while under the fire of his adversary Mr. HARRIS is made to appear rather foolish. The small bickerings of small men, the jealousies and contentions which so often disturb the equanimity of private life, seem strangely out of place in an official correspondence. Yet it is absurd enough to be amusing, to see how the Ministers of the two greatest countries in the world can engage in the same kind of foolish sparring in which Smith and Jones, and their respective wives, are apt to indulge across the street. Do not let us be misunderstood. We are perfectly aware that the expression is altogether different in the one case to what it is in the other, but the spirit is the same, and there is more than one touch of personal feeling in Mr. ALCOCK'S correspondence with our Foreign Secretary which shows how nettled he is with Mr. HARRIS, and how pleased he is to disappoint his predictions by returning to Yedo in triumph. We do not see anything in Mr. HARRIS'S reply to make us doubt but that he would have acted in the same way if the tables had been turned. The impression left on our minds by the perusal of this correspondence is, therefore, not a pleasant one. From one of the despatches from Lord JOHN RUSSELL to Mr. ALCOCK, it would appear that there is some doubt as to the entry of British subjects into Yedo on the 1st of January next as stipulated by treaty. The following is the extract alluded to:—

"I should wish to have your opinion, whether it is desirable to insist upon the provision of the treaty which admits of the residence of British subjects generally in the capital of Yedo after the 1st of January, 1862. In forming an opinion upon this point, the somewhat analogous case of Canton will naturally occur to your mind; and, whatever course should be decided on, the expediency of guarding in Japan against similar irritating discussions on such a point as those which have prevailed in China must constantly be kept in view."

The details of trade at Yokohama are thus given:—

"The exports of 1860 were of the declared value of £824,000, more than half of which left in British vessels; the imports in British vessels were of the value of £133,000; and those in American, Dutch, and French vessels, £65,000; 103 merchant-vessels, of 40,905 tons, entered the port, 52 of them British vessels, of 21,724 tons. British vessels paid import and export duties and shipping dues to the amount of £30,000; American, Dutch, and French vessels, to the amount of £24,000. With the exception of spelter, dyewoods, and a few medicines, the Japanese have not been in the habit of buying our imports to any considerable extent, until, through the stoppage of business at Shanghai last year, cottons and woollens were forced into the market."

With the exception of these statements, there is nothing in the papers which requires any further remark, nothing which throws fresh light upon a subject with which all our readers are familiar. We believe that every important point referred to has been already fully considered in our Journal, and the main value of this correspondence is, that it comes to us with the authority of a Parliamentary document.

Digitized by Google

MR. MOSS'S CASE.

We are now in a position to state that Lord JOHN RUSSELL has instructed Mr. ALCOCK to invite Mr. Moss back to Japan, and also to remit the fine imposed upon him. We also believe that instructions will be sent to compromise the claims of Mr. Moss, which have been entered in the shape of an action in the Supreme Court of Hong Kong. Our readers will remember the earnest manner in which we condemned the proceedings of Mr. ALCOCK as illegal and arbitrary, and it is satisfactory to find we are now confirmed in our opinion by the law officers of the Crown.

THE NEW STEAMERS FOR CHINA.

The directors of the "China and Japan Steam Navigation Company," after the allotment of the shares on the 30th ult., invited tenders for building six steamers. The preliminary arrangements of the "China River Steam Navigation Company" are progressing. Two new vessels have been ordered here, and two in America by private firms in the China trade. The paddle steamer building by Messrs Mare and Co., of Blackwall, for Messrs. Dadaboy, Nourojée, and Co., will be ready for launching next month, as also the one building for Messrs. Jardine, Matheson, and Co., at Birkenhead. The tow boat for the Shanghai river, building under the superintendence of Captain Macfarlane, by Mr. Laird, will be shortly ready, and by the size of her paddle-wheel and suitable model, she bids fair to prove an efficient tug. The launch of the screw steamer building on the Clyde for Messrs. Apcar and Co., will take place about the 28th inst., and we understand that a paddle steamer has been ordered by the same firm to be built on the Thames, for the Coast of China. The screw boat for Messrs. Lapraik and others; building by Messrs. Wingate and Co., Clyde, is in a forward state, as also the one for Messrs. Lyall, Still, and Co., but the builders in this country try the patience of superintendents, who have been in China, by their slow progress.

CHINESE IMMIGRATION TO BRITISH GUIANA.

We refer our readers to a valuable letter in another portion of our columns on the subject of Chinese Immigration. It is written by an eye-witness on board the *Sebastopol*, who has carefully investigated the subject, and we are glad to find that his independent examination of the question leads him to adopt the same views which have been always maintained in this journal. It was well that the West India Committee in Demarara selected such a man as Mr. Austin for their agent in this important undertaking. His admirable arrangements have hitherto been attended with the most marked success; and nothing can be more striking than the difference between the forced and odious system of the "trade" from China to Cuba, and the free system which is now being carried out under the auspices of the Demerara Government. From the statements in the letter, we find that the immigration of Chinese to Guiana has been accomplished with a mortality of less than one per cent., a proof that with proper management the system may be adopted on a large scale without any evil consequences. Indeed, the constitution of JOHN CHINAMAN is far more adapted for such a change than that of the Indian coolies; and we observe that in the two last arrivals at Trinidad from Calcutta, the mortality on the voyage has been at the rate of 15 and 20 per cent. Part of this may, of course, be owing to the bad accomodation on board the vessels; but the greater part is, we believe, to be attributed to the Indian constitution.

THE CHINA MAILS.—In reference to the letter which appeared in *The Times* of the 12th, on the subject of the proposed stoppage of the bi-monthly mail to China, it is necessary to repeat what has been already noticed in this journal, viz., that measures are in progress for inducing Government to continue the mail, the result of which will in due time be announced.

PARLIAMENTARY PAPERS have been published containing the despatches of Mr. Parkes and Admiral Hope on the condition of the rebels up the Yang-tze-Keang, which fully confirm the opinions expressed in our leading article of this date as well well as in previous numbers of the journal.

Parliamentary Intelligence.

HOUSE OF COMMONS.

CHINA.

(31st.) Mr. DUNLOP moved that an address be presented to Her Majesty praying that she will be graciously pleased to instruct her representative in China, in the exercise of an impartial neutrality between the two contending parties in that empire, to afford to British subjects equal facilities for commercial intercourse with both, and to seek to maintain a friendly understanding, for the purposes of trade, not only with the Imperial Government, but also with the *de facto* rulers of provinces which Her Majesty's subjects have occasion to trade in, or to pass through, for commercial objects, so as to avoid all unnecessary risk of interruption of traffic or hostile collision. The hon. gentleman said that in two instances British ships had fired upon forts in the hands of the insurgents. One was in 1858, under the very eye of Lord Elgin, and the other was at the ports near Shanghai. That would not be considered as neutrality. We were now hiring our troops at Shanghai to the Imperial Government. This put it in the power of the Emperor of China to boast to the insurgents that the Queen of England was one of his sovereign vassals, giving him our troops and receiving pay for them. So much with regard to military neutrality. In reference to neutrality as to matters of ttrade, he might state that on the 8th August, 1860, a notice was issued by che British Consul at Shanghai, warning British subjects not to hold interciourse with the insurgents, as it would be a violation of international printhples to do so until they were recognised by Her Majesty. How could saat be considered neutrality? What would our merchants at Liverpool wy, if this principle of international law had been applied to the States hich had seceded from the Union in America? The insurgents had always been anxious to be on good terms with us, and to them no such atrocities as those committed by Commissioner Yeh could be charged. The hon. gentleman concluded by expressing a hope that the noble lord the Secretary of State for Foreign Affairs would give the House some satisfactory explanation on the subject.—Mr. BAXTER, who seconded the motion, said that on a careful consideration of the papers on this subject he was convinced we were not pursuing a system of perfect neutrality. He contended that the character of the Taepings had been misrepresented.—Lord JOHN RUSSELL said that what happened two years ago had nothing to do with the present state of affairs, which was quite different. The case at present was, that Lord Elgin, having given directions that that part of the treaty which said that the river Yang-tze-Kiang should be open for trade, made a provisional arrangement with Prince Kung for that purpose, and Sir James Hope went up the river, and at Nanking he made an agreement with the chief of the Taepings, and engaged to observe neutrality between them and the Imperialists. Our object was to promote our trade as much as possible, and to endeavour both to act a neutral part and as far as we could to preserve peace. The accounts which the Government received from China certainly betokened an improvement in our relations with both parties. He had that morning read a letter from Canton, which stated that the Customs duties were regularly paid, and that in every difficulty that arose the Chinese authorities showed a disposition to remove all obstructions to our intercourse with the natives. Mr. Bruce had arrived at Peking. He had desired that there should be no sort of ostentation in his reception; for he said that he was merely going back to a place where he had been before, and his entry had been quite private, but every civility had been shown him by the authorities. He (the noble lord) submitted that when neither the Tartar dynasty was strong enough to put down the rebels, nor the rebels to overcome the Tartar dynasty, it was no part of our duty to take the one side or the other.—Mr. BUCHANAN saw no reason to think that the indemnity would be withheld; but he would be a sanguine man that should venture to think the balance of payments would be in favour of this country. We must keep up a large force in China, and it was more probable that we should have to send out money than that we should have to receive it. The question was, therefore, a very serious one—how far our policy had tended to increase our difficulties? It appeared to him that we had entered into a Treaty with a Power which was utterly powerless. The Imperialists, with whom we had made a Treaty, were the weakest of the parties in China; and the Taepings were certainly not chargeable with that apathy and contempt of all foreigners which marked the adherents of the Tartar dynasty. One most obvious breach of neutrality was the undertaking into which we had entered to collect the dues for the Tartar dynasty; for what would the Imperialists have thought if we had made the same kind of treaty with the Tien-Wang at Nanking which we had made with Prince Kung, and had appointed Supervisors of Customs for him? The English merchants were chargeable with the opium traffic, but in other matters they were as fair and honourable a class of men as any in the world. There was one point in which the new Customs system would injuriously affect the British trader. The assessors were joint—namely, English, American and French—and the two latter would have ample means of obtaining an insight into all the secrets of our trades. He thought it was the height of simplicity in our Government to consent to such an arrangement. Another defect was that the British merchant was to be deprived at all the Chinese ports of his natural protector, the Consul. Mr. Bruce had declared that the Consul was not to interfere with trade questions, which were all to be referred to himself.—Mr. S. FITZGERALD found fault with the regulation that an English vessel proceeding to one of the open ports in the possession of the Rebels was bound to go into one of the ports in the possession of the Imperial Government, and pay dues to them. He also thought our position at Shanghai was a very peculiar and dangerous one. It appeared that British troops were kept at Shanghai for the protection of the place against any attack by the Rebels.—Lord PALMERSTON thought the objections against the collection of the Customs duties in China by British agents were not well founded. In the first place, those British subjects were not acting under the authority of the British Government, but were lent to the Chinese Government, and were responsible to the Chinese authorities for their conduct. It had been complained that they were not placed under the authority of our Consuls, but he did not see there was great fault to find in that respect. It was thought best to place them immediately under

Digitized by Google

the authority of Mr. Bruce. Generally speaking, no doubt it was an unusual course that British subjects should be chosen to collect the Customs of the Chinese Government, but the fact was that not only could no dependence be placed on native officials, but we had a direct interest in seeing these Customs duties properly levied, because out of them was to be paid the indemnity stipulated to be handed over to England by the Chinese Government. The circumstance mentioned by Mr. Fitzgerald was not known to the Government, but it was one worthy of consideration and inquiry.—Mr. WHITE thought that the regulation with regard to English vessels, if persisted in, must lead us into some contest with one of the contending parties. For his own part he believed the sympathy which had been called forth in this country for the Taepings would never have existed if people only knew, as he did, what a desperate set of low ruffians and scroundels the Taepings were.—Colonel SYKES said the speech of the noble lord the Secretary of State for Foreign Affairs had failed to satisfy him that the English Government had observed a policy of perfect neutrality. With regard to the Taepings, the hon. and gallant gentleman observed that under them trade and commerce had sprung up, while in several instances where Imperial rule prevailed the reverse had been the case. He wished to know how long Shanghai was to be occupied by British troops, because if they remained there for any length of time the cost to this country would be greater than the money it would receive in the shape of indemnity from China. Our object ought to be to conciliate the Taepings, who were a vast body of people, consisting of one hundred millions, with five millions of armed men.—Mr. DUNLOP then withdrew his motion.

OPENING OF THE YANG TZE-KIANG RIVER.

(June 10th.) Colonel SYKES asked the Secretary of State for Foreign Affairs whether the report from Mr. Parkes of his four interviews with the Taeping authorities at Nanking, to which reference is made in Commander Aplin's letter, dated the 2nd of April, 1861, in the China correspondence, respecting the opening of the Yang-tze-Kiang River, would be laid upon the table of the House.—Lord J. RUSSELL was understood to say that the report had been received, and the substance of it given in the papers already produced.

THE CASE OF MR. MOSS.

(10th.) Mr. Ald. SALOMONS asked the Secretary of State for Foreign Affairs if any decision had been come to in the case of Mr. Moss, sentenced by Mr. Alcock to fine, deportation from Japan, and imprisonment at Hong Kong; and if he was prepared to lay any papers on that subject upon the table of the House. Lord John RUSSELL was again inaudible, but it might be gathered from two or three unconnected words that he did not deem it proper to lay the papers on the table, as the question had given rise to legal proceedings at Hong Kong.

THE ROYAL GEOGRAPHICAL SOCIETY.

At a recent meeting of the Royal Geographical Society at Burlington House, Lord ASHBURTON, the president, in the chair, a paper was read from Mr. ALCOCK, H.M.'s Minister in Japan, giving an account of a journey from Jedo to Fusi-yama, the sacred mountain of Japan Previous notice had been given, and from the interest which attaches at the present time to everything connected with Japan, a very large and distinguished company assembled to hear this paper read. The difficulties which Mr. Alcock had to overcome before he could remove the prejudices from the minds of the native authorities to foreigners making this journey, were first related. After these had been cleared away, everything connected with the expedition went on smoothly. The Japanese fears of unlucky days, and their other susperstitious notions vanished in a moment, and proper preparations were made for a suitable reception being given to the Consul-General and his company. Mr. Alcock goes on to describe the formalities which attended his career through the different principalities *en route*, and interesperses in his narrative many interesting details relating to the internal arrangements and economy of the natives. Then, again, he gives us the whole story of Japanese bathing over again; he describes how he saw the population, male and female, luxuriating in the public baths together, joking and gossipping, probably, over the scandal of the place.

After this paper was read the Earl of ELGIN, at the President's request, addressed the meeting. His lordship commenced by saying that although but just returned from those parts, he felt that he had not much to say in addition to that which had already been said in Mr. ALCOCK's paper; but after a compliment to Captain Sherard Osborn, who had safely conveyed him both to Jedo, in Japan, and to Han-kow, on the Yang-tsze, his lordship proceeded to give his opinion on the Japanese diplomats, which was very amusing. He found them not only very shrewd in argument, but also very ready to give up a point when they were overcome, and especially quick to appreciate a joke. His lordship said that when on his voyage to Jedo, the vessel was to anchor at Kanagawa; on finding plenty of water there, Captain Osborn and himself agreed to try the lead further, and steam up to Jedo itself. But the Japanese here encountered them with various pleas and excuses to get them to "go back"—that, said Lord Elgin, is not the way the English do. Then there was no anchorage—he pointed to their own vessels riding securely at anchor in the bay. But provisions could not be found—the answer was, we did not come here to eat and drink; so, after these frequent repulses, the Commissioners smiled and said no more of their returning.

THE PENINSULAR AND ORIENTAL STEAM NAVIGATION COMPANY.

The forty-first half-yearly meeting of the P. and O. Steam Navigation Company was held on the 4th inst., when a dividend of 3½ per cent. for the half-year, free of Income-tax was voted. The Directors' Report is as follows:—

No material change has taken place in the distribution of the fleet during the last six months; it will be observed, however, that the *Mooltan* has been placed on the active list, and that the *Ripon* is under repair.

The *Mooltan* has not yet made a sea voyage; the directors, consequently, abstain from expressing an opinion as to the amount of success that may ultimately attend their endeavour to effect, by new appliances, an important saving in the consumption of fuel in this ship, as compared with other vessels of her class. The trip from the Thames to Southampton was quite satisfactory; and as every arrangement tending to enhance the comfort of passengers has been introduced in this vessel, it may be confidently expected that she will acquire a high character in the Company's fleet.

The *Ripon*, it will be remembered, was the first of the large class of iron vessels built by the Company eighteen years ago, when the comparative merits of wood and iron as materials for ship-building was a question that had to be solved by experience. The directors, after much anxious consideration, decided in favour of iron, and the *Ripon* has proved so sound a ship that it has been decided to lengthen her by the bow, to fit her with new boilers, and to apply to her machinery the recent improvements to secure economy of fuel.

Since the date of the last report, the *Chusan*, *Azof*, and *Granada*, then under charter to the English Government in China, have been paid off; but the *Shanghai* remains in the service of the French Government, and the French Admiral has also chartered the *Formosa* and *Granada*.

It was stated in the last annual report that the directors had submitted to the Government a proposal for the consolidation into one contract of the postal services between this country and India and China, leaving it terminable, on twelve months' notice from either party. This proposal was objected to, but alternative plans were submitted, and an arrangement was concluded, still terminable on twelve months' notice, under which the Company are to receive a moderate rate of subsidy for certain branches of the service, which, at a period when the cost of fuel was comparatively low, they had performed without aid from the Government.

The most important of these branches was a line between Bombay and China, which being made to alternate with the monthly or contract line, furnished a complete fortnightly communication between England, the intermediate places on the trunk line, and Penang, Singapore, Hong Kong, Shanghai, &c.; and as the Government enjoyed all the privileges of the contract on this line, namely, the conveyance of the mails free, and of official passengers at reduced rates, the directors constantly kept a claim for some remuneration before the authorities.

This claim for past services has been adjusted by the payment of £12,000 in respect of the twelve round voyages performed in the year 1860.

Previous to the conclusion of the above arrangement, the directors had given notice to the Government that the Company would not have occasion to despatch the vessels on this branch regularly as theretofore, but only as their commercial traffic might require. It was eventually agreed, however, that the line should be carried on for six months certain, from the 1st January last, the Company receiving £2,000 for each round voyage, or at the rate of £24,000 per annum, subject to discontinuance on two months' notice.

That notice has been served on the Company, and the consequent reduction of the China Mail Service from a fortnightly to a monthly one has been officially announced by the Postmaster-General.

The directors had thought it unlikely that the Government would forego the advantage of a communication kept up at so small a cost, for it would appear, from the official reply to a question in the House of Commons, that the line has yielded £12,000 a-year in postages (or half the subsidy agreed upon); so that, without estimating collateral advantages or the probable increase of correspondence owing to the peace with China, its continuance would only cost the country £12,000 per annum, or £500 for each homeward and £500 for each outward mail.

The directors referred, in the last annual report, to the depressed condition of the trade with India and China; and it is unfortunate that at the very time they have succeeded in placing vessels of large carrying capacity on the China line the state of the market in Europe should have led to a very considerable diminution in the export of silk from that country, the steamers for the last three or four months having left Hong Kong with half cargoes only.

Spirit of the Press.

THE EFFECTS OF THE NEW TREATY.

We should be ungrateful if we did not call attention to the efforts which are now being made to obtain the full fruition of our Chinese treaties. We have been constantly urging the prompt opening of the new ports, and the exercise of our recently acquired right to go through the country upon commercial enterprise. We have been continually counselling expeditions up the Great River, in order to arrange for the safety of its transit, and to accustom the dwellers upon its banks to the sight of European ships of commerce and European traders. All this has now been done. Admiral Hope's expedition up to Hankow, 570 miles from the mouth of the river, has been as much, and perhaps rather more, a commercial than a naval enterprises. The object was not so much to force a passage through the heart of China as to conduct our traders up the country in a manner which should impress the Chinese with the belief that these merchants are the subjects of a great and powerful nation, under whose protection they trade, and whose good name they are bound to vindicate by fair dealing. With Admiral Hope went many companies of merchants from the commercial ports. Some are now working their way across the country, intending to pass through Thibet, and to organise as they go a complete chain of commercial communication between the interior of China and our possessions in India. Others confined their attention to the commercial capabilities of the provinces through which the Great River rolls. A deputation from the Chamber of Commerce at Shanghai viewed with the eyes of practical commercial men the whole system of "business" as it is transacted in the heart of the empire, and the result of the examination is now before us in a report, signed by Messrs. Hamilton, Mitch e, and Ballance, and addressed to the Chairman of the Shanghai Chamber of Commerce. In a commercial point of view this is the most interesting and the most important document that has appeared in our age. In plain and unattractive language, and in columns of dry figures, it reveals the whole mystery of the workings of industrial China. It is too technically commercial to yield its information to the general reader, and too long and statistical for the columns of a newspaper; but it is a document which our men of commerce and our men of statecraft ought to study. What we have hitherto seen only in its results we now see in its causes. We see now whence came and whither went those exports and imports which for so many years came out and went in at Canton. In the very centre of "the Flowery Land," high up in the great cities, these English merchants came upon the cotton goods which had been imported at the far-away southern port of Canton, and had been divided into smaller packages in order that they might be carried on men's shoulders over the mountains which divide Canton from the central waters. They are able to compare the prices which these goods commanded in the interior with their cost at the seaports, and they calculate upon these *data* the amount of burdens which they have undergone during their inland transit. This calculation is probably fallacious; in barter, we cannot tell whether in these transactions they have been fairly estimated. We know that Russian cloths are sold at a profit in China, though at a price lower than they are made for in Russia; but this is because they are bartered at a higher price against teas which are estimated at an unnaturally high price, so that the purchaser of the cloths can afford to sell them at a much lower real price than he nominally paid for them in tea. So it may have been with these cottons, and so we suspect it must have been. Again, these gentlemen found in this central part of China the emporium where the teas were collected for manipulating and packing for Canton. We have here come upon the hive itself whence we have for so long a time been through devious and dangerous paths getting our supplies of honey. All this tea is lying upon the tributary waters of a river which descends with a moderate current to our own ships lying at its mouth, which, as these gentlemen have shown, can be navigated without danger from flood or shoals for nine months of the year, and which during every month is ascended by the cumbrous native vessels. The valley of the Yang-tse is known to be one great coalfield. The Rebels were long ago found to be copiously supplied with this mineral at Nanking, and the members of the Shanghai Chamber of Commerce found the distillers of Woochow burning great quantities in the production of the raw spirit which the Chinese use. What may not this coal be worth to us, with such opportunities of access, and such facilities for covering the river with our vessels? In the cautious and temperate language of the counting-house we do not expect to find great promises of future results, nor would it have been wise in these gentlemen to encourage our commercial community to make hasty and indiscriminate adventures in these untried provinces. But they have stated enough to show that we must prepare for an entire revolution in all our trade with China. They found that at Hankow the dealers were unanimous in saying that if Hankow were opened the teas hitherto grown and prepared in the neighbourhood of the Tangting Lake would be sent there instead of to Canton. Kewkiang and the Poyang Lake, which it commands, the deputation hold in great commercial value. Into this lake, they say, fall numerous navigable streams running through the rich black tea districts, and it is connected with canals which traverse the whole of the green tea districts. "It is, in short, the centre of a most extensive and important network of river and canal communication, brought to a very high state of perfec ion by the Chinese in more prosperous times." It scarcely requires a mind educated to commercial operations to appreciate the importance of all this commerce being taken from its old course, released from the necessity of traversing mountains on the backs of men, and placed at once on a broad waterway, whence it must descend without hindrance or extortion to the ships which are to bear it to Europe. It places us in a position to buy tea as cheap as the Chinese can grow it, and to sell them cotton goods as cheap as we can make them.—*The Times.*

ENGLAND'S POLICY WITH REGARD TO CHINA.

Our House of Commons, which claims to unite all power with all dexterity, and which is always ready to rend the oak or to pick up the pin, undertook on Friday last to settle the internal affairs of the Chinese Empire. It is a task for which its members are not, perhaps, eminently qualified, either by education or by position; for, with the exception of our professional statesmen, those who know anything about the matter have for the most part strong private interests involved, and those who are likely to be impartial are in danger of being altogther uninformed. The House, however, applied itself with a serious alacrity to the solution of all the great social problems of government and commerce which remain yet unsolved in China. As might be expected from the unequal resources of the different minds brought to act, the views were very various, and the facts much controverted; but the conclusion arrived at was most wise and most sound. There was universal agreement that, however clearly we all see our way to the regeneration of China, it is in every respect desirable that we should in no way meddle in the matter. Even those who regard in the rebels of the South a sect of Christians struggling towards the truth, and fighting for liberty, do not propose that we should join forces with them and help them to extirpate the Tartar race. Even those who see in the Imperial system a venerable Government, strong in moral force and capable of being regenerated, do not urge us to play Hercules to this Royal taskmaster, and to clear China of all robbers and monsters. Differing upon every fact, and avowing the most discordant sympathies, the speakers in this debate were yet happily and wisely unanimous in their advice to do nothing. No one, however, took the trouble to remind the House of Commons that China, with all her short comings and all her many intestine commotions, is at this time very much what she has always been, and what in the nature of things we must always expect her to be. She is as large as Europe. There is no period of her history when she has been at peace in all her provinces. Sometimes she has been divided into many kingdoms, sometimes split only into two, sometimes united by conquest into one; but there never was a time, if we look back even into the doubtful records of early Chinese history, when there was peace throughout this enormous district, when no rebel army was in the field, and no strong pirate afloat. We may say as much for Europe. Let the historical members of the House of Commons put their hands upon the year when there was no war raging, no insurrection smouldering throughout Europe. In this favoured quarter of the world, where Christianity and civilisation prevail, let us turn to that white page on which no drop of blood has left a stain. When we can do this we shall have more right to prescribe for the social disorders of the Chinese, and to speak dogmatically about the atrocities they commit. If we should hold ourselves responsible for all the doings of the great European family, the Chinese might find topics for retort which might temper the conceit of even such critics as Mr. Buchanan, hostile to the Imperial rule, or Mr. Baxter, credulous of Taiping Christianity. The fact is that no aggregate of 300,000,000 of human beings was ever yet without disease in some of its members. The form in which this inevitable evil now appears in China is that of a sanguinary and a predatory sect. It is our own fault if we cannot by this time appreciate this movement. The Taipings have been for ten years seated in the heart of the country. If they had been Christians they would long since have sought some fellowship with the Christian missionaries, from whom, in the first instance, their leader derived vague notions of the Christian system. If they had been politicians, they would have attempted to build up some political system within the large area they have for such a long time occupied. If they had been social reformers, they have had full opportunities of time and power to put their theories into practice. Nothing of all this, however, have they done. They have constructed nothing, and they have attempted to construct nothing. They have overspread the country like locusts, and when they have eaten the fields bare they have left them so. Their religion is a horrible parody, their patriotism consists only of giving no quarter even to children at the breast—such was their boast at Chekiang—and their early moral denunciations against opium-smoking and incontinence have given way to the practice of universal licentiousness. This Taiping rebellion is now nothing more than the natural outbreak of the humours of a vast political body. It is useless, therefore, to discuss its merits or demerits. In some form or other we must have it. Drive it in to-morrow, and it will re-appear in some other form. It is the same question which embarrasses us at home—it is crime. It has, indeed, manifested itself in the most inconvenient shape which, as regards our present interests, it could possibly have assumed. As birds and insects select the ripest and the richest fruit, so this predatory force has selected the richest portion of the Chinese Empire. Where the great cities are—where commerce has gathered together her hoards, and where the old traditional system of trade was in operation, there the robber naturally fixed himself. If this had happened in Szechuen, or Yunan, or in Shantung, it would have been nothing to us; but it affects us materially when these people fix themselves upon the great river up which we desire to pass to trade, and it embarrasses us greatly when they insist upon periodically plundering the large cities with which we are entering into commercial relations If they would conquer them, occupy them, and govern them, it would be no concern of ours to whom we pay the dues. But this is not their habit. Unless bought off by sufficient ransom, they plunder and destroy, and they produce the further inconvenience of calling forth Imperialist armies, who, being ill-paid and ill disciplined, only double the evils produced by the rebels. There is a point at which even a plunderer upon land may come to be reasonably considered as *hostis humani generis;* and many have thought that this point has been already reached by the Taipings. We, however, have always treated them with an unswerving neutrality. When we first met with them at Shanghai city our relations with them were almost cordial. At any rate, our intercourse with them was sufficiently close to enable our merchants to recognise in their leaders all the refuse of the Chinese population of the European settlements. Our sailors when off duty sometimes worked their guns for them; and, as the mandarins were then uncivil, we generally sympathised with the Rebels. Our policy, however, was what it now is—to keep both parties away from our settlements. The European settlement of Shanghai is a mile distant from the Chinese walled city. When the Imperialists directed their cannon so ill that their 32lb. shot knocked away the bales of silk from under the noses of the silk inspectors, the settlement turned out, attacked the Imperialist camp, and drove the besieging army in a horrible fright as far as Soochow. When the Rebels the other day desired to take the Chinese city, the English and French drove them in their turn back from the city. The French have an especial reason for objecting to the inroads of the

Digitized by Google

Taipings in cities where they locate themselves, inasmuch as the Taipings are accustomed to kill Roman Catholic priests, affecting to take them for Buddhist Bonzes; and we fear that the Protestant missionaries have sometimes felt a grim satisfaction in testimony thus borne by an impartial pagan against a rival ritual. These religious matters have a little complicated the business, but, upon the whole, there has been a more complete neutrality observed than the conduct of the Taipings would seem to deserve. The only specific complaint which their admirers have been able to adduce is that goods going to the places held by them are made to pay duties to the Imperialist Government—a complaint which will deserve consideration when the Rebels are in possession of some town which can be reached without passing through an Imperialist port. It seems to us that the policy of this country with respect to these warring factions is quite plain. We cannot deny to the King of Nanking his belligerent rights so long as he respects our treaty rights. If we find him in possession of a port at which duties are due, we must pay the duties to the officer commissioned to receive them. But we have full right to demand that he shall not interfere with our commerce, and to compel him, if necessary, to respect it. Moreover, we have also full right to draw closer our friendship with the Imperial Government, who are now our friends. We have full right to strengthen their hands by giving our moral support to that system of European Customs collectors, which has been so misrepresented in the House of Commons. It is clearly to our interest as a nation that the foreign Customs of China should be fully and honestly collected, should pass direct into the Imperial Treasury, and should be used to pay and equip a force capable of keeping peace in China, and securing the great cities from plunder. Any individual interest which militates against this national interest must be evidently anti-English, and also dishonest. We may make what terms we can with the Taipings, and we ought to make terms with them, but our permanent interest lies in making our commercial intercourse a necessity to the Imperial Government. All depends upon these Customs dues, which are now collected, not by European officials lent to China, but by independent Europeans in the service of China. These Customs duties honestly paid, and not roguishly evaded, will soon be found available to eradicate his rebellion, and to give force to a Tartar Government which has already begun to recognise the impossibility of governing by the old traditions of China.—*The Times.*

OUR MINISTER IN JAPAN.

The correspondence just presented to Parliament respecting the recent diplomatic and political differences in Japan, is, in the present early stage of our intercourse with that empire, of peculiar interest and value. The recently acquired right of trading with the Japanese being formally guaranteed by a treaty, the development of our trade must depend to a great extent on the manner in which the provisions of the treaty are carried out. To secure from a jealous, exclusive, and semi-civilised Government like that of Japan the observance of treaty obligations, is, in effect, one of the most delicate and difficult tasks that could well be entrusted to a diplomatist. He must have a considerable amount of temper and forbearance, and be able to understand and make full allowance for the different characters and habits, the maxims and traditions, in a word the whole civilisation of Eastern nations as compared with those of the West. His skill and prudence, his temper and intelligence, will very much determine the serious question of success or failure, peace or war. Above all, he must distinguish between form and substance, and, while carefully maintaining the rights of the Government he represents, not be too exacting and punctilious on minor points of official observance and etiquette. Should he be a man of proud, overbearing temper, when a difficulty arises he will too probably resort to threats instead of conciliation, and thus involve the country in a needless, unjust, and inconclusive war, such as we have too frequently waged in China. On the other hand, if he lacks firmness and decision, he will almost inevitably be defeated by the craft or treachery of the Government officials with whom he has to deal. The British Minister at Yedo has avoided these opposite errors, and under circumstances of exceptional difficulty has acted with equal firmness and prudence. It is impossible to read this correspondence between Mr. Alcock and Lord John Russell without being struck with the just and sensible view that Mr. Alcock takes of his position and duties, as well as with the wisdom of the policy of conciliation he has so steadfastly and successfully pursued.—*Daily News.*

Literature.

Lectures on Colonization and Colonies, delivered before the University of Oxford in 1839, 1840, and 1841. By Herman Merivale. New Edition. Longmans.

There is scarcely any subject more interesting to an Englishman than that of which Mr. Merivale treats in the volume now before us. Never in ancient or in modern times did any nation send out its people to found new empires to the extent which Great Britain has done. This little island, "this gem set in the silver sea," is the parent of vast regions in every quarter of the globe which it has peopled and cultivated. Small colonies, founded for purposes of commerce, have gradually swollen into empires. Our object has seldom, if ever, at the first been conquest; but we have had our trade to protect, and then we have had insults to avenge, and thus we have been led to fight until our territory has widened, and we have come at length to rule over mighty continents and to possess the entire sea-board of magnificent islands.

How far the prosperity of England has been affected by her colonies, how far those colonies have been benefited by acknowledging her authority, the results of the policy which has been adopted in reference to them, the effects of the exportation of capital on the wealth of the mother country, the course we have pursued towards native tribes, the political relation of colonies to the parent land, and the moral and religious aspects of the question—are the main, but not the only, topics grasped by Mr. Merivale. The work, which has always been regarded as an authority, was published twenty years ago. At that time some of the principles of political economy which are now almost universally received were scarcely understood, and Mr. Merivale did battle for them gallantly. Some portion of his work may therefore be regarded as an historical record of opinions which are nearly obsolete, and when he denounces the prohibitive system and the series of restrictions which England endeavoured to establish by her navigation acts, and to some of which foreign countries are even now pledged, we are at once carried back into a region of opinion which is alike curious and perplexing. Mr. Merivale reminds us that Lord Chatham said once in Parliament that "the British colonists of North America had no right to manufacture even a nail or a horse-shoe," and this remark of the great earl is merely a simple illustration of the policy adopted under the so-called "colonial system." This system not only crippled our trade, but its maintenance involved us in serious wars in which, according to Lord Sheffield, we have spent a far larger sum in retaining our colonies than the value of all the merchandise we have ever sent them.

Although the body of this work is already familiar to all readers who are interested in the subject of which it treats, the additions which have been made to it in this edition, in the shape of notes and appendices, considerably enhance its value. The experience of twenty years has compelled Mr. Merivale to modify some of his opinions, and to renounce others; but he informs us at the same time that he sees no reason to dissent from the leading principles of administrative and commercial policy on which his lectures were based. Mr. Merivale shows that he has not much faith in schemes of wholesale emigration; he regards it as a temporary expedient which can only produce a very temporary advantage, and he illustrates his remarks by the statement that from the Isle of Skye, out of 11,000 inhabitants 8,000 were carried away by emigration in 1755 and a few following years; and yet before the end of the next generation the number had reached more than its first amount, and then he adds, "Ireland, on the supposition which I have just made, would only exhibit the phenomenon of Skye on a larger scale." And again he says, in reference to the belief entertained, that emigration may be carried to such an amount as to alter the existing proportions between capital and labour;—"It seems pretty well admitted by all who have reflected on the subject that to effect any such change by indiscriminate emigration in a kingdom of which the population increases nearly at the rate of 300,000 per annum is altogether out of the question." That a select emigration, that is to say an annual emigration of a number of young persons of both sexes just arriving at the marriageable age, would be of more permanent service, Mr. Merivale then endeavours to disprove. He now confesses, however, that some of his opinions on the emigration question have been to a certain extent changed by the emigration of 1847 and the following years in Ireland.

It would have been impossible for Mr. Merivale fully to discuss such a broad topic as that of colonisation without alluding at least, to the Chinese empire. Thus he writes:—

"China is one of the great colonising countries of the globe; for although colonisation with a view to dominion is not a part of its policy, yet its industrious people swarm into every part of the Eastern Ocean, where there appears to be an opening for their exertions, and settle there under foreign governments. It is a country in a great part of which the increase of capital appears to have reached almost its last point of retardation. The soil in some provinces is nearly all occupied, while the stationary condition of the people, in regard to the arts of life, presents no prospect of improvement in their condition by increased productiveness of labour. Population is, therefore, continually pressing on the means of subsistence; but such an amount of emigration as actually takes place, consisting also entirely of persons who are able to emigrate at their own expense, can have no more effect in regulating the increase of that vast multitude, whether of one hundred and fifty or three hundred millions of human beings, than the water which is let into or out of the London Docks on the tide of the ocean. Infanticide, famine, and early mortality, are, it is to be feared, the real checks which keep it down to the present level."

In parting with Mr. Merivale's volume we give it the highest praise when we say that it abounds in practical suggestions, in carefully collated statistics, as well as in broad principles of political economy, and in those precious seeds of thought which only a great writer can throw out, and which may spring up in other minds and produce abundant fruit.

In the current number of *Blackwood's Magazine*, there is a lively article entitled "A Cruise up the Yang-tsze in 1858-9." At the present time it will doubtless be read with interest, although the freshness of the narrative is somewhat lost by the lapse of two years. The cruise will be continued in the next number of the journal.

From Mr. Bohn we have received the first volume of "Milton's Poetical Works," being the last volume issued in his Illustrated Library. It contains all the matter which gave value to James Montgomery's edition of the poet, together with a various selection of explanatory notes, by Mr. Bohn himself. The work will contain one hundred and twenty engravings, and, altogether, there can be no question that it will form the best popular edition of the poet which has yet appeared. In Mr. Bohn's Scientific Library we have "Ure's Philosophy of Manufactures," being the third edition of that standard work, continued in its details to the present time, by Mr. L. Simmonds—than whom no one could be found more qualified for the task. The volume bristles with statistics, and will prove invaluable to the statistician as well as to the manufacturer.

We have received Cassell's "Popular Natural History," Part 27, "The Illustrated History of England," Part 17, and the "Ladies Treasury" for June. We have also to acknowledge the receipt of Mr. Beeton's monthly publications, namely—*The Boys' Own Magazine, The Englishwoman's Domestic Magazine*, and *The Boys' Own Library*, Nos. 1 and 2. This last-mentioned periodical commences with the "Wild Sports of the World," and bids fair to prove exceedingly attractive. The illustrations are admirable.

Naval and Military.

Notice is given that the distribution of prize money for the capture of Canton on the 28th and 29th of December, 1857, to the land forces present at the said capture, will commence at the office of A. J. Moorhead, Royal Hospital, Chelsea, on Wednesday, the 22nd inst., and will be continued daily (except on Mondays and Thursdays) between the hours of 11 and 2 o'clock.

The screw steam-vessels *Powerful, Adelaide*, and *Khersonese*, chartered by the War Department for service during the period of the Chinese war, have discharged at the Woolich Royal Arsenal pier a large amount of captured weapons and other stores, many of which will be preserved for exhibition. They consist of rough, coarsely-made gun-carriages, platforms, wheels, stink pots, bows and arrows, and a very large number of brass and copper guns and gingalls, of peculiar construction. The battered condition of some of these guns, and the stains of blood with which they are now marked, prove the accuracy and unerring aim of the two batteries of Armstrong guns which were brought into exercise, the elongated shot from which, in more than one case completely destroyed the brass field pieces of the Chinese. One of the captured guns bears proof of having been damaged in seven places, and rendered useless; another has the trunnion completely carried away; whilst a third has the muzzle destroyed, and the barrel of the gun severely indented. The two batteries of Armstrong guns used during the war have been returned into store, and, notwithstanding their arduous service, are in perfect condition, the light gun carriages being also entirely uninjured.

The *Punjab* paddle steam frigate, Captain Alexander Foulerton, has arrived at Spithead from Bombay, with military invalids on board from troops stationed in the Presidency.

Colonel C. P. B. Walker, of the 2nd Dragoon Guards, lately on the China Staff, is very likely to succeed to the office of Assistant-Adjutant-General at Shorncliff. Colonel Walker being Second Lieutenant-Colonel of the Bays, becomes liable to reduction on the new Indian establishment, and he will, of course, be placed on half-pay on being appointed to the Staff.

Orders have been received at Chatham Garrison, directing the following reinforcements to be despatched to the Cape of Good Hope to augment the British forces now serving at that station, viz.:—860 men of all ranks of the 2nd battalion 11th Regiment; 91 men of the 85th, King's Light Infantry; 78 men of the 2nd battalion of the 10th Regiment; 57 men of the 2nd battalion of the 13th, Prince Albert's Light Infantry, and 20 men of the Royal Artillery. The whole of the above troops, together with a proportionate number of officers from each of the regiments named, will embark at Portsmouth, the necessary amount of tonnage having been taken up on the 29th May by the War-office. The *Ghenghis Khan, Conflict*, and *Boanerges* are to convey the 2nd battalion of the 11th Regiment.

The Duke of Cambridge, having been appointed to the colonelcy of the Royal Artillery and the Royal Engineers, will dine with General Sir Richard Dacres and the officers of the Royal Artillery at their mess, at Woolwich, this day. The Duke will be attended on the occasion by Lord Herbert and the Staff of the War Department, Generals Sir Hew Dalrymple Ross, Sir Robert Gardiner, and Sir John Burgoyne, and other distinguished officers, and the heads of Departments at Woolwich have received invitations to meet his Royal Highness at dinner.

The annual dinner of the 79th Cameron Highlanders took place at the London Tavern on the evening of the 30th ult., Lord Dalhousie in the chair. The annual dinners of the 71st Highlanders, the "Celer et audax" (60th Rifles), and the 1st Life Guards have also been held during the last few days. These dinners are getting more popular than ever, and serve to keep up the good feeling among those who are still serving in the army and their old comrades who have retired from the service.

The amalgamation of the Indian army is proceeding, but the details to be worked out are so voluminous that it will be some time before things are at all settled.

The junior lieut.-colonels of regiments whose names will be found in this month's "Army List," in italics, are intended to be absorbed as opportunity offers, so that in future there will be no extra lieut.-colonels.

The next examination of candidates for admission to the Royal Military College, Sandhurst, is to commence on the 17th inst., before General Knollys, the vice-president, and members of the Council of Military Education, at the Royal Hospital, Chelsea. The examination will extend to the 22nd inst.

The candidates for appointment to the Commissariat come up for examination before the Council of Military Education, at the Royal Hospital, Chelsea, on the 17th inst., and the two following days.

The examination of candidates to the Royal Military Academy, Woolwich, to be held before the Council of Military Education is to commence on the 1st proximo, and will continue daily (Sundays excepted) up to Thursday, the 18th.

Brevet-Major R. Biddulph has been appointed military secretary to General Sir Hope Grant, who proceeds to the Madras command.

Lieut. Perceval, R.A., has been transferred to No. 6 battery 12th Brigade, and is appointed fire-master and inspector of warlike stores at Hong Kong, to which place he proceeds shortly.

The *Bosphorus*, hired transport, arrived at Spithead on the 18th inst., from China, with the head-quarters of the 87th (Royal Irish) Fusiliers on board, numbering 14 officers and 529 non commissioned officers and men. The ship sailed from Hong-Kong on Jan. 3; Singapore, Jan. 17; Cape of Good Hope, April 14; and St. Helena, April 27. Fine weather was experienced throughout the passage, and the health of the troops has been exceedingly good. Two deaths took place from causes contracted prior to embarkation. The *Bosphorus* has proceeded with the troops from Spithead to Kingstown, the regiment being ordered into quarters at Dublin.

The *Fury*, 6, paddle, Commander Bedford Pim, arrived at Spithead on the 11th inst. from China and the Cape, with the following passengers, marines, and seamen, on board:—Sixty of the Royal Marine Battalion, under Lieutenant Godfrey: the crew of Her Majesty's gunboat *Starling*, lately paid off at Hong Kong; part of the crew of Her Majesty's troopship *Assistance*, lately lost in the China seas; Lieutenant Gordon Stuart, from St. Helena; Captain Phillips, R.N., and Mr. J. E. Boileau, from the Cape of Good Hope. The *Fury* sailed from Hong Kong on the 15th of January; Cape, April 8; St. Helena, April 20; and Ascension, April 28; Cape de Verdes, May 15, and Teneriffe, May 26. Fine weather has been experienced the whole passage home, but has been generally attended with head winds. The *Fury* was commissioned on the 28th of July, 1856, and has been constantly engaged in the China Seas since that time. She has taken part in all naval operations during the war, and was the only vessel that shared in all three of the attacks on the Peiho forts. The *Fury* during her commission has steamed and sailed 59,180 miles, while her towing services in the China Seas represent an expense of fuel to the amount of £35,624. The ship's company are a fine, seaman-like body of men. They show signs, however, of the effects of the climate in their spare frames and countenances.

THE ADDISCOMBE COLLEGE.—This college was closed at the last distribution of prizes on the 7th inst., by Sir Charles Wood, who said:—"Gentlemen, this is the third, and, I am afraid, the last time I shall have the honour to address the cadets assembled in this room. Various changes have occurred under which it has been thought desirable that this Indian College of Addiscombe shall cease to exist; not that it has failed, as I believe that it has well fulfilled all the purposes for which it was established, having existed for more than half a century. In the address of the Council of Military Education, it has been stated that it will be for the benefit of the service that the various arms of the Indian army should be consolidated into one army; but, nevertheless, it is not without feelings of great pain that I address for the last time the cadets of Addiscombe."

Monetary and Commercial.

The half-yearly meeting of the P. and O. Company has been held, and a dividend of 3½ per cent. declared. The report will be found in another column.

A company has been formed for lighting Malta with gas, and another is in course of formation for erecting gas works at Hong Kong.

The stoppage of orders for India and China produce will place at the disposal of the merchants of New York and Boston considerable sums, as the cost of such shipments are invariably paid by London credits, which have, of course, to be provided for.

The first annual meeting of the Labuan Coal Company was held on the 12th inst. The report states that the mines will be ready to supply in about two or three months, all the arrangements for raising the coal having been carried out successfully. Sir James Elphinstone, the chairman of the Company, presided at the meeting, and Mr. Edward Pereira, late of the firm of Dent and Co., China, has been elected to a seat at the Board.

The suspension has been announced of Messrs. Mackay and Read in the East India and China trade, with liabilities estimated at about £30,000. The following letter has been addressed to the creditors by the solicitor to the firm:—

"Messrs. Mackay and Read have consulted me as to the position of their affairs, and I regret to have to inform you that I am compelled to advise them at once to suspend payments. I consider that this step will best promote the interests of the creditors. The books are placed in the hands of Messrs. Coleman, Turquand, Youngs, and Co., who will forthwith prepare a statement, and as early as possible convene a meeting, of which you shall have due notice."

The bar silver brought by the Mexican packet has been disposed of at 60⅝d. per ounce, and the dollars at 59d. per ounce, showing in both instances a decline of ¼d. from the prices realised for the quantities by the preceding arrival.

Digitized by Google

In reference to the prohibition placed on the export of gold and silver from Mexico, *The Times* says :—

"Some uneasiness appears to have been created in the Stock Exchange at the Mexican prohibition against the exportation of 'gold and silver.' The prohibition, however, is not against the exportation of gold and silver generally, but against that of gold and silver bullion. During the civil war this old prohibition, which from time immemorial has been the rule in all Spanish American States producing the precious metals, was relaxed, because the Liberals had the ports, and the Church party many of the Mints, and it has now been reimposed simply in order not to lose the seignorage on converting the bullion into coin before exportation."

The first section of the Malta and Alexandria submarine cable, between Malta, Tripoli, and Benghazi, has been successfully laid by the steamer *Malacca*. The steamer *Rangoon* left the Thames yesterday with the second instalment of cable for this line, and the *Malacca* is shortly expected back to convey the remaining portion.

BOARD OF TRADE RETURNS.

Our exports for the four months ended 30th April last, show a falling off to the extent of £3,259,885, as compared with same period last year, when the total value of British manufactures and produce exported was £41,834,347, whilst this year they amounted to only £38,574,462. The principal articles of manufactures are cottons, cotton yarn, woollens, and worsted stuffs, of which we exported in the first four months in 1859, to the extent of £17,631,269; in 1860, to the extent of £18,279,729; in 1861, to the extent of £16,822,213, showing a decrease in 1861 of £1,457,516, which is proportioned in most of the articles, but only to the extent of £5,000 on woollens. To China, however, the exports have been on a larger scale than hitherto, having been: cottons, yards 125,039,686, valued at £1,622,713; cotton yarn, lbs., 3,762,610, valued at £171,889; woollens, pieces, 42,459, valued at £187,361; worsted stuffs, do., 68,254, valued at £146,236; total in value, £2,128,199; while in 1859, they amounted to only £1,000,225, and in 1860 to £1,741,854. The value of the four items approaches the total annual value of all our exports to China up to 1857, when it was exceeded by only £300,000, but from that time they have rapidly increased, having been, notwithstanding war and rebellion—in 1858, £2,960,412; 1859, £4,457,573; 1860, £5,318,428.

To the Philippine Islands the export of cottons during the first four months of this year, has been more than double what it was in same period of 1860; in 1859 the value was £96,562; in 1860, £120,528, and in 1861, £248,455.

To Java there is a decrease as compared with 1860, but an increase as compared with 1859, when the value was £217,873, which rose in 1860 to £397,100, and fell in 1861 to £251,268. Singapore took in 1861, £181,651 worth of cotton goods, and Ceylon £153,145 worth. If we include the cotton goods exported to Bombay, Madras, and Bengal, £2,222,393, it gives a total of £4,679,624, as the value exported from 1st January to 30th April, 1861, to the East, being 39½ per cent. of the total value of these goods exported to all parts of the world, which was £11,824,363.

The Indus took out on the 4th of June from Southampton specie to the amount of £17,686 in gold, and £190,041 in silver, namely—To Alexandria, in gold, £11,550; Ceylon, £3,200; Madras, £2,336; Calcutta, £600, and £130,896 in silver. Singapore: In silver, £3,000; Hong Kong, £25,350; and Shanghai, £30,795.

ARTICLES OF IMPORT.

TEA.—The low and common broken-leaf kinds of Congou were sold, at public sale, as low as 7d. to 8d. per lb. but have since been inquired for at the reduction; good common may now be quoted 11d. to 1s. per lb., but with a very limited demand; the flavoury kinds, from 1s. to 1s. 3d. per lb., are saleable in small parcels. Common to fair Ho-Hows and Ning Chows, under 1s. 5d. per lb., have sold rather easier. Good Ning Chows, second-class Monings, and Wopaks, have met with a steady demand at former prices. Fine Monings and Wopaks have also been wanted, and full prices have been paid. Fair to good Kaisows show a continued improvement in prices, as also fine to finest, which are now realising 2s. to 2s. 3d. per lb. Tayshans have been saleable to a moderate extent at previous rates. Common to fair Oolongs remain difficult of sale; fine remain very firm. Souchongs show no material alteration. Some further parcels of Flowery Pekoe have been sold at very low rates, the demand being chiefly for kinds under 1s. 6d per lb. Common Scented Capers have been in improved demand, owing to speculative purchases, and may be quoted ½d. to 1d. per lb. higher; the fair to good and fine kinds remain much as before. In Scented Orange Pekoes the only feature has been rather more inquiry for the better kinds at full prices for Canton-make. Green Teas continue in active demand, but, the supply being now very small, transactions are limited. All the Twankays and Young Hysons up to 1s. 9d. per lb. continue in demand, for export, at the advanced prices quoted last month; the grades above 2s. per lb. are at present less influenced, but sales made show an upward tendency in prices. Canton Greens barely maintain former rates, especially for Gunpowders; some at public sale sold rather lower. The stock on the 1st of June of all descriptions of Black was in London, 60,074,459 lbs., and of Green, 4,814,057 lbs. The total delivery was, of Black, 30,390,113 lbs., and 4,547,019 lbs. of Green. The stock at Liverpool was of Black, 3,657,626 lbs., and of Green, 162,480 lbs. The total delivery of Black was, 3,154,088 lbs., and of Green, 235,694 lbs. The imports in London to the 1st June have been, of Black, 43,802,075 lbs., and of Green, 3,220,021 lbs; and at Liverpool, of Black, 4,700,666 lbs., and of Green, 367,221 lbs. According to the circular of Messrs. Mitchell, Aspinall, and Skipper, the amount of Tea afloat at the present time is 13,333,818 lbs., against 14,374,315 lbs. at the same period in 1860.

SILK. The business done in Silk during the past month has been very limited, but prices have been well maintained. The accounts of the European crop are as usual somewhat conflicting, but in general they lead to the conclusion that the result will not be better, if so good as that of last year. The deliveries for the month are 5,550 bales of China and 898 bales of Japan. Manufacturers, unfortunately, have no such ground for even imaginary comfort—their trade is beyond question bad, and their prospects, both as to demand for goods and improved assortment in the supply of the raw material, scarcely other than bad.

SUGAR.—Holders are now showing a little more firmness. Of Eastern descriptions a small lot of 390 bags of Singapore sold at 38s. to 40s. for mid. to fine yellow, and 33s. 6d. for fine brown.

COFFEE.—A dull market has prevailed. Sales of 900 casks and 500 barrels of Plantation Ceylon went off at 67s. to 71s. for fine ordinary to low middling. Of 770 bags inferior Singapore the whole were withdrawn.

RICE.—We have again to report a quiet market for this article, sales having been confined to small parcels at about previous rates, comprising only about 15,000 bags, chiefly white Bengal, at 10s. 6d. to 11s. 6d., good up to 13s. 9d., Ballam at 9s. 7½d., some fair Rangoon at 10s. 3d. to 10s. 6d., and Nakrenzie at the latter price. 1,452 bags Bengal, in auction, were sold at, and afterwards, Moonghy at 9s. 7½d., low Dacca grain, 10s. to 10s. 6d. 8,298 bags Rangoon were partly realised; middling, of old import, 9s. 6d., first-class sea-damaged of fair quality at 9s. 9d.

PEPPER.—1,724 bags black Singapore were offered by auction, the sound part of which was withdrawn, but has since mostly been placed, fair quality 3¾d. to 4d. The damaged (a large proportion) sold at 3⅝d. to 3¾d.; 629 bags heavy Malabar, of old import, were disposed of at 5d. Privately, 1,000 bags Penang have been sold—ordinary dusty at 3⅝d., good, 3⅞d. to 3¾d. 70 bags Penang White met low bids, and were bought in.

SAGO.—No transactions reported. Flour: 200 bags of fair quality were withdrawn at 16s., but subsequently sold at that figure.

SPICES.—Cinnamon: No sales reported. Quotations as before. Cassia Lignea: Prices lower. Of 280 bags at auction, half sold at 85s. to 88s. Cassia Buds: Rather scarce, 15 cases at auction retired at £10. 10s. Cloves: Sales of 3 cases Penang at 9d. for ordinary quality. Mace: 45 cases Penang and two Singapore, mostly sold for 9d. to 1s. 2d. for low to good reddish. Nutmegs: have brought former terms on the average; and of 150 cases Pennag, 85 cases Batavia, and 7 cases Singapore at auction, all the Penang and Singapore, with a few of the Batavia, sold at 3s. 3d. to 3s. 6d. per lb. for good to fine bold, and 1s. to 1s. 10d. ordinary small to fine medium.

HEMP.—Of 1,400 bales at auction a portion only sold at £20 15s. to £22.

COTTON.—The market has become less buoyant, and prices have ruled more in favour of the buyer; moderate business in very fair to good Tinnevelli at 6d. to 6¼d. per lb., and in fair to good Western 5-3 16d. to 5⅞d. Sales of Tinnevelli effected for arrival up to 6¼d.

Digitized by Google

JAPAN WAX.—Sales of 1,000 boxes at 52s. for ordinary, and 500 boxes were bought in at 54s.

TOBACCO.—Java and other Eastern sorts are much wanted.

TIN.—Market very dull. Small sales of Straits at 121s., and buyers now offer only 120. Antimony ore, £16. 2s. 6d.

GAMBIER.—Of 1,400 bales at auction, a few only sold at 16s. 6d. Cutch. Of 2,000 bags at auction, half sold at 22s. to 22s. 6d. for good Pegu.

MISCELLANEOUS.—India rubber: Market dull, and small sales only at 1s. 2d to 1s. 3½d. Camphor: Market firm, sales of Japan are announced for this week. Sapanwood: 24 tons Siam sold at £8 7s. 6d. to £8 15s., and thirteen tons Manila, at £6 to £6 10s. Soy: No sales. 22 hogsheads retired at 2s. 6d. per gallon. Mother-o'-Pearl Shells: Small sales of Manila, at 100s. to 105s.; Singapore scarce and wanted. Star Anniseed: Sales at 70s.; Sticklac: 29 bags offered at auction, were all retired, quotation, 75s. to 90s. Gum Benjamin: Of 1 0 cases Sumatra, a portion only sold, at £12 10s. to £13 5s. Damar: Very quiet. Gamboge: Small sales at previous quotations. Rattans: 16,000 bundles Singapore sold at 2s. 3d. to 5s. 3d. Elephants' teeth: No sales reported. Vermillion: No demand; 140 boxes at auction all retired. Galangal root: Small sales, at 15s. to 20s. Cubebs: Of 34 bags offered at auction all were retired at £8. Dragons' Blood: No demand. Galls: Japan maintain the recent advance, and are quoted at 45s. to 60s. Rum: More inquiry, and 1,000 casks of Mauritius have been placed at 1s. 8d.

UNITED STATES.

NEW YORK, May 25.

TEA.—The market has been very inactive, and quotations are quite nominal.

SUGAR.—No sales of Java or other Eastern sorts.

RICE.—The extreme views of holders have not been realized, but no lower prices have been accepted.

SPICES.—There have been no sales worth reporting during the fortnight.

FIRE CRACKERS.—Small sales at $1. 10c. for No. 1 Canton.

HEMP.—Market dull. Quotation for Manila nominal at 5½c.

INDIA RUBBER. No sales reported; market quiet.

On Singapore (dols.) Bank Bills	4s. 9d.	Buy at	4s. 8d.
On Hong Kong, ditto	4s. 9d.	Do.	4s. 3d.

MANCHESTER MARKETS.

The market generally has become quieter, and rather more depressed in some respects. The prices of yarns are in most cases very well maintained; but there has been a lessened demand. Spinners for the home trade are not quite so firm in their quotations. The demand for piece goods remains without any improvement. Most kinds of cloth are almost entirely neglected as before, and the inquiry for the East has again nearly ceased, both for cloth and yarns. There are very few buyers in the market, and where sales take place in cloth there is generally some concession in price since last week. At that time sufficient business was done for India and China to supply a good many manufacturers with contracts for a while longer. But the prospects of trade are discouraging, while two important markets—India and America—are so nearly closed against producers.

COMMERCIAL POSTSCRIPT.

CITY, FRIDAY AFTERNOON.

ARRIVALS NOT INCLUDED IN TABLE.—June 6, off Dungeness, Antoinette Maria, from Batavia; off Hastings, from Samarang, Neckar; 5, off the Lizard, from Maulmain, Sea Serpent; 8, in the Channel, from Banjoewangie, Henricus Gerardus; 11, at Portsmouth, from Hong Kong, Bosphorus; 6, off Scilly, from Canton, Wolverine; 8, at Brouwershaven, from Banjoewangie, Constance; 9, Antonia Geertruida; 8, off Dungeness, from Batavia, Broedertrouw; 11, at Falmouth, from Rangoon, Wilhelm Kirchner; 12, from Akyab, Roman Emperor; 12, off Falmouth, from Bankok, Marie; 10, off the Start, from China, Cæsarewitch; May 2, at Valparaiso, from Hong Kong, Lady Elizabeth; 30, at Boston, from Penang, Belvidere; 13, at London, from Nagasaki, Juanpore; 13, off Falmouth, from Rangoon, Fairlight. From PENANG.—At London: Zenobia, Isabella Harnett, Rajah of Cochin, Barracouta.

From BATAVIA.—At Liverpool: Kerr.

From BANKOK.—For Falmouth: Main, Pauline.

FREIGHTS AND CHARTERS.

There is a want of animation in business generally, which is prejudicial to freights, but rates are nevertheless fairly maintained.

Her Majesty's Emigration Commissioners have chartered the Oithonaa, for Melbourne, at £13. 18s.; and the Red Riding Hood, China to British Guiana, at £14. 17s. 6d. per statute adult, and receive tenders next week for two ships to convey Chinese emigrants from Hong Kong or Whampoa to British Guiana, the first ship to be ready, at the port which the agent in China may decide, on the 14th of November, and the other on the 16th of December.

For India, China, and the Cape, there are 60,000 tons loading. The berth freights from London vary very little. Coal freights are lower; only 25s. per ton is obtainable Wales to the Cape of Good Hope, the recent contract having been almost completed by American ships; £30 per keel has been accepted from the North of England to Bombay, £28 now offered; Wales to Singapore, 27s.; 40s. is offered Birkenhead to Shanghai, £50 per keel from the Tyne, 42s. per ton Wales to Hong Kong.

Current freights to Shanghai for vessels on the berth, 40s. to 50s. per on weight and meas.; to Hong Kong, 35s. to 40s.; Singapore and Penang, 30s. to 45s.; to Manila, 35s. to 40s.; to Batavia, 45s. weight, 40s. meas.; to Japan, 65s. weight, and 60s. meast.

INSURANCE.

The following are the current rates of premium at Lloyd's, according to the class of vessels, &c.:—To Hong Kong, 40s. to 50s. Shanghai, 50s. to 60s. Singapore, 30s. to 45s. Batavia, 30s. to 40s. Manila, 50s. to 60s. Nominal quotation for Japan, 50s. to 60s.

At Hamburg, for Batavia and Singapore, 40s. China and Manila, 40s. to 50s.

CASUALTIES.

The Dionysia Catharina, v. d. Sprenckel, from Banjoewangie, which arrived in the Texel May 23, reports having sustained damage in her rigging and lost an anchor and chain in St. Helena Roadstead, by being driven foul of.

The Flying Scud, Harding, which arrived at New York, May 15, from Canton, had lost nearly a whole suit of sails, topgallant masts, fore and main topmast heads, fore, main, and mizen lower topsail yards, and had sprung spencer gaff and mizen masthead, having been struck by a squall or whirlwind, May 4, in lat. 25, lon. 67.

The Susannah (barque), of and from Hambro', Russ, bound to Singapore, got into collision with the Ben Muick Dhu, from Villa Nova, and both vessels arrived in the Downs, May 31, with considerable damage in consequence.

The Louis Meyel, Dutch ship, Holtgreve, from Banjoewangie to Amsterdam, put into Mauritius, 11th April, with loss of mizenmast, fore and main topmasts, and all attached; decks swept, and part of cargo thrown overboard, having experienced a hurricane.

The sound portion of the cargo ex Catharina Maria, Schuchardt, from Banjoewangie for Rotterdam, condemned at the Cape of Good Hope, will be forwarded by the Lumley, Lawson. The damaged portion was sold 5th April.

The Marie Gabrielle, Erain, from St Nazaire to Hong Kong, with coal, was totally lost on the West Coas. of Australia, 12th Feb.

At ST. HELENA, April 9.—Cornelia, Witt, from Sourabaya. 11, Amelia Maria, Svendsen, from Sourabaya, and sailed for Falmouth. 12, Forest Eagle, Pillsbury, from Macao. 14, Maria Catharina, de Bos, from Java, and sailed 15 for Amsterdam; Maria Clotilde, Basterra, from Macao, and sailed 15 for Havana. 15, J. C. Schotel v. Beesthelle, from Java, and sailed 16 for Rotterdam. 16, Anna Lena, Zaal, from Sourabaya, and sailed 17 for Amsterdam; Hermann, Deeman (?) (late master, dead), from Sourabaya, and sailed 19 for Amsterdam. Orissa, Morrison, from Whampoa, and sailed 20 for London. 20, Eclipse, Brandt, from Sourabaya, and sailed 22 for Norrkoping. 21, Balder, Djoberg, from Pasaroeang, and sailed 22 for Falmouth. 22, Baltimore, Bruks, from Banjoewangie, and Goede Vertrouwen Kraan, from Sourabaya, and both sailed 24 for Amsterdam; Cornelis Antonie Ryners, from Banjoewangie, and sailed 24 for Rotterdam. 23, Juanpore, King, from Japan, and sailed 24 for London; Sperwer Schrender, from Batavia, and sailed 24 for Amsterdam; Erasmus, v Heiningen, from Java, and sailed 26 for Rotterdam. 24, Delftshaven, Schaap, from Java, and sailed 25 for Rotterdam. 25, Marinus Willem, v. Duyn, from Java, and sailed 26 for Rotterdam; California, de Wyn, from Java, and sailed 27 for Amsterdam; Maria Magdalena, Willenbrink, from Macassar, and sailed 27 for Rotterdam. 27, Edouard Marie, Remmers, from Java. 28, Stad Enschede, Heght and Pollux, Cruys, both from Java.

At ASCENSION, April 23.—Lowe v Myestein, Lamin, from Sumatra, for Amsterdam.

At SIMON'S BAY, April 4.—H.M.S. Esk from China, and left 18 for England. 13, Louisa, Bruis, from Java.

EMIGRATION FROM CHINA TO DEMERARA.—The ships *Ghenghis Khan* and *Earl of Windsor* have been settled by the Emigration Commissioners to convey Chinese emigrants from Hong Kong or Whampoa to Demerara.

STAMP YOUR OWN PAPER—with Arms, Crest, Initials, or Name and Address, by means of CULLETON'S PATENT EMBOSSING PRESS, 15s. Best Make 21s. Any person can use them.—T. CULLETON, Die Sinker to the Board of Trade, 25, Cranbourn-street, corner of St. Martin's-lane, London, W.C.

WEDDING CARDS—For Lady & Gentleman—5s. each. 50 Embossed Envelopes, with Maiden Name printed inside, 13s. Visiting Cards—A Copper Plate engraved in any style, with name and 50 Cards, printed for 2s., post free. N.B.—All orders executed by return of post, for stamps or cash. T. CULLETON, Seal Engraver and Die Sinker, 25, Cranbourn-street, corner of St. Martin's-lane, London, W.C.

FAMILY ARMS, &c., Emblazoned for Painting on Carriages or Needlework, 6s.; Best Style, 12s., Gothic and Modern Monograms Designed, 5s. Arms Quartered, Impaled, and Painted on Vellum, according to the laws of Heraldry By T. CULLETON, Seal Engraver and Die Sinker, 25, Cranbourn-street, corner of St. Martin's-lane, London, W.C.

ARMS, CRESTS, &c., Engraved in the Best Style. Crest on Seals or Rings, 7s. On Steel Die, 6s. Initials. 1s. 6d. per Letter. Book Plate, Engraved with Arms, 10s.; or Crest, 5s. Postage and Registered Letters 1s. extra.—T. CULLETON, Heraldic Engraver by Appointment to the Queen, 25, Cranbourn-street, corner of St Martin's-lane, London, W.C.

SOLID GOLD RING (18 Carat, Hall Marked), Engraved with Crest, 42s.; Large Size, for Arms, 75s. On receipt of P. O order the size will be sent to select from.—T. CULLETON, Seal Engraver, 25, Cranbourn-street, corner of St. Martin's-lane, London, W.C.

THE PEN SUPERSEDED.—Mark your Linen. The best and only method of Marking Linen, Silk, Stockings, Coarse Towels, or Books, so as to prevent the Ink washing out, is with CULLETON'S PATENT ELECTRO-SILVER PLATES. By means of this novel invention a thousand pieces of linen can be marked in a few hours. Initials, 1s. each; Name, 2s. 6d. Set of Moveable Numbers, 2s. 6d; Crest Plate, 5s., with the necessary directions for use. Post free Certificate from the eminent Dr. Sheridan Muspratt, F.R.S., Professor of Chemistry, &c.

"Several trials with Mr. Culleton's Patent Electro-Silver Plates, for marking linen, induce me to pronounce them excellent; the letters are beautifully marked in a deep black colour, without blotting, and after a long boiling, with either potass or soda, they remain unaltered. Other plates which I tried decomposed the ink, and in many cases burned holes in the linen. I can testify Mr. Culleton's Plates are incorrodible, and will not hurt the finest fabric.—(Signed) "SHERIDAN MUSPRATT

"College of Chemistry, Liverpool.

"May, 15, 1854."

All orders to be sent to the Patentee and Sole Maker.

T. CULLETON, 25, Cranbourn-street, corner of St. Martin's-lane, London, W.C.

The whole are bargains.

METROPOLITAN LIGHT COMPANY,

447, STRAND, LONDON.

CLARK'S PATENT IMPROVED LAMPS FOR THE CAPE, INDIA, CHINA, AND JAPAN.

THE advantages of CLARK'S PATENT GEM LAMP, are so apparent, and its superiority so unquestionable, that it would be extremely surprising were any one acquainted with its merits to purchase the Lamps hitherto sent abroad.

THE LAMP GIVES DOUBLE THE LIGHT OF THE OLD LAMPS.

It is much more elegant in appearance. It is so simple in construction that it cannot be mismanaged.

The GEM LAMP for Table use is fitted on Bronzed, Lacquered, Cut Glass, Silvered, or Jasper Slate Pillars.

Merchants are respectfully informed that, for many reasons, French or English Moderator Lamps are not suitable for exportation. The size of the glasses for the Gem Lamps being only one-half of those of the old lamps, 50 per cent. is saved in freight and package; their cost and risk of breakage are also considerably less. The Gem Lamp is admirably adapted to burn any of the native oils, such as cocoa-nut, olive, mustard, or rape seed oils.

To show the superiority of CLARK'S PATENT LAMPS, one is always kept burning.

CLARK'S CANDLES for Tropical Climates are the best adapted for the East, as they are entirely free from grease in substance, &c., and do not gutter. They give a most brilliant light, and are unsurpassed by any yet manufactured.

JOHN CLARK, Manager.

NOTICE TO PASSENGERS BY THE OVERLAND ROUTE, via EGYPT.

PHILIP ZECH, Proprietor of the two well-known Hotels in Alexandria, the Hotel d'Europe, and the Peninsular and Oriental Hotel, begs to inform his friends, and Travellers in Egypt in general, that he has purchased SHEPHEARD'S HOTEL in CAIRO, which will still continue to bear the same name; and in returning thanks for the extensive patronage enjoyed by his two houses in Alexandria, hopes that the preference may likewise be extended to his house in Cairo, which will be managed in first-rate style, and in a manner intended to give every satisfaction to its frequenters, both as far as table, wines, internal and external service are concerned. Many alterations and ameliorations are being carried out at the present moment.

DR. CURTIS'S MEDICAL WORK, "MANHOOD."

An Essay on Nervous and Generative Diseases.

The 140th Thousand, with numerous plates in a sealed envelope, price Half-a-Dollar,

MANHOOD: the CAUSE and CURE of PREMATURE DECLINE IN MAN, with plain directions for perfect restoration to health and vigour, being a Medical Essay on Nervous and Generative Diseases, their Prevention and Cure, with the Author's experience in the Treatment of the various Disqualifications of Marriage—whether resulting from Youthful Abuse, the Follies of Maturity, the Effects of Climate or Infection. The result of Twenty-five Years' successful practice. By Dr. J. L. CURTIS, 15, Albemarle-street, Piccadilly, London.

Consultations, Ten till Three and Six till Eight.

REVIEWS OF THE WORK.

"We feel no hesitation in saying, that there is no member of society by whom the book will not be found useful—whether such person hold the relation of a Parent-Preceptor, or Clergyman."—Sun, Evening Paper.

"Dr. Curtis has conferred a great boon by publishing this little work, in which is described the sources of those diseases which produce decline in youth, or more frequently premature old age."—Daily Telegraph, March 27, 1858.

The Book concludes with numerous varied and interesting cases, to which is added the Author's Receipt of a Preventive Lotion.

Dr. CURTIS may be consulted, as usual, either by letter or personally, at his residence, as above. Patients in INDIA, CHINA, and the COLONIES can be cured by correspondence only, and have their medicines sent with secrecy and despatch. The efficacy and harmless nature of the remedies employed by Dr CURTIS, having been demonstrated by the most complete success during a practice extending over a period of Twenty-five Years, nervous sufferers of every class have a perfect guarantee that the utmost skill and experience will be made available in the treatment of their cases.

THE WORK SOLD BY HINNAM, QUEEN'S ROAD, HONG KONG.

HOLLOWAY'S PILLS.—BILIOUSNESS, SICK HEADACHE, LOW SPIRITS.—The stomach becomes deranged from many causes; the consequence is, that the bile gets into the blood, and produces nausea, headache, and depression of spirits. These disagreeable symptoms are speedily relieved by Holloway's Pills, which regulate the functions of the stomach, restore the appetite, act beneficially on the liver and kidneys, correct every secretion, purify the blood, and expel all unwholesome matter from the system. These excellent Pills ensure the production of healthy gastric juice, without which digestion cannot naturally take place. Thus they remove the foundation of innumerable complaints, acting as gentle alteratives, at the same time giving general tone and renewed vigour both to the muscular and nervous fibres.

'CAUTION."—Purchasers and Correspondents are requested to take especial notice of the mark on the blades, "MAPPIN AND COMPANY'S ROYAL CUTLERY WORKS, SHEFFIELD." All MAPPIN AND COMPANY'S Knives are so marked, and the quality thus guaranteed.

MAPPIN AND COMPANY

OPPOSITE THE PANTHEON, OXFORD-STREET.

MANUFACTORY, ROYAL CUTLERY WORKS, SHEFFIELD.

ALL ORDERS FROM ABROAD MUST BE ACCOMPANIED BY A BANKER'S DRAFT OR ORDER FOR PAYMENT IN ENGLAND.

Illustrated Catalogues sent Post Free.

MAPPIN & CO. have no connection whatever with any Firm of a similar name in London.

OVERLAND ROUTE.

COMMUNICATION by STEAM to INDIA, AUSTRALIA &c., *via* EGYPT.—The PENINSULAR and ORIENTAL STEAM NAVIGATION COMPANY book Passengers and receive Cargo and Parcels for Gibraltar, Malta, Egypt, Aden, Ceylon, Madras, Calcutta, the Straits, and China, by their steamers, leaving Southampton on the 4th and 20th of every month. For Gibraltar, Malta, Egypt, Aden, and Bombay by those of the 12th and 27th of each month; and for Mauritius, Reunion, King George's Sound, Melbourne, and Sydney, by the steamers leaving Southampto on the 20th of every month.

For further particulars apply at the Company's Offices, 122, Leadenhall-street, London, E.C.; or Oriental-place, Southampton.

TRIESTE ROUTE to INDIA.—The Steamers of the AUSTRIAN LLOYD'S STEAM NAVIGATION COMPANY leave TRIESTE for ALEXANDRIA on the 11th and 27th of every month, at 10 A.M., in correspondence with the P. and O. Company's Steamers leaving Southampton on the 4th and 20th, and Suez on the 21st and 6th of each month. Passengers' baggage may be shipped at Southampton for Alexandria.

For further information apply at 127, Leadenhall-street, London; or Oriental-place, Southampton.—HICKIE, BORMAN, and Co., Agents.

REGULAR LINE OF PACKETS.

FOR BATAVIA.—The fine, fast-sailing barque ELIZA THORNTON, A 1 13 years, 4.1 tons per register, coppered and copper-fastened throughout, THOMAS MAXWELL, Commander; lying in the St. Katharine Docks. Has superior accommodation for passengers.

For freight or passage apply to the owners, Messrs. Thornton and Wests, Old Swan-wharf; or to Rangel, Woollett, and Co., 1, Lime-street-square.

TO SAIL ON THE 20TH JUNE.

FOR HONG KONG, the splendid Clipper ship, STANDARD, A 1, 375 tons register, WILLIAM WALSHAW, Commander; lying in the St. Katharine Docks. This ship has just delivered a cargo of tea in first-rate order.

For freight, apply to Phillips, Shaw, and Lowther, 2, Royal Exchange Buildings, E.C.

ROBERTSON and CO. will despatch the following first-class VESSELS to their respective destinations. They are well adapted for their several trades, and are confidently recommended to their friends:—

Destination.	Ships.	Docks.	To Sail.
Colombo	Couranto	W.I.D.	With des.
Amoy and Japan ...	Ocean Gem	W.I.D.	With des.
Hong Kg & Whampoa.	Heroes of Alma	W.I.D.	June 20.
Hong Kg & Whampoa.	Red Riding Hood	W.I.D.	With des.
Shanghai	Henry Miller	W.I.D.	June 15.
Shanghai	Juanpore	W.I.D.	With des.
Penang	Ecliptic ...	W.I.D.	June 15.
Bombay	Her Majesty ...	E.I.D.	With des.
Calcutta	Anne Royden	E.I.D.	With des.

London, 5, Newman's-court, Cornhill; or York-chambers, 55, King-street, Manchester.

To follow the Marsha and Jacoba, and will meet with immediate despatch.

FOR BATAVIA and SOURABAYA, the fine Dutch clipper barque, SALATIGA, 5-6ths 1.1. A 1, 413 tons register, yellow metalled. H. G. BIESTHORST, Commander; loading in St Katharine's Dock.

For terms of freight apply to Cloid and Routledge, 124, Bishopsgate-street, Within, E.C.; or to E. and W. Arnold, 3, Clement's-lane, Lombard-street, E.C.

FOR SINGAPORE & PENANG (first ship), the splendid fast-sailing British-built ship TAMAR, A 1 12 years, 509 tons register, J. J. ROSS, Commander; loading in the London Docks. Has superior accommodation for passengers.

Apply to James Thomson and Co., 1, Billiter-court; or to Douglas and Mills, 23, Billiter-street.

FOR SHANGHAI DIRECT, a regular trader, the well-known Cumberland-built clipper ship CAMBALU, A 1, 13 years, 499 tons register, WILLIAM FRAZER, Commander; loading in the St. Katharine Docks. This splendid vessel is favourably known in the China trade for her superior sailing qualities.

Temperleys, Carter, and Darke, 3 White Lion-court, Cornhill, E.C.

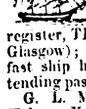
To leave the Docks on the 4th July; last Shipping Day from Manchester the 29th June.

FOR SHANGHAI DIRECT, the TUNG-YU, A 1, 1,137 tons register, C. TAYLOR, Commander; loading in the East India Docks. This ship has just arrived off her third voyage from China, and has excellent accommodation for Passengers.

For freight or passage apply to the owners, Messrs. Charles Shaw and Co.; or to Killick and Martin, 29, Nicholas-lane, Lombard-street, E.C.

FIRST SHIP for SINGAPORE and BANKOK (Siam).—The splendid clipper barque AVONDHU, A 1 9 years, 394 tons register, having the greater portion of her cargo engaged and shipping, offers a favourable opportunity for shippers; loading in the London Docks.

Apply to R. Webb and Co. 35, Leadenhall-street; or to A. Wright and Co., 19, St. Helen's-place, Bishopsgate-street.



FOR HONG KONG and WHAMPOA, now loading and will have quick despatch, the splendid new clipper-built ship, LORD MACAULAY, A 1 13 years, 846 tons register, THOMAS MUIR, Commander (late of City of Glasgow); to load in the East India Docks. This fine fast ship has first-rate poop accommodation, which intending passengers should inspect.

G. L. Munro and Co., 33, Gracechurch-street; and Holmes, Knevitt, and Holmes, 41, Princess-street, Manchester; Sun-court, Cornhill, E.C.

SHANGHAI direct, with quick despatch, the splendid new British Clipper ship HARKAWAY, A 1 10 years, 615 tons register, J. JOHNSON, Commander, loading in the West India Docks. Has excellent accomodation for passengers, and has just discharged a cargo of tea in perfect order.

Charles Alcock and Co., 155, Fenchurch-street; Holmes, Knevitt, and Holmes, 41, Princess-street, Manchester; Sun-court, Cornhill, E.C.

DR. J. McGRIGOR CROFT, M.R.C., Physician, London. Fell. E.S.; Fell. O.S.; late Staff-Surgeon and Medical Officer of H.M. Ceylon Rifles in China, and Ceylon (retired), may be consulted by his China and Eastern friends returning home suffering from tropical disease. Address, Mandarin Villa, 8, Abbey Road, St. John's Wood London.

FOREIGN CORRESPONDENCE!

THE greatest novelty of the Day in Paper is the NEW INDIA PAPER, which is an entirely New Fabric, possessing a peculiar surface which renders it admirably suited for rapid writers. It is further distinguished from the usual kind of Foreign Paper, by its being as pleasant to write upon as stout writing paper, whereas with any other than a very light hand the pen is very liable to catch in the thin paper used ordinarily for Foreign Correspondence. It may be had in various note and letter sizes, plain, ruled, and black-bordered. The New India Envelopes possess two most valuable qualities, viz., lightness, and the strength and toughness of stout Cartridge Paper. They are less than half the usual price of Foreign Envelopes.

Three Sheets of India Note and Envelope, weigh under the ½-oz. The Envelopes may be had plain, or printed "via Marseilles," or Southampton. Ostend, France, Belgium, Liverpool, Halifax, Trieste, Lisbon, or in any other manner to order, and likewise with Mourning Border.

Sold only by E. TOWNSEND HAMBLIN, Stationer 421, Oxford-street, London, W.

THE LONDON AND CHINA TELEGRAPH.

THE SECOND Volume of this JOURNAL was completed on the 13th Nov. 1860. The Subscriptions is 18s. per annum, or 5s. per quarter, not including Postage. Terms for advertising, 2s. 6d. per five lines; and 6d. for each additional line.

Subscriptions and Advertisements received abroad by the following Agents:—

Heam, P. Fleshender, A. Williamson, J. Laing, and Mrs. Smith's native servant. From Southampton for Shanghai: Messrs. Eaton and Spence.

Summary of News from the Far East.

FROM CANTON TO HANKOW.

Our readers are already aware that four gentlemen started in the spring of the year from Canton, for an expedition to Hankow. From one of these travellers a long letter has been addressed to the *China Mail*, containing a detailed narrative of the journey. Their progress up the river has been very slow, seldom exceeding twenty or thirty miles a-day. Several times their progress has been obstructed by rapids, but many objects of interest have repaid them for the weariness of the voyage. Hamlets and villages are scattered on both sides of the river, and the travellers were of course able to walk ashore daily without delaying the progress of their very slow conveyance. The scenery is described as being strikingly varied in character—from the broad tame rice fields to the lofty hill, frowning down upon the river from the height of a thousand feet. In some spots the river runs in a deep and swift current between high and rocky mountains; in others groves of lofty forest-trees throw their cool shade over the banks, and delicious waterfalls create even a deeper sense of freshness and repose. About a hundred and fifty miles above Canton the travellers reached what one of them calls a "remarkable mountain, at least 500 feet high." Certainly the height is not its remarkable feature, but at its base is a large cave fitted up as a temple to the Goddess of Mercy, and inhabited by Buddhist priests and tame pigeons. Two hundred and twenty-eight miles above Canton they came upon the walled city of Shee-ne Chow. It is built on a tongue of land, and the east and west branches are joined by a bridge of boats. The travellers walked through several streets, "followed by crowds, pushing and rushing to get a sight of the white men." Yet, in spite of their curiosity, the people were civil and obliging; but as these were the first foreigners who had ever ventured there in British costume, it was natural that some excitement should be caused by their presence. The letter from which we have gathered this intelligence is dated from Lawk Chay-ung, two hundred and sixty-eight miles north of Canton. Another of a somewhat later date, describes the further voyage to Ping Shek, a distance of about sixty miles. The rapids in this part of the river are many and dangerous, yet the boatmen shoot down them fearlessly—not always scathless, however, for many boats are said to be broken to pieces every year upon the rocks. The scenery throughout this portion of the route is described as very beautiful, and as amply repaying all the danger and fatigue that was incurred. The average width of the river between Lawk Chay-ung and Ping Shek was two hundred feet. This latter town is the most northern of any note, in Canton province on this route. Only three weeks before it was visited by the quaternion of Englishmen it had been sacked and burnt by the rebels, who were, however, soon driven out by mandarin soldiers. Ee Chag-ung—a town beautifully situated—was reached on the 1st of May, and is described as quite European in its aspect. The town is walled, and not half-a-mile in circumference. The letter closes with the statement that the travellers were about to start in mountain chairs for Chung Chow, from whence they would take boats down the river to the Yang-tsze. There, therefore, we must leave them for the present, but shall expect with curiosity the future account of their progress.

CHINA.

THE YANG-TSE-KIANG.

A second naval expedition has been despatched in search of deserters from H.M.'s ships. This time they went in China boats with a guide furnished by the Taoutai. The Chinaman cunningly misguided the party, took the wrong creek, and managed to arrive at the wrong place when it was dark. There other boats and guides were obtained, and at last they reached the spot where there were twenty-four foreigners carousing in the boats of the Imperialists. They were taken without resistance, eleven not being Americans or English were liberated, and the remainder brought down and handed over to their respective Consuls. None have been recognised as deserters from Her Majesty's navy or army. They acknowledged to have received a bounty for enlistment, and said there were about two hundred more in the neighbourhood where they were taken.

Specimens of Taiping blasphemy are plentiful as blackberries, and it is passing strange how, in the face of them, any Englishman can imagine that the Rebels are under the influence of our Christian faith—it is not even entitled to be considered as a corrupt form and expression of it. The following recent Proclamation of Teen Wang will suffice, we should imagine, to open the eyes of those who are disposed, on religious grounds, to favour the movements of the insurgents:—

"TEEN WANG'S PROCLAMATION.

"To the Kings and High Officers, Six Boards of Control, and the Foreigners in and out of China throughout the world for full information.

"Throughout Heaven and earth the Sire-God is everywhere. The Sire created all things in six days with His mighty hand. Shan-ti and Christ are now in the world. The Sire is head over all things, and has made myself and son Lord in His Heavenly kingdom. Shang-ti's Heavenly kingdom extends everywhere, and is perfect. They who reverence Shang-ti will ascend to Heaven and will concentrate in one world, one family, all united in one.

"Formerly we established three regulations, now we add three more. The Father-Sire laboured six days, and now we give you six regulations: 1st regulation is mutually to reverence the heavenly grace and love; 2nd regulation is to pay tribute to Heaven in way of duty; 3rd, to reverence Heaven, and not assist the Yans—Imperialists; 4th, while anchoring temporarily, do not encroach injudiciously—at night do not stealthily go about in your boats; 6th, as to prohibited goods, do not offend against the prohibition (by smuggling).

"In addition to the true regulations (alluding to a former publication), we have added six more, making altogether nine.

"Now do not in the least turn away your back upon Ya Ko Hum and Yan—God, Christ, myself, and son—who illuminate all places as one body politic, benevolently harmonising them for ten thousand times ten thousand generations. Of this proclamation publish many everywhere, even among Western foreigners. "FROM THE THRONE."

The 11th year of the Heavenly Father, Heavenly Brother, and Heavenly King's great peace, Heavenly Kingdom, 1st moon and 27 days—March 7, 1861.

A large body of Rebels have been gallantly repulsed, on their approaching to the attack of Kin-kiang. The Imperialists placed themselves in ambush and surrounded the enemy, cutting them off, and destroying, as they report, some 2,000 to 3,000 of killed and wounded.

A division of the Nien-fei insurgents are said to be moving southwards towards the Yang-tsze, being, as reported, at the town of Hin-kien, some 200 miles from Hwae-gan-fu. The progress of another division has been arrested at Joo-ning-foo, on the north bank of the Yellow River, where they suffered severe losses.

PEKING.

Mr. Bruce has suspended the issue of passports to British subjects, a policy that appears to be entirely mistaken. The consul can use his discretion in granting them only to proper persons, and their appearance throughout the country, and particularly in the cities and towns, as provided for by the Treaty, would certainly be the readiest and indeed the only way to make an impression which we cannot suppose would be unfavourable. So strictly is the order observed, that the admiral did not take his flag-lieutenant up with him when he visited Peking with Brigadier Staveley. The Prince Kung received them civilly, and listened with great attention to Mr. Parkes's narrative of the position and movements of the rebels on the banks of the Yang-tsze.

The residence of the British Legation is an enormous place, with detached buildings, covering about four acres and a half of ground. It is much out of repair, and necessitates the employment of a considerable staff of masons and carpenters to make it habitable in summer or winter. The alternations of heat and cold are very sudden and great in the capital. At the end of last month the thermometer was 87 in the shade, and scarcely six weeks before it was 2 degrees below zero.

Reports state vaguely that a rebellion has broken out in Mongolia. The non-activity of the Emperor is causing much anxiety to his friends, among whom we English are supposed in a manner to be reckoned.

A full translation of the memorials mentioned in our last number, as having been addressed to the Emperor by Sangkolinsin and Kia-Ching and others, appears in the *North China Herald* of May 4. These curious and interesting documents were discoverad by Mr. M. C. Morrison at Yuen-ming-yuen, on the 8th October last.

On the subject of the late visit to the Great Wall, noticed in our last, the *China Mail* writes:—

"We believe some little curiosity exists as to the proceedings of an officer and his interpreter who recently visited Peking, and are alleged to have acted somewhat injudiciously. As we have written something on this subject, and do not wish to suggest exaggerated notions of the conduct which our Plenipotentiary in Peking has tacitly censured, we give the following details, furnished to us, but not hitherto considered as requiring publication. It will be seen that the spirit in which the various acts were gone about gives them a colouring which they might not otherwise have possessed. The officer commenced his objectionable proceedings by violating the 9th Article of the Treaty of Tien-tsin, in going to the Great Wall without a passport from the local authorities, or a preliminary permission from an English Consul; he further, through the aid of his interpreter, insisted on a district magistrate supplying him with a horse and cart. Finally he returned, carrying a brick from the Great Wall; and concluded by going with his interpreter, with guns over their shoulders, and demanding admission into the Yuen-min-yuen, which, however, was refused. Another young officer visited Peking about the same time, and walked about the streets with a revolver on. Now, each and all of those young gentlemen ought to consider that Her Majesty, whose uniform two of them are wearing, did not spend upwards of £10,000,000 sterling in order to afford them the power of bullying a Chinese magistrate, or riding armed up to the gate of the Summer Palace and demanding admission. There was in this something more inconsiderate than in the other acts. Here was one of the spoilers—a non-combatant, it is true—come armed with a friend to view the ruin we had made, and to chuckle over China's humiliation as he carried away another brick. Our sense of mirth is barely overpowered by that of sorrow, when we contemplate the spectacle of the armed horsemen, decreeing themselves a triumph, and cantering down Curiosity-street with the brick from the Great Wall, which they alternately shared the honour of carrying. In other circumstances, this procession of the three 'bricks' must to a certainty have provoked our joy; but as matters in the capital stand at present, the whole display was a serious blunder—an ignoble exhibition, whose consequences it is easy to foresee in a more deeply-seated hatred of foreign insolence on the part of the Chinese in Peking. Doubtless, Mr. Bruce has asked the Prince of Kung not to judge the English people by the behaviour of those two gentlemen; but whether the Prince will suspend his judgment or not is another question."

TIEN-TSIN.

The Peiho is said to be crowded with trading-junks. Notwithstanding the proximity of a rebel army, the greatest activity prevailed in all textile fabrics.

The weather had suddenly become very hot during the day, and detachments from each of the Infantry Regiments and the Royal Artillery are moved out of the city to the old camping ground adjoining the "Temple of Oceanic Influences," and put under canvass. The prospect of a protracted stay in China is very displeasing to the army. The out-of-door amusements, which, in winter, helped to relieve the monotony of their life, are not available in the heat of summer. The Brevet has disappointed many and disgusted more.

The Secretary of the Prussian Embassy has taken an "Hotel" and erected a flag-staff of no ordinary dimensions, in anticipation of the arrival of the Minister.

The reports that reach Tien-tsin of the movement of the rebels are very contradictory. At one time they are said to be in the country north-east of Shantung; at another, moving in a north-westerly direction towards Peking. The people seem to be ready to accept any Government which would guarantee security to person and property, but know not in which quarter to look for it. The Emperor remains at Jehol, and there is now no likelihood of his returning to Peking.

In this embarrassing state of affairs the departure of the allied troops has been postponed, and it is not improbable that the whole, except the 60th Rifles, which regiment is under orders to embark, will remain in the North for an indefinite period, or at all events, until the country is quiet and a government established. The members of the foreign embassies live in the capital without any inconvenience but that arising from the natural curiosity of the natives to see them, but they are extremely civil, and do not offer any molestation, as has been reported. They constantly ride out to the surrounding country, which is charming towards the west and north; but Yuen-ming-yuen is tabooed, and is not approached within a mile.

SHANGHAI.

The *North China Herald* states that Mr. Thomas Taylor Meadows has been relieved by Mr. W. H. Medhurst, who has assumed the functions of British Consul at Shanghai. Mr. Meadows proceeds to the new port of Newchang, in H.M.'s steamer *Sphinx*. Mercantile agents are proceeding thither numerously.

An official notification states that an office of Her Britannic Majesty's Consulate in the district of Tang-chow-Foo is established at Yen-tai (Che-foo) pending reference to His Excellency Her Majesty's Minister at Peking, and that business will be there transacted until further notice.

On the 30th April, the American expedition sailed up the Yang-tsze. It consisted of three vessels, the *Hartford, Dacotah,* and *Saginaw*. . . .

Numerous proclamations have been posted up lately at the Magistrate's Ya-men. They are of no interest, however, beyond that which is derived from the insignificance of their subject matter. . . .

The annoyance that foreigners have so continually to submit to of being shrieked after with the cry of "Lar-le-loon" is to be suppressed officially, at the instigation of a French officer who has taken the trouble to write about it to the magistrate. According to the notice, the people are warned that although from the words not being Chinese they may not be aware that there is any harm in them, the magistrate is informed by the French, that it is an offensive epithet signifying "filou" (thief), and commands them to desist from the use thereof under pain of the bamboo. Our friends, the French, seem to take a great deal of trouble about trifles, for it would puzzle them to prove the origin of the words to be French, and as they have no meaning in Chinese, the use of the words seems harmless to either party. It is believed that the word originated with the Portuguese.

The trade of dyeing is no longer permitted to be carried on in the city, owing to the pollution of the city-ditch, from the increased number of dyers rendering the waters unserviceable, or at least greatly deleterious to the health of the poor, who cannot afford to have this necessity brought from far.

The children in the city are cautioned against hooting and spreading false rumours, as disturbances have arisen from the alarm occasioned thereby.

The Imperialists have been gaining ground over the insurgents in the province of Honan. Certain of the local officers are said to have greatly distinguished themselves.

Some six weeks ago the celebrated Tsang Kwo-fan, now Governor of Ganhwei, greatly distinguished himself in the pursuit of an army of Rebels, which ended in the recapture of Sinning-hien. Six of their camps were burnt by the Imperialists, twenty-eight of their leaders being taken prisoners, together with 450 of their soldiers, and upwards of 2,000 were killed.

The Insurgents in Shan-tung appear still to be kept in check by the Imperialists, though they succeed from time to time in crossing the Imperial Canal, they are usually repulsed on an engagement taking place. They appear to have approached to a place, considered to be of great stragetical importance, there being but a narrow pass between the hills, the heights of which are occupied by the Imperialists. There has already been a battle fought at Ke-ho-hien, not very distant from this pass, but the Insurgents after suffering considerable losses were put to flight.

A battle was lost by the Imperialists in the east of Shantung province, near King-chow-fu, and severe losses were inflicted on both sides.

In the province of Kwei-chow the "Meaou-tsze" mountaineers have been committing serious depredations in unison with some of the disaffected portion of the population in those parts, but have, however, been recently repulsed by the troops. In one engagement 3,000 of the country people who had been made prisoners and were being carried off to the mountains, were recovered.

The following items on matters at the North are taken from the *North China Herald*:—H.M.S. *Ringdove*, Commander Robt. G. Craigie, arrived here on the 1st May with the mails from Peking, Tien-tsin, and Chefoo, having left the river Peiho on the 27th and Chefoo on the 29th ult. The *Scout* with Vice-Admiral Sir James Hope on board, was to leave the latter place for Hong Kong on the 29th. The *Odin, Vulcan, Slaney,* and *Watchful* (gunboat) were also there, with three French men-of-war and two transports; also the merchant vessels *Sea Witch, Egean, Ida D. Rogers,* and *Garland*. In the Peiho river the *Alma* and *Louisa;* outside, off Taku, a Russian gunboat, the *Sterling, Faust, Wanderer, Duck,* and *Johanne*. The Peiho was so crowded with trading junks that the *Drake*, gunboat, coming down with the mails, had to anchor, and an officer brought them out to the *Ringdove* in a junk.

At Tien-tsin great activity prevails in business, and prospects are highly favourable. The comparative proximity of the Rebels has not caused any alarm, although they are reported to be within 180 miles of that city. It is otherwise at Chefoo, where trade had received a check, said to be on that account, but probably attributable to large importations of foreign goods.

It is stated that a great number of letters are lying in the office of the P. & O. Company at Shanghai under protest, and that grievous inconvenience is being experienced at that port in consequence of the Consul having relinquished the duties of Postmaster. It is hoped that arrangements will be made to institute a Postal Department upon a satisfactory and permanent footing.

FOO-CHOW-FOO.

A correspondent of the *China Mail* has furnished an account of the loss of the *Japan*. She was going out, it appears, with a full cargo, and in a few hours became a perfect wreck. In going past the Kimpai Point she struck on a rock and filled rapidly. Ultimately she ran ashore on the Wedge Rock, where she now lies. Only two tier of teas were saved. She was sold for a small sum by the Commander, but since then a naval court summoned by the Consulate at the request of those concerned, came to a decision unfavourable to the legality of the sale. The captain, it is supposed, will carry the matter to a higher court.

There is a discussion now going on with reference to the correct mode of spelling the name of this port. Foo-Chow-Foo. Foo-chow, Fuh-chau, Fuh-chau-fu, Fu-chau, Fuh-choo, Foo-choo, Fuh-chou, Foo-tcheou, Fou-tchow, Foo-tchow, Fu-chew, Fuh-cheu, and Hoc-sien, are the different varieties of the orthography, and the perplexity is still further increased by sometimes connecting the two or three syllables with a hyphen, at other times commencing with a capital letter, at other times with a small letter, or writing the parts closely together. Many learned authorities can be cited in favour of several of these modes of spelling the word. "Who shall decide when doctors disagree?" We at least see no reason from the arguments advanced on the subject, to change the orthography we have hitherto adopted.

SWATOW.

The *China Mail* that reports on the 30th April, a body of 200 armed men, collected from Swa-boey and Ou-teng, two large villages in the immediate neighbourhood of Swatow, marched through the streets into the hong of Messrs. Bradley and Co., and plundered and destroyed every article of furniture and merchandise, with the exception of a few chests of opium and some musters of shirtings—even to the servants' clothing. This was done in open daylight, at three o'clock in the afternoon, without the slightest warning or apparent cause—the Chinese authorities at Swatow not interfering; and no arrests have since been made, nor has a guard been granted, or assistance rendered by the civil authorities to guard against further attack, notwithstanding urgent applications on the part of Messrs. Bradley and Co. The amount of property carried off is estimated at about $10,000. The inhabitants of these villages are notorious scoundrels, and are especially inimical to foreigners, having, as we are informed, vowed vengeance against any foreigners who should dare to settle at the town of Swatow. Since the above was written, we have been told that the blame rests with Allin, Messrs. Bradley and Co.'s comprador, who is said to have, in a recent quarrel with the Swa-boey men, fired a volley of grape, by which both men and women were killed. We trust the matter will be thoroughly sifted, and steps taken to put an end to the ever-recurring disturbances at this unfortunate port.

Reports had been received overland at Swatow of the destruction of the town of Tseau-chew by the *Pearl*, and gunboats *Haughty, Firm,* and *Cockchafer*,—which leads us to qualify our late remarks as to the behaviour of the villagers; for we can scarcely suppose that an experienced officer like Captain Borlase would venture on such a demonstration without good reason. However, time will tell.

HONG KONG.

H.M.'s ship *Chesapeake* proceeded to Aberdeen for the purpose of entering Mr. Lamont's dock. But, though lightened to

Digitized by Google

17 feet 10 inches, the intention to dock was given up from the fear that though she might have a 19 feet spring to take her in, the tide might not rise so high again for months, and, therefore, she would not be able to get out. She is refitting, and will proceed to England shortly. Mr. Taber is about to light a portion of the Oriental Hotel, Hong Kong, with gas manufactured from naptha. The lamps and materials are now landing from the American ship *Benefactor*. The old-established firm of Lindsay and Co. have sold all their land and houses in Hong Kong, and intend doing business at northern parts of China only in future.

The firm of Birley and Co. have erected a tablet in St. John's Cathedral, bearing the following inscription :—"In memory of George Urmson, Merchant in Hong Kong, for sixteen years a resident in China, loved and honoured by many friends, born at Frodsham, Cheshire, September 7th, 1823, died at sea, near Formosa, February 23rd, 1860, on his voyage to England to rejoin his wife and family. His partners, deeply lamenting his loss, have raised this tablet to his memory."

The following military changes are reported in the *Hong Kong Register* :—

The appointments of Commandant and Town Major at Shanghai have been discontinued.

The Loodianah Regiment lately stationed at Shanghai, is now in Hong Kong Harbour, on board H.M.S. *Urgent, en route* to India.

The 21st Regiment M. N. I. left Hong Kong for India on the 4th inst.

A wing of the 5th B. N. L. I., about 475 men of all ranks, under command of Captain Taylor, 5th B. N. L. I., arrived from Canton on the 3rd inst. for duty in Hong Kong Garrison.

The detachment, consisting of 69 men, was withdrawn from Stanley on the departure of the 21st M. N. I.

The detachment of Royal Artillery lately stationed at Kowloon has joined head-quarters at Victoria.

The detachment of the 60th Royal Rifles stationed at Kowloon, under command of Lieut.-Colonel Muter, 60th Rifles, are under orders to proceed to Tien-tsin, to join head-quarters stationed there.

The right wing of the 44th Regiment, consisting of about 600 men of all ranks, under command of Major Hackett, proceeded to Kowloon on the 30th ult., and relieved the left wing, consisting of about 430 men, under command of Captain Ingham, who returned to Victoria for duty.

The detachment of the Military Train stationed at Victoria are about to be sent to Tien-tsin, to join their battalion stationed there.

Captain C. C. Grant, 3rd B. N. L. I., has been appointed D. A. A. General to Brigadier General W. T. Crawford, C.B., commanding the troops in South China.

The undermentioned officers proceed to England by the outgoing mail on medical certificate :—Mr. Notley, clerk, R.E. Department, Mr. Stratton, Military Store Department.

On the 24th April the first consignment of ice was received from the Peiho river.

It is officially announced that the appointment of John Heard, Esq., as Russian Consul at this port, has been recognised pending the receipt of Her Majesty's exequatur.

A mutiny has occurred amongst some of the crew of the British barque *Malakhoff*, in consequence of which the vessel put back to Bangkok. It appears that they had entered into a conspiracy to murder the captain, the mate, and those of the crew who were not to have joined them in the revolt. They were accordingly delivered over to the consul, who put seven of them chained on board the *Anne Reddin*, in which vessel they have now arrived to be lodged as prisoners in Hong Kong gaol. The remainder of the mutineers were to follow in a Dutch barque, bound to this port.

H.M.'s steamer *Couper* was put up to auction on May 2, by Messrs. R. M'Gregor and Co., and bought in for $37,000. The highest bid for this vessel was $36,000.

Chief Justice Adams' health is so far recovered that he was expected to leave Shanghai for Hong Kong on May 3rd.

J. J. dos Remedios, Esq., has been recognised by H.E. the Governor, as Vice-Consul for Portugal at this port, subject to the approval of the Home authorities.

On the news of the death of the Duchess of Kent reaching Hong Kong, the flags of the various war vessels and merchant ships in the harbour were suspended half-mast high.

The idea of a police patrol to Kowloon has been abandoned.

Mr. Alcock has left again for Kanagawa, *via* Shanghai, in consequence of the absence of Mr. Moss, at whose suit he was to appear at the Supreme Court. As stated in our last, it is believed that Mr. Alcock would, at the suggestion of the Home Government, arrange the claim without going into court.

Admiral Hope is said to have left the Peiho on the 29th of April in Her Majesty's ship *Scout*, and when the mails left was daily expected at this port. On his arrival Admiral Jones is to leave for England in the *Chesapeake*.

The dismantled hull of the *Spartan* was sold for $1,300, the masts, sails, and other appurtenances, being separate from the hull, also brought very low prices.

The iron ship *Fearnought*, which lies ashore on Lamma Island, was put up to action on May 3rd by Messrs. Thomas Hunt and Co., at their sale rooms. The hull and lower masts sold for $1,100.

We noticed in our last the rapid passage of the steamer *Ly-ee-moon* from Hong Kong to Shanghai in 66½ hours; we have now to record her return to Hong Kong in 61½ hours. The whole time between her leaving Hong Kong and returning thither (including two days' stay at Shanghai) was only seven days and a few hours. We are glad to see that the enterprise of Messrs. Dent and Co., and the labour and skill of Captain Hill, have proved so signally successful, for the *Ly-ee-moon* may assuredly be pronounced the fastest steamer in the world.

The *Amazone* has put in for provisions, intending to proceed to Amoor River. She experienced fine weather from the Cape, and from Anjer light southerly winds between S.S.E. and S.S.W. with a light current to the northward. She has been twenty-four days from Anjer and 150 days from Hamburg.

CANTON.

On the 23rd April a large instalment of the indemnity was paid into the Government Bank at Canton by the Chinese Government, in accordance with the terms of the convention signed at Peking.

The following additional particulars of the capture of the steamer *Mee-Lee* are from the *Friend of China*:—"Notwithstanding a close search for several days and nights in that part of the river where Captain Ricaby and Mr. Coit are believed to have gone overboard from the steamer *Mee-Lee*, the bodies have not been recovered; and it is now feared that, despite the rewards of $200 for each or either, offered by Tung Akie (the Canton agent principally interested in the vessels), nothing more will ever be seen of the unfortunate men, conclusively deceased.

"Meantime, the native magistrates of the districts Poon-yee and Nam-hoi, through which the Pearl river runs, have offered, jointly, $100 for each and several of the parties guilty of the crime—Tung Akie offering to add $20 to each $100, so making an aggregate of £1,000 sterling for the eight believed to be implicated. Besides this, Captain Walcott of the *Willamette*, and Captain Newton, of the *Pak-wan*, will each give $100 to aid in the prosecution of any one against whom grounds of criminality may appear, and we have no doubt but many others would readily contribute if money were required to obtain punishment of the blood-thirsty demons.

"There are various hypotheses as to the cause of the murders—the *prima facie* reason of robbery, being generally rejected. In support, however, of the presumption that plunder was the sole motive of the desperadoes, the following has transpired:—A boat woman, for, as she said, a payment of Ten cash, took a written communication to the *Mee-Lee*, now lying off the Custom House, in which the writer stated that he was smoking opium in a certain divan named when he overheard men conversing on the subject of taking a steamer; one of the plotters residing at such and such a place. This paper was handed to the U.S. Consul, and by him was given to one of the district magistrates, who thereupon surrounded the house indicated, found in it the man named in the letter, and learnt from him that the other persons spoken of as accomplices had left Canton about the time that it is likely they would have left if they were the actual performers in the bloody deed. But with the arrest and subsequent dismissal of the arrested, the matter stands; the man pleads innocence, and the writing-informer remains anonymous.

"Nothing further has transpired calculated to bring the tragedy home to anyone. Suspicion attaching to three Chinese boatmen in the service of the Peruvian Consul, they were arrested by Mr. O. H. Perry, and are still in custody on board the *Mee-Lee*."

The Rev. Dr. Legge and his relative the Rev. T. Chalmers, both of the London Missionary Society, have obtained passports and started on a month's trip to the interior. During Dr. Legge's absence from Hongkong his place at the London Mission is filled by Mr. Parkes of the Wesleyan Mission at Canton, who for some time past has been closely studying the language at Fatshan.

The Rev. J. H. Gray delivered a lecture at the Soldier's Institute on the 6th May, on Christopher Columbus. In the *Friend of China*, a full report of the lecture is given. It appears to have been listened to with interest.

Our long-tried friend, the river steamer *Willamette*, has been sold for traffic on the Yang-tze-Kiang, and has left Canton on her last trip to Hong Kong. We hardly know how to express in fitting terms a parting compliment to Captain Walcott and his officers, of whom it is not sufficient to say that passengers always received at their hands the greatest civility and attention.

A Temperance meeting has been held in the Garrison school. Several officers were present, and the room was crowded. It is said that the speech of the evening was made by Sergeant-Major Short, of the 99th Regiment.

PHILIPPINES.

MANILA.

On the 25th April three shocks of an earthquake were felt, but it lasted only a short time and no injury was caused. Cholera is still prevalent in some parts, and the measles also in a bad form. The popular festival of Antipolo is at hand, but the writer from whom we gather the information goes off into such a rhapsody that it is quite impossible in our sober prose to do justice to his description. The following passages will, however, afford a specimen of what, we presume, passes current for fine writing in the columns of a China paper:—

"Oh youthful Britons! whose young blood danceth 'neath the Sol of this burning clime! and ye, oh ye tender-eyed and tenderer-hearted daughters of the soil! beware of confidential cooings and promenadings in those lovely and alluring groves half hidden 'mid the luxuriance of Nature's adorning foliage! Suffer not the exuberance of your juvenile imaginations to hallucinate your senses, enrapture your minds, and fascinate your souls! Do not be ensnared by the attractive temptations of delusive moonlight, and magic zephyrs of midnight breathing! Pay your devoirs to the holy shrine ye ostensibly profess to visit! Be not carried away into exstatic oblivion of terrestrial responsibilities, lest your romance be suddenly and fearfully dispelled (as erst hath happened) by visions of enraged sposi, starting up on milk-white steeds, with green eyes, monster fury and vengeance flashing from their [illegible]

BORNEO.

By last advices (dated 23rd) the pumping at the coal mines was progressing favourably but slowly, owing to the inefficiency of the old machinery. The *Yarra* with the new machinery sent from this country had left Singapore for Labuan, with which, on its arrival, the bottom would soon be reached.

SARAWAK.

Our latest intelligence is up to the 8th May.

Sir James Brooke had returned from his visit to Brunai, where his reception was of the most friendly nature. The good understanding between Brunai and Sarawak was completely re-established. The Sultan has issued a firman addressed to all the people of Muka, announcing that Sir James Brooke is appointed his representative at Muka, and stating that he has been requested to open trade, and establish a good Government in order that the Sultan may obtain some revenue.

Mr. St. John, our Consul-General, is requested to carry this "chop" of the Sultan to Muka in a British man-of-war, so that it may be clearly explained to the people at large, and ascertained whether the Sultan's mandate will be obeyed or not. It is doubtful how far our Government may feel authorised in acting, but it is believed that even without our aid the Sarawak Government will succeed though not without bloodshed, in bringing Muka to order. At present an important trade is interrupted, and the interests of British subjects, to a large extent, jeopardised, for the greater part of the trade is carried on with British capital.

MALACCA STRAITS.

PENANG.

The Government Straits steamer *Hooghly* has been announced for sale.

The Hon. Mr. Laing arrived at Penang in the Government steamer *Australian* on the 24th of May, and had then nearly recovered from his late dangerous illness.

H.M.'s steamer *Beagle*, Captain Hay, which left Singapore the 12th May, arrived here on the 14th, and has since sailed for Trincomalee.

The police have made several successful attacks upon gambling houses, arresting a number of people, who were fined.

Births, Marriages, and Deaths.

(Announcements for Subscribers are made free of charge.)

BIRTHS.

COUTTS.—At Spring Gardens, Hong Kong, on the 28th April, Mrs. A. Coutts, of a son.
HELENS.—At Sarawak, on the 26th April, the wife of L. V. Helens, Esq., of a daughter.
HALSTED.—On the 14th inst., at Blackheath, the wife of Capt. G. A. Halsted, R.N., of a son.
HIGGINS.—On the 17th inst., at 15, Maida-hill West, the wife of Thomas Higgins, of a son.
KNOOP.—On the 8th inst., at Bremen, Mrs. August Knoop, of a son.
LONG.—On the 9th inst., at Dublin, the wife of James Long, Esq., Deputy-Assistant Commissary-General, of a son.
OLDFIELD.—On the 19th inst., at Bonn-on-the-Rhine, the wife of Lieut.-Colonel Charles J. Oldfield, of a son.
PITTIS.—On the 18th inst., at 8, Palace-road, Roupell-park, the wife of E. A. Pittis, Esq., of a son.
SASSOON.—On the 20th inst., at Cumberland-terrace, Regent's-park, the wife of S. D. Sassoon Esq., of a son.
TRAVERS.—On the 19th inst., at Cheam, Surrey, the wife of Otho W. Travers, Esq., of a daughter.

MARRIAGES.

HAIGH—OSWALD.—On the 20th inst., at St. Mary's, Lambeth, by the Rev. William N. McGuinness, B.A., George Peter, son of William Haigh, Esq., late of the Clapham-road, to Augusta, widow of the late Richard Oswald, Esq., of Hong Kong.

DEATHS.

COOK.—On board the vessel in Hong Kong, harbour, on the 6th May, James Cook, aged 22, third officer of the British ship *Carribbean*.
CUPPAGE.—On the 21st inst., at Kensington-park-terrace, Notting Hill, Mrs. William Cuppage, of Singapore.
FONTANOROSSA.—At sea, on the 1st May, G. B. Fontanorossa, master of the Peruvian ship *Petrosilla*.

Digitized by Google

KNOOP.—On the 16th inst., at Bremen, Mrs. August Knoop, of apoplexy.
LEGGE.—On the 8th inst., at Brighton, the Hon. Arthur K. H. Legge, Lieutenant Royal Navy, aged 26.
LIDGETT.—On Monday, the 17th inst., at Blackheath, John Lidgett, Esq., No. 9, Billiter-street, city, and Tunbridge-wells, in the 61st year of his age.
MASON.—On the 16th inst., at Fluder House, King's Kerswell, Devon, Lieut.-Colonel Edward Mason, in the 69th year of his age.
NAPIER.—At Hong Kong, on the 1st May, of consumption, George Napier, aged 36 years.
NEWMAN.—May 2nd, at the General Hospital, Hong Kong, John Newman, gunner, Royal Artillery, aged 32 years.
OPPENHEIM.—On the 23rd March last, off Madagascar, on his homeward voyage from Manila, Captain Charles Fox Oppenheim, in his 54th year.
PATERSON.—At Labuan, on the 21st April, suddenly, David Paterson, Esq., late of Singapore.
ROBERTSON.—On the 14th April, off Pulo Condore, the infant daughter of Captain J. W. Robertson, of the barque *Burman*, of London.
YOUNG.—At Hong Kong, Queen's-road West, on the 6th May, James Young, tavern-keeper.

COMMERCIAL REPORT.

JAPAN.

KANAGAWA.—The import market is in a stagnant state, and the quotations nominal. In exports we find the following report:—

TEAS for the home market past month a fair business has been done principally at quotations. Stock estimaments for the month about 2,000 packages at about 700 to 1,000 packages chiefly common kinds.

SILK.—Previous to the receipt of the English mail fair business was doing at full rates; however the unfavourable advices of January 26, as to the position of the home market having checked purchases, dealers became anxious to realise and reduce their demands about 5 per cent. but without any result. Quotations: Ida, $500 to $525; Mybach Nos. 1 and 2, $510 to $525; Nos. 1, 2, and 3, $490 to $505; inferior, $470 to $480; Soda, Nos. 1 and 2, $480 to $500; Nos. 2 and 3, $450 to $470; re-reeled Nos. 1 and 2, none; Nos. 2 and 3, $430 to $460; inferior, $360 to $420; other kinds, $380 to $440. The total export of silk from July 1, 1860, to April 2, 1861, is as follows:—England, 1,676 bales; Shanghai, 7,330 bales; Hong Kong, 191 bales; total, 9,197.

NAGASAKI.—In imports, owning to the scarcity of money in the hands of native merchants, few cash sales are reported, and those of small lots only, for local consumption. The large stocks of imports at Miaco decrease but slowly, and a reaction cannot be looked for until that is effected.

In EXPORTS.—Tea: stocks increasing, settlements do not keep pace with the arrivals, and are reported at about 3,200 packages mostly of very common sorts, bartered against imports, leaving unsold about 760 packages best, at $20 to $25; 960 medium, at $8 to $15; 3,000 common, at $3 to $5 per picul, and 150 Japan fired.

Silk: stocks estimated at No. 1, 55 bales; No. 2, 70 bales; No. 3 (mixed lots), 120 bales. Quotations No. 1, $460 to $480; No. 2, $430 to $450; No. 3, $350 to $390.

CHINA—IMPORTS.

The stagnation reported last mail has continued, trade south of the Yang-tsze being actually destroyed by the action of the rebellion. A good business has, however, been transacted at Chefoo and Teen-tsin, the supplies for which places having been drawn principally from Shanghai have tended materially to strengthen that market. The clearances given do not indicate the amount of business done, as the re-exports are not embraced. By last advices the Chefoo market appeared overdone. The Teen-tsin market, however, continued to exhibit satisfactory signs of strength and capacity.

TIEN-TSIN.—Grey Shirtings, 5¼ to 7 catty, Tls. 2.0.5. to 2.5.0.; 7¼ catty, Tls. 2.6.0.; 9 catty, Tls. 2.7.5.; deliveries, 7,000 pieces. White Shirtings, 56 reed, Tls. 2.3.0.; 64 reed Tls. 2.4.5.; 68 reed, Tls. 2.6.0.; deliveries, 3,000 pieces. Blue Shirtings, Tls. 4. Red Shirtings, Tls. 3.8.0. Tea-cloths, 4½ catty to 5½ catty, Tls. 1.3.0. to 1.4.5; deliveries, 2,100 pieces. Spotted shirtings, white, Tls. 2.4.0.; coloured, Tls. 2.8.0.; deliveries, 1,600 pieces. Chintzes, Tls. 1.4.0.; deliveries, 1,100 pieces. Handkerchiefs, blue and bronze, mace 5 per doz. Brocades, white, Tls. 2.1.0.; coloured, 2.9.0. per pieces; deliveries, 2,700 pieces. Damasks, blue, Tls. 5; assorted colours, Tls. 4.7.0.; deliveries, 800 pieces. Long ells, H.H. scarlet, 9 catty, Tls. 6.5.0. Velveteens, mace, 1s. 8d. per yard. American goods: brown sheetings, 40 yards, 11 catty, Tls. 3; 12 catty, Tls. 3.1.0.; drills, 40 yards, Tls. 2.9.0.; jeans, 30 yards, Tls. 2.6.0. per pieces. Camlets, blue, Tls. 25; red, Tls. 20. Lastings, blue, Tls. 12. Steel, large size, Tls. 16 per picul. Lead, Tls. 6.5.0. per picul. Tin plates, Tls. 5.7. 0. per box. Spelter, Tls. 8 per picul.

SHANGHAI.—There have been no receipts of British or American manufactures during the fortnight. The local demand has been very dull, but the inquiry for shipment North has been good, no less than five cargoes having been shippped to Cheefoo and Tien-tsin since the despatch of last mail. Exclusive of these, the deliverics have been as under:—Shirtings: grey, 38,620 pieces; white, 5,000 pieces; T-cloths, 18,000 pieces; spotted shirtings, 2,850 pieces, at 1.8.6 to 1.8.8 for white, and 2.5.0 to 2.6.5 for assorted; brocades, 300 pieces, at 1.8.8 to 1.9.0 for white, and 2.4.5 to 6.5 for assorted; damasks, 440 pieces, at 4.0.0 to 4.5.0; handkerchiefs, 370 dozen, at 5 mace to 6m. 6c.; chintzes, 4,220 pieces, at 1.1.0 to 1.8.0. American goods:—Drills, 1,760 pieces - stock, 20,000 pieces; sheetings, 5,000 pieces—stock, 25,000 pieces; jeans, 275 pieces—stock, 18,000 pieces; Spanish stripes, 306 pieces; long ells, 220 pieces; camlets, 220 pieces; lastings, 40 pieces.

FOO-CHOW-FOO.—The market is dull. The following sales have been forced during the fortnight:—Grey shirtings, 2,000 pieces, 8¼ lbs. at $2.40; T-cloths, 5,000 pieces, 6½ to 8 lbs. at $1.75 to $2.50. Lead, 350 piculs, at $9.

CANTON.—The stagnation referred to in last report still continues, the sales of the fortnight having been restricted to the following:—Cotton yarn, 242 bales; grey shirtings, 5,000 pieces; white ditto, 750 pieces; Spanish stripes, 96 pieces; lead, 900 piculs; quicksilver, 100 flasks; iron, 1,700 piculs of square and round bar.

HONG KONG.—Business has been dull. The sales of the fortnight are reported as under:—Cotton yarn, 250 bales; grey shirtings, 1,000 pieces; white ditto, 2,000 pieces; dyed and spotted shirtings, 4,000 pieces: Lastings, 190 pieces; bar iron, 1,300 piculs. Tin plates: In moderate supply and good demand. Lead: Saleable. Window glass: stock excessive; clearances have been made for Tien-tsin. Provisions, ship-chandlery, &c., precisely as last reported. Shipments of beef have been made to California. Coals: Low and plentiful here. A contract of 20,000 tons for the Manila Government is likely to help rates. No sales are reported lately. English steam are worth $10 afloat and Sydney about $6. At Shanghai English steam quoted 14 taels; Sydney, 10½ taels.

CHINA—EXPORTS.

TEA.—About six tea clippers have either gone, or are on the way to Foo-chow-Foo, where the new teas are expected in all next month. That port being happily free from the influence of the rebels, is mainly relied upon for the coming season's export. The shipments thence will doubtless be large, but then it must be remembered that the United States and Australia will require a large proportion of them.

SHANGHAI.—Black: Since the date of the last report a few chops of Ning-chows and Ho-how kinds have arrived here from Ningpo, and a small quantity more is still expected. These teas have been placed on the market, and 1,200 chests have been taken at 26 taels, costing fully last home quotations. Settlements to date are now 73,794 chests against 271,435 chests last year at same date. Stocks 2,000 chests Ning-chow, 2,400 chests Hohow kinds, 1,500 chests Old Common Congou, and 550 chests Hoo chow. There are also 1,100 chests of Old and New Flowery Pekoes.—Greens: There is little to notice in this description; purchases have been made to a considerable extent at Ning-po for the American market, and acuve competition has instituted an advance of fully 4 taels on previous high rates. It is reported that stocks at Ning-po are getting into small compass. With respect to operations in this market, there is nothing worth notice. The transactions in Japan teas have now dwindled to a very small figure.

FOO-CHOW.—The only settlements since the departure of the last mail have been the following: Congou, 115 chests and 230 half-chests but mid. flav. at 14 taels to 15½ taels, and 810 half-chests Hohow at 19 taels. These show no alteration on previous rates. The unsold stock upon the market is stated at 7,000 chests Congou, 300 half-chests Oolong, 900 chests Flowery Pekoe, and 1,300 packages Green Teas. The only vessel loading is the *Beemah*, and she will wait for the new teas.

CANTON.—In country Congous the business has been trifling. Large quantities of new Tayshan leaf have been brought down, and are now under process of manufacture; no settlement reported, but these teas will soon be on the market. Scented teas of the new crop are being prepared apace, and are being offered at 2 taels to 3 taels below last year's rates. In Green Teas a better business has been done. Canton made have been taken to some extent for Australia, and Moyunes for the United States at extreme rates. Further supplies of the latter to the extent of 5,000 packages have come forward.

RAW SILK—SHANGHAI.—A dragging business has followed the receipt of further disappointing news from Europe by the 11th March mail, but notwithstanding the gloomy accounts the dealers have shown greaty firmness, the high prices paid up country and a possible decreased supplo next season, owing to the rebels, having made them reluctant to submit t any loss on their present stocks, which consist mainly of common descriptions, fine qualities being very scarce. For the latter fully last quotations have been paid, both of Tsatlees and Taysaams, whilst for inferior and common sorts a reduction of 10 taels per picul has been submitted to. Low qualities are abundant. The reports of the new season's crop are satisfactory, but it is too early to form any correct opinion as to the out-turn. The weather is most favourable, and it is reported that the rebels will be willing to accept a tax on the coming crop, not exceeding what has hitherto been exacted by the Mandarins. Tsatlees, No. 1, none; do. 2, 420 taels to 430 taels per picul; do. 3, 400 taels to 410 taels do.; do. 4, 370 taels to 395 taels do.; do. 5, 340 taels 360 taels do.; Hangchow Tsatlees, 350 taels to 380 do.; Hong Tsatlees, 330 taels to 350 taels do. Yuenfa, 315 taels to 370 taels do.; Taysaams, No. 1, 370 taels to 380 taels; No. 2, 320 taels to 330 taels do.; No. 3, 275 taels to 290 taels do.; Nos. 4 and 5, 240 taels to 265 taels do.; Hainings, 260 taels to 330 taels do.; Sewhings, 290 taels to 330 taels do.; Laeyongs, 250 taels to 265 taels do.; Throwns, 350 taels to 400 taels do.

CANTON.—The rates for the little old left upon the market are lower. The new crop is expected at market in a few weeks. The rates will probably show a decline on last year's opening prices.

DRUGS AND OTHER EXPORTS.—Very little doing. The following are the Canton nominal quotations:—Cassia lignea, $17.50 to $17.75; cassia oil, $275 to $285; cassia buds $38; vermillion, $37; firecrackers, 72½c. per box. Matting: white, four quarter, 10c. to 10½c. per yard; five quarter, 11½c. to 12c. per yard; six quarter, 14½c. to 15c. per yard; red checked, 12½c., 14½c., and 17c. respectively.

MANILA.—Sales of shirtings have been made to a fair extent. Iron is in large supply. In exports—Sugar: Sales of current claye were reported last mail of 10,000 piculs at $4.75 per picul, at which same price about 15,000 piculs more have since been taken, and at which, were tonnage available, a further quantity could be placed. Unclayed descriptions are worth $3.06¼ to $3.12½ per picul, at which rates considerable parcels are engaged to arrive. Coffee: In the absence of any transactions the price demanded is $15.40 per picul, at which, however, there are no buyers. Hemp: Purchasers offer $3.56¼ to $3.62½ per picul, but holders generally are unwilling to accept such rates, and the receipts seem now likely to fall off.

SINGAPORE.—The business done during the past twelve days has been moderate. But in spite of this and of an advance in the rates of freights prices have been well maintained which shows that supplies have, on the whole, been very moderate. There is no inducement for dealers to bring their stuff forward. A rather better feeling has been shown by some buyers since the receipt of London letters of April 10, but generally there is great distrust of any marked improvement in home prices. Business on American account is hardly resumed as yet.

EXPORTS FROM CHINA.

Per Egmont, from Shanghai, April 27, to London. Tea, 537,953 lbs; silk, 898 bales; silk waste, 10 piculs; galls, 26; Cassia Lignea, 18½.

Per Potosi, from Shanghai, April 24, to New York. Tea, 523,183 lbs.

Per Columbian (mail steamer), from Hong Kong, May 1, to London. Silk, 1,972 bales. To the Continent, 151.

Per Eureka, from Hong Kong, May 4, to San Francisco. Sugar, 1,720 piculs; rice, 630; fire-crackers, 600 boxes; China goods, 1,054 packages; beef, 100 barrels; mat-bags, 10 mil.

Per Strathallan, from Canton, May 3, to London. Tea, 620,080 lbs.

EXPORTS FROM SINGAPORE.

Per Christopher Newton, May 14, to Liverpool. Tin, 125 piculs; gambier, 3,541; sago flour, 3,457; pepper, 1,822; white pepper, 20; coffee, 267; nutmegs, 12; mace, 2; gutta percha, 80; rattans, 240; tea, 94 chests.

Per Peter Symons, May , to London. Gambier, 5,019 piculs; black pepper, 2,562; white pepper, 103; sugar, 210; tapioca, 130; coffee, 172; tin ore, 51; sticklac, 107; benjamin, 79; gutta percha, 295; rattans, 99; india-rubber, 115; camphor, 110 cases; merchandise, 30; tea, 250 chests.

Per Bingermeester and Reenen, May 11, to Amsterdam. Gambier, 4,014 piculs; black pepper, 3,179; pearl sago, 303; sago flour, 221; tapioca, 22; gutta percha, 20; tea, 200 boxes; sundries, 4 cases.

Per Procymatia, May 20, to London.—Gambier, 4,100 piculs; black pepper, 2,067, white pepper, 35; coffee, 34; tin, 90; tin ore, 46; gutta percha, 342; indiarubber, 41; horns, 101; hides, 130; gambouge, 4 cases; benjamin, 36; gum gutta, 10; gum damar, 183; shells, 250; merchandise, 44; oil, 5 tanks; tea, 1 box; jameti canes, 14,400.

SHIPPING INTELLIGENCE.

ARRIVED.

At SHANGHAI.—From Bordeaux: April 27, Antonia Terry.

At HONG KONG, MACAO, and CANTON.—From London: May 5, Ethereal; 7, Georgiana, Fiery Cross; 8, Sultana. From Liverpool: 4, Invincible; 5, Jeddo (str.). From Hamburg: 9, Amazone. From Newcastle: 4, Ashmore. From Cardiff: 7, Cornelia Mathilde; 8, Orion, Cornelius Gips. From New York: 5, Benefactor.

At BATAVIA.—From Liverpool: May 4, Lettice Catherine. From Holland: April 15, Robertus Hendrikus; 24, Ternate; May 1, Van Galen; 2, Krimpenerward; 3, Doggersbank; 7, Elize Henriette.

At SINGAPORE.—From Newcastle: May 18: Johannes. From Bordeaux: 18, Birman.

SAILED.

From SHANGHAI.—For London: April 27, Egmont.

From NINGPO.—For New York: April 20, Potosi.

From HONG KONG, MACAO, and CANTON.—For London: May 3, Strathallan. For San Francisco: 4, Eureka.

From BATAVIA.—For London, April 27, Shantung. For England: 17, H.M.S. Furious. For Holland: 18, Triton, Nieuw Holland; 30, Princess Charlotte; 5, Shanghai; 6. Admiral Piet Hien; 9, Henriette Maria; 10, Jannetje; 11, Johannes Lodewyk; 12, Paul Johan.

From SINGAPORE.—For London, May —, Peter Symons; 20, Procymatia. For Liverpool: 14, Christopher Newton. For Amsterdam: 11, B. van Reenan.

LOADING.

At SHANGHAI.—For London: Ziba, Sir Ralph Abercrombie. For New York: Dora.

At FOO-CHOW-FOO.—For London: Europe.

At HONG KONG, MACAO, and CANTON.—For London: Carribean, Mutlah, Geelong, Carribean, Flying Spur, Golden Eagle, Veloz, Wild Gazelle. For Europe: F. Westphalia. For Australia: Aden, New Great Britain, Conflict. For Sydney and Melbourne: [illegible]. For San Francisco: Benefactor, Cimber, Dictator, Harbinger, Moonlight. For Bordeaux: St. Cl[illegible].

At MANILA.—For London: Kate, Regina Maris. For New York: Prioress. For Sydney: George Lee. For Melbourne: Anna Digna.

At BATAVIA.—For Hamburg; Princessan Louise. For Holland: Hoffman, Duggersbank, Nyverheid, Vrede, Wilhelmina Lucia, Hendrika, J. H. Ferdinand, Batavier, Ternate, Krimpenerwaard, Huydecoper, Buitenzorg, Augusta.

At SINGAPORE.—For London: Australia, Britannia, Granville. For Hamburg: Titania.

At PENANG.—For London: Lumington.

FREIGHTS AND CHARTERS.

AT SHANGHAI.—To London: tea, £3; silk, £4. 10s. To New York: tea, $15; silk, $25. The supply of tonnage is far below the requirements, every unemployed vessel having been taken up at advancing rates. To Swatow there is a brisk demand owing to the fall in the value of bean cake; and if more tonnage had been available an extensive business would have been done. The charters reported are: to Swatow and back, James Shepherd, 45 days, $3,450; Elizabeth, 50 days, $4,800; Remigius Adolphus, 50 days, $6,500; Emma, 40 days, $3,000. Armistice, for coast of China and Japan, $1,600 per month. Coast and rivers of China, Adriatic, $1,500 per month; Albertine, $1,200.

AT AMOY.—A fair demand in tonnage is experienced at remunerative rates. The Vesta has been chartered for 4 months at $1,253 per month; Ellen Masters for the same period, at $2,000; Henry and Oscar, Dannevirke, each for 6 months, at $1,000 and $1,150.

At HONG KONG, MACAO, and CANTON.—To London, £3 to £3. 10s. The harbour is now overloaded with unemployed tonnage, and is likely to remain so until the new season's Teas come to hand. The Emigration trades have come to a close, the harvest requiring the hands, and the fall in the price of Rice has stopped all further charters for the conveyance of that article. Meanwhile, ships are pouring in, and will either have to seek employment elsewhere or wait for the new season. Amongst the charters reported, are—Carribean and Mutlah, to London at £3; Veronica, Flying Spur, and Fiery Cross, from Foo-chow-Foo for London, rate not fixed. Benefactor to San Francisco, $7,500 in full. Helene, at $1,000 per month for six months; Maria Elizabeth, at $1,400 per month for three months; Norma and Harriet Armitage, at $1,500 per month for four months. The Felix has been sold for $11,500; Aallotar for $10,500; and Champion for $2,700.

At MANILA.—All available tonnage in port has been taken up, and a good deal of produce still awaits shipment which would obtain fair rates.

At SINGAPORE.—To London, £3. 15s. to £4. 5s. Full rates are being offered for Rice and Timber charters, but the arrival of unemployed vessels has been so few that there are none to accept them, and consequently but a small business has been done.

CASUALTIES.

The barque Rhein passed a sunken vessel, on the 28th March, in lat. 8.25 N., and long. 104.25 E., and the captain supposed her to be a large ship as there was only 15 fathoms of water on the ground. A red flag was flying at the main rigging, and everything attached to the mast.

The captain of the barque Friendship reports having passed a large ship's poop with capstan standing, Puly Oby, bearing SS.E., distant about 40 miles.

The Kingfisher, which was reported in our last as sailed from Kanagawa to San Francisco, put in for water *en route* from Hong Kong.

PASSED STRAITS OF SUNDA.

From England and Continent to China: April 25, Ballarat; May 2, Polmaise, Edouard; 6, Challenger; 9, Orixa. To Singapore: 7, Birman; 9, Mayola. To Batavia: 10, Margaretha Johanna, Koning Willem III. From China to England and Continent: 7, Kinnaird; 9, Glencoe; 12, Weymouth. From Singapore: May 3, Champion; 9, Sappho. From Boston to China: April 24, Argonaut. From New York: May 10, Houqua. From China to Sydney: April 25, Arabia. From Batavia to Liverpool: 29, G. B. Carr. To Holland: 28, Christina and Jeannettee; 29, Triton; May 7, Princess Charlotte; 8, Shanghai; 9, Henrietta Maria; 10, Jannetje; 12, Johannes Lodewyk. From Melbourne to Batavia: 10, Therese. From Manila to Melbourne: 8, Peking.

Continental Intelligence.

FRANCE.

The arrival of the Siamese Ambassadors has given rise to an unusual degree of curiosity. A great many stories are told of their odd behaviour at Toulon and Fontainebleau, which seemed s curious to their hosts as their unpronounceable names must have been puzzling to the chamberlains and others charged with the task of introducing them into the Imperial presence.

M. Montigny, who, as we stated in our last paper, has been appointed by the Government to be their cicerone during their stay in France, is about to invite all the Ministers of State and grand officers of the court to a banquet which the ambassadors will give at their apartments at the Champs Elysées.

RUSSIA.

(FROM OUR OWN CORRESPONDENT.)

ST. PETERSBURG, June 15.

Mr. Arthur Nordmann, son of Professor Nordmann, of this university, has just returned from a three years' scientific expedition to the Far East, in which he turned his attention more particularly to the zoology and ethnography of the regions he visited. After spending some months in China, he proceeded to De Castries Bay, wintering at Nicolayefsk. In the summer of 1859 he ascended the Amoor as far as Blagowessensk, a distance of 1,800 wersts, or 1,200 miles, then returning to Kasakowitch, at the mouth of the Ussuri. In the month of August he went up that river in a little skiff in company with the Botanist Maximowitsch to the confluence of the Em, a distance of 300 wersts, returning to Nicolayefsk for the winter. During his wanderings he had abundant opportunities of studying the different tribes inhabiting the Amoor district, whom he pronounces to belong mostly to the Mongolian and Tunguse races. To the north of the Peninsula of Korea he found a few fugitive Chinese, and some banished from their native country for misdemeanours, who derive a precarious livelihood from gardening. The sparsely distributed villages lying between De Castries Bay and Victoria Bay are inhabited by people of the Orotschi race, who live by the primitive pursuits of hunting and fishing. The Island of Sachalin, from the southern frontier to the 50th degree north latitude, is peopled with Giljacs, who inhabit several large villages, whilst the interior is in possession of namadic tribes of Aintzys and Tunguse. The Giljacs, Orotschis, Goldes, Samayrers, and Neydas move about in *nartas*, a kind of sledge drawn by dogs. The Goldes have also horses, and the nomadic Tunguse possess a good many reindeer. All these races, except the Mandschurians, belong to the Bhuddist religion, and believe in sorcery and witchcraft, holding, for the most part, some animal as sacred; thus the Giljacs worship the bear, and the Goldes the tiger. Mr. Nordmann has sent his valuable collections to this country round by sea, whilst he himself returned overland, having travelled from Irkutzk to St. Petersburgh, a distance of 6,000 wersts (4,000 miles), in nineteen days.

The Emperor and family have been paying their usual annual visit to Moscow, during which the lately emancipated serfs on several of the neighbouring estates sent a deputation to His Majesty to express their gratitude, and offer him as a symbol of their homage, according to the custom of the country, a plate of bread and salt. A septuagenarian named Stephen Kusmin Sacharoff, who has performed the functions of starost on the estates of the Countess Chreptowitsch for more than thirty years, and is in possession of an honorary caftan as a distinguishing mark of good conduct, presented the simple offering on a silver plate, inscribed "To the Emperor-Emancipator Alexander II. from the peasants of Moscow and its neighbourhood, in grateful commemoration of the 19th of February, 1861." The Czar was pleased to receive the humble gift with his usual urbanity and good feeling, and gave orders to have it consecrated by the Archbishop of Moscow, and preserved in the museum of that city.

HOLLAND.

(FROM OUR OWN CORRESPONDENT.)

AMSTERDAM, June 23.

The *Staats Courant* contains the following official notification on the subject of privateering:—

"The Minister for Foreign Affairs and the Minister of Justice, duly authorised and empowered by the King, hereby warn all natives of this kingdom to abstain from taking any share or interest in any privateer during the present difficulties in the United States of North America, forasmuch as the Netherlands Government has given its adhesion to the stipulations agreed on by the Congress of Paris in 1856, by which all privateering is abolished, and, therefore, no such acts can be acknowledged or confirmed; on the contrary, all commissions issued and letters of marque and reprisal granted to Netherlands subjects are strictly illegal, and, therefore, this warning is given them that by doing so they render themselves liable to be tried for such offences, and, if proved guilty, will be punished with the utmost severity of the laws. The above-mentioned Ministers further give notice that during the hostilities in North America no privateers, either with or without prizes, will be admitted into any harbour, port, or roadstead belonging to this kingdom, except only in case of accident at sea or driven in by stress of weather, the needful orders having been given to all the different local authorities to act accordingly and to warn off all privateers as may attempt to enter, even by the employment of force if necessary."

The agitation mentioned in my last in favour of a revision of the postal arrangements and the introduction of the penny postage system is still going on throughout the country, and great indignation is expressed against the Upper Chamber of the States General, which with singular inconsistency lately voted a hundred millions of florins for the construction of railroads of very doubtful importance, and now throws out a decidedly useful measure, on the ground that there may be a falling off of 400,000 florins in the revenue during the first year in consequence of the reduction, whilst the experience of all other countries where a uniform rate of postage has been introduced goes to prove that any temporary loss to the revenue is more than compensated in a very few years by increased receipts. The First Chamber, which adjourned after its late lamentable act of disappointing the hopes and wishes of the country, is again convoked for the 25th inst.

Government has now received official accounts of the great extent of the late misfortunes in Netherlands India, which are even more serious than was anticipated. According to these despatches it appears that no less than 1,558 lives were lost, 364 towns and villages with an aggregate of 17,800 houses destroyed, and ten villages so completely swept away that not the slightest traces of their former existence or locality can be discovered. In addition to all this, the total loss of rice and indigo crops and damage done to coffee plantations are very serious, though the amount cannot be reduced to figures.

Rear-Admiral Vogelpoot, the naval Commander-in-Chief of the forces in Netherlands India, has, at his own request, been relieved of his command, and will be succeeded by Rear-Admiral May, hitherto naval aide-de-camp to H.R.H. Prince Henry of the Netherlands.

Mr. J. A. Philipse, the President of the First Chamber of the States General, had a narrow escape last week whilst taking a drive in an open carriage, when the horses took fright and became unmanageable close to the Toll-bridge near the Hague. Aware of the imminent danger he was in, Mr. Philipse jumped out just in time, and escaped with only the fright, but his coachman was dragged into the canal, into which the horses rushed with the vehicle, but was fortunately saved by the toll-keeper, as were subsequently the horses, but the carriage itself was shivered to pieces.

The King has appointed four cadets of the Military Academy and seventy-eight non-commissioned officers of different regiments on home service, who have passed the necessary examination, to sub-lieutenancies in the East India army.

H.N.M. steam corvette *De Vecht*, Lieutenant-Commander Moddermann, hence to Batavia, arrived on the 16th of May in the Roads of Santa Cruz (Teneriffe), and after taking in provisions, water, fruit, wine, and coals, proceeded to her destination. All well on board.

The Dutch squadron fitting out for the protection of the national interests in North America will consist of the steam frigate *Zeeland*, Captain G. Fabius, the steam corvette *Vesuvius*, Lieutenant-Commander J. O. Arntzenius, fitting out at Helvoetsluys, the steamer *Djambi*, the *Apeldoorn*, Lieutenant-Commander Hugenholtz, the sailing schooner *Atalante*, now at Curaçao, and the steam corvette *Cornelis Dirks*, also on that station, which is the point of rendezvous in the first instance. The first-class steamers *Leeuwarden* and *Curacao*, and the fourth-class steamers *Briel* and *Aart van Nees*, all building in the Royal Navy-yard at Vliessingen, are ordered to be accelerated and launched as soon as possible. In naval circles it is rumoured they are intended to reinforce the squadron in the North American waters. The two first were laid down last year, and the two latter early this spring. The *Apeldoorn* having made her trial trip at Nieuwe Deep with complete success—as the official report states, "having attained the

Digitized by Google

great speed of seven and a-half knots under steam alone"—she was swung for the adjustment of her compasses, and steamed out of that port on the 10th inst. for her destination (Curaçao), exchanging salutes with the batteries. The squadron is placed under the command of Captain Fabius, who will hoist his broad pennant as Commodore on board the steam frigate *Zeeland*.

A handsome memorial, consisting of a silver inkstand with suitable emblems and inscription, was presented last week to Mr. J. Munnich, formerly member of the College of Boedelmeesters at Batavia, and now Director of the Society of Arts and Sciences, recently arrived in this country from Java. The memorial was presented by a deputation in the name of the Society for the Advancement of General Knowledge at Batavia.

Government has received advices stating that at the sale of 400,000 lbs. of old copper money put out of circulation, held at Sourabaya on the 15th of April, the whole quantity was sold at 69 florins per picol.

An opportunity is now offered to a certain number of musicians belonging to regimental bands in this country to exchange into the Colonial service under very favourable conditions. They will go out to Batavia with the rank of sergeants of infantry, and receive pay at the rate of 1 florin 20 cents per day, with free clothing, rations, and quarters, whilst promotion is secured to them as vacancies occur, involving a rise of pay to 1 florin 50 cents, and eventually 2 florins per day.

The following gentlemen have been confirmed in their appointments made by the Governor-General of Netherlands India:—Mr. H. de Bruyn to be Director of Public Works, with the rank of Inspector for Netherlands India; Mr. E. Netscher to be Resident of Riouw; Mr. J. Blok to be Resident of Ternate; Mr. C. de Waal to be Secretary of the Government; Mr. F. K. Pahud to be Assistant-Resident of Buitenzorg; Mr. J. A. Arnold to be Assistant-Resident of Siak; and Mr. D. W. Rost van Tonningen to be Assistant-Resident of Madjalengka (Cheribon).

Mr. R. Sehlmächer has received his exequatur as Consular Agent at Sourabaya for the King of Prussia, and for the Free Hanseatic city of Hamburgh.

Baron Sloet van de Beele has been appointed Governor of the Dutch possessions in the East Indies, in the place of M. Pahud, who had resigned.

At the annual rifle match held last week at the Hague both the Prince of Orange and Prince Henry of the Netherlands contended for prizes. The former was unsuccessful, but the latter won the second prize of the match No. 7, distance 150 yards.

The Netherlands Trading Company having advertised for tenders for a further number of vessels under the usual conditions, such vessels to be ready for sea in a port of Holland on or before the 10th of July, and those now on the outward-bound voyage to be placed at the disposal of the Company's factory at Batavia not later than the 10th of November next, the following fifteen vessels have been tendered, and are accepted by the company:—

To sail.	Ship.	Captain.
Rotterdam—	Kortenaar	Glazener.
„	Tonia	Zeeman.
„	General de Stuers	Viersma.
„	Johanna Maria	Dam.
„	Eva Johanna	S. van Bockhove.
„	Maassluys...	S. Post.
Amsterdam—	Vreede	Van der Plas.
„	Christina Agatha	Esink.
„	Laura and Adele	Noel.
„	Ocean	Herdershee.
„	Anthony van Hoboken	Hazewinkel.
„	Anna	J. R. Bok.
Dordricht—	Grootmeester Nationaal	Giesse.
Schiedam—	Loopuyt	Van der Hidde.
Middelburg—	Noordstern	Luteyn.

The company have also been making inquiry for tonnage for the conveyance of a steam engine weighing 17,000 Dutch lbs. to Batavia.

COMMERCIAL.

COFFEE.—Java continues in fair demand, and though prices were inclined last week to turn in favour of sellers, a reaction has succeeded, and it is now difficult to effect orders except at the highest quotations; No. 8 quality of last sale has been paid with 40c., and No. 24 sought for in vain at 39½c. The market both here and at Rotterdam has a rising tendency; 6,100 bags private trade ex *Minister Pahud* and *Brouwershaven* have been sold at 38¼c.

SUGAR.—Some transactions are reported, though not of great extent, and only at a reduction of 1½ to 2 florins on prices of the May sale. A small parcel of 605 cranjangs of Java ex *Minister Thorbecke*, quality No. 14, has been sold at 34½ fl. to be received on board.

RICE commands full prices, but the sales were limited. 4,600 bags Java table rice ex *Louisa Kronprinzess van Zweden* sold at 10 fl., and 827 bags Java paddy ex *Dionisia Catharina*, fetched 8¾ fl., whilst 4,000 bags ex *Helena and Anna* changed hands at 9¼ fl., and 6,100 bags ex *Minister Pahud* and *Geurtje and Maria*, realised from 8¼ fl. to 9 fl., the two latter at Rotterdam.

COTTON has been in brisk demand at rising prices, owing to the difficulties in North America, but the market is now rather easier. At the company's sales last week all that was offered found ready purchasers above the valuation. Amongst the parcels brought forward were 3,629 bales of Comptah, which realised 26c. for ordinary, and 28¼c. to 28¾c. for good middling.

TEA calm, but prices firm.

INDIGO in good demand, and if anything a trifle higher. A few arrivals of Java have dropped in for the private trade since my last, but are not yet in the market.

DRUGS.—Purchasers are looking forward to the company's sales to take place next week, and till then keep out of the market.

TIN.—For the same reason there is nothing doing in this article.

EXCHANGES.—Hamburg short, 35 fl. 5-16c.; London ditto, 11fl. 90c.

In the Stock Exchange a favourable reaction has taken place, and the Two and-a-Half per Cents. have risen to fully their former value, and are now quoted 63⅞ to ¾, ex div.

Spirit of the Press.

THE SUEZ CANAL.

We are in a position to answer Mr. Griffith's question, to which a reply was promised by Lord John Russell, but was not forthcoming. It is perfectly true that "accounts have been received" by ourselves, not by the Foreign-office, "that M. Lesseps has induced the viceroy of Egypt to employ large numbers of natives by forced labour in the construction of the Suez Canal." No one at all acquainted with the history of the great public works of Egypt failed to see that it must come to this at last. Our correspondent speaks of "men brought up in gangs from their villages and made over to the agents of the company," and this at the very season when their crops are ripening, and the task of uniting the Red Sea to the Mediterranean was so uncongenial to them that "a number of men contrived to escape from the train, but were in a few days recaptured and sent back to their taskmasters." Whether this system of impressment can be carried on long enough, or relentlessly enough, to keep down the accumulations of sand in Lake Menzaleh, and to defeat the inveterate tendency of the Isthmus of Suez to widen itself, remains to be proved. What is certain is, that the scheme is being pushed unscrupulously and puffed unblushingly, and that the tactics foreseen at the outset, and against which we have so often warned our readers, are now being actively practised. The results actually achieved may be learnt from M. Lesseps' own report "*sur l'etat actuel des travaux dans l'Isthme.*" They consist in the erection of a wooden jetty and tramways at Port Said, as well as of workshops and dwelling-houses for the workmen, in the introduction of dredging machines and other apparatus, in the construction of a small aqueduct, and a system of earthenware pipes for the supply of fresh water. One-sixth of the total estimated expense of the undertaking has already been laid out, before any one of the physical obstacles has been encountered that led Robert Stephenson to pronounce the scheme not absolutely impracticable (as has been insinuated), but ruinous as an investment. There is one point upon which Mr. Griffith touches that has been the subject of much misrepresentation. We have been taken to task pretty roundly for discouraging a scheme of universal beneficence on grounds of self-interest, and it was tacitly assumed at the late meeting at Paris that what terrifies us is the probable success of the undertaking. There cannot be a greater mistake. It was, perhaps, natural that when the Mediterranean was openly talked of as a French lake, and Bonaparte avowed his intention of making Egypt a province of France and a basis of operations against our Indian Empire, a corresponding spirit should be developed in this country, and the duty of forestalling the designs of France and demanding guarantees for our right of way to the East should be urged somewhat boldly. These vague ideas have here passed away with the dangers out of which they arose, and the Overland Route, secured to us by treaties, and much less valuable to us for military purposes than for those of peaceful communication, is our only privilege in Egypt. If a canal were opened, it would be closed by convention, if not by nature, against ships of war of all nations, and nothing but a system of differential tolls, or some other violation of Egyptian neutrality in favour of France, could prevent our reaping the chief advantage of it. It is not, therefore, the success of the enterprise that we have to dread. If this were all, we should be well content to leave it as an engineer's question, and, reserving our own opinion, to accept the decision of the majority. At all events, we should be careful to conceal an opinion so likely to kindle the jealousy of our rivals, and Lord Palmerston would have been the last man to commit the indiscretion attributed to him by Mr. Griffith. What, then, is the real peril apprehended by English statesmen and studiously kept in the back ground by the corps of *diplomates et ingénieurs* of which M. Lesseps is the head? It is simply that under cover of this canal, whether it be destined to succeed or to fail, France may be tempted to aggrandise herself in Egypt at the expense of the Pasha's purse and the Sultan's sovereignty, and to the detriment of those great European interests involved in keeping the "Gates of the East" in the hands of a permanently neutral Power. We do not wish the Egyptian Government to be put under such obligations to an ambitious ally that it cannot extricate itself without making improper concessions to its creditor. We do not wish Egypt to be treated by France as the Jews were by the Christian Princes of the Middle Ages, till it is so impoverished by the process that the company, which already holds a large tract of land, or some more powerful body claiming to represent it, may assume the attitude of a mortgagee in possession. We do not wish a dependency of the Porte to become the focus of French intrigue and the tool of French dictation. These and like dangers, be it observed, are attached, not to the completion of the enterprise, but to its commencement and prosecution; they are not future, but present. The attitude of England in this matter is analogous to that of a Parliamentary Opposition. The project has been undertaken contrary to the advice of our engineers and in almost ostentatious hostility to our interests, and the position of

Digitized by Google

antagonism to it into which we are thus thrown is strengthened and justified by the artifices that have been used to bolster up its financial unsoundness. Everything that has hitherto transpired confirms the objections which have been urged from the first. These objections were founded on the enormous expense of construction, the almost insuperable difficulty of forming and keeping open the harbours at the two outlets, the disadvantage of competing with vessels of a comparatively small draught against ocean steamers, especially considering the dangers of Red Sea navigation, the exorbitant transit dues that could alone keep such a canal in repair, and the impossibility of obtaining any adequate securities for its maintenance in the present political condition of the East. Even if our objections to the scheme were as selfish as it is the policy of M. Lesseps to describe them, it is absurd to trace the *liaison* of France with Egypt to anything that has happened in the present century. A plan for the occupation of Egypt was offered to the French Government by Leibnitz, and the First Napoleon prophesied that it must sooner or later belong to France. Ever since he suited the action to the word by organising the Egyptian expedition, with its contingent of *savans*, to survey and report on the course of Necho's Canal, French enthusiasts have never lost sight of Egypt as a field for ambition; it looks so inviting, and would figure so well in the map between Algeria and Syria, over whose populations the Marquis de Larochejaquelein lately informed us that France had exercised a "direct protectorate" from the age of St. Louis. We know what the temptation is, for we resisted it after the expulsion of the French, as we resisted the Emperor Nicholas's overtures to Sir Hamilton Seymour, and we suspect there are some schemers at Paris who think us fools for our pains. These gentlemen belong to a party that has scarcely cared to conceal its ultimate aims. To detach Egypt from the Porte by treating with her as an independent Power, to patronise her civilisation, and to establish a permanent right of interference in her concerns, was the policy of this party even under Louis Philippe, and when France was compelled to repudiate her engagements with Mehemet Ali in 1840 M. Thiers' words were—"Our influence in Europe is lost for ever." Far be it from us to insinuate that any such designs are consciously present to the minds of the promoters of the Suez Canal, or that any rectification of the French frontier is contemplated in that direction. We merely indicate the reasons that oblige us to watch the proceedings of this company with some anxiety.—*The Times.*

Parliamentary Intelligence.

HOUSE OF LORDS.

PARSEE APPOINTMENTS TO THE MEDICAL SERVICE.

(21.) Lord MONTEAGLE presented a petition from certain British subjects, natives of India, complaining of their exclusion from the competitive examination for appointments to office. He called the attention of the House to various Acts of Parliament and to the Royal Proclamation to the natives of India, admitting the eligibility of the natives to hold offices the duties of which they were qualified to perform. In spite of these enactments, he said certain Parsee gentlemen who had studied medicine in this country had not been admitted to the competition for the appointments of the Army Medical Department. He only claimed for them what he believed to be their right, and contended that the law ought not to be perverted by official prerogative.—Lord HERBERT admitted the high character and acquirements of these gentlemen, but could not admit their claim to be appointed as surgeons to our line regiments in any part of the world. He stated that he had referred the matter to Dr. Gibson, Director-General of the Army Medical Department; Sir John Liddell, Director-General of the Naval Medical Department: and Sir R. Martin, a gentleman of great experience in India, who confirmed him in his opinion that these gentlemen were physically disqualified for the situations to which they aspired.—Lord ELLENBOROUGH bore the highest testimony to the qualifications of the native doctors, preferring them, if in India, to those of Europeans. He did not see any reason why native medical officers should not be employed under the general direction of Europeans, as they would fairly meet the wants of the service. After a few remarks from Lord CLANRICARDE and Lord DE GREY and RIPON, the petition was ordered to lie on the table.

HOUSE OF COMMONS.

EAST INDIA COUNCIL, &c., BILL.

(13th.) On the order for the second reading of this Bill, Mr. VANSITTART said he did not see why the revenues of India should be saddled with the expense of three separate councils. He objected to the multiplication of local boards or councils, of which there were too many already.—Mr. LAYARD looked at the Bill with much favour. In two respects, he thought, it would do good to India; it would make our Government more respected, and give an opportunity for the employment of natives in the way he wished to see them employed. He approved local councils, which, among other advantages, he said, would prepare the way for separate Governments; and he strongly urged the policy of allowing natives a voice in the legislation, instead of their being, as at present, ignored.—Mr. AYRTON condemned the whole scheme of the Bill, and recommended Sir C. Wood to frame another more consonant with the simplicity of Asiatic ideas, undoing all the errors of the past.—Other members spoke and raised objections to the Bill, to which Sir C. WOOD briefly replied. The Bill was then read a second time.—(20th.) The several clauses in this Bill were discussed in Committee and agreed to.

EAST INDIA (CIVIL SERVICE) BILL.

(13th.) On the second reading of this Bill, Mr. VANSITTART objected that the effect of the Bill would be to do away with the competitive system of examination for the Indian Civil Service, and that it would give rise to a considerable amount of jobbing. He cited the opinion of Lord Macaulay in favour of continuing the service as a close service, confined to covenanted servants. The measure, he said, would be as unpopular among the natives generally as in the Civil Service.—Mr. LIDDELL admitted that the Bill might prove a death-blow to the present system of the Civil Service, and that it placed in the hands of the Secretary of State a vast amount of patronage. He was, however, of opinion that there were considerations which outweighed these objections, and, on the other hand, he suggested powerful recommendations of this modification of the system, which would strengthen our rule in India.—Mr. LAYARD approved of the principle of admitting natives to a participation in the public service, but admitted there were many obstacles to their proper preparations for the duties of the service.—Lord STANLEY said that the general feeling of the House appeared to be that the principle of the Bill was sound, but that the details required careful supervision. He thought that two securities, that of limiting the admission to the civil service to persons who had been seven years in India, and the acquisition of languages, would be found efficacious. These, with the confirmation of the Secretary of State of any appointment by the Governor-General, and also by the Crown, would operate as checks on undue exercise of patronage and jobbery.—The debate was continued by several members, after which Sir J. ELPHINSTONE moved an adjournment.—This was negatived, and the Bill was read a second time.

INDIAN PRIZE MONEY.

(18th.) Sir H. VERNEY asked the Secretary of State for India whether interest was paid by the Calcutta Treasury on the prize money paid into it; whether any interest was paid on jewels and other booty before it was realised; and whether, in future, when booty was taken in India, which it was anticipated would be prize, officers in command of corps were to send in at once the nominal roll, without waiting for the Royal warrant declaring such booty to be prize.—Sir C. WOOD said that interest was paid on prize money in the Treasury at Calcutta at the rate of 5 per cent. No interest was paid on jewels or property not in the state of money. He could not say when the payment of interest on the money would cease, or whether interest would be paid on jewels, &c., when realised. No notice had been given of those questions, and it was impossible for him to answer in detail questions of this kind without the opportunity of informing himself. With regard to the preparation of prize rolls, officers in India had been desired as regarded the present prize to prepare them some time ago, and directions had been given that for the future prize rolls should be made out without waiting for the declaration of prize.

THE SHIP "CAMILLA."

(18th.) Mr. WYLD asked the Secretary to the Admiralty whether any inquiries were made regarding the reported wreck of Her Majesty's ship *Camilla* (Commander Colville), in the Japanese waters, in September, 1860, and the result of the inquiries.—Lord C. PAGET said that three reports had been received at the Admiralty from Admiral Hope, which left no sort of doubt as to the fate of the *Camilla*. What placed the fate of the *Camilla* beyond a doubt was the fact that she went on a coasting cruise towards Yedo, and that when doubts were raised as to her fate, one of the steamers of the Indian Government was despatched in search of her. The whole of the coast and creeks in the direction of which she was supposed to have gone were carefully examined, both by the steamer and by boats which were sent by the native princes, but no remnants of the unfortunate vessel were found. There was a report that one of her masts had been discovered, but it turned out that it belonged not to a man-of-war, but to a merchant vessel. The last report of Admiral Hope confirmed the opinion that she had been lost, and that view was strengthened by the fact that a foreign man-of-war, which must have been somewhere in the neighbourhood of the *Camilla*, and was exposed to the dreadful typhoon which raged along the coast, was also lost about the same time.

GRANT'S COOKING APPARATUS.

(20th.) Gen. BUCKLEY said that the *Adelaide* transport took out to China, by order of the Secretary of State for War, Captain Grant's cooking apparatus sufficient for 5,000 men, in order to test its efficiency for troops in the field, but the waggons were never landed, though three written applications were made by Captain Milward, who had the charge of them. He asked the Under-Secretary for War whether the *Adelaide* did not take the apparatus to Hong Kong, and whether they were in use there now.—Mr. T. G. BARING said that Sir Hope Grant had informed him that he did not think it necessary to land the apparatus referred to. He could not say whether they were at present in operation.

RED SEA TELEGRAPH.

(21st) Captain JERVIS asked the Chancellor of the Exchequer whether it was not advisable that the question of the Red Sea Telegraph should be referred to a select committee, in order to inquire whether it might not be worth while endeavouring to render it available?—The CHANCELLOR of the EXCHEQUER considered that to appoint such a committee would be to devolve on a portion of the House of Commons duties which belonged to the Executive Government, by whom they could, on the whole, be best discharged. Therefore he did not think a reference to a select committee would be the best plan of dealing prospectively with the subject. As to the financial part of the question, the Government had now under consideration a mode of arrangement with the persons who at present formed the company in charge of the telegraph; and he hoped they would soon be able to adopt some measure on the subject. It did not appear that there would be any advantage in the present company retaining the telegraph. The Board of Trade were preparing a report as to what measures should be taken for making a thorough examination of the different parts of the cable on the spot.

THE SUEZ CANAL.

(21st.) Mr. D. GRIFFITH asked the First Lord of the Treasury whether accounts had been received that M. Lesseps had induced the Viceroy of Egypt to employ forced labour in the construction of the Suez Canal, and moved for a copy of any despatches which had passed upon the subject. He characterised the forced labour in question as slavery more unjust and severe than that of the negroes in America. He accused the noble lord with having, by a long course of policy in regard to Egypt, allowed French influence to become dominant in that country, and thus contributed to this result.—No reply was given to this question in consequence of Mr. Griffith being out of order.

THE REBELLION IN CHINA.

The *Illustrated London News*, in a notice of our policy towards the "Rebels," has a paragraph which our merchants in China may think it necessary to repudiate. We will at once do so. We know of no "countrymen of ours of wealth and position" who have done aught else than represent the rebellion as an intolerable obstruction to legitimate trade. There are some who have made the rebellion suit their private gains, but they are not, we are happy to say, of "wealth and position." The following is the paragraph above alluded to:—"We have reason to know that certain countrymen of ours of wealth and position in China, have, to serve their own purposes, very much misled public opinion here with regard to the character, designs, and power of the insurgents. Our Government has been acting too much under information gathered from such sources. The expedition up the Yang-tsze-kiang sheds a new light on the matter, and will, we hope, induce some change in our opinions and our policy."

MEMORIAL FOR THE CONTINUATION OF THE FORTNIGHTLY MAIL TO CHINA.

(Lying for Signature at the "London and China Telegraph" Office.)

To be presented, (it is expected) on the 29th inst., by a deputation consisting of—

S. GREGSON, Esq., M.P., Chairman of the East India and China Association;

THOMAS DENT, Esq.; (Messrs. Dent, Palmer, and Co.)

WALTER BUCHANAN, Esq., M.P.; (Messrs. Buchanan, Hamilton, and Co)

Sir STUART DONALDSON, Chairman of the Australian Association;

HARVEY LEWIS, Esq., M.P. for Marylebone, and Chairman of the Universal Marine Insurance Company; and several other gentlemen interested in the China and Australian trades.

To the Lords Commissioners of Her Majesty's Treasury.

Respectfully showeth—

1st. That your memorialists have seen with much concern and surprise the resolution which has been sanctioned by your Lordships in regard to the discontinuance, after the current month, of the bi-monthly mail which for some time past has been despatched on the 20th and 26th of each month.

2nd. That the second monthly mail alluded to now costs the country, after deducting the amount which the line has yielded in postages, about one half of the total subsidy, or £12,000 per annum, that is, £500 for each homeward, and £500 for each outward mail; and your memorialists, therefore, earnestly hope that, considering that so many millions sterling have been expended in furthering our trade with the Chinese, the comparatively trifling outlay involved in this second monthly mail will not be deemed worthy by your Lordships of being put in comparison with the numerous commercial advantages it affords; and your memorialists feel confident of the support of Parliament in passing the necessary vote.

3rd. That your memorialists beg to submit that the sums now derived from postages will, by reason of the augmentation in correspondence caused by the extension of our relations with the Chinese from the opening of so many new ports, be so far increased in amount as to cover a large proportion of the deficit in the subsidy alluded to.

4th. That your memorialists further desire to remind your Lordships that China and the Far East will not be the only sufferers by the discontinuance of this mail, but that the withdrawal of the subsidy will disorganise the mail service between those countries and Australia, as according to the contract the mail steamer for Australia starts from Galle on the 21st of each month, and the second mail steamer from Singapore, China, &c., arrives at Galle on the 16th, while the mails from Australia are due at Galle on the 16th of every month, and the steamer for Singapore, China, &c., leaves on the 21st with the English mails of the 20th and 26th of the preceding month.

5th. That your Lordships have always evinced so great a liberality in the promotion of free trade, and in facilitating communication with all quarters of the globe, that your memorialists believe it is only necessary that a fair representation of this proposed exception should be made in order to stop what must otherwise be stamped as a retrograde and injurious act for a liberal Government in the present day.

6th. That though several other weighty arguments in proof of the great value of our trade with the Far East, and the revenue it produces, might well be urged by your memorialists in support of their views as to the necessity of continuing the mails as heretofore, they would briefly ask your Lordships to accept the subjoined signatures as evidence of the fact of such bi-monthly mail being indispensable for the proper conduct of the vast and increasing trade with the Far East.

And your memorialists will ever pray.

LONDON, THURSDAY, JUNE 27, 1861.

COMMERCE WITH WESTERN CHINA.

WE are accustomed to say that the late treaty with China has thrown open the whole Empire to British enterprise and trade. That mighty river the Yang-tse, to the lower part of which we have access, is, we think, to form the medium for such a commerce as the world has not yet seen. We feel like conquerors surveying a vast territory which has been won by their arms, and with the expectation of conquerors we long to gather in some of the golden spoil with which the country abounds. All this is natural enough. It would be difficult to estimate at too high a value the prospective advantages afforded us by the late treaty. We regard it, indeed, as the dawn of a bright day, not for Great Britain alone, but also for China itself. But it is only the dawn, and these faint streaks of light upon the Eastern sky will merely deceive us if we regard them as anything more than harbingers of the future. Western China with its five inland provinces, containing an intelligent, industrious population of more than 100,000,000, is as yet unknown to the merchant, and it is from travellers alone that we have received such knowledge as we possess of its productions and capabilities. Our readers will remember that some months ago we referred to an important project of Captain SPRYE'S for bringing this territory within the range of British commerce; that gentleman, in conjunction with his sons, has expended much labour and money on the praiseworthy object of making us fully acquainted with the western portion of the Empire. In the month of December last Captain SPRYE read a valuable paper on Western China before the President and Members of the Royal Geographical Society. To that paper we briefly referred at the time, intending on its publication in the Journal of the society to take it up more fully. The length, however, of the document has prevented the publication of more than a very brief and imperfect abstract. We have, therefore, applied to Captain SPRYE for a perusal of the manuscript, and that gentleman has kindly granted us permission to make what use of it we please.

The paper is replete with interest; it is a concentration of valuable facts on a very novel topic, and it will be necessary to recur to it again and again in order to do it full justice. In the present article we can only find space to record the general impression left upon our mind by a careful perusal of the document. In the map prepared by Captain SPRYE to illustrate his project a line is drawn through China in the one hundred and eleventh degree of longitude, which divides as fairly as may be the Eastern and Western halves of the empire. This Western portion has, as we before said, been hitherto untouched by us, and some careless or prejudiced writers have declared that it is altogether unworthy of our attention. To this baseless assertion Captain SPRYE replies by a mass of evidence which is as wonderful as it is convincing. He proves that the five provinces which comprise Western China proper, namely, Yunnan, Kweichew, Syechuen, Chensi, and Kansu, and occupy the same latitudes as from Canton to Peking, not only abound with the raw materials, which are of most service to us, but that the people are so actively engaged in commerce and so fully alive to its value that nothing remains for us but to open a way to it from Pegue, in order to create a new field of commerce to British enteprise. We say a *new field*, because it has been more than once affirmed that Captain SPRYE'S design would draw off the trade from Singapore and from the eastern ports. No one who reads the document before us can entertain this suspicion for a moment. There can be no clashing of interests here, and on the broad principle that trade begets trade, we believe that the more intercourse we can open with Western China, the more we shall have with the eastern seaboard of the country. On another occasion we shall show why we deem it so important to trade with Western China, and, in doing this, shall state with some minuteness the productions of that portion of the empire. At present we can but describe very briefly the means we have of gaining access to it.

By the acquisition of Pegu and Martaban, England has extended her frontier to within about 250 miles of Esmok. This space is in the occupation of two Burman Shan princes, the Tswabwua of Kiang-tung, and the Tsenwibua of Kiang-Hung, both of whom have expressed their desire for the establishment of a route between British territory and China across their States and through their capitals. From Rangoon to the frontier of Burmah is 250 miles. There Captain SPRYE proposes to establish a commercial emporium, which would be within reach of the Chinese traders and caravans which already travel from Esmok to the Burman and Siamese Shan towns of Moni, Mokmai, Mobye, Zimmai, &c. From thence he would eventually carry on a tram or railroad to Kiang-Hung, where already Chinese merchants are engaged in traffic with the Laos States and the Shan States of Siam and Burmah. To this point the Chinese may be safely trusted to bring their merchandise if a wider market were opened for them; and as these provinces abound with noble rivers and vast inland lakes and every facility for transit, we should attract to the spot the rich treasures of Yu-nan and Se-chuen, and at the same time gain that substantial footing in the country which at the present moment it is especially important to hold, since France, by the occupation of Saigon, has secured the command of the mouths of the Cambogia, and may herself easily advance to Esmok by the navigation of that noble river. It will be seen, however, by a reference to the map, that the possession of Pegue gives us an advantage over our neighbours, which it would be a grievous folly to forego. Gladly would we touch, did space permit, on several other topics mooted by Captain SPRYE, and especially on his proposed land telegraphic communication with China viâ Esmok. At present, however, we can only say that, while dissenting from some of the observations thrown out in the document, we agree entirely with the aim of the writer, and think that his statements deserve the deep consideration not onl of merchants, but of statesmen.

THE ISLAND OF BANKA.

THE Island of Banka, called by the natives China Batta, and formerly known by the name of York's Island, might, from its size, situation, climate, and productiveness, easily support a million of inhabitants instead of the fifty thousand by whom it is at present populated. Favourably situated on a great maritime high road, the importance of the position is becoming every year more known and better appreciated, and since the establishment of regular steam communication between Java and Singapore in connection with the bi-monthly Overland Mail to and from Europe, it has become one of the principal stations of the Indian Archipelago. The island with its dependencies, Billiton and Lepar, contains an area of 7,500 English square miles, by far the greater part of which is uncultivated, though with a very little attention and labour it might be made to produce all the fruits, vegetables, and other commodities which grow in a tropical clime.

Granite is the predominant formation, which besides containing some large veins of auriferous quartz, is more particularly rich in tin ore, so that during the last ten years the annual quantity of this article obtained averages 70,000 piculs, or nearly 5,000 tons. In the absence of all scientific mining operations the ore is obtained by simply digging it out of the rich alluvia, soil, in which it is embedded at a trifling depth from the surface, whilst the process of sinking shafts and blasting it from the solid rock is alike unknown and unsuited to the lazy habits of the workmen, who, in this instance, are exclusively Chinese.

The severe prohibitive system and love of monopolies, in which the Dutch so much delight in the administration of all their fertile and valuable colonial possessions, presses with a

Digitized by Google

heavy hand on this beautiful island, crippling alike the energy and welfare of its inhabitants, and the due development of its natural resources. No attention is paid to the means of land communication, and the roads are in such a neglected state as to be nearly impassable, so that all carriage or waggon traffic is out of the question, and the produce of the country has to be transported down to the coast by the tedious and expensive process of loading it on the shoulders of the natives, the Government requiring a certain number from each village to be placed at the disposal of the authorities for that arduous service, which has so exasperated and disgusted the natives, that rather than submit any longer to such tyranny, large numbers have quitted their homes for ever, preferring to retire to the mountains and the jungles beyond the reach of their task-masters. Under these circumstances small coasting vessels are employed to carry provisions and keep up the communication between the principal town and the different outposts; though it would not be difficult to make and keep in repair roads throughout the island, as there is an abundant supply of granite for materials, and the surface of the country generally, and with very few exceptional chains of rocky mountains, offers no engineering difficulties to be surmounted by art. The produce of the gold might become an object of importance, and be not only self-supporting, but afford a considerable profit if undertaken by scientific persons, and worked with the appliances of modern inventions and improvements. The island contains, moreover, rich iron ores, the iron made from which is of very superior quality. Pure rock-crystal is found in large quantities embedded in the quartz, which might be used in the manufacture of glass, whilst it is not unlikely, judging from the analogy between the natural features of the island, and those of the mining districts of Borneo, that diamonds abound to a considerable extent. Excellent fuel is to be found in the inexhaustible beds of lignites or fossil wood, and in several of the marshy valleys turf may be cut in any quantity.

The vegetation is peculiarly rich and varied, the island being celebrated for its many and valuable descriptions of wood. The immense and beautiful circular table slabs, formed of one single horizontal slice of a gigantic tree, the wood of which is hard and takes a brilliant polish, are much esteemed and in request for exportation. Amongst the most valuable trees are forests of ebony, iron-wood, emballo, teak, and the red wood called *kaju ringas*. The djatti tree, so common in Java and Sumatra, is comparatively scarce in Banca. Attempts have been made to introduce the *tectonia grandis*, but without much success; there are, however, large forests of different sorts of oak. Amongst the palm-trees indigenous to the soil the Nipa and the Nipong are mostly esteemed. In the jungles ratans are more common than bamboo.

The general surface of the country may be called wavy or undulating, large and elevated mountains being very few. The highest peak on Banka is that called Maras, near the Bay of Klabat, in the northern part of the island, calculated by Dutch naval officers to be 3,000 feet above the level of the sea. Manopin or Menumbing, a mountain in the north-west district, at the foot of which is built the town of Muntock, is distinguished for its picturesque groups of granite peaks. All the mountains are clothed with verdure to their very summit, many of them even with the Casuarina, the tropical representative of our northern needle-leafed trees.

For the most part the coast is low and swampy, but densely covered with forests of mangrove. With but few exceptions where rocks project into deep water, the sea recedes gradually and the coast is fringed with fine sand of dazzling whiteness, composed of pulverised coral and shells. The usual clearness of the sea is destroyed at the mouth of the rivers for many miles by the water discharged being discoloured to a deep tan colour, probably resulting from the decomposition of vegetable matter washed down during their course.

Among the valuable shells found along the beach, that of the *scalaria vera* is greatly esteemed. The sea abounds with delicious fish of all kinds, amongst which those in greatest request are the kakap, lidda, and ikan kuissi. The natives are in deadly fear of the crocodiles (of the species *C. biporcatus*), which are frequently twenty feet long, and so voracious that they often attack the natives whilst peaceably fishing in their canoes.

In the forests are found several descriptions of snakes, many of which are poisonous, such as the python, and there are also flying or winged serpents. Large scolopenders and scorpions abound in the chinks of old wood. Gigantic spiders spread their nets between the branches of the forest trees, and there are myriads of ants and termites. The butterflies are not distinguished for their beauty or brilliant colours; the largest species is the Atlas, and then the Memnon, Morpho, Phidippus, Vanessa Arsinoë, Nymphalis Apatarina, Merope, Danais, Juventa and Hegesippa; Noctua, Pasiphaë and Deltoidea.

The native animals and birds are not numerous. The former are represented by three species of deer and two of pigs, with a few monkeys. The birds are confined to snipes, woodcocks, herons, and others that frequent marshy places, whilst the forests abound with several species of pigeons, many of which have the most varied and dazzling plumage; among the latter are the beautiful green pigeons, as well as the *columba rosacea* and *C. jamba*.

The native inhabitants of Banka are believed to belong to the Batta race, with whom they have a striking similarity, both in outward appearance and mode of life. Formerly Banka was an appurtenance of the Crown of Matjapahit, and at a later period belonged to the Princes of Palembang, and has thus been subject for centuries to Javanese and Malay influence. On the discovery of the tin ores, for which the island is so celebrated, in the year 1709, the Chinese were attracted to the spot, and they now constitute a full third of the whole population. At the beginning of the present century the inhabitants were successively visited with various direful calamities, such as civil war, attacks from pirates, starvation from the failure of the crops, and various diseases, especially typhus and small-pox, which committed great ravages and decimated the population; but since 1817 the numbers are on the increase, and they are at present estimated at 50,000 in round numbers.

Banka is divided into nine districts, which are under the civil jurisdiction of a Dutch resident, who is also military commandant of the island. The districts are Muntock, Jebus, Blinju, Sungiliat, Marawang, Bankalpenang, Toboalie, Koba, and Sungiselan. The natives being of a peaceful disposition, but few troops are required to keep them in order, and the whole military force consists only of a battalion of about five hundred men, with some artillerymen for duty at the small redoubts that are erected in the principal towns. The neighbouring sea is more dangerous than the land, being much infested by pirates, who are unusually enterprising, bold, and cruel. The Dutch have therefore some armed prauws to keep them in check, besides a few Government steamers that continually cruise off the island. The mail steamer which runs twice a month between Batavia and Singapore necessarily passes by the island and touches at Muntock on each trip up and down, to land and ship the mails and passengers.

Literature.

The prospectus of a valuable work has just been issued, entitled "Results of a Scientific Mission to India and High Asia," by H. A. and R. de Schlagintweit (Trübner and Co.) The two surviving brothers, Hermann and Robert Schlangintweit, have now been for two years engaged in its preparation, which, comprehending as it will the results of three years' laborious and successful travels, will, doubtless, prove of the greatest interest to the scientific world. The work will be in nine volumes, with an atlas in three, and the completion of the issue is expected to take three years. To Messrs. Trübner and Co. we are also indebted for the first volume of Dr. Legge's work, "The Chinese Classics," which is to be completed in seven volumes. The printing of the volume is the work of Chinese workmen in Hong Kong, and reflects great credit on them.

The Du Chaillu controversy is not yet exhausted. In the *Athenæum* Dr. Gray publishes a reply to M. Du Chaillu's recent explanation concerning the alleged discrepancy of dates in his work, charging him with directly contradicting facts in his own book. It is obvious that the interest and curiosity of readers do not diminish—the work having reached its tenth thousand. Meanwhile, the following conclusive answer has appeared in *Punch*:—

"Says Gray to Du Chaillu,
'I don't want to rile you,
But you set up preposterous claims.'
Says Du Chaillu to Gray,
'I don't care what you say,
For—you called Dr. Livingstone names.'"

In Amsterdam a work has just appeared, entitled, "De Openstelling van Japan," &c.—a collection of published and

Digitized by Google

hitherto unpublished documents and narratives, brought together by his Excellency the Minister of State, J. B. J. Van Doren.

From Messrs. Ward and Lock we have received a very valuable little volume, which all overland travellers will do well to purchase. It is entitled, "Hints to Travellers by the Overland Route to India, Australia, and China." Nothing can be more complete than this cheap but useful manual. In a very lively, genial manner all the points of interest connected with the route are described, while at the same time that minute and practical information is afforded which the traveller finds so useful.

"Macmillan's Magazine" for this month contains a clever but decidedly "strong" article on "The American Crisis." From the same publishers we have also received Nos. 1, 2, and 3 of "Tracts for Priests and People." The first, *Religio Laice*, is by Thomas Hughes, whose "Tom Brown at Oxford," by the way, will be concluded in the July number of the "Magazine." The second, by the Rev. F. D. Maurice, is entitled, "The Mote and the Beam," and may be regarded as a homily on "Essays and Reviews," or rather on the effects which the publication of that work has produced. The third is by the Rev. Francis Garden, and is entitled, "The Atonement as a Fact and as a Theory."

Japan, the Amoor, and the Pacific; with notices of other places comprised in a voyage of circumnavigation in the Imperial Russian corvette "Rynda" in 1858-60. By Henry Arthur Tilley. 1861. Smith, Elder, and Co.

Happy the man who, like Mr. Tilley, is free to accomplish a pleasure voyage round the world. Happy the man who, like him, can enjoy thoroughly, and describe with artistic craft, every curious sight, and each strange incident he met with on his travels. We can well imagine the glee with which the author of this lively volume must have received the unexpected invitation to sail in a Russian man-of-war on a two years' voyage, and though only two days were allowed him to prepare his outfit and to bid adieu to kith and kin, we are not surprised to learn that he was ready to start for Paris on the second night, and that on the third day he was passing through Brittany on his way to Brest. There he was welcomed by Commodore Popoff, the commander of a little Russian squadron, consisting of two corvettes, mounting eleven guns each, and a clipper gunboat. Their destination was the Amoor river, but the commodore had liberty to touch at whatever ports he pleased, and it was his pleasure to touch at a good many. We do not propose accompanying Mr. Tilley and his companions to every spot which they visited or explored before reaching Japan. On that country the main interest of the book is centered, and there our readers will find, as we have found, that an hour or two may be passed very agreeably in Mr. Tilley's company.

In one respect Mr. Tilley is unfortunate. The Bishop of Victoria has been in the field before him, and what can the man do that cometh after the king? Dr. Smith's "Ten Weeks in Japan," altogether belies its unassuming title, and may be regarded as the most satisfactory work on the country ever written by an Englishman. Having read that volume so recently, it is difficult despite of Dogberry's assertion, to avoid a comparison between the travellers, especially since they necessarily touch on so many common points of interest. We must confess that we should not care to consult Mr. Tilley on any of those serious topics which arise out of our recent treaty with Japan. The view he takes of our commercial relations with the country is superficial, and, as we believe, unsound, and the remarks he casually drops on Missionary labours savour of ignorance and indifference. The only advantage Mr. Tilley can discover from the opening of Japan is that our ships will be able to refit and victual in safety at the different ports. The only suggestion he can throw out with regard to Missionary enterprise is, that it should be confined to one denomination of Christians; whether Papist or Puritan matters not in his eyes so that the two do not clash. But it is not necessary to endorse Mr. Tilley's opinions in order to enjoy the record of his travels. If we cannot accept all his views, we can at least relish his descriptions of Japanese life and customs. In these descriptions Mr. Tilley has an eye to picturesque effect, and indulges legitimately enough in a little innocent word-painting, yet we do not detect any important exaggeration, and we accept his narrative as an agreeable and amusing addition to Anglo-Japanese literature.

Mr. Tilley agrees with the Bishop of Victoria and with every man who is familiar with the two races, that the Japanese greatly surpass John Chinaman in intellectual vigour as well as in physical development. The ardour with which the natives of Japan labour to acquire knowledge is extraordinary in a country which is under the sway of stereotyped customs and despotic laws. If it were possible fully to study the constitution under which the Japanese live and have lived for ages, we might perhaps find the secret of this anomaly; as it is, we can only read the riddle by the presumption that the inherent vitality of the race is too strong to be destroyed by what Mr. Tilley terms "the most absolute despotism that has ever existed." The people are all able to read and write, the bonzes being the chief instructors, and the author affirms that in Japan literature is as common, and books are as widely circulated and much cheaper even than in Germany. This to an Englishman seems even stranger than the assertion recently made by Mr. Marryat that Copenhagen is a more literary city than Edinburgh. Singular, too, it is to see how willing and, indeed, anxious the people are to gain knowledge from Europeans, and to apply it to practical purposes. On medicine, natural history, and other important subjects, they not only have numberless works of their own, but also cause translations to be made from the writings of Europeans. At the same time "all are eager to understand the language of the Western stranger, and to reap every possible advantage from his presence." Japanese art possesses a strong affinity to that of the Chinese; there is in both the same curious and delicate workmanship, the same manifestation of patient labour, the same lack of imagination, the same disregard of what we consider the rules of good taste. Yet in many respects the Japanese are a-head of their rivals, and we ourselves need not be ashamed to gather suggestions from them. Now, for instance, that the paper duty is repealed, it would not be unwise of some enterprising speculator to study the art which they have brought to such marvellous perfection, and to take out a patent for paper umbrellas, and paper great coats. We do not recommend their windows of oiled paper, yet it would be worth while to know how they fix it on the frames with a glue which is insoluble in water. In their persons the Japanese, although they use no soap, are among the cleanest people in the world; yet strange to say, while showing an almost Dutch aversion to dirt within their houses, they will allow the most noxious refuse to collect together on the outside. Of their moral impurity Mr. Tilley gives much the same account as the Bishop of Victoria, but he evidently takes a much more lenient view of it. Indeed, in one place he speaks of the naked modesty of Japan, and affects to regard the Japanese as unsophisticated children of nature. Yet his description, somewhat too minute perhaps, of the tea houses, and divers other particulars in which he indulges, prove that so far from being innocent, the natives of Japan are, as Dr. Smith declares them to be, the most licentious people in the world.

In conclusion, we must own that whatever may be the shortcomings of Mr. Tilley's work, it is one likely to meet with many readers, since it has the great charm which overpowers a number of defects, of being vivacious, picturesque, and amusing.

SOURCES OF COTTON SUPPLY.

The following is a list of new places from which cotton has been shipped to this country during the past twelve months. These places are either entirely new as places of cotton export, or are ports were the export of cotton has revived, owing, mainly, or at least in part, to the agitation created through the efforts of the Manchester Cotton Supply Association:—St. Marc, 75 bales; Smyrna, 700; Tutucorin, 18,924; Cochin, 1,125; Colombo, 4,822; Beypoor, 575; Ceylon, 280; Bimlipatam, 12; Calcutta, 1,004; Paita, 611; Lagos, 1,741; Accra, 10; Alexandretta, 600; Demerara, 838; Trinidad, 131; Colon, 39; Port-au-Prince, 398; Fayal, 1,838; Paraiba, 2,485; Aspinwall, 93; Larnaca, 8; Casma, 800; St. Vincent, 150; Mossel Bay, 62; Rangoon, 40; Minatitlan, 500; Hayti, 67; Cape of Good Hope, 146; Port Phillip, 13; Algoa Bay, 7; Port Elizabeth, 12; Para, 46; Havana, 8; Belize, 42; Tobago, 2; Kingston, 3; St. Domingo, 32; Lisbon, 212; St. Thomas, 65; Barbadoes, 65; Montserrat, 2; Grenada, 227; Natal, 25; Callao, 552; Freetown, 2; Puerto Babello, 1,340; Savanilla, 26; Valparaiso, 15; Rio Grande del Norte, 380; Sydney, 1; St. Kitts, 10; Arica, 103; Port Louis, Mauritius, 85; Lima, 4; Cape Coast Castle, 8; Port Madoc, 2; Grand Saline, 24; and Sierra Leone, 1; making a total of 58 new, revived, or increasing ports from which we are now receiving cotton.

A VISIT TO THE GREAT WALL OF CHINA.

A long and interesting letter from Mr. E. B. Fonblanque describing a visit to the Great Wall of China appeared in *The Times* of the 17th inst. Mr. Fonblanque was accompanied by Mr. Dick. They returned to Peking, carrying with them a brick in token of the success of their journey.

Naval and Military.

Mr. George John Armytage, whose promotion to the rank of Lieutenant in the Navy has just taken place, passed his examination at Portsmouth in a brilliant manner. Lieutenant Armytage was with the late lamented Captain Vansittart, of the *Magicienne*, at the disastrous attack on the Peiho Forts, in the summer of 1859, and on that occasion was wounded. His gallantry during the whole affair was very conspicuous, and when Colonel Lemon, C.B., of the Royal Marines, was badly hit, this brave young fellow went to his rescue, and succeeded in carrying him to the boats.

By the death of Major-General Eaton Monins the following promotions will take place:—Colonel L. A. During to have the rank of major-general; Colonel Joshua Simmons Smith to be major-general; Lieutenant-Colonel J. M'Neill Walter, C.B., 35th Regiment, to be colonel; Major W. S. Aslett, Royal Marines, to be lieutenant-colonel; and Captain Adam Campbell, Staff Officer of Pensioners, to be major in the army.

The following are the whole of the reinforcements the Government has decided on despatching to India during the ensuing month, to augment the cavalry and infantry regiments serving in the Bengal, Madras, and Bombay Presidencies:—For Calcutta.—Three officers and 130 men of 1st Battalion 19th Regiment, 3 officers and 60 men of the 1st battalion 20th Regiment, 1 officer and 20 men of the 35th Regiment, 1 officer of the 52nd Light Infantry, and 4 officers and 120 men of the 77th Regiment, from Chatham; 1 man of the 27th Enniskillens, 3 officers and 26 men of the 34th Regiment, 2 officers and 30 men of the 54th Regiment, 2 officers of the 38th Regiment, 1 man of the 88th Connaught Rangers, and 2 officers and 70 men of the 97th (Earl of Ulster's) Regiment, from Colchester; 4 officers and 70 men of the 90th Light Infantry, from Canterbury; 1 officer and 35 men of the 42nd Royal Highlanders, and 6 officers and 20 men of the 92nd Highlanders, from Perth; 4 officers and 80 men of the 1st battalion 13th Prince Albert's Light Infantry, and 3 officers and 50 men of the 89th Regiment from Fermoy; 1 field officer, 3 subalterns, and 170 men of the 48th Regiment, from Cork, and 1 man of the 7th Hussars, from Kneller-hall. For Bombay: Two officers and 26 men of the 17th Lancers, from Maidstone; 2 officers and 120 rank and file of the 1st battalion 4th King's Own, from Chatham; 2 officers and 70 men of the 56th Regiment, from Colchester; 1 officer and 50 men of the 72nd Highlanders, from Aberdeen; 4 officers and 60 men of the 33rd (Duke of Wellington's) Regiment, and 2 officers and 50 men of the 95th Regiment, from Fermoy; and 2 officers and 22 men of the 1st battalion 18th Royal Irish, from Buttevant. For Madras.—One officer of the 52nd Light Infantry, from Chatham; 1 officer and 46 men of the 1st battalion 1st Royals, from Colchester; 1 officer and 100 men of the 3rd battalion 60 Rifles, from Winchester; 3 officers and 80 men of the 74th Regiment, from Aberdeen; 1 officer of the 68th Light Infantry; and 3 officers and 20 men of the 69th Regiment, from Fermoy; 1 man of the 21st Fusiliers, from Wellington; and 2 men of the 1st (the King's) Dragoon Guards, from Kneller-hall. For Kurrachee.—Two officers and 100 men of the 71st Highlanders (Light Infantry), from Stirling; and 2 men of the 7th (Princess Royal's) Dragoon Guards, from Kneller-hall.

The *Army and Navy Gazette* says:—"It is not unlikely that Major-General Hastings Doyle, now Inspector of Militia in Ireland, will be the successor of Major-General Trollope in the command of the troops in Nova Scotia."

Colonel Key, late of the 15th Hussars, will succeed to the command of the Cavalry Brigade in the Dublin district upon the approaching retirement of Major-General Parlby.

We lately announced the appointment of Sir Frederick Nicholson, Bart., to the post of Conservator of the River Thames. There is an old adage which, we think, applies to Sir Frederick—"It never rains but it pours." This very fortunate officer has been selected by the First Lord of the Admiralty to succeed Captain the Hon. J. R. Drummond at Woolwich, as Commodore-Superintendent. The salary, according to a Parliamentary paper now before us, attached to the office is £1,182. 10s. There is a very excellent house fitted up as a residence for the Commodore; and, on the whole, a more desirable post for a young officer desirous of living near London could not well be desired.

The rumour to which we alluded in our last issue respecting the possibility of another vacancy occurring at the Board of Admiralty has been unhappily confirmed by the death of Rear-Admiral the Hon. F. T. Pelham, C.B. The lamented admiral has been succeeded by Captain Charles Eden, C.B., who in his turn will be replaced by Captain Frederick, and the Junior Naval Lord will be Captain the Hon. James R. Drummond, C.B., now Commodore-Superintendent at Woolwich. The Board of Admiralty therefore, as re-constituted, will be—His Grace the Duke of Somerset, Rear-Admiral the Hon. Sir Frederick William Grey, K.C.B., Captain Charles Eden, C.B., Captain Charles Frederick, Captain the Hon. J. R. Drummond, C.B., Samuel Whitbread, Esq., M.P., First Secretary the Right Hon. Lord Clarence Edward Paget, C.B., M.P., and Second Secretary William G. Romaine, Esq., C.B.

By a circular memorandum, dated the 8th of June, 1861, His Royal Highness the General Commanding in-Chief, with the concurrence of the Secretary of State for War, has directed that on and after the 20th inst. the bounty for all recruits for the army shall be reduced from £2 to £1, which is to be paid to them on joining their corps in cash, without deduction.

A new Royal warrant has been issued by command of Her Majesty in lieu of the warrant promulgated on the 27th of October, 1860, for the purpose of regulating the grant of pensions and allowances to officers of the land forces on account of wounds and injuries received in action.

Orders have been received at Devonport for converting the *Ocean*, 91, laid down as an ordinary screw steamship, into an iron plated ship.

Captain H. E. Edgell, C.B., late of the *Retribution*, has been appointed a naval aide-de-camp to the Queen, vice Captain Stopford, promoted to flag rank by the death of Vice-Admiral Sir R. Saunders Dundas, K.C.B.

A heavy reserve of 100 and 40-pounder Armstrong guns, and ammunition is in readiness for transport from Woolwich Arsenal for Malta, and also a reserve of ammunition for Bermuda, Halifax, and Jamaica.

CHANGES AND PROMOTIONS IN HER MAJESTY'S ARMY AND NAVY.

MAJOR BRABAZON'S VISIT TO PEKING.

Major Brabazon leaves England by this mail for Peking in order to investigate on the spot the circumstances connected with the assumed death of his son, and to test the validity of the statements which have been made on the subject in this country. Whatever may be the issue of his journey he will at least have the satisfaction of feeling that he has done the utmost a father could do to recover tidings of his lost son.

DIPLOMATIC JAW-BREAKERS.—We are happy to introduce our readers to the various members of the new Siamese Embassy in Paris:—Phayasiphiphat, first Ambassador; Phranaivai, second Ambassador; Phran-Arong, third Ambassador; Phoxai, son of the second Ambassador; Larnandie, apostolic missionary and interpreter to the Embassy. The attachés are Louangimmontri, Naisapvixsai, Louangxapxapsonrin, Khounmahasit, Munchapkphichit, Naivat, Nai-iem, Naisombomu, Khounchonchenthale. The names of the attendants, Naihont Khonnraxasombat, Munnarapakdi, Naiyon, Nainet, Monthanong, Naipia Munchindarak, Nunhannaroung, Naithim, Nainiem, Naided, Mimphakdisatra, and Naisonn.

WE understand that Dr. MacGowan is about to lecture in Dublin under the auspices of the Lord Lieutenant, Archbishop Whately, and other distinguished persons.

MR. D. A. LANGE, the English representative of the Suez Canal Company, has sailed for Alexandria, to examine the actual condition of that project, and to report the material and political results thus far observable.

SIR JOHN BOWRING is at present staying at Leghorn, and his health is much improved.

GAS FOR HONG KONG.

We mentioned in our last that a company was in formation for the purpose of erecting gasworks, and singularly enough the last China mail brings us the following strong call for this commodity:—

"We are in fact behind the time: we want gas! Our eyes are at length opened to this fact, and for all the benefit they derive from the present antiquated plan of lighting with oil, we might just as well close them. We enunciate no very original idea when we say, that in order to have gas, we must have a gas company—at least that is the form of producing and controlling this element, which has hitherto been found to be, commercially, the most convenient. Here we have the money and the enterprise, and not so far away we may find the materials and the little skill needed to manage them. If the community determine to introduce gas into the colony, little more remains to be done. No doubt many of us consider we get on very well with oil—a fine, subdued, mellow light! No worry about it—the coolies manage all that. Then there is the trouble with gas; boys would be continually letting it escape, or perhaps, viewing it as a pleasant perfume, they might always be applying their handkerchiefs to the jet and turning it on—in fact, it would turn the existing state of affairs upside down; perhaps even the Josses might frown on such an innovation, and

Digitized by Google

all the domestics strike work. Well, these are all considerations; but to our view they are only so many cobwebs to be swept away. Let gas once be introduced, and the present clumsy lighting apparatus will be sent into our lumber cellars. The evening atmosphere of sitting-room or boudoir will no longer be tainted with an ever-present sickly, noisome, smell of oil; no suspicion of filthy smoke will longer haunt the domestic firmament; no regular breaking of globes and funnels will rank among the minor annoyances of life. By such an exchange we should obtain brightly-lit streets for the present thief-inviting slums; radiant chandeliers for three or four smoky moderators; in a word, light for darkness, gladness for gloom. This is all the more urgent a consideration, seeing that, unlike such countries as England, we have throughout the whole year, long, long evenings. Every argument that could be employed in favour of gas at home is of double weight here, since we have twice the amount of darkness. There is, of course, in the commencement of such an undertaking, some little expense to be encountered. We must lay down pipes, and somebody must pay the "piper." But surely, with a community like that of Hong Kong, that difficulty is not insurmountable; and we commend this scheme to the attention of the public, not so much as something new, but as something that must come some day, and ought to be taken up now. The simple form of doing the work by a company, with shares that are within the reach of all (say $100 each), appears to be the most feasible method of setting about it. Let us not leave the matter to our successors when it is so easily within our own power to accomplish it."

Monetary and Commercial.

The last Bank of England returns show that the position of the Bank is steadily becoming stronger. There has been an addition to its resources both under the head of Deposits and of Securities, the latter having matured to some extent, and the void not having been filled up by the commercial demand, the reserve of notes has accordingly increased more than half a million. The addition to the Coin and Bullion is likewise considerable, notwithstanding the continued shipments to America.

The *Money Market Review* says:—"The Discount Market has not experienced any alteration of striking importance. The market must be expected to continue rather tight until the quarter is turned, and the mercantile engagements maturing in the first week in July tare met. Considering the contraction of trade which is taking place in all directions, and the fact that, notwithstanding the drain to America, gold is accumulating in the Bank, there is an impression that the money market will then become easier, and that a reduction will take place in the rate of discount, which, at present, remains at the Bank of England at 6 per cent."

Public funds have been particularly dull, Consols ranging at 89¼ to 90 (ex dividend). Yesterday there was an increased dulness, owing to expected sales being effected by the insurance offices, to meet the losses incurred by the great fire in Tooley-street, which are estimated at nearly £2,000,000. The 8,000 casks of tallow were insured at £200,000. Other articles consisted of hemp, cotton, rice, tea, and saltpetre.

The Southern States of America propose to withdraw all the paper currency of the Confederate States, and to substitute a currency of Confederate State bonds of as low a denomination as $20. The amount of such Confederate currency is to be determined by the amount of cotton, tobacco, rice, and sugar which planters and others may place in the hands of the authorities. When the independence of the Confederate States shall have been recognised the project is to ship the produce on account of the Confederate Government, and on the returns of the shipments being made, to cancel an equal amount of bonds in circulation. The old currency, it is argued, might then be restored, if deemed advisable, and trade would fall into its accustomed channels. This remains to be seen, and is, of course, open to considerable doubt.

In the midst of the torrent of vituperation poured out against England by the journalists and letter-writers of the United States, a most satisfactory exception may be cited in the case of the *New York Commercial Advertiser*, the oldest evening paper in that city. It has had several logical articles on the question of privateering and belligerent rights. The failure has been announced of Messrs. Sampson and Tappan, East India merchants, of Boston; and of Messrs. Waldo, Barry, and Co., a dry goods house at New York. Both firms held a good position, and the liabilities are considerable.

On the difficulties of our position with the Dis-United States the *Economist* illustrates the following as probable to occasion a *casus belli*:—

"Charleston is blockaded by the *Niagara* steamer. She announces to all comers the existence and efficiency of the blockade, stops and warns off several ships, which respect her warning and sheer away. But, wanting coal, or having some other errand on hand, she sails away for two or three days, and the blockade, though nominally continuing, is virtually raised, and according to the law of nations ceasing to be effectual, cannot claim respect. During this interval of unquestionable freedom, a British ship comes out. The *Niagara*, which has returned to her station during the night, catches sight of her at early dawn as she sails away and captures her. Is the capture good or not? Clearly 'Yes,' say the Americans, for the blockade had been announced, and the *Niagara* came back in the nick of time. Clearly 'No,' say the English, for the blockade had been raised, the blockading force having been withdrawn.

"Again, a British barque with a valuable cargo, bound for Savannah, is intercepted by the United States steamer. She is told by the captain—"Savannah is blockaded; you must go elsewhere." She believes the statement and obeys the order, loses her market, and at great expense prolongs her voyage. It then appears that the statement was false; Savannah was not blockaded at all, except in the wish and fancy of the Yankee captain, and there was nothing to prevent the barque from going to her original destination, and disposing of her cargo according to the merchants' orders. On learning this deception she demands compensation for her loss. We are just in demanding this; will the Americans be just enough to concede it?—and who is to assess the damage?"

The Times, in noticing the attitude of the Northern States, says:—

If there be anyone who believes it possible for England to avert the suspicions of the Americans by fairness of dealing, or to escape their abuse by the most studied courtesy, let him read the files of American newspapers that have arrived by the last mail. When it is remembered that for six months every organ of the English Commonwealth—the Queen in her Speech on opening the Session, the Ministers every time that a question has been asked, the House of Commons, and the Press, have, with remarkable unanimity and constancy, abstained from uttering a word which might encourage the Secessionists, the storm which is now raging against us throughout the Northern States seems as strange as it is scandalous.

Messrs. Glass, Elliott, and Co. have received a telegram from Ajaccio, in Corsica, informing them of the successful laying of a submarine telegraph cable between that place and Toulon, in France. The length of the line is 205 miles, and the depth of water 1,500 fathoms.

Mr. D. A. Lange, the English representative of the Suez Canal Company, proceeded in the last steamer for Alexandria, with a view to examine the actual condition of that project, and to report faithfully the material and political results thus far observable.

The market for silver has experienced a further decline, the bars having been sold at 60⅜d. per oz. standard. The dollars held over from the previous steamer, in expectation of a rise, have been sold at 59⅞d. per oz., being a slight fall from the price at which the greater part of those brought by that vessel were sold on the 5th inst. There is but little doing in this coin.

The sums which have been from time to time advanced by the Government of India for payment of the guaranteed interest to the railway companies amounted at the end of last year to £5,299,709.

Government have fixed the *Earl of Windsor*, the *Ghenghis Khan*, the *Wacousta*, and the *Mary Pleasant* to convey Chinese emigrants from Hong Kong or Whampoa to British Guiana at £14. 14s. up to £14. 17s.

NEW TELEGRAPH ROUTE TO CHINA.

Messages can now be sent from London through Russia to China, the route being to Kasan, thence *vid* Kiachta to Peking either by post or by Estafette from Kasan to Kiachta, and thence to Peking. The charges are as follows:—A message of twenty words to Kasan, £1. 2s.; Kasan to Kiachta, twenty-three days' post, and to Pekin, fourteen days, 8s. If sent by Estafette, the time saved will be eight days, but the expense increased by £26.

The *Pera*, from Southampton on the 20th inst., took out in gold to Alexandria, £3,500; to Ceylon, £5,000; to Madras, £3,792; in silver, £10,000. To Calcutta, £126,079; to Hong Kong, £19,325; to Foo-chow-Foo, £2,000; to Shanghai, £32,013; making a total of £12,292 in gold, and £189,417 in silver.

ARTICLES OF IMPORT.

TEA.—We have but little feature of interest to report during the past fortnight. The trade have bought only to supply immediate requirements, and at about previous prices for those kinds in demand.- For other descriptions the firmness of holders has prevented any reduction in prices, but they are with difficulty supported. Latterly the dulness has been increased by the large quantity advertised for sale on the 25th and 27th inst., amounting to 42,000 packages, of which 6,200 are for sale without reserve. At the great fire at Cotton's Wharf from 20 to 30,000 packages of Tea are reported to be destroyed; a large portion believed to be Tayshan Congous. In low and fair to good Common Congous business has been very limited. The latter we quote 11d. to 11½d. per lb.; Common to fair flavoury kinds under 1s. 3d. per lb. continue difficult of sale, also Common to fair Ho Hows. Good Ning Chows and second class Monings and Wopaks have met with a fair inquiry, and sales have been to a moderate extent at previous prices. Good and fine Kaisows continue in request at fully former prices. A chop of fine Moning Hop Fat has been placed on the market, and a portion reported sold at 2s. 3½d. per lb. Tayshans remain without alteration. In Souchongs and Oolongs business has been limited. 850 chests Flowery Pekoe are advertised for sale without reserve for to-morrow, which will establish quotations for these kinds. Common Scented Capers have been in demand at the late advance. Good and fine are also wanted. Scented Orange Pekoes remain much as before. Green Teas are becoming very scarce, and the sales made have been at advanced prices for all descriptions, the lower grades shewing the greatest rise. Canton make have been saleable at former rates. At the sales yesterday 20,246 packages passed auction, and 3,368 packages were sold, 2,100 being without reserve. The sales went very heavily, and 837 packages Flowery Pekoe sold rather easier.

SILK.—The periodical public sales are concluded. The quantity offered was 1,600 bales Bengal silk, 7,000 bales China, and 1,000 bales Japan. As too frequently happens, the whole were allowed to pass without biddings, except for some few parcels of the Japan, which were announced as "to be sold." These were generally of inferior quality and in very small "breaks," and realised proportionately low prices. The general market continues very quiet, but the uncertainty and fear as to the result of the European crop induce importers to be firm.

SUGAR.—Rates are somewhat higher, and the market quite firm. Sales of 3,400 bags clayed Manila at 34s. 9d.

COFFEE.—Prices somewhat lower. Sales of fine ordinary to low middling plantation at 67s. to 70s. 6d.

RICE.—Market very flat, and floating cargoes meet with no buyers Sales of Java at 12s. 6d. 13s. 9d.

PEPPER.—Black steady, but not in strong demand; and of 1,914 bags Singapore at auction half sold at 3½d. to 4d. per lb.; of 3,877 bags Penang three-fourths sold at 3¾d. to 3¾d., and 977 bags Batavia, all sold at the same prices. White dull; 144 bags Singapore at auction sold at 5⅝d to 5½d. per lb. for middling, and 64 bags Penang, all retired.

SAGO.—Holders are asking 4s. to 5s. advance on last rates. Flour: 1,047 bags sold at 15s. 6d. to 16s.

SPICES.—Cinnamon, quotations remain: 1st 1s. 7d, to 2s. 4d., 2nd 1s. 2d. to 1s. 9d., 3rd 11d. to 1s. 4d., and 4th 7d. to 9d. per lb. Business unimportant. Cassia Lignea: Flat; 140 boxes at auction retired. Cassia Buds: No sales. Cloves: 2 cases Penang sold at 1s. 0½d. for good. Mace: 37 cases Penang and 1 case Singapore sold at auction at 1s. to 1s. 1d. for good reddish, and 8d. to 11d. for ordinary to good red. Nutmegs: 161 cases Penang and 16 cases Singapore at auction, nearly all sold at 3s. 3d. to 3s. 6d. per lb. for good to fine bold, and 1s. to 1s. 8d. ordinary small to good medium.

HEMP.—Of 1,940 bales (Manila) brought to auction, upwards of three-fourths sold, Quilot at £33 per ton; fair to good roping, £20. 7s. 6d. to £21. 10s. for the sound, with the damaged (a large proportion) upon corresponding terms.

COTTON.—Business moderate, and latterly prices have receded ¼d. per lb. Transactions have included good fair to good Sawginned at 6¼d. to 6⅜d, very middling old to good fair new Oomrawuttee 5⅜d. to 5½d.; middling to middling fair Dhollero 5¼d. to 5⅜d.; middling fair old Broach 5¼d.; and fair Mangarole 5¼d.

JAPAN WAX.—Saucers being scarce have realised former prices, but blocks have sold for less money. Of 330 cases at auction three-fourths sold at 52s. to 56s. 6d. per cwt. for ordinary to good block.

TOBACCO.—East India sorts are likely to advance in price. Manila is still inquired for, and none in the market.

TIN.—Market flat, and no sales of consequence to report.

GAMBIER.—Market flat, and of 2,320 bales at auction about one-third sold at 16s. per cwt. for fair sound. CUTCH: Steady. Of 1,698 bags at auction about three-fourths sold at 22s. to 22s. 6d.

MISCELLANEOUS.—Indian Rubber: Dull. 156 packages at auction, half sold at 1s. 1½d. to 1s. 2d. Camphor: A parcel of 100 tubs of Japan at auction mostly sold at 230s. Sapanwood: 46 tons Siam at auction sold at £8, and 15 tons Batavia sold at £7. 12s. 6d. to £8. 7s. 6d. Soy: 68 hogsheads at auction, all retired. Mother-o'pearl-shells: 200 cases Manila, all retired. Singapore: Scarce. Star Anniseed: Market flat and no sales. Sticklac: 58 bags middling at auction sold at 68s.; Block, 55s. to 55s. 6d. Gum Benjamin: Of 201 cases Sumatra at auction, half sold at £11 to £11. 15s. per cwt. for good second quality; £6 to £6. 2s. 6d. fair third; and £3. 7s. 6d. to £3. 12s. 6d. fourth. Damar: Quiet: of 256 cases at auction, a few only sold at 41s. 6d. to 45s. per cwt. for middling to good picked. Gamboge: Very quiet. Two cases sold at £4 and £5 per cwt. for middling pipe. Rattans: 24,545 bundles of Singapore and 6,110 Rangoon sold at 1s. 9d. to 5s. 8d. per 100. Elephants' Teeth: Stale and defective are worth 20s. to 80s. per cwt. less. Vermillion: No inquiries. Galangal Root: 50 bags at auction sold at 19s. to 19s. 6d. for fair. Cubebs: 154 bags at auction, part sold at £7. 10s. per cwt. for fair but stalky. Dragons' Blood: 63 cases at auction, half sold at £4 to £6. 10s. for ordinary to fair lump. Galls: 456 cases Japan sold at 38s. to 44s. for ordinary to middling stalky. Rum: 700 puncheons common West India sold at 1s. 9d. to 1s. 10d.

UNITED STATES.

NEW YORK, June 10.

TEA.—Holders are firm, and offer but small lots.

SUGAR.—Market dull, and no sales of East India.

RICE.—The demand for this article has improved in consequence of supplies for the army.

HEMP.—The market for Manila is dull, and quotations nominal at 5c. to 5¼c.

TIN.—Banca Tin is firmly held at 26c. Straits dull, at 23c. to 24c.

INDIA-RUBBER.—There have been no sales for several weeks.

COFFEE.—Moderate demand, but prices maintained. Sales of Java at 16c. to 17c.

ARTICLES OF EXPORT.

IRON.—The quotations in London are for Welsh bars, £6. 0s. 0d. to £6. 10s.; nail rods, £7 to £7. 17s. 6d.; hoops, £8. 15s. to £9. 5s.; sheets, single, £9. 5s. to £9. 15s.; Staffordshire bars, £8 to £8. 10s.; rails. £5 to £5. 10s.

STEEL.—Swedish keg, £17.

COPPER.—Sheet and sheathing, 11d.; yellow metal, 9¼d.

TIN.—125s. for block; 126s. for bar. Tin plates, best charcoal, I.C., 20s. to 30s. per box.

LEAD.—English pig, £20 to £21. 10s.; shot, patent, £24; sheet, £21. 10s.; spelter, £16; zinc, English sheet, £23. 10s. to £24; quicksilver, £7 per bottle.

EXPORT OF BULLION TO CHINA. &c.

The following return shows the shipments of bullion from Southampton during the present year by the P. and O. Company's mail steamers:—

	Gold.	Silver.
Shanghai	—	£308,551
Foo-Chow-Foo	—	24,993
Hong Kong	—	206,084
Manila	—	—
Singapore	12,219	64,393
Penang	—	18,624

FROM MARSEILLES.

	Gold.	Silver.
Shanghai	—	49,840
Hong Kong	—	26,220
Singapore	3736	6,776
Penang	—	44
Foo-Chow-Foo	—	4,460

MANCHESTER MARKETS.

The market has continued as before, dull and in favour of buyers, who, however, are watching their opportunity of coming in at low prices as stocks proceed to accumulate with each succeeding week. Manufacturers are altogether discouraged with the absence of demand, and only maintain prices on the question of cotton supply. Spinners see no prospect before them but that of lessening their productions, which they are now but beginning to do in isolated cases, and that most unwillingly. The class of yarns represented by Blackburn 32's are ¼d. to ½d. per lb. lower than last week.

COMMERCIAL POSTSCRIPT.

CITY, THURSDAY AFTERNOON.

The steamer *Malacca* will take on board the remaining portion of the cable for the Malta and Alexandria line in about a fortnight. The *Rangoon*, noticed in our last, arrived at Malta on the 19th inst.

ARRIVALS NOT INCLUDED IN TABLE.—June 18, off Crookhaven, from Manila, Glendower, for Cork, with loss of sails, &c. 24, at London, from China and Barbadoes, Red Riding Hood; at Liverpool, from Singapore, Mary Spencer; off the Wight, from Singapore, Lincelles. 26, at Deal, from Penang, Zenobia; off Portland, from China, Caroline; at Gravesend, from China and Dublin, York; from Akyab, Empress; in the Downs, from Sourabaya, Crouch Brothers; 23, off Portland, from Padang, Lewe van Nyenstein; 23, at Brouwershaven, from Banjoewanjie, Johanne en Geertruida, J. C. Schotel, and Henriette Elizabeth Susanna; 26, at Deal, from Macassar, Maria Magdalen; 25, at Liverpool, from Hong Kong, Chevy Chase (s.s.); 27, at Gravesend, from Sourabaya, Corsican Brothers.

DEPARTURES.—June 23, off Portland, for Shanghai, Julia; 20, off the Start, for Batavia, Jeannette and Cornelia; 22, from Liverpool, for Hong Kong, Abeona; 25, from Glasgow, for Sourabaya, Nova Zembla; 16, from off Dungeness, for Batavia, Antonia Petronella; 24, from Cardiff, for Manila, Hero.

SPOKEN.—Osiris (French ship), Brest to Saigon, May 18, 5 N., 26 W.; Johannes Anthonius, Rotterdam to Batavia, May 16, 2 N., 24 W.; Germania, Liverpool to Batavia, May 15, on the Equator, 23 W.; Octavia, for Singapore, May 16, 1 N., 24 W.; Iron Age, Sourabaya to Falmouth, June 2, 39 N., 30 W.; Morayshire, Foo-chow-Foo to London, 35 S., 21.30 E.

LAID ON AT LONDON.—For Hong Kong, Violet; for Shanghai, Fairlight.

At ST. HELENA, May 15.—Elizabeth Antoinette, Bessier, from Java, and sailed for Amsterdam; Onward, Jenkins, from Shanghai, and sailed 16 for New York; Malvina Vidal, Kessel, from Sourabaya, and sailed 24 for Rotterdam. 21, Independence, Thrane, from Canton, and sailed 21 for Havana. 26, Sales de Mendezona, from Manila, and sailed 27 for Liverpool; Catharina Olsson, from Java; Prins van Oranje, Nensing, from Batavia, and sailed 27 for Rotterdam. 27, Rostock Belincke, from Macao, and sailed 28 for Cowes. 28, Mary Shepherd, Budge, from Manila; Carntyne, Cowley, from Maulmain, and sailed 29 for Falmouth. 29, Messenger, Manton, from Macao, and sailed 30 for Havana; Leonidas, Wood, from Canton for Havana; Capella, Large, from Sourabaya for Cowes; Jacatra, Benson, from Singapore. 30, Merchantman, Mitchell, from Canton for London; Zephyr, Devries, from Java for Rotterdam.

Table Bay, April 23, Ouderkirk, A. D. Amstel, Grants, from Banjoewanjie, and sailed 27 for Rotterdam; 26, Sydpolen Fritz from Stockholm, and sailed 18th May for Batavia; May 12, Maria Adolphina, Bloen, from Batavia, and sailed 15 for Amsterdam.

Simon's Bay, April 24, Maria Adriana, Vander Helts, from Batavia; 15, H.M.'s str. Nimrod, from Singapore; 17, H.M.'s str. Roebuck, from Japan.

FREIGHTS AND CHARTERS.

For India, China, and the Cape of Good Hope the tonnage loading is 61,000 tons, and there is not much activity in shipments; 40s. per register ton for India, 65s. for China, and 45s. for the Cape, are the current rates. The troops for Kurrachee and Madras were taken low, and there is keen competition for those to Bombay and Calcutta. Coal freights to India and China are unaltered, and the demand for tonnage is very limited.

Current freights to Shanghai for vessels on the berth, 40s. to 50s. per on weight and meas.; to Hong Kong, 35s. to 40s.; Singapore and Penang, 30s. to 45s.; to Manila, 35s. to 40s.; to Batavia, 45s. weight, 40s. meas.; to Japan, 65s. weight, and 60s. meas.

INSURANCE.

The following are the current rates of premium at Lloyd's, according to the class of vessels, &c.:—To Hong Kong, 40s. to 50s. Shanghai, 50s. to 60s. Singapore, 30s. to 45s. Batavia, 30s. to 40s. Manila, 50s. to 60s. Nominal quotation for Japan, 50s. to 60s.

At Hamburg, for Batavia and Singapore, 40s. China and Manila, 40s. to 50s.

CASUALTIES.

The Mascate, Gefflot, from Samarang to St. Nazaire, which put into Mauritius, February 11, with damage, has been condemned and sold at that port.

Part of the cargo (500 bags coffee) ex Cornelius Wernard Eduard, Bakker, from Padang for Rotterdam, which put into Mauritius April 7, leaky, has been sold there, being damaged.

SANTA CRUZ, May 22.—The Granger (ship), of London, Hanson, from Queenstown to Hong Kong with coals, arrived here May 5, making three inches water per hour, in port. She was surveyed, discharged seventy or eighty tons of her cargo, had her top sides caulked, and sailed for Hong Kong June 12.

The Trimountain, Friend, from Akyab to Bremen, has been towed into Saugor, leaky.

The Mercedes, Croizet, from Bordeaux to Hong Kong, was spoken, 10th, in lat. 30 S., and lon. 31 W., by the Louis, Tabet (which arrived at Mauritius Nov. 24), and has not since been heard of.

The Frederick VII., Ohlson, arrived at Falmouth June 13 from Akyab, leaky, and with part of cargo thrown overboard. She has been surveyed, and commenced discharging.

At ST. HELENA, May 2.—Fama Phillipina, Gama, from Manila, and sailed 4 for Alicante. 4, Australia, Jochems, from Batavia, and sailed 5 for Amsterdam; Lincelles, Tidmarsh, from Singapore. 6. Cornelia Gertruida, Hoeksma, from Banjoewangie. 7, Aldebaran, Meyboom, from Java, and both sailed 8 for Amsterdam. 8, Odilia Margaretha, van Zeffen, from Batavia, and sailed 10 for Rotterdam. 10, Cornelia Hendrika, Jaski, from Java, and sailed 11 for Amsterdam.

NOTICE TO PASSENGERS BY THE OVERLAND ROUTE, via EGYPT.

PHILIP ZECH, Proprietor of the two well-known Hotels in Alexandria, the Hotel d'Europe, and the Peninsular and Oriental Hotel, begs to inform his friends, and Travellers in Egypt in general, that he has purchased SHEPHEARD'S HOTEL in CAIRO, which will still continue to bear the same name; and in returning thanks for the extensive patronage enjoyed by his two houses in Alexandria, hopes that the preference may likewise be extended to his house in Cairo, which will be managed in first-rate style, and in a manner intended to give every satisfaction to its frequenters, both as far as table, wines, internal and external service are concerned. Many alterations and ameliorations are being carried out at the present moment.

HOLLOWAY'S PILLS.—GOOD SPIRITS.—Every one has frequently experienced the sudden personal change from gaiety to gloom. The wind and weather oftentimes receive the blame when a faulty digestion is alone the cause of the depression. Holloway's Pills can be honestly recommended for regulating a disordered stomach and improving digestion. They entirely remove the sense of fulness and oppression after eating; they clean the furred tongue; and act as a wholesome stimulant to the liver, and as a gentle aperient to the bowels; they healthfully rouse both body and mind. Holloway's Digestive Pills are the best known antidotes for loss of appetite, nausea, flatulency, heart-burn, languor, depression, and apathy, so characteristic of chronic derangement of the digestion.

Price 7½d. per doz. Bottlers contracting for large quantities, effect so great a saving in labour, &c., that they can supply them at one-third less price to Shippers, who will find it most profitable to order their goods to be so packed in future.
SEYMER & Co., 27, Eastcheap, E.C.

DR. CURTIS'S MEDICAL WORK, "MANHOOD."
An Essay on Nervous and Generative Diseases.
The 140th Thousand, with numerous plates in a sealed envelope, price Half-a-Dollar,
MANHOOD: the CAUSE and CURE of PREMATURE DECLINE IN MAN, with plain directions for perfect restoration to health and vigour, being a Medical Essay on Nervous and Generative Diseases, their Prevention and Cure, with the Author's experience in the Treatment of the various Disqualifications of Marriage—whether resulting from Youthful Abuse, the Follies of Maturity, the Effects of Climate or Infection. The result of Twenty-five Years' successful practice. By Dr. J. L. CURTIS, 15, Albemarle-street, Piccadilly, London.
Consultations, Ten till Three and Six till Eight.
REVIEWS OF THE WORK.
"We feel no hesitation in saying, that there is no member of society by whom the book will not be found useful—whether such person hold the relation of a Parent-Preceptor, or Clergyman."—Sun, Evening Paper.
"Dr. Curtis has conferred a great boon by publishing this little work, in which is described the sources of those diseases which produce decline in youth, or more frequently premature old age."—Daily Telegraph, March 27, 1858.
The Book concludes with numerous varied and interesting cases, to which is added the Author's Receipt of a Preventive Lotion.
Dr. CURTIS may be consulted, as usual, either by letter or personally, at his residence, as above. Patients in INDIA, CHINA, and the COLONIES can be cured by correspondence only, and have their medicines sent with secrecy and despatch. The efficacy and harmless nature of the remedies employed by Dr. CURTIS, having been demonstrated by the most complete success during a practice extending over a period of Twenty-five Years, nervous sufferers of every class have a perfect guarantee that the utmost skill and experience will be made available in the treatment of their cases.
THE WORK SOLD BY HINNAM, QUEEN'S ROAD, HONG KONG.

N.B.—Brushes, Combs, Sponges, and every article for the Toilet, 32, Lawrence-lane, Cheapside, E.C., Sole Proprietor of the "Rose of England."

KALOS GEUSIS SAUCE, as Improved by Mons. A. SOYER, and so highly valued in our East and West Indian Colonies as a stomachic, is prepared by I. M. ROBSON, 32, Lawrence-lane, Cheapside, London.

FOR FAMILY ARMS.—Send Name and County to the Royal Heraldic Studio and Library; in a few days you will receive a Correct Copy of your Armorial Bearings. Plain Sketch, 3s.; in Heraldic Colours with written description, 6s.; Large Size, 12s. Family Pedigrees, with original grant of Arms, to whom and when granted, the origin of the name, all traced from authentic records, for Two Guineas. An Index, containing the Names of nearly all persons entitled to use Arms, as extracted from the British Museum, Tower of London, Heralds' College, &c. &c. The Manual of Heraldry, 400 Engravings, 3s. 6d., post free, by T. CULLETON, Genealogist, Lecturer on Heraldry at the Mechanics' Institute, 25, Cranbourn-street, corner of St. Martin's-lane, London, W.C. The Heraldic Colours for Servants' Liveries, 5s.

STAMP YOUR OWN PAPER—with Arms, Crest, Initials, or Name and Address, by means of CULLETON'S PATENT EMBOSSING PRESS, 10s. Best Make, 21s. Any person can use them.—T. CULLETON, Die Sinker to the Board of Trade, 25, Cranbourn-street, corner of St. Martin's-lane, London, W.C.

WEDDING CARDS—For Lady & Gentleman—5s. each. 50 Embossed Envelopes, with Maiden Name printed inside, 13s. Visiting Cards—A Copper Plate engraved in any style, with name and 50 Cards, printed for 2s., post free. N.B.—All orders executed by return of post, for stamps or cash. T. CULLETON, Seal Engraver and Die Sinker, 25, Cranbourn-street, corner of St. Martin's-lane, London, W.C.

FAMILY ARMS, &c., Emblazoned for Painting on Carriages or Needlework, 6s.; Best Style, 12s., Gothic and Modern Monograms Designed, 5s. Arms Quartered, Impaled, and Painted on Vellum, according to the laws of Heraldry. By T. CULLETON, Seal Engraver and Die Sinker, 25, Cranbourn-street, corner of St. Martin's-lane, London, W.C.

ARMS, CRESTS, &c., Engraved in the Best Style. Crest on Seals or Rings, 7s. On Steel Die, 6s. Initials, 1s. 6d. per Letter. Book Plate, Engraved with Arms, 10s.; or Crest, 5s. Postage and Registered Letters 1s. extra.—T. CULLETON, Heraldic Engraver by Appointment to the Queen, 25, Cranbourn-street, corner of St Martin's-lane, London, W.C.

SOLID GOLD RING (18 Carat, Hall Marked), Engraved with Crest, 42s.; Large Size, for Arms, 75s. On receipt of P. O. order the size will be sent to select from.—T. CULLETON, Seal Engraver, 25, Cranbourn-street, corner of St. Martin's-lane, London, W.C.

THE PEN SUPERSEDED.—Mark your Linen. The best and only method of Marking Linen, Silk, Stockings, Coarse Towels, or Books, so as to prevent the Ink washing out, is with CULLETON'S PATENT ELECTRO-SILVER PLATES. By means of this novel invention a thousand pieces of linen can be marked in a few hours. Initials, 1s. each; Name, 2s. 6d. Set of Moveable Numbers, 2s. 6d.; Crest Plate, 5s., with the necessary directions for use. Post free. Certificate from the eminent Dr. Sheridan Muspratt, F.R.S., Professor of Chemistry, &c.

"Several trials with Mr. Culleton's Patent Electro-Silver Plates, for marking linen, induce me to pronounce them excellent; the letters are beautifully marked in a deep black colour, without blotting, and after a long boiling, with either potass or soda, they remain unaltered. Other plates which I tried decomposed the ink, and in many cases burned holes in the linen. I can testify Mr. Culleton's Plates are incorrodible, and will not hurt the finest fabric.—(Signed) "SHERIDAN MUSPRATT.

"College of Chemistry, Liverpool.

"May, 15, 1854."

All orders to be sent to the Patentee and Sole Maker.

This fine vessel, well known in the trade, presents an excellent opportunity to shippers desirous of quick despatch, having room for a few light measurement goods only.

Apply to Robertson and Co., 5, Newman's-court, Cornhill, London, E.C.; or to York-chambers, 55, King-street, Manchester.

CHINA—JAPAN.—A GERMAN GENTLEMAN, aged 26, long engaged in first-class houses, Corresponding fluently in French and German, and well acquainted with the Manchester Goods, is desirous of meeting an engagement for China or Japan. Address J. W., care of Messrs. J. Schott and Co., 159, Regent-street.

DR. J. McGRIGOR CROFT, M.R.C., Physician, London, Fell. E.S.; Fell. O.S.; late Staff-Surgeon and Medical Officer of H.M. Ceylon Rifles in China, and Ceylon (retired), may be consulted by his China and Eastern friends returning home suffering from tropical disease. Address, Mandarin Villa, 8, Abbey Road, St. John's Wood, London.

FOREIGN CORRESPONDENCE!

THE greatest novelty of the Day in Paper is the NEW INDIA PAPER, which is an entirely New Fabric, possessing a peculiar surface which renders it admirably suited for rapid writers. It is further distinguished from the usual kind of Foreign Paper, by its being as pleasant to write upon as stout writing paper, whereas with any other than a very light hand the pen is very liable to catch in the thin paper used ordinarily for Foreign Correspondence. It may be had in various note and letter sizes, plain, ruled, and black-bordered. The New India Envelopes possess two most valuable qualities, viz., lightness, and the strength and toughness of stout Cartridge Paper. They are less than half the usual price of Foreign Envelopes.

Three Sheets of India Note and Envelope, weigh under the ½-oz. The Envelopes may be had plain, or printed "via Marseilles," or Southampton. Ostend, France, Belgium, Liverpool, Halifax, Trieste, Lisbon, or in any other manner to order, and likewise with Mourning Border.

Sold only by E. TOWNSEND HAMBLIN, Stationer 421, Oxford-street, London, W.

EXTRA.
ISSUED AS A
SUPPLEMENT
TO THE
LONDON AND CHINA TELEGRAPH—JUNE 27TH 1861.

THE CHINA POSTAL SERVICE.

DEPUTATION TO THE CHANCELLOR OF THE EXCHEQUER.

On the 5th inst. a deputation of merchants, bankers, and others interested in the Chinese and Australian trade, waited upon the Chancellor of the Exchequer, at his official residence in Downing-street, for the purpose of urging upon him the necessity of continuing the bi-monthly postal service to China.

Among the deputation there were Mr. S. Gregson, M.P., Chairman of the East India and China Association; Mr. Walter Buchanan, M.P., Mr. W. Nicol, M.P., Mr. Harvey Lewis, M.P., Mr. James Youl, Deputy Chairman of the Australian Association; Mr. J. Mackinnon, secretary to the above association; Mr. Andrew Henderson (Messrs. Dent, Palmer and Co.), Mr. T. Jones Gibb (Messrs. T. A. Gibb and Co.), Mr. Walter Gledstanes (Messrs. Gledstanes and Co.), Mr. T. Griffith Frith (Messrs. Frith, Sands and Co.), Mr. G. G. Macpherson (Chairman of the Agra Bank), Mr. James Matthews (Messrs. Grindlay and Co.), Mr. Robert Smith (Messrs. Robert Smith and Co.), C. G. Mansel, Esq., Capt. Sprye, F. J. Angier, Esq. (*London and China Telegraph*), &c., &c.

Mr. S. GREGSON introduced the deputation, and said that as a copy of the memorial had been sent to the Chancellor of the Exchequer, and had been read and considered by him, he would not read it then, but he hoped they would receive a favourable answer to their application. There was one point that he (the Chancellor of the Exchequer) did not seem to be very clear upon, and that was the £12,000 a-year for the postal service. The whole of that amount would not be required, for as the intercourse between China and this country increased it would be reduced; but considering the advantages England derived from the China trade, it would not be too much if the nation had to pay the whole of it. When they (the deputation) applied to the Chancellor of the Exchequer before, they thought that the Peninsular and Oriental Steam Company might reduce their rate of charges, but they had since ascertained from them that they were not inclined to make any reduction. They had that morning received a despatch from Russia that the Tai-pings were nearer Pekin than ever they had been, and likewise that the Emperor of China was dying; and therefore to cut them off from communication with China now would be a great inconvenience to trade. He was aware that the question of cost was a great one, and that every item was of importance to the Chancellor of the Exchequer, considering the expenses of the nation; but when they had heard that within the last few nights the House of Commons had voted very large sums of money for things of much less importance than that under consideration, he thought the Government might continue the postal service they were asking. England at present received about five millions and a-half a year in produce from China, and there was yet the whole of the north of that country to be opened to our trade, and, therefore, rather than decrease the direct postal communication in that direction, they ought to increase it to once a week. The directors, therefore, hoped that the direct intercourse with China would be kept up.

Mr. BUCHANAN said he had a memorial to present from the Chamber of Commerce of Glasgow, in which they showed that their interests were not confined to China, but extended to the Straits. The mails for China took other mails than those for Hong Kong, for they included those from Foo Chow and other places. Letters were sent from all parts to Hong Kong as a central point, from which they could be despatched to this country; and if the Government broke up that central point by taking away the second mail, branch mails that might arrive at that place just after the departure of the main one would be detained there a whole month, and that was a matter of great importance to merchants in that part of the world.

The CHANCELLOR of the EXCHEQUER said they must consider that the memorial was, in effect, an application for a new subsidy. There was originally a fortnightly service to Hong Kong, but that was commuted to a monthly one to Shanghai, and the Government paid for the monthly service to Shanghai as much as for the fortnightly one to Hong Kong. In 1859 the Peninsular and Oriental Company made a claim on the Government for an increase of the subsidy on political grounds, apart from commerce, and last autumn it was considered. They would observe from what he had said that their application was strictly a claim for a new subsidy, and so they must be pleased to consider it, the Government paying for Shanghai the same as for Hong Kong. Then came the consideration of the cost, and from his experience he could say that the cost to the Government would not be far from the net amount they might agree to pay. To ascertain what that would be the fortnightly mail must be debited with the excess of the expense over what the monthly mail cost, and on the other hand it would have to be credited with a fair proportion of the receipts from the mails it brought. With regard to the increase in the correspondence with China neither he nor the Post-office authorities could see that there had been an increase. Well, then, they must see that it was a very delicate case to give subsidies on grounds not strictly postal, and they must consider the public scandal that might attach to the Government that would do so. He did not mean to allude to one that was now before a Committee of the House of Commons, but they must consider that if once they began the system it would open the door to great scandal. Some few years ago they were giving subsidies to such an extent that if they had not put a stop to them they would be now paying four millions and a half a-year. It had been said that an increase in the rate of postage might obviate the difficulty, but he was not prepared to give an opinion on it. He should like the deputation to consider the question themselves.

Mr. GREGSON observed that they could not estimate what the loss would be, or if it would be beyond the £12,000 a-year.

The CHANCELLOR of the EXCHEQUER replied that he could not say that £12,000 a year would cover the loss. The question he had to consider was, what they got by the monthly mail, and what by the monthly fortnightly mail, and by what the latter exceeded the former that would be the proceeds of the fortnightly mail.

Mr. BUCHANAN informed the Chancellor of the Exchequer that the merchants wrote and sent their letters to China fortnightly, and therefore they might consider the postage as tolerably certain.

Mr. MANSEL added that all the circulars from China brokers and merchants were issued fortnightly.

Mr. BUCHANAN asked if the Government could not be induced to consider the state of affairs in China, and the necessity for keeping up the communication at least for another twelve months.

Mr. GREGSON urged that there was the approach of the Tai-pings to Peking, and there would be a new Emperor, and affairs were assuming an interest and importance that rendered it most desirable that their communication should not be cut off just now.

Mr. BUCHANAN remarked that the information given in the House of Commons on the previous evening was that the Government had no knowledge either of the advance of the Tai-pings on Peking or of the Emperor's illness, but that information was in all the China papers.

The CHANCELLOR of the EXCHEQUER said the Government had no knowledge of it, neither had they any information of the surrender of Tien-tsin.

Mr. GREGSON said it was only in the China papers that they had seen it, and they had come to hand only yesterday.

The CHANCELLOR of the EXCHEQUER then suggested that they should talk the matter over amongst themselves, and see what they could suggest, and then Mr. Gregson could communicate to him on their behalf.

Mr. GREGSON asked whether the Chancellor of the Exchequer could give him any idea of what the postage would be.

The CHANCELLOR of the EXCHEQUER said that would be a question for the deputation to consider, and also the number of letters likely to be sent.

Mr. NICOL said that seemed to be the practical way of handling the question.

Mr. MACKINNON drew the attention of the Chancellor of the Exchequer to the case of those interested in the Australian colonies. They were much concerned in this alteration, because their letters were now delayed at Galle only five days, whereas if the mail only went monthly they would have to be detained there twenty-one days. A minute had been passed by the Lords of the Treasury, about six weeks ago, in favour of the maintenance of these mails, and a copy of it was in the hands of his friend Mr. Youl.

Mr. YOUL said the minute was to the effect that the service of the mails to the colonies was of the greatest importance to them. He had not got the copy with him, for he had given it to Sir Stuart Donaldson, who was to have been present, but had not been able to attend. The minute had been sent to the Peninsular and Oriental Company, and many had gone to some expense in preparing to avail themselves of that service.

The CHANCELLOR of the EXCHEQUER did not recollect it, and did not think the Government was cognisant of the fact of that minute, but he should like to be put in possession of the date of it, because every consideration ought to be given to those persons under such circumstances.

Mr. GREGSON would like to know what would be likely to be the amount of the increased postage, whether one and a-half the present charge or double.

The CHANCELLOR of the EXCHEQUER said that was entirely a question for them. He would advise them to consider what they would be willing to pay, and then consult the Postmaster-General as to what would be the cost of the working of the service.

Mr. BUCHANAN did not know that postage would be any consideration with the merchants, they were a wealthy class, and did not look to the cost of postage.

The CHANCELLOR said if they liked he would write to the Postmaster-General and ask him in what shape a practicable proposition could be made to him, and then he would write to them on the subject.

Mr. FRITH thought the Chancellor of the Exchequer had not had time to consider the indirect advantages of postal communication, for where there were facilities for correspondence the trade of the country would always expand.

The CHANCELLOR of the EXCHEQUER said he fully appreciated the importance of the mail service and the effect it had in developing commerce, but they must admit that if the Government were not careful to confine their subsidies to postal claims alone it would open the door for innumerable claims and perhaps abuses.

It was eventually arranged that Mr. Gladstone's last suggestion should be carried out, and that when he heard from the Postmaster-General in reply to his communication, he would write to Mr. Gregson, who would continue the correspondence on behalf of the deputation and their constituents. The interview was, on the whole, considered satisfactory, the right hon. gentleman having throughout shown the greatest desire to meet the wants and wishes of the China and Australian merchants.

The deputation thanked the Chancellor of the Exchequer for the kind and courteous reception he had given them and then retired, promising to carry out his recommendations.

Intelligence was received from Hong Kong up to 18th May, on the 9th inst., via Bombay, to which port it was conveyed by the P. & O. Co.'s str. *Ganges*.

List of Passengers.

PASSENGERS INWARD.

By this mail.—From Hong Kong, for Southampton.—Commander and Mrs. Bevan, Mrs. Brown and child; Messrs. Clarke and J. Mackenzie; Lieut. Brown, 99th Regt., Lieut Hogg, 5th B.N.I., Lieut. O'Neill, 44th Regt., Assist.-Surg. Crian, R.N., Assist. Commissary-General Rogers, and Captain Bell—2nd class: Messrs. W. F. Dukes, W. Ketteringham, W. Callsen, and Samuel Moore. For Marseilles.—Messrs. H. H. Dent, S. N. Taylor, J. A. C. Gaelech, Francisco Ulloa, Pio Mauca, Jose Elosequi, and Pablo Linart; H. E. Don Pedro Pampellon, child, and European servant—2nd class: Mr. Jose Ferriols and Antonio Aloary. For Gibraltar.—Mr. Juan H. Davila and European servant, Mr. H. Torecillo, and European servant, and Mr. Manuel del Roldan. For Malta.—Mr. Young, C.B. For Alexandria.—Mr. C. Boyd. For Singapore.—Mrs. GrandPre and child, Miss C. and Miss J. d'Almeida, Messrs. M. C. Cohen, A. Grant, and H. Hardie.

PASSENGERS OUTWARD.

Per P. and O. str. Ceylon, 4th July, from Southampton to Hong Kong: Mr. Redesdale, Ensign Thompson, Mr. S. G. Downs, Mr. D. D. Inglis. To Singapore: Mr. J. Sutherland. From Marseilles, 12th July, to Shanghai: Mr. Markham, Mr. Higson.

Per P. and O. str., 4th August, from Southampton to Singapore. Mr. A. K. Cockran, Mr. J. D. Vaughan. To Hong Kong: Mr. O. Bullock. To Shanghai: Mr. Winstanley. From Marseilles, 12th August, to Shanghai: Mr. J. Conrad Morf. From Alexandria to Shanghai: Mr. John Gavin. To Singapore: Miss Theresa Collu.

Per P. and O. str., 20th August, from Southampton to Hong Kong: Mr. and Mrs. Woods.

Per P. and O. str., 13th September, from Marseilles to Shanghai: Mrs. Parkes.

Per P. and O. str., 4th Oct., from Southampton to Hong Kong: Dr. Smith (Bishop of Victoria), and Mrs. Smith.

PASSENGERS ARRIVED OUTWARD.

At Hong Hong.—Per Sweepstakes, from Melbourne: Mr. R. K. Rotheel and Dr. J. Falconer. Per str. Pekin, from England, &c.: Messrs. Weston Williams, Ponsford, Duncanson, Green, Conquest, Earnshawe, Scott, Ross, Hodge, Farmer, Pickett, Westonhagen, F. A. Rangel, Scott, Brown, Cooper, Levi, Elsinger, and Dadjeebhoy. Per Ernst, from Saigon: Mr. Gasset. Per Don Antonia Escano, from Manila: Messrs. Cole, Johnston, Ruttersugeam, Lukes, and Bernard. Per Thunder, from Calcutta: Messrs. Cretaus, J. Xavier, A. L. Rodrigues, and several deck passengers. Per Cornelia, from Bankok: Mr. H. Hardie, and three Chinese. Per L'Oriental, from Saigon: Four Chinese, Mr. Zeniero.

CONTINUATION OF THE BI-MONTHLY MAIL.

From information received upon going to press, we have authority for stating that the question relative to the Bi-monthly Mail to China is substantially settled, and that it is determined to increase the rate of postage from 6d. to 1s per half-ounce.

Summary of News from the Far East.

FROM CHINA TO INDIA—OVERLAND.

The Yang-tse river is at present naturally enough the main point of interest in the China papers. Its capabilities for the navigation are now said to be so completely determined that no doubt is felt any longer on the subject, and, according to the *China Mail*, all enterprise in China is gradually being represented in this great highway of commerce. Already there is a larger demand for steamers than can readily be met, although there are already about a dozen fine vessels trading on the river, without mentioning those at present building in England or on their way out. Among these vessels are the *Fire-dart, Governor-General, San Theodosius, Ta-yung, Scotland, Rajah, Chusan, Manila, Hellespont, and Willamette.*

An interesting letter has been addressed to the *North China Herald* from one of the travellers who, it will be remembered, accompanied Admiral Hope's expedition with the intention of pushing on to Thibet and India overland. He observes that the Yang-tse is navigable up to I-chang, which is about 364 miles above Hankow. Above that town the river is said to become unsuited to steam navigation. We subjoin the following extract from the account to which we have referred, dated from Kwei-chang Province of Se-chuen, April 12:—

"Parting with the naval squadron at Yo-chow, on the outlet of Tung-ting Lake, a tedious voyage of eleven days—tedious from its comparative slowness after steaming—and through an uninteresting country—uninteresting on account of its flatness—we arrived on the 27th of March at Kinchow (foo), or rather Shasze, the port as it were of the former, which is about a mile distant from the river, and is more of a Tartar town than a mercantile place. This (Shasze) was the first place having anything of a business-like appearance, the number of up-country junks attesting a considerable trade with Sechuen, in the way of cotton up, and silk, sugar, tobacco, and such like down.

"Above Kin-chow the country soon becomes hilly, and even mountainous. The town of Chi-kiang (hien) and Itu (hien) are passed, and proceeding up a most picturesque part of the river, we arrive at I-chang (foo), 364 geographical miles above Han-kow, and 948 by the Yang-tsze, or, in round numbers, 1,100 English miles from Shanghai, a place which, from its situation, must ever be of considerable importance.

"At a distance of three miles above the city, the river suddenly changes its character altogether, and narrowing to less than one-half its former width, rushes with a strong current through a long gorge, with stupendous cliffs rising on either hand. At fifteen miles above I-chang, the first actual rapid exists at this season; and from thence upwards as far as we now are, about 83 miles above I-chang, its course is through a continuous mountainous country, passing through several more gorges, and obstructed occasionally by rapids. But there is no want of water, for the river is very deep in these narrows.

"I would not give it as a decided opinion that these rapids will altogether prevent steamers from ascending to the upper waters of the Yang-tse, because in time light river-steamers of full power and adapted to the peculiar navigation may be constructed; besides which, the nature of the river may be very different under altered circumstances of high water; for it would appear that the rise during summer is very great, water lines having been observed in the confined parts some 60 or 70 feet above the present level. But then the additional force of water might presen another obstacle."

JAPAN.

It is stated that our Consul has made some progress in coming to a liberal understanding with the Japanese Government, with regard chiefly to the adoption of a well-defined course in the future treatment of foreigners whom it may be necessary to arrest for any misdemeanour.

The Government of the Tycoon has expressed its disapproval of the manner in which Mr. Moss was treated some months ago.

CHINA.

THE YANG-TSZE-KIANG.

The knowledge that Hankow has not fallen into the hands of the Rebels has given a great impetus to trade. It appears that they approached within thirty miles of that city in the early part of April, but that a sally was made before them by the garrison, so that they were forced to fall back on Hangchow. Confidence appears, therefore, to have been generally restored at Hankow, for the people were returning, and showed an anxiety to engage in trade with the few foreigners already established there. The *North China Herald* gives the following account of Mr. Gingell's arrival, and of the position in which our merchants will be placed at Hankow :—

"The Yamun selected by Mr. Parkes for the residence of the consul is at Wu-chang, and on Mr. Gingell's arrival he requested the authorities to conduct him to it. They replied that the troops occupied all the Yamuns but one and that would be required also in a fortnight, that the city being under martial law the gates would be closed at stated times which might be inconvenient to him. A Yamun was accordingly pointed out at Hankow which he consented to occupy. He landed with a guard of marines and two constables on the 26th April and took formal possession. The building is nearly in the centre of the city. The foreign concession is at the eastern end of the city, with a fair proportion of water frontage. Vessels of the largest draught can lie alongside, the bank having eight fathoms close to. Hankow Reach is an extremely fine one, its extent from the Middle Shoal to the Han-yang Shoal being about six miles, and from one mile and a quarter to three-quarters across. Plenty of room for turning, and good anchorage throughout. The present anchorage is a little beyond the river Han. The river at this place had been four feet higher, but had fallen again. The towns of Han-yang and Wu-chang are both walled, the latter large enough to deserve the name of a city; both have within the walls, hills from one hundred to three hundred feet high, while Hankow is perfectly flat."

The steamers *Governor-General* and *Fire Dart* had returned to Shanghai from Hankow, laden with oil, paper, and medicines. They brought no teas, though it is expected that the new crop would soon arrive in abundance. The barque *Mona* had been despatched thither with a large amount of treasure in tow of a steamer. Both the *Governor-General* and the *Fire Dart* were being hurried back again, and were taking a considerable quantity of Manchester goods. The steamer *Scotland* had been chartered for Hankow and back for the sum of 20,000 taels.

The P. and O. Company's steamer *Rajah* is sold to Messrs. D. Sassoon, Sons, and Co. The price is not yet made public, but reported to be $50,000. The company have also sold two other steamers, the *Manila* and the *Chusan*, for employment in the North. This is one sign among many of the impetus afforded to commercial enterprise by the opening of "the Great River."

TIEN-TSIN.

There is no news of special interest by this mail. The greatest confidence still prevails with regard to the future prosperity both of this port and of Chefoo. A considerable trade was doing in cotton goods, and the Rebels had removed further from the city. In the neighbourhood of Chefoo, however, they appeared to be gaining ground on Sangkolinsin, and to be driving him back to the north.

SHANGHAI.

The *Ly-ee-moon* has gone to Tien-tsin, a large business being transacted for that quarter. The junk owners were in great tribulation, their eyes having been opened to the fact that the carrying trade by sea would soon be entirely lost to them.

The *North China Herald*, of May 18, says :—

"H.M.S. *Actæon*, *Leven*, *Algerine*, and *Dove*, left the river on the 16th on their way to complete the survey of the West Coast of Japan. The *Ringdove* will leave on Monday next with Rutherford Alcock, Esq., C.B., H.M.S. Minister and Plenipotentiary at Japan, for Nagasaki and Yedo, on which station she will remain for the present. The *Bouncer* leaves to-day for Nanking, taking Commander G. E. Montgomerie, who succeeds Captain E. D'Aplin (promoted) in the *Centaur*, as senior British naval officer in the Yang-tsze-kiang, with whom Mr. R. J. Forrest remains as interpreter. Mr. T. Adkins also goes up in the *Bouncer* to Ching-kiang as Acting Vice-Consul. The *Encounter*, Captain R. Dew, has succeeded the *Renard* as guard ship on this station."

According to the latest advices Ningpo still remains in the occupation of the Imperialists; business, however, is dull, and the money market tight. Some fear was entertained by the natives of the Rebels attacking the city, but not the slightest preparation was being made for its defence. Affairs at Hangchow wear a gloomy aspect. The Imperial rule had become almost unbearable, the pay of the troops was in arrear, and the inhabitants of the surrounding country were being subjected to arbitrary taxation. The towns of Han-yang, Wu-chang, and Kiu-kiang, were also in the possession of the Imperialists. Here the Braves were seeking opportunities to create disturbances and annoy foreigners, but the inhabitants of these towns were quiet and civil, although very inquisitive. At Ngan-king the insurgents and the Imperialists were still fighting, but the town had not changed masters.

It is announced that Mr. Adkins was about to proceed to enter upon his duties as Acting Vice-Consul for Chin-kiang. A copy of a chart, containing the recent survey of the Yang-tsze-kiang from Woosung to Lang-shan, has been furnished to the Shanghai Chamber of Commerce by Capt. Ward, of H.M.S. *Actæon*. Regulations for the collection of import and export transit duties on that river have been issued by the Superintendent of Customs for the guidance of British subjects.

FOO-CHOW-FOO.

The gun-boat off Foo-Chow picked up a couple of piratical boats lately close by, and brought them as prizes to the port. The men who manned them have been handed over to the tender mercies of the mandarins. One of the gun-boats' men received a ball in his face, and is under medical treatment.

Local trade is pretty fair. The new Custom-house is in full operation. No seizures have as yet been made—perhaps there is nothing to seize. For the purpose of affording facility to the coast steamers, a branch Custom-house has been opened at the Pagoda Anchorage down the river, where steamers, by lodging an abstract of all cargo and dutyable goods on board, are given a Chinese chop or permit to open hatches, and are thus able to discharge as soon as would be convenient. The mandarin in charge or supervision of the Customs has boats employed as guard-vessels on the river; they examine all boats going up from the anchorage, and see after the permits. The effect of the Custom-house on the Chinese is amusing; to hear them talk of grand chop, receiving chop, discharging chop, &c., &c., would make a London agent fancy their dread of committing themselves only equalled by the apparent knowledge of its stern reality.

The *Japan* had been re-sold by Captain Fawcett for $230—the first sale being declared illegal. Some twenty-five to thirty chests of her tea cargo are being recovered by the divers each tide. Her masts, rigging, &c., have been floated to Pagoda Island.

The French chartered steamers *Fee-loong* and *Confucius* arrived from Shanghai on the 17th May. It is said they are collecting the indemnity money due to the French Government. The latter mentioned steamer in coming up the river, ran into a boat laden with rice, and one of the boatmen was killed.

SWATOW.

Everything at Swatow is quiet, though tragical scenes have been enacted in the vicinity. The *Pearl* and two gunboats arrived on the 3rd May, and proceeded to Brig Island, where the *Pearl* anchored, while the boats proceeded to Tseau-chew to demand that the villagers should hand over the pirates who were said to be secreted there, but they returned for answer that "their hearts were very big, and they did not fear the foreigners' landing." The boats then opened fire, which commenced at 8 A.M., and lasted until 8 P.M. Our casualties consisted of Lieutenant Hambly, burnt in the face; four seamen with bullet wounds; one marine artilleryman burnt in the face. The force consisted of 136 men and 8 officers—144; that of the pirates, 1,000. The casualties of the enemy were, 115 killed and 70 prisoners. The whole town was thoroughly burned down to the ground.

The facts and merits of the case are thus stated by the *China Mail* :—

"The village of Tseau-chew has long been known as a nest of pirates, who were a terror to the native vessels frequenting the Straits of Namoa. In January last, a Tien-tsin junk bound to Amoy was blown into those waters, and the pirates dwelling in this village robbed it of property to the value of some $30,000, killing at the same time eight or nine of her men. The junk then came into Swatow and reported the piracy to her owners at Amoy. By return steamer they replied, appointing Ahok (who is not a mandarin as reported) to proceed to the village and use means to

Digitized by Google

obtain restitution. He demanded $12,000 or twelve of the pirates; the people treated his demand with derision, and robbed him. He then petitioned the magistrate of the district, who, having before received many similar petitions against these pirates, now determined to act in the matter, and with 800 braves and two junks sent by the Admiral at Namoa, he proceeded to the village. Finding preparations for an obstinate defence he wrote to the English for aid, at Ahok's suggestion. The Chinese Admiral did the same, quoting the New Treaty. The gunboat *Cockchafer* was sent by Admiral Jones, not to assist them, but to find out how matters stood. On receiving the *Cockchafer's* report, the admiral sent Captain Borlase in the *Pearl*, with other two gunboats, to demand a surrender of the village unconditionally. This not being complied with, the place was bombarded for an hour on the following morning, after which a landing was made of several boats' crews under cover of shells thrown from 68-pounders. Most of the valuables had been removed, but among what was left behind was part of the property taken from the Tien-tsin junk, so that evidence is not wanting of their being the actual pirates."

Some of the articles stolen from Messrs. Bradley and Co., as mentioned in our last issue, are now said to have been recovered, and an opinion prevails that the matter will be quietly settled.

According to a return published for the half-year ending 31st December last, it appears that 105 foreign vessels paid duties amounting to 51,509 taels, and foreign goods per native craft paid 15,019, or a total of 76,528 taels (about £25,500), not a tenth part of which would have reached the authorities prior to the establishment of the Foreign Inspectors of Customs.

HONG KONG.

A frightful case of piracy and murder has occurred on board the brig *North Star*, within a few miles of the harbour. The vessel left Hong Kong on the morning of May 13th, with a large amount of specie on board, and was attacked in the evening when close to Lingting. Seven or eight men were killed forthwith in this murderous onslaught, and the life of the captain is represented as in a very critical state. The following is the most minute, and apparently trustworthy, version of the affair :—

"The wind had fallen very light. The captain had gone forward, told the men to rest while they could, as the vessel would be making short tacks during the night, and their services would, therefore, be required. In the meantime a boat came alongside. This boat is described as being a size larger than the ordinary two-masted boats used chiefly by captains of vessels in this harbour, and had mat sails. The man at the helm was first attacked, and we believe was actually burnt to death by stinkpots which were hove on board previous to the pirates boarding, as we did not observe any severe wounds from sharp instruments about him. The men were down in the forecastle, and their attention was attracted by the Chinese passengers rushing down below to their quarters. They came up and saw smoke aft, saw the captain cut down, saw the chief officer and Mr. Lariski fighting, and finally overpowered, saw the cook (a European) stabbed aft, in the waist, and saw him driven forward to the windlass, where he was again stabbed. Three young men made for the jib-boom, and one seaman and the carpenter for the port fore-rigging; the seaman got up the rigging, but the carpenter was stabbed, and went overboard more of his own accord than being thrust over. The Chinese followed the boys out on the jib-boom as far as the fore stays, when they went in again. The captain was struck over the head and breast by six of those pirates when going aft, and struck down. The pirates then went aft, and it is our belief that if all could have kept forward of the mainmast, none would have been hurt. They clearly knew that treasure had been put on board the ship, and it was for that they came. The money (about $4,000) was in the captain's stateroom. They quickly placed the boxes which contained it in the boat, took the chronometer, but did not touch the cargo. In fact, the whole affair did not last ten minutes. The captain had discharged his revolver a few minutes before the disaster in order to clean it, so that accounts for its being unloaded at the time of the attack. The boat containing the men that boarded the *North Star* had been observed the whole day cruising about, only one man and two boys being visible."

A meeting of subscribers to the Hong Kong Chamber of Commerce, was to be held at the Club-house on the 29th May, to decide upon rules and regulations, and to elect a committe of management.

The *China Mail* reports that a lady has been slandered by three military officers, that apologies and explanations have passed in consequence, and a court-martial held on the wrong man.

Messrs. Phillips, Moore and Co., announce that Mr. Pincus Friedlander is authorised to sign their firm at Tien-tsin.

Admiral Hope will shortly visit Japan in the *Impérieuse*, to which vessel he has removed his flag. Admiral Jones left for England in the *Chesapeake* on the 22nd May.

The following is a list of the subscribers to the "Inglis Fund" mentioned in another portion of our paper :—

"A. Perceval, $150; John Dent, $200; A. Fletcher, $100; John D. Gibb, $100; W. Walkinshaw, $100; R. Muirhead Reddie, $100; George Lyall, $50; C. F. Still, $50; William T. Bridges, $100; Thomas D. Neave, $50; C. Broderson, $50; Maxn. Fischer, $50; F. B. Johnson, $50; J. J. dos Remedios, $50; J. Heard, $50; E. F. Parker, $50; Fred. H. Block, $100; Arthur Sassoon, $50; D. Lapraik, $50; A. Hudson, $50; H. G. Thomsett, $25; C. W. Murray, $50; H. Cohen, $50; M. C. de Rozario $50; S. P. Hall, $25; Lane, Crawford, and Co., $50; De Silver and Co., $25; W. A. Bowra, $25; D. Gow, $25; A Friend, $10; H. Marsh, $25; C. May, $50; S. E. Burrows, jun., $25; Baron de Cerçal, $50; George H. Heaton, $25; And. S. Dixson, $25; Edward H. Pollard, $25; George Holmes, $25; A. Camajee and Co., $25; D. M. Mody and Co., $25; D. and P. Camajee, $10; Eduljee Framjee, Sons, and Co., $25; Cowasjee Palanjee and Co., $20; F. B. Cama and Co., $25; P. F. Cama and Co., $15; A. L. Agabeg, jun., $25; Y. J. Murrow, $25; J. A. Brooks, $15; C. Boyd, $50; R. C. Antrobus, $50; Acheong, $50; Tam Choy, $25; Awa, $25; Leong Ah Chew, $25; Hamoon, $40; Hinnam, $10. Total, $3,065.

The following advertisement is an amusing specimen of the art of puffing, as exhibited in the columns of the Hong Kong *Daily Press* :—

"NOTICE.

"Old Hip, dealer in lacquered ware, long since known to foreigners by the name of Hip Qua, having heard that a man had advertised in the papers stating that one of Hip Qua's partners had withdrawn by consent from the firm and that this fact was generally known to Hip Qua's patrons,

"Old Hip begs to make the following particulars concerning his firm. He was formerly known as Hip Qua, afterwards Pon Tsau Wing joined him as a partner, and the profits of their firm as lacquered ware dealers were equitably divided for many years. When Pon Tsau Wing died his son became the manager of the business and kept the books. This latter cheated Old Hip, so he was obliged to pay him off and dissolve the partnerships. All the foreign community are aware that Old Hip would not be guilty of dishonesty, and that long before he was noted for dealing in first-class goods.

"After the partnership was dissolved this son of Pon Tsau Wing commenced business for himself under the style or firm of Old Hip, stating that this latter had been dismissed for dishonesty, which is a gross falsehood. We have heard that this son of Pon Tsau Wing cheated some French soldiers of money in Canton, and that he is now in gaol for the same. If you want to buy really good and cheap articles in lacquered ware, call at the establishment of Old Hip, Hongkong, or Young Hip, of Canton.

"Hong Kong, 7th March, 1861."

The Russian frigate *Alreck* has arrived from Europe, *via* Singapore.

The cargo of ice per *Benefactor*, from New York, is selling at Messrs. Bowra and Co.'s godowns at fifty pounds per dollar. In years gone by, the selling rate was more than double this, and a subscription was raised in 1845 for the preliminary expenses of procuring the first cargo, to which the various firms subscribed $100 to $1,000 to form a fund. This fund has proved to be a sinking one, for none of the contributors have ever seen it back again.

At the beginning of May there were upwards of seven hundred prisoners in Victoria gaol, over a seventh being Europeans.

We are glad to notice the return of Mr. Adams, the Chief Justice, from Shanghai, and trust his health will be permanently improved by the change.

According to the latest returns, the number of British troops stationed in China is as follows :—Tien-tsin, 3,080 ; Taku, 75 ; Shanghai, 875 ; Hong Kong, 835 ; Kowloon, 886 ; Canton, 2,640 ; making a total of 8,316 men. The Rev. R. Beach has been appointed fourth-class chaplain to the forces, by the Right Honourable the Secretary of State for War. Leave of absence to proceed to England has been granted to the undermentioned officers, on the recommendation of a medical board : —Lieut. O'Neil, H.M.s 44th Regiment, Lieut. Hogg, H.M.s 5th B.N.I. Infantry, Assistant Surgeon Crian, Royal Artillery. A party of time-expired men, consisting of seven sergeants and forty-six rank and file belonging to various corps, proceed to England, via the Cape, in H.M.S. *Chesapeake*. One armourer sergeant, three sergeant conductors belonging to the Military Store Department, and two stokers belonging to the Purveyors' Department, who had arrived here in charge of a distilling apparatus, also proceeded to England by the same opportunity. There has been no mortality among the troops of any consequence.

CANTON.

Considerable anxiety is felt at the proposed evacuation of the city by the allied forces.

A strong police patrol under the command of Captain Despard, Superintendent of Military Police, was despatched in quest of the eight deserters from H.M.s 99th Regiment. A fight occurred between them ; one deserter was shot, and the rest escaped to the hills. Thereupon two detachments were sent in search of them, but the deserters the meanwhile had

Digitized by Google

commenced their return journey. Five of them gave themselves up to the military authorities at Canton, and the remaining two, who were found severely wounded in a Chinese village, were brought back by their pursuers. These men are said to have committed two murders besides robberies and other offences.

The following items are from the *Friend of China*:—There was a frightful exhibition in Canton on May 14—the attempt to hang a Chinese, convicted at a drum-head court-martial, of a murderous assault on a sepoy. It was determined to let the native authorities carry out the sentence, and a cross was erected so clumsily that the noose would not operate. The Chinese then tried a species of bow-stringing, hauling the poor wretch's neck backwards and forwards in a disgusting manner. At last a policeman put a loaded musket to the half-killed creature's head and blew his brains out.

The 99th Regiment, in Canton, with exception of removable disease brought on by indiscretion, is said to be in excellent sanatory condition.

Mr. Consul Robertson having intimated a request that those who have an interest in Shameen should take into consideration the prudence of planting trees along the intended Bund, a meeting at Mr. Scott's was called for this afternoon, when, besides the chairman, Mr. Robertson, seven attended we believe. The principal resolution passed was to the effect that the old Canton Garden committee should be asked to disburse money in their hands towards planting trees in such places as Mr. Brunstedt, overseer of the works, might indicate. On the understanding that the plan does not bear the final approval of the Allied authorities, Mr. Robertson exhibited the Shameen scheme, the only alteration on the old plan being a narrowing of the bund to fifty feet, and the widening of the centre road or mall to one hundred.

The *Friend of China*, of May 25, contains a notice of Mr. Scarth's pamphlet on "British Policy in China," from which several passages are extracted.

A serious disturbance took place on board the American ship *Orion*, at Whampoa, between the captain and the cook, which resulted in the death of the latter. It appears, from the evidence of the crew, that the captain ordered the steward to get tea, he in his turn ordering the cook to do so, who, being in liquor, was very abusive, Captain Libbey ordered him to be put in irons, when he seized a steel and a knife, and was about to attack the captain, who had already got his revolver, and fired at him; one of three shots went through his body, and caused instant death.

On the subject of the Canton claims the *China Mail* says:—

"We believe that by the present mail a letter has been sent to the Foreign Secretary, in which his lordship's attention is called to a matter that has been allowed to slumber in a manner beyond precedent, even in the records of official dilatoriness. The claims for losses sustained by English merchants in Canton in 1856 is peculiarly a matter where delay in settlement, or in fixing a time for settlement, shows a most unbecoming want of consideration for interests which are entitled to the most serious respect. It is now seven months since the Convention of Peking was signed. By that Convention two millions of taels were expressly stipulated for, to cover the losses alluded to. Considerable sums of indemnity money have been paid at all the ports—H. M. S. *Scout* brought down nearly a million taels the other day, but there are no signs of any payments being made, nor can the smallest information be had from Government upon the matter. The sum withheld amounts in all to about £700,000. Of this sum the merchants concerned have been deprived for four years. The French and American claims have been fully liquidated as regards the principal, and nearly so as regards the interest, the latter being rated at 12 per cent. per annum. Mr. Bruce has given no reply to inquiries made to him on this subject, and we cannot be surprised to learn that the merchants have thought proper to appeal home for information. Lord John Russell must have information on the matter, and it would be well to know his reasons for so long withholding it. We cannot understand the reason for such culpable apathy, and it would be doing good service where a good service is due, should some influential member of the Commons call attention to the matter from his place in the House."

BORNEO.

In reply to a remark in the *China Express*, of April 10, with reference to the rumour that Sir James Brooke would be appointed Governor of the Straits Settlements, the *Singapore Free Press* says:—

"Sir James Brooke's health, we are glad to say, has not at all suffered from his visit to Sarawak, but we believe he has no intention of continuing in the East for a longer period than will suffice to restore order at Muka, and the other places on the coast of Borneo, near Sarawak, which have been unsettled by the intrigues of Seriff Masahore, and the unfortunate proceedings of Governor Edwardes. It is not likely that the Colonial Office would offer the Government of the Straits to Sir James, as he is too independent in his opinions and actions to make a model Governor according to official ideas. It is still more unlikely that he would accept the appointment, were it in his option, as his past treatment by the English Government, Whig or Tory, has not been such as to make him desirous of occupying such a position towards it, as the office of Governor of the Straits Settlement would place him in. In saying this, however, we merely hazard a conjecture as to what Sir James Brooke's feelings on the subject are likely to be, as we have no positive knowledge regarding them."

As regards the hostilities in the southern and eastern division of Borneo, matters remain in *statu quo*. New attacks are expected on the part of the enemy. Latterly they have confined themselves to petty plundering expeditions, and have always been put to flight by the Dutch troops wherever met with.

JAVA.

The accounts from Macassar state that, on the 19th of April, the Dutch war-steamer, *Reinier Claeszen* returned there from a cruise along the west and north coasts of Celebes. On the 4th she gave chase, but unsuccessfully, to a large pirate prahu near the Island of Pengalasan. On the 13th she fell in with sixteen pirate prahus, which were hiding in the bay of Teyar, west of Mandahar. Three armed boats, reinforced by infantry, were obliged to abandon the attack on the pirates, on account of their being overmatched. Reefs and rocks prevented the steamer from getting near to the pirates, who, availing themselves of the darkness of the night, effected their escape and were not again to be found.

In two districts of Java, Rembang and Bagelan, heavy rains during the month of May had again done considerable damage to the crops, carried away bridges, and caused landslips.

Dr. Bernstein, in the month of February, ascended the Sabila mountain in Ternate, and found an immense number of nutmeg trees, the existence of which was previously unknown to the natives of the island.

Small-pox was very prevalent in Ternate and the neighbouring islands, and was producing great mortality amongst the natives. A native schooner carried the disease from Ternate to Doreh, in New Guinea. The disease also broke out on board the schooner *Esther Helena*, Captain Edwards, from Ternate bound to the Sandwich Islands, with 120 coolies, men and women, on board, and in a few days forty persons were attacked, ten of whom died. The captain then put into Doreh, where he erected a house with material which he had on board, in which he placed the diseased persons and continued his voyage.

The clove crop at Amboyna for 1860 had all been delivered into the Government godowns, and amounted to 258,117 lbs. Amsterdam. The nutmeg crop at Banda for 1860 amounted to 1,072,765 lbs. Amsterdam, besides mace.

The appointment of Mr. Loudon as Minister for the Colonies, is viewed with great satisfaction in Netherlands India. Much is expected from his thorough knowledge of the colonies and liberal opinions.

The Director of Finances has notified that Government drafts will in future be obtainable, payable at the Government treasuries in Batavia, Samarang, and Sourabaya, and also at other places, in the first case, however, upon application to the Director of Finances. For sums under ten rupees orders can be obtained at all the Government treasuries, payable at sight at such Government treasury as may be desired.

MALACCA STRAITS.

SINGAPORE.

The transfer question continues to engage the attention of the press at Singapore and Penang, but no new feature has been produced. The impatience at the delay of course increases, as "waiting" is particularly irksome in a hot climate, where everything is conducted more on the American type. A public meeting was held on the 22nd May on this subject, when the following resolutions were passed:—

"1. That it is the opinion of this meeting that the revenue of the Straits Settlements are sufficient to meet all legitimate expenses.

"2. That the greatly increased expenditure for military purposes, entailed by the extensive system of fortification now in progress, should not be borne by these Settlements, as it is undertaken for Imperial and not local interests.

"3. That the surplus revenue, exclusive of military outlay, estimated at £50,600, is more than sufficient to defray the cost of a local corps of 1,200 men, which is considered ample to meet all the requirements of these Settlements.

"4. That it would prove advantageous to British interests in these seas that the Governor of the Straits Settlements should also hold the appointments of H. M. S. Commissioner and Superintendent of Trade in the Eastern Archipelago.

"5. That a committee, composed of the chairman, Mr. Greenshields, Mr. Paterson, Mr. Woods, and Mr. Harrison be appointed to carry out these resolutions."

PENANG.

The *Penang Argus* calls attention to the omission of this port on the scheme of the new French Mail Company. There is no doubt it is an unintentional omission, and in going through the Straits of Malacca they will not pass by Penang. We will promise our timely representations on the matter.

Mr. Lewis, lately Resident Councillor at Penang, has obtained from the Rajah of Perak a lease for twenty years of the province lying between the Krian and the Kurau. It is to be rent free for the first two years, after which the rent will be $5,000 per annum. We hear that large numbers of Malays are leaving Province Wellesley to settle in Mr. Lewis' territory, the soil of which is famous for its large yield of paddy. It is also well adapted for sugar, tapioca, and cocoanuts. The forests supply timber, rattans, nibongs, nipa leaves, &c. for the Penang market, and the inner tracts are said to be rich in tin.

We are glad to learn that the convict settlement at Port Blair is now progressing very favourably in every respect under Captain Haughton's management.

Births, Marriages, and Deaths.

(Announcements for Subscribers are made free of charge.)

BIRTHS.

ADAMSON.—At Ardmore, Singapore, on the 23rd May, Mrs. William Adamson, of a son.

ARBUTHNOT.—On the 5th inst., at Greenhithe, Kent, the wife of W. R. Arbuthnot, Esq., of a daughter.

BAILEY.—On the 25th ult., at Midford, the wife of Commander Bailey, R.N., of a son.

BROOKE.—On the 5th inst., at 130, George-street, Edinburgh, Lady Louisa Brooke, of a son.

BRUCE.—On the 29th June, at Duffryn, Aberdare, the wife of H. A. Bruce, Esq., M.P., of a daughter.

DAVIDSON.—At Dalvey, Singapore, on the 31st May, the wife of M. F. Davidson, Esq., of a daughter.

HAMILTON.—On the 14th inst., at Edinburgh, Mrs. Buchanan Hamilton, of a son.

KENT.—At Palace-villa, East Moulsey, on the— inst., the wife of Frank Kent, jun., Esq., of a daughter, still-born.

SANFORD.—On the 13th inst., at 16, Champion-grove, Grove-lane, Camberwell, Mrs. Percival Sanford, of a son.

TAYLOR.—On the 16th May, on board the Trafalgar, off St. Helena, the wife of Capt. J. H. Taylor, of a daughter.

VACHER.—On the 12th inst., at No. 2, Palace-gardens-terrace, Kensington, the wife of W. H. Vacher, Esq., of a son.

WILKINSON.—On the 13th inst., at No. 6, Sussex-place, Hyde-park, the wife of Alfred Wilkinson, Esq., of a daughter.

MARRIAGES.

BEVAN—STRONACH.—On the 9th May, at the British Consulate, Amoy, by the Rev. W. Smith, Consular Chaplain at Fuhchau, Commander George Dacres Bevan, Royal Navy, to Jessie Bowie, daughter of the Rev. John Stronach.

BROOKE—WELSTEAD.—On the 18th May, at Singapore, by the Rev. T. Nicolson, J. Brooke Brooke, Esq., of Sarawak, to Julia Caroline, second daughter of the late Benjamin Welstead, Esq., of Kimbolton, Huntingdonshire.

LOCKHART—MACADAM.—On the 27th June, at the residence of her brother, Brighton-place, Portobello, by the Rev. William Stevenson, Bothkennar, James Lockhart, Esq., of Shanghai, China, to Margaret, daughter of the late William MacAdam, Esq., of Glasgow.

POTTER—HENDERSON.—On the 26th June, at St. Paul's, Withington, by the Rev. R. Burton, rector of the parish, William Potter, Esq., to Agnes, eldest daughter of C. P. Henderson, Esq., of Withington Hall, near Manchester.

DEATHS.

CALDAS.—On the 19th June, at Lisbon, Joaquim V. Caldas, late of Hong Kong, aged 36.

HANCOCK.—On the 3rd inst., at Turnham-green, of diphtheria, Horatio Spencer, eldest son of B. E. Hancock, Esq., of Ceylon, aged 4 years and 4 months.

COLEPEPER.—On the 9th inst., of chronic dysentery, at No. 4, Darnley-road, Hackney, in the 57th year of his age, John Spencer Colepeper, Esq., late police magistrate in Ceylon.

JOHNSON.—At Hong Kong, on the 15th May, John Johnson, seaman of the British brig *North Star*.

LAZARUS.—At Hong Kong, on the 15th May, — Lazarus, passenger of the British brig *North Star*.

LOWDER.—On the 2nd inst., at Chippenham, Wilts, from the upsetting of a boat, Alicia Eirene, aged 16 years, eldest daughter of the late Rev. John Lowder, incumbent of Derry-hill, near Calne, and afterwards British Chaplain at Shanghai, China.

MULLER.—At Hollywood-road, Hong Kong, on the 12th of May, Paul Muller.

SMITH.—At Hong Kong, on the 15th May, Andrew Smith, chief officer of the British brig *North Star*.

VOIGHT.—At Hong Kong, on the 16th May, of wounds received from pirates, Augustus Voight, Master of the British brig *North Star*.

COMMERCIAL REPORT.

JAPAN.—NAGASAKI.

IMPORTS:—Grey shirtings, 5½ catty, $2 40c. to $2 50c.; ditto, ditto, 6½ $2 90c. to $2 95c.; T cloths, no demand; white shirtings, $3, nominal; white spots, $2 75c. to $2 85c.; dyed ditto, $3 70c. to $3 75c.; white brocades, $2 80c. to $2 90c.; dyed ditto, $3 70c. to $3 80c.; chintzes, $2 40c. to $2 75c.; damasks, $5; handerchiefs, 50c.; lawns, no demand; camlets BBB, $24 to $24 50c.; ditto ss, $23 to $23 50c.: ditto H or X, $20 to $22; long ells, Spanish stripes, lastings, velvets, no demand; lustres (40 yards), $9 50c.; orleans (plain), ditto (figured) $6 to $7; spelter, no demand; tin plates, no inquiry; lead, $8 50c.

EXPORTS:—Vegetable wax, per picul, $12 to $13; bees' wax, scarce; gall-nuts, $6 50c. to $6 70c.; rape seed, $1 80c. to $1 90c.; ditto oil, $7 50c.; mother-o'-pearl shells, $1 25c.; iron, $2 85c. to $2 90c.; copper, scarce; tobacco (common), $3 to $4 50c.; ditto (good), $5 to $7; isinglass (best), $23 to $26; camphor, none in the market; sulphur, $2; coir, $2 50c. to $4; matting, $2 75c.; coal, $4 65c.; printed cottons, 50c.; tea, plentiful and cheaper than at the date of our last report; silk, still scarce and dear, although a few parcels have been offered at reduced prices during the last fortnight.

TIEN-TSIN.

Grey shirtings—5½ to 7 catty, 2.0.5 to 2.5 taels; 7½ catty, 2.6 taels; 9 catty, 2.7.5 taels: deliveries, 7,000 pieces. White shirtings—56 reed, 2.3.0 taels; 64 reed, 2.4.5 taels; 68 reed, 2.6.0 taels: deliveries, 3,000 pieces. Blue shirtings, 4 taels. Red shirtings, 3.8.0 taels. T-cloth, 4½ to 5½ catty, 1.3.0 to 1.4.5 taels; deliveries, 2,100 pieces. Spotted shirtings—white, 2.4.0 taels; coloured, 2.8.0 taels: deliveries, 1,600 pieces. Chintzes, 1.4.0 taels; deliveries, 1,100 pieces. Handkerchiefs, blue and brown, 5 mace per dozen. Brocades—white, 2.1.0 taels; coloured, 2.9.0 taels, per piece: deliveries, 2,700 pieces. Damasks—blue, 5 taels; assorted colours, 4.7.0 taels: deliveries, 800 pieces. Long ells, IIH scarlet, 9 catty, 6.5.0 taels. Velveteens, 1.8 mace per yard. American goods—brown sheetings, 40 yards, 11 catty, 3 taels; 12 catty, 3.1.0 taels; drills, 40 yards, 2.9.0 taels. Jeans, 30 yards, 2.6.0 taels per piece. Camlets—blue, 25 taels; red, 20 taels. Lastings, blue, 12 taels. Steel, large size, 16 taels per picul. Lead, 6.5.0 taels per picul. Tin plates, 5.7.0 taels per box. Spelter, 8 taels per picul.

CHINA—IMPORTS.

SHANGHAI.—The imports of manufactures for the fortnight have been per *Antagonist* and *Glenclune* from London, and *Sharpshooter* from Liverpool. There has continued a good export demand for Tien-tsin, and some inquiry has also sprung up for Hankow. The descriptions of goods required for these markets are Grey Shirtings, Teacloths, Chintzes, Brocades, Camlets, American Drills, and Jeans—and for these the market tends upwards. To Japan there is very little doing. The local demand appears steadier. Woollens being out of season are very dull. The clearances of the fortnight are stated at:—Longcloths, Grey, 51,450 pieces, White, 12,270 pieces; Teacloths, 33,200 pieces; American goods, Drills 3,500 pieces, stock 270,000 pieces); sheetings, 5,000 pieces (stock, 20,000 pieces); jeans, 1,500 pieces (stock, 16,500 pieces); spotted shirtings, 7,600 pieces (white), at 1.8.5. to 1.9.5., and 1,500 pieces coloured, at 2.4.5. to 2.5.5.; brocades, 1,650 pieces (white), at 1.8.5. to 1.9.0., and 150 pieces (coloured), at 2.5.5. to 2.6.0; chintzes, 3,500 pieces, at 1.4.5. to 1.7.5.; velvets, 2,500 pieces (black, 1m to 1m 3c, blue, 1m 4c to 1m 5c per yard); handkerchiefs, 1,160 dozen (brown, 3m 8c; blue, 6m 5c); English drills, 3,000 pieces, at 2.1.5.; dimities, 700 pieces, 1.2.0. to 1.3.0.; Spanish stripes, 42 pieces; long ells, 60 pieces; camlets, 120 pieces; lastings, 560 pieces; iron, 400 piculs (this article is dull with heavy stocks); lead: in limited request but in small stock; tin: very quiet; tin plates are quoted high, but the demand is limited.

HONG KONG.—Sales of the fortnight: Shirtings, 1,500 pieces sound, and 18,000 pieces damaged, at auction. T-cloths, 5,000 pieces sound, and 8,000 pieces damaged, at auction; Aw. drills, 3,000 pieces; camlets, 100 pieces; iron, 1,000 piculs; lead, 500 pigs; quicksilver, 50 flasks.

PROVISIONS, SHIP CHANDLERY, &c.—American pork is saleable occasionally, but is in full supply: the quotation is about $13 per barrel for prime mess. Beef is in enormous stock; a sale of American is reported of mess at $6 per barrel. Flour is likely to become a little better; 2,500 barrels have been shipped to Manila, and 500 barrels to Shanghai. Fresh Gallego and Haxall are worth at present about $8.50 to $8.75. Rope, especially Europe, is in heavy supply, as are all other articles usually placed under this heading. Coals are difficult to quote. Storage cannot be had, and cargoes are therefore sold afloat at what they may fetch. If there be a demand at the time, a sale may be effected; otherwise they are difficult to move. The stock is ample, but not large. The wholesale rates for cargoes afloat may be quoted $9 to $10 for English steam, and $6 for N. S. W. At Shanghai the quotations are, English steam, 14 taels; Japan, 8 taels; Sydney, 11 to 11½ taels.

CANTON.—The sales of the fortnight have been perfectly insignificant. Yarn, 212 bales; shirting, 3,000 pieces; T-cloths, 4,280 pieces; longells, 100 pieces; lead, 350 piculs; quicksilver, 130 flasks; steel, 500 tubs (English, at $450 to $480).

CHINA—EXPORTS.

TEA.—The opening of the Hankow trade has entirely altered the position of the tea market. The general impression appears to be that large quantities of the leaf will be procurable at that port and will be sent to Shanghai for manipulation and packing. Many country Congous will also doubtless find their way thence, packed and ready for shipment. The new Congous it will be seen have commenced to arrive at Foo-chow; and from the fact of a number of the tea clippers being hurried thither, it might be inferred that foreigners are anxious buyers, and will open the market soon. From the cessation in the demand for Black Teas, however, the probability is that exporters will await the turn of events at Hankow, and will be guided accordingly. As will be seen from a perusal of the market advices given below, there has been more business done during the fortnight in Country Greens than for some time past.

SHANGHAI.—Black: During the fortnight a few small settlements have again been made out of arrivals from Ningpo, and purchases amount to 1,800 chests, of which 1,200 chests are Ningchows at 24½ to 26¾ taels; 400 chests Hohow at 20 taels, and 200 chests Common Flowery Pekoe at 24 taels. Settlements to date are now 75,600 chests against 272,950 chests at the corresponding period last year. Stocks of all kinds only amount to 5,650 chests, of which the greater part are common kinds of Congou and Flowery Pekoe. The recently received advices from Hankow have led many to look for early and large receipts of new Teas at that port, and, influenced by this expectation, prices for the above settlements show a decline of 1 to 2 taels on previous quotations. The business in Greens during the past fortnight has been considerable at Ningpo for shipments hence to America. Settlements amount to 22,560 half-chests, making to date 134,580 half-chests against 442,116 half-chests same period last year. In Japan Teas nothing has been done worthy of note, the new season's leaf will very shortly come forward, and meanwhile old stocks are neglected. Total settlements to date amount to 48,000 half-chests. Stocks: China Teas 1,100 half-chests here, and 4,000 half-chests at Ningpo; Japan Teas 3,600 half-chests. Prices without change, and quite dependent on the operations of two or three buyers for the United States.

FOO-CHOW-FOO.—Two or three small chops of new Congou have arrived, but they have not been placed upon the market. They are expected down in quantity in another week. The rumour runs that the quality is poor and the price high. The dealers are chary of buying in the interior until they shall learn something definite about the Hankow

Digitized by Google

market, fearing that they may be caught with stock. The settlements of the fortnight have been insignificant, and would hardly be worth noticing but for the purchase of a chop of Country Greens. for which the holders became more moderate in their demands. The following is the report:—Congou, 980 chests and 130 half-chests do. at 11½ to 12½ taels for ordinary, up to 18 to 19 taels for fair Hohow packed. Country Greens, 1,000 half-chests at 31 taels all round. The unsold stock upon the market (not reckoning the new Congous) is 8,000 chests; Congou, 300 half-chests; Oolong, 900 chests Flowery Pekoe, and 300 packages Country Greens.

CANTON.—New Oonams and Oopack Congous are expected in a month hence. Advice of the settlement of some is stated to have been received from the tea districts at prices below those ruling last season. The settlements of Congous for the fortnight have been small. Three chops of old Congou have arrived which complete the season's supply. The new Tayshan Congous contain spurious leaf, and are rejected by foreigners in consequence. Country Greens have been moved to some extent at lower rates, and a fair business has been done both in Scented Teas and in Canton Greens. The following are the settlements reported during the fortnight:—Congous, 3 chops Oonam at 27 to 28 taels. 840 chests Canton, packed, at 20 taels. Scented Teas, 4,000 boxes new Orange Pekoe at 27 to 34 taels, and 2,000 boxes old ditto at 18 taels. 700 boxes Caper, new at 27 to 31 taels. Oolongs.—400 half-chests, at 18 taels. Moyune Greens.—6,100 packages, at 35 to 65 taels for Gunpowder and Imperial, 26 to 32 taels Young Hyson, 32 to 56 taels Hyson, 22 to 28 taels Hyson Skin and Twankay. Canton Greens.—5,500 boxes Gunpowder at 20 to 24 taels, 2,500 chests 1,000 boxes Young Hyson at 20 to 30 taels. The stock unsold on the market is called 8 chops Oonam and Oopack Congou, 9,400 packages Moyune Greens and Canton-made Teas of all sorts in various stages of preparation.

RAW SILK.—SHANGHAI.—There has been more activity in the market, consequent on the 26th March account from Europe being considered as showing signs of improvement. Throwns have commanded the principal attention, in consequence of a comparatively heavy reduction in the prices asked. In the better sorts of Tsatlees the prices have only given way about 5 taels, and inferior sorts and Taysaams have declined fully 10 taels per picul, whilst Thrown have been freely offered at from 15 to 25 taels reduction. The reports from the interior of the expected crops are still satisfactory, and visitors recently returned thence state that both the worms and mulberry leaves are unusually abundant. Should the Rebels not interfere with the production or the transit, there is every prospect of a good yield. Musters of new silk may be looked for in about a fortnight, and will probably go forward by next steamer. The transactions of the fortnight are estimated at 1,500 bales, making the prices—Tsatlees, No. 1 and 2 none; No. 3, Tls. 395 to 405; No. 4, Tls. 370 to 390; No. 5, Tls. 340 to 360. Taysaams, Nos. 1 and 2, none; fair to middling, No. 3, Tls. 270 to 290; Nos. 4 and 5, Tls. 240 to 265. Hangchow Hong Tsatlee, none. Yuenfa, Tls. 315 to 360; Hainings, Tls. 260 to 300; Sewhings, Tls. 290 to 315; Laeyongs, Tls. 250 to 255; Throwns, Tls. 315 to 400.

CANTON.—The musters of the new crop are not yet on the market. It is reported plentiful and good. The market has fallen materially upon last year's rates. Re-reeled Cumchook may be contracted for at $425.

DRUGS AND OTHER EXPORTS.—Cassia Lignea is quoted at Canton, $17 50c. to $18. At Macao $17—no sales reported. Cassia Oil, Canton, $285. Macao, $280. no settlements. Cassia Buds: Canton, none. The Macao quotation is $38. Star Anniseed: Macao quotation, $14 75c. stock. Anniseed Oil, Canton, $160. Macao, $158. Rhubarb is firmly held at Canton—no settlements reported. Vermillion at Canton is quoted $37 50c. per box in very full supply. Galls scarce and wanted. Galangal at Macao is quoted $4.

SINGAPORE.—The demand for some European imports has improved, and a moderate amount of business has been done. In cotton manufactures the inquiry has been chiefly for grey shirtings, T-cloths, and yarn, the sales of which are stated under their respective heads. Most exports are in good demand, and as tonnage for England is more abundant, transactions to some extent have taken place.

MANILA.—In imports business is very dull, owing to the large arrivals just to hand, and which keeps dealers from making any purchases, as also the approaching wet season, which is most unfavourable for moving off goods. A little more animation has been felt in the produce-market, but without any alteration in quotations.

BANKOK.—The active demand for rice has been stopped by the fall in prices in China. Sugar demand small, and holders are waiting better rates. Pepper: all arrivals have been eagerly picked up.

The picul is 133⅓ lbs. weight; the tael at Shanghai is equal to 1 dollar and 40 cents. and is divided into decimal parts of ten.

EXCHANGES ON LONDON.

[For dates, see first page.]

EXPORTS FROM CHINA.

Per Madras (mail steamer), from Hong Kong, May 12, to London.—Silk, 559 bales. To the Continent—117.

Per Ziba, from Canton, May 13, to London.—Silk, 1,009 bales; tea, not reported.

Per Golden Eagle, from Canton, May 15, to London.—Tea, 295,300 lbs.

Per Ganges (extra steamer), from Hong Kong, May 18, to England.—Silk, 53 bales.

Per Carribbean, from Canton, May 24, to London.—Tea, 1,014,000 lbs.; sundries, 885 packages.

Per Fader's Minde, from Canton, May 17, to Falmouth.—Cassia, 340 piculs; sugar, 2,000; sweetmeats, 10 boxes; canes, 80 mil.; soy, 30 tubs; China ware, 5 cases; sundries, 14 packages.

Per Veloz, from Conton, May 12, to Sydney.—Tea, 611,170 lbs.

Per Conflict, from Canton, May 14, to Melbourne.—Tea, 425,800 lbs.

Per Moonlight, from Hong Kong, May 17, to San Francisco.—Tea, 1,111 packages; sugar, 2,325 piculs; rice, 400; oil, 150; matting, 500 rolls; opium, 4,100 taels; fire crackers, 181 boxes; China goods, 3,157 packages; gunny bags, 16,700.

Per Harkaway, from Hong Kong, May 22, to San Francisco,—Tea, 300 packages; rice, 150 piculs; matting, 743 rolls; fire crackers, 134 boxes; China goods, 2,994 packages; beef, 136 barrels.

Per Dictator, from Hong Kong, May 24, to San Francisco.—Sugar, 400 piculs; rice, 2,400; tea, 500 packages; opium, 2,400 taels; China goods, 2,260 packages.

Per New Great Britain, from Hong Kong, May 15, to Sydney and Melbourne.—Tea, 55,000 lbs.; sugar, 1,300 piculs; oil, 125; China goods, 2,647 packages; prepared opium, 19,200 taels.

EXPORTS FROM MANILA.

Per Kate, May 19, to London.—Hemp, 4,300 piculs; sugar, 9,600; sapanwood, 86; coffee, 428; mother o'-pearl shells, 143; cigars, 2,454 mil.

Per Regina Maris, May 20, to London.—Hemp, 1,900 piculs; sugar, 12,800; sapanwood, 200; cigars, 2,355 mil; indigo, 364 qqls.

Per Prioress, May 14, to New York.—Hemp, 6,022 piculs; sapanwood, 300; hides and cuttings, 755; indigo, 97 qqls.

Per George Lee, May 7, to Sydney.—Sugar, 10,526 piculs; cigars, 1,350 mil.

Per Anna Digna, May 14, to Sydney.—Sugar, 14,182 piculs; coffee, 290; cordage, 1,056; cigars, 1,000 mil.

EXPORTS FROM PENANG.

Per Parsee, for London, May 25.—Tin, 868 piculs; sugar, 2,031; black pepper, 1,517; cutch, 1,599; tapioca, 1,553; buffalo hides, 93; cow hides, 32; buffalo horns, 134; india rubber, 102; rattans, 41; nutmegs, 278; mace, 95; cloves, 3; isinglass, 100; nutmeg oil, 108 bottles; rum, 3,200 gallons.

Per Numa Vidal, for Marseilles, May 30.—Tin, 1,400 piculs; white pepper, 277; gum benjamin, 145.

EXPORTS FROM SINGAPORE.

Per Britannia, to London, May 22.—Tin, 553 piculs; gambier, 2,200; sago flour, 860; black pepper, 1865; white pepper 98; coffee, 460; gutta percha, 87; benjamin, 8; rattans, 120; spice, 7 cases; sundries, &

Digitized by Google

Per Titania, to Hamburg, May 28.—Gambier, 4,042 piculs; black pepper, 2,398; white pepper, 75; pearl sago, 530; tapioca, 32; buffalo hides, 12; sapanwood, 184; rattans, 68; merchandise, 4 packages transhipped.

Per Australia, to Falmouth for orders, May 28.—Gambier, 8,811 piculs; black pepper, 5,269; white pepper, 351; sago flour, 103; pearl sago, 104; gum dammar, 25; sapanwood, 50; rattans, 100; tea, 600 chests.

SHIPPING INTELLIGENCE.

ARRIVED.

At SHANGHAI.—From Liverpool: May 14, Sharpshooter.

At HONG KONG, MACAO, and CANTON.—From Liverpool: May 25, Maiden Queen. From Toulon: 11, Heloise. From Cardiff: 12, Star Dockum; 14, B. Hertog Van Sax Weimar. From Nantes: 14, Cezar.

At MANILA.—From Liverpool, May 7, Julio; 8, Soberano; 13, Pepita. From Bristol: 10, Jesusa; 13, Joaquina Viet.

At SINGAPORE.—From London: May 31, Pilgrim. From Liverpool: 23, Mayola. From Nantes: 24, Auffredy.

SAILED.

From SHANGHAI.—For London: May 14, Ziba.

From HONG KONG, MACAO, and CANTON.—For London: May 15, Golden Eagle; 26, Carribean. For England: 23, H.M.S. Chesapeake. For Australia: 8, Veloz. For Melbourne: 14, Conflict. For San Francisco: 17, Moonlight; 22, Harkaway; 24, Dictator.

From MANILA.—For London: May 19, Kate; 20, Regina Mars. For New York: 14, Prioress. For Sydney: 7, George Lee; 14, Anna Digna.

From SINGAPORE.—For London: May 28, Britannia. For Cowes: 28, Australia. For Hamburg: 22, Titania.

From PENANG.—For London: May 25, Parsee. For Marseilles: 30, Numa Vidal.

LOADING.

At SHANGHAI.—For London: Sir Ralph Abercrombie. For New York: Dora.

At FOO CHOW-FOO.—For London: Beemah, Ellen Rodger, Europe, Falcon, Robin Hood.

At HONG KONG, MACAO, and CANTON.—For London: Invincible, Geelong, West Australian, Mutlah. For Europe: F. Westphalia, Victor Emmanuel, Wild Gazelle. For Australia: Astarte. For Sydney and Melbourne: Matilda, Stately. For San Francisco: Benefactor, Cimber.

At MANILA.—For Liverpool: Pepita, Joaquina Victoria, Julio, Soberano. For Havre: Souvenance. For New York: Independence. For Boston: Saracen. For Havana: Jesusa.

At BANKOK.—For Europe: Hannah Salkeld.

At SINGAPORE.—For London: Granville, Weymouth. For Liverpool: Mayola. For Marseilles: Sainte Anne. For New York: Rocket.

At PENANG.—For London: Sirocco, William and Jane.

FREIGHTS AND CHARTERS.

At JAPAN.—The Antogonist has been chartered to load here for London at £3. 10. per ton of 50 feet.

At SHANGHAI.—To London: Tea, £3; Silk, £4 10s. To New York: Tea, $15; Silk, $25. To Hankow: Measurement goods, $20 per ton. During the past fortnight the supply of vessels has largely increased, but the settlements have not kept pace at same rates, the demand being rather less than previously. For the Coast the business has been also below the average. For Hankow two vessels have been chartered at high rates one having left with a full cargo, and it is reported four lacs of dollars on freight; two steamers have also arrived from there with cargoes. The settlements since our last, are:—To Swatow, Algernon, 25 days, $3,200. To Ningteck, Foo-chow and back, Magna Bona, 50 days, $7,000. To Foo-chow and back, Nabob, 50 days, $7,500; Horatio, $6,000. To Hankow and back, Scotland, Tls. 20,000, and Mona, terms unknown.

At FOO-CHOW-FOO.—All the vessels at this port are waiting for the new teas. The Victor Emmanuel has been chartered at Hong Kong to London at £3. 7s. 6d.

At HONG KONG, MACAO, and CANTON.—For London: £3 to £3. 10s. For New York: Tea, $10; Silk, $25. There is a large amount of disengaged tonnage in port, and as there is no employment for them, they will have to go elsewhere. The new Teas that have commenced to arrive only find employment for first-class moderate-sized British-built clippers. The trade to the United States is still very dull. For the Yang-tsze-kiang steam only can be used, as the current is always running down, and ten steamers are already employed in this trade. The Tientsin trade is also progressing favourably. For Japan the trade is rather dull. The charters reported are:—West Australian and Invincible to London at current rates; Alexander to New York at above rates; Stanley to Sydney at £1,700; Harburg and Isis to Saigon and back at 50c. per picul; Clipper for six months, at $950 per month; Teresa for 4 months, at $1,300 per month, and Burman at $1,500. The Willamette has been sold for $30,000, Manila for $50,000, Chusan for $65,000, and Rajah for $50,000.

At MANILA.—The Julio, Soberano, and Joaquina Victoria are loading for Liverpool at £4 5s. to £4 10s., nearly 5s. per ton being saved in the export duty on sugar on account of their carrying a Spanish flag. The Pepita also gets for same port a full cargo at £3. 12s. 6d.

At BANKOK.—Business is very dull, there being scarcely any demand for vessels. The Samuel Fales is loading for Hong Kong at 50 cents. per picul.

At SINGAPORE.—To London, £3 10s. to £4. Moderate sized vessels are still required for the Rice ports although the demand is not quite so brisk. Seeking vessels are scarce, and the following are the only charters reported:—Mayola to Liverpool, at £3 15s. to £4 5s. Weymouth for London, at £3 10s. to £4. Sainte Ann to Marseilles, at 115 francs. Sillery to Maulmain, at £5. 12s. 6d., for Teak or to the United Kingdom, at £4. 5s., for rice with 10s. extra if to the Continent.

CASUALTIES.

The Egmont, from Shanghai to England, was hove on her beam ends during a typhoon on the 5th and 6th of May, when she was compelled to cut away a jibboom, fore-topgallant, and royal mast, also main topmast, topgallant, and royal masts; lost starboard bulwarks, started covering board, and stancheons. After the vessel righted there was five feet of water in the hold. Lost one boat, and several sails.

The Osprey, from Saigon to Hong Kong, with rice, struck on a shoal of the West Edge of the Paracels on the 8th May, and in eighteen hours the ship was almost sunk, the starboard bow only being above water. Captain and Mrs. Allen, Mr. Cole, a passenger, and seven men took to the longboat, and were attacked three times by pirates, who completely stripped them of every thing, but they succeeded in reaching Macao on the 19th in the Margaret Dundas. The pinnace, with second officer, carpenter, and three apprentices, reached the coast on the 13th with the longboat, but parted on the arrival of the pirates, and was ultimately towed by a fishing-boat into Macao.

The Albert Edward, in running up the Bamboo Town on the 17th May, was hailed by the Golden West to put her helm in a certain way, which resulted in the Albert Edward's helm being hard aport and the Golden West's to starboard, the effect being a collision, in which the Albert Edward was cut down to her copper, right through the topgallant forecastle; her foremast going by the board as short as a carrot, taking with it the main topgallant mast, and all the gear between it and the flying jibboom. The Albert Edward is now in dock, the Golden West is in Hong Kong, and who pays the damage is to be a question for the Admiralty Court.

The crew of the steamer Sir Jamsetjee Jejeebhoy were frightened from their propriety on the last passage to Hong Kong. There were some two dozen passengers on board, and in the middle of the night they set up a tremendous hullabaloo, in the supposition, it is thought, that the captain, Skead, would come below to see what was the matter, when, of course, he would become an easy victim. But they mistook their man. Captain Skead simply directed the "look out" to lock the hatch bars, and keep the passengers down below, while he took aim from a twelve-pounder aft at a boat which had been accommodating her tacks to the steamer's progress, and so induced her to sheer off. In the morning the passengers said that one of them had had the nightmare, and so put them all in a fright; but there must have been something more than that, for the helmsman actually ran away from the wheel, and took refuge forward till called back by Captain Skead.

PASSED STRAITS OF SUNDA.

From England and Continent to China: May 14, Carlota; 16, Farvel; 22, Northfleet; 26, Resolute. From New York: 25, Mandarin. From China to England and Continent: 20, Excelsior. To Sydney: 19, White Star. To Demerara: 19, Whirlwind. To New York: 20, Lord Clarendon. From England and Continent to Singapore: 14, Auffredy; 16, Pilgrim; 20, Reunion; 24, Tigris; 26, Prince Charlie. From Singapore to England and Continent: 19, N. Riccarde Schmidt; 22, Skiddaw. From Liverpool to Batavia: 15, Souverain. To Amoor: 14, Althea. To Manila: 23, Gertrudio. From Manila to New York: 21, Sherwood. To Boston: 24, Jumna.

THE TRADE OF CANTON.

Having now the official returns, compiled by the Foreign Inspectors of Customs, for the second half-year, we are enabled to give an abstract of the general trade of the Port of Canton for 1860, and it is highly satisfactory to notice, by the latest returns, the progress that it is making, both in imports and exports. The value of the for former were, in the second half of the year, a quarter of a million sterling in excess of those of the first half of the year, while the exports in the same period were about one and a quarter million sterling in excess. The aggregate value of the import trade for the year is shown to have been £4,353,744, and of the exports £3,838,939, or a total foreign or external trade of £8,192,683.

Although considerably behind Shanghai in its exports of tea and silk, the shipments of these staples would seem to be rallying. The total export of tea from Canton in the past year was 35,101,811 lb., of which 2,008,410 lb. only was green, and the rest black. 30,616,509 lb. were sent to Great Britain direct, and 2,287,344 lb. to Hong Kong for shipment. The United States took 1,313,220 lb. of tea from Canton, and Australia, Bombay, and South America a few hundred pounds each. The shipments of silk in the year were 5,489 piculs of raw and 82 of thrown, besides 4,982 piculs of coarse, 168 of refuse, and 23 of cocoons. The United States took 492 piculs of raw silk, Bombay 912 piculs, and the rest nearly all came to Great Britain. As will be judged by the previous figures, it was principally on the last half of the year that the great bulk of the shipments of tea and silk were made.

The shipping entered inwards in the port in the half-year ending December, 1860, numbered 540 vessels, measuring 178,582 tons, of which 134 ships and 57,483 tons were in ballast. The clearances numbered 528 ships and 170,229 tons, of which 124 and 64,202 tons left in ballast. The vessels under British flags entered inwards were 113 of 59,798 tons, and 65 river steamers and lorchas of 8,725 tons. Under the American flag 43 square rigged vessels of 36,106 tons, and 239 river steamers of 42,616 tons. The summary of duties paid in the half-year was 962,541 taels, of which 628,234 was paid by British shipping and 281,805 by American ships.

Continental Intelligence.

FRANCE.

General Ignatieff is at present in Paris. This General distinguished himself at the Congress of Paris by causing the frontiers marked out by the negotiators to be rectified to the advantage of Russia, and by so doing added to his country an extent of about two hundred kilometres. A lucky chance has also enabled him since then to render a still greater service to Russia. He will be better known to our readers as the negotiator of the Treaty with China, which incorporated with the Siberian territory an extent of nearly two thousand square kilometres.

The official reception of the Siamese Ambassadors by the Emperor took place on the 28th ult. at Fontainebleau. The presents which the Ambassadors are charged to present to His Majesty were sent off early in the morning. Independently of the Order of the White Elephant, studded with diamonds, these presents consist of a crown of massive gold, covered with diamonds; a gold waist-belt, with a plate ornamented with diamonds; gold dishes, richly enamelled, of enormous weight; and a number of palanquins, thrones, arms, &c. The crown, which is of a conical form, is covered with a band of very thin caoutchouc, on which the diamonds are placed, so that at a little distance it resembles a pile of precious stones. The *cortége*, after passing through the town, entered the Palace by the Cour d'Honneur. A battalion of the Guard was drawn up in the court, and paid the usual military honours, and a detachment of Cuirassiers was stationed on either side on the grand staircase and in the gallery. The Ambassadors were received at the foot of the staircase by the Grand Master and the First Master of the Ceremonies. Their Majesties, having near them the Prince Imperial, were seated on a throne erected for the purpose in the gallery Henri II., and were surrounded by the great officers of the Crown, and the great officers and ladies of their households. The Minister of Foreign Affairs was also present. The Ambassadors and their suite, on entering the gallery Henri II., went on their knees and advanced in that way to the foot of the throne to their Majesties, as they do in approaching their own Sovereigns. The First Ambassador handed to the Emperor an address from the First King of Siam, which the Rev. Father Renaudie, missionary and interpreter to the Embassy, read in French to their Majesties. The First Ambassador afterwards presented to the Emperor and the Empress the various articles sent by the Kings of Siam, which had been laid out beforehand on tables in the gallery.

The French Government has received despatches from Cochin China dated Saigon, the 14th of May. Numerous deputations had arrived at the French head-quarters since the affair of My-Tho, to offer to submit to the French general, so that the country conquered is now placed under the French authority. The Envoy of the Viceroy of Cambogia had brought a satisfactory reply. His submission is accepted, and in return his entire private property has been guaranteed to him. If he wishes to remain in office he is to have the highest position in the local Government. His son, who is young and active, has been offered a commission in the native corps which is being raised to serve with the French. It is expected that this corps will be of great service to the French, as the Annamites who are to compose it are to be well paid, well fed, and well armed. The accounts from the capital are sad. The King had published an edict, sentencing all to death who should have any intercourse with the French. He caused the general who commanded the right wing of the army at the attack of the forts of Ki-Hoa to be executed in the great square of Hué. The unfortunate man had behaved gallantly on the occasion, and had been invited by the Emperor to come to Hué to receive a reward. When the Commander-in-Chief heard of the fate of his companion in arms he committed suicide. These facts had detached many adherents of the Emperor, and induced them to seek French protection. The French authorities expect that they will have possession of the entire of the Annamite territory within a year or two. The Annamite empire forms the eastern part of the Indian Chinese Peninsula, situated between Hindostan, China, the Gulf of Bengal, and the Ocean. The possession of this vast territory will give France considerable influence in Asiatic affairs. The Annamite Cambogia, of which the French have completed the conquest, is considered by the French as a most valuable colony. Its south-eastern boundary joins the kingdom of Siam, the Government of which is now seeking an alliance with France. Its extent is 14,000 square leagues. At the date of the despatches military operations were suspended, and the troops were occupied in repairing the fortifications and in building a lighthouse on the point of Cape St. James. Measures are being adopted by the Minister of War to organise a corps of 2,000 men, which, with the native troops, are to form the garrison of the new colony, which, it is expected, will be sufficient not only to maintain possession of the conquered province, but to attack and conquer Hué, the residence of the Emperor.

Another despatch, received somewhat earlier, states that all military operations will be discontinued in the district of Hué, that Vice-Admiral Charnier, commanding the French naval force in Cochin China, has solicited his recal, in consequence of ill-health, and that the troops are said to be suffering greatly from the climate. A letter from Toulon says that a corps of Spahis are being recruited in Algeria for Cochin China. The writer of the letter adds that the Annamites are unfit for cavalry, being unable to learn to ride. The French cavalry in the new colony is consequently to be formed of Spahis from Algeria and Tagals recruited in the Philippine Islands, who are naturally accomplished horsemen.

At the Paris Biennial Exhibition, M. Delamarre exhibits four pictures, "The Occidentalist," the "Lantern-painter," the "Tea Merchant," and "Chinese Fishermen," which belong especially to our field. Two of them are engraved in the *Illustrated London News* of June 29th, and are thus described in detail:—

"'The Lantern painter' portrays a native of Canton painting, with much gravity, large Chinese characters upon a lantern already ornamented with antique figures. His manner of manipulating the brush or pencil is imitated from nature by the French artist. By the side of the lantern-painter is a Chinese of a higher class making some observations. In the background there is a female holding a lantern. The interior is decorated with small columns and carvings in red wood, similar in colour to that known as Peking lake or dull vermilion. 'The Occidentalist' is the name the artist has given to the Chinese *savant* who studies the politics and literature of the Occident. He bears the same relation to the Chinese that an Orientalist does to Europeans. This picture represents a blue mandarin endeavouring to understand the books and newspapers of Europe, particularly those of England and France. On the table at which he is studying are *The Times* and the *Moniteur*. The wrinkles on his forehead indicate a supreme effort to comprehend the writing of "those interesting barbarians"—notions which he cannot at all reconcile with his previously-conceived ideas of the perfection of Chinese civilisation. The principles advanced by the European documents seem to embarrass him more than the words of the foreign languages of which he has made himself the master. The wooden lattice-work in the background is very characteristic. In some cases it is completely open, but occasionally the interstices are filled up with glass or other transparent material."

A letter from Toulon of the 9th inst. states that the steam frigates *Gomer* and *Labrador* sailed that day for Cochin China with artillery and marines; seventeen Sisters of Charity proceeded to Cochin China by the same conveyance. The steam-transport *Sevre* is waiting orders to follow. Accounts were received at Toulon by the Indian mail of the death of Captain Causse, of the Imperial navy, one of the five superior officers sent to Cochin China to serve under the orders of Admiral Charner, Captain Causse died in the harbour of Aden of apoplexy.

Advices from Egypt state that Mr. Lange, the English agent of the Suez Canal Company, reached Alexandria on the 18th of June, and that M. de Lesseps left the next day for France. Mr. Lange was about to start for Port Said, and then to traverse the track along which the canal works are going on. The Viceroy had granted his steamer, and Mr. Colquhoun, the British Consul-General, with Mr. Saunders, having agreed to join the expedition, it was now definitely arranged that they should all leave on the 29th. The necessary instructions had been sent to prepare camels, horses, &c., to meet them, and Mr. Lange had full powers to inspect the books and everything connected with the project. According to last reports there were 8,000 men at work.

The *Siècle* has the following:—

"We have received No. 80 of Vol. XIII. of the *Annales de la Sainte Enfance*. The association by which this work is published has for its object the salvation of youthful Chinese, and from not more than twenty-five dioceses it obtained in the year 1860 the sum of 487,390f. Here is a specimen of the manner in which young Chinese are baptised without the

Digitized by Google

knowledge of their parents:—Manuel, one of the persons who baptises for me, was one day on the look-out for a favourable opportunity of exercising his office. A pagan perceiving him said, 'You are a physician—come quickly, my child is dying!' Manuel hastened to the house indicated; a child whose body was much swollen was shown to him. He examin d the child and put his hand on its forehead. 'There,' said he, 'is the seat of the malady. The forehead is much heated, and must be refreshed. Bring a little water!' He touched the forehead again. 'Yes,' said he, 'a little water is required,' and he baptised the child without any one knowing what he was doing. 'The head of the child is very feverish,' he said afterwards; 'the malady is grave, I will return to-morrow.' The next day he went to the house, but the little angel was already in heaven. Further on we read:—'A couple of idolators attending our schools had a child who learned some prayers, and heard speak of the virtue of the cross. One day the father having something the matter with his hand, the child made secretly the sign of the cross on it, and an almost instantaneous cure took place—an event which greatly excited the child's confidence in that adorable symbol. On another occasion when his little sister, aged about four years, had an attack of fever, he resolved to cure her as he had done his father. He accordingly took her to a corner, made her recite the *Pater* and the *Ave*, accompanied by the sign of the cross, and the little girl was immediately cured!' Is it not to be lamented that religious associations, whether authorised or not, should publish such tales? Is that manner becoming of administering the sacrament of baptism which is described? And are not statements of cures effected by means of a *Pater* and an *Ave* of a nature to keep alive ignorance and superstition? We appeal to our readers to judge."

RUSSIA.

(FROM OUR OWN CORRESPONDENT.)

ST. PETERSBURG, July 8.

An overland letter from Peking states that the insurgent forces are daily increasing in number, and advancing rapidly towards the capital. San-Van, the commander-in-chief of the Emperor's army, continues to suffer one defeat after another, and in one encounter with the rebels was nearly taken prisoner. Evidently encouraged with their success, the Tae-pings are preparing to attack Peking, their advanced posts being already moved forward to within 200 wersts of the city. The work of rebuilding the Emperor's Summer Palace is being carried on with extraordinary rapidity, and makes great progress, which is not to be wondered at, as there are no less than seven hundred labourers employed on the works daily. The reconstruction of the palace bears evident marks of an admixture of European architecture. The Bagdo Chan was still residing at Jok-he, having postponed his return to Peking till the autumn, but it is expected that when that period arrives a fresh postponement will be made. The Emperor's favourite minister, Sou-Soug, a man of insupportable pride and highly unpopular, has been grievously wounded by some high personage, and is said to be in considerable danger. The caravan from Kiachta had not arrived when the letter was despatched, but was looked for in a few days.

A letter from a Russian Missionary at Peking contains the following:—"The good news that God has been pleased to grant us the means for the holy work of propagating his Divine precepts within the limits of this vast empire, redoubled my impatience to pay a visit as soon as possible to our Christian villagers, established about half lay between Tane-tsin and Peking, a short distance from the high road, in the village of Doun-dine-agne. This village has long been an object of peculiar interest for our mission; but it is only lately that I—the first pioneer of the missionaries,—have been enabled to effect my intentions, after overcoming many difficulties thrown purposely in my way. Christianity has long since been professed by the inhabitants of this village, but they were nearly cut off from all communication with the Russian missionaries, and they had had no opportunity of having their wives and children baptised. The result of my visit was that I have been enabled to send them an enlightened and pious missionary to instruct them in the principles of Christianity during the whole of the season of Lent, after which they will make a public profession of their creed, and be admitted by baptism into the bosom of the Christian Church. It is for this object that I have spent the sum placed at my disposal, which, I hope, will meet the expectations of the generous benefactors who subscribed to the fund."

Russian journals state that a mutiny had broken out in the Mandschurian army in garrison at Peking, in consequence of the non-payment of arrears due to the troops.

Accounts have been received here that the Emperor of China is about to send a numerous embassy to Paris and London. They will proceed overland through Siberia, and make some stay in this city on their way to France and England.

The General commanding the army in the Caucasus has sent in an official report from the Commaudant of the naval station at Bakou, announcing the appearance of a new island in the Caspian Sea, between Bakou and Lenkoran. The officer in command of the schooner *Tourkmene*, employed in surveying and sounding the Caspian, reports, under the 9th (21st) of May, that having left Lenkoran on the 7th, and just passed the island called Pogorelaia-Plita, he perceived on the horizon an island that did not exist there previously. After having attentively examined it, and walked all over it, he describes it as composed of torn and jagged clods of earth, the surface alone being scarcely dry, whilst all beneath was liquid and warm. This new island is about twelve leagues from Svinoi Island, and about the same size. Its elevation is eighteen feet above the level of the sea, and there can be no question of its recent volcanic origin. Bakou lies at the foot of the range of mountains of the Caucasus on the western coast of the Caspian Sea; and the island of Svinoi, which is marked on all good maps, is about fifteen miles from the land.

Colonel Balouzek, one of the Emperor's aides-de-camp, lately appointed Minister Resident at Peking, accompanied by his lady and their suite, as well as by Colonel Boborikine, the Russian Consul for Ourga in China, arrived on the 28th of April (10th of May) at Irkutsk, where they intended to repose from the fatigues of their overland journey for a few days, and then proceed by the caravan route to the Chinese capital.

Private accounts from Siberia state that the frontier Custom-house is shortly to be removed from Kiachta either to Irkutsk or some station on the banks of Lake Baikal.

Our money market is in an alarming state, and great fear—amounting almost to a panic—prevails everywhere, so that silver and gold have totally disappeared, being hoarded up by their fortunate holders. The principal proprietors of mines, as well as the cotton spinning establishments, are in great difficulties. The sugar refiners demand subsidies from Government to the amount of several millions. In many of the manufactories the workmen are discharged for the present, and all business is at a stand-still. Several of the great contractors for farming the privilege of selling spirits have failed and others are tottering. Many industrial undertakings and joint-stock companies are winding up their affairs, and shares inundate the market, and are not to be sold, even at 50 and 60 per cent. under par. Discount is nominally 10 per cent.; but money in reality commands a much higher rate, and large collateral security is demanded for cash advances. The produce market is completely paralysed; all goods unsaleable.

HOLLAND.

(FROM OUR OWN CORRESPONDENT.)

AMSTERDAM, July 10.

At length the great question of the new Governor-General of Netherlands India *vice* His Excellency Mynheer Pahud, whose period of service in the East has expired, is finally settled by the official announcement in the *Staats Courant* of the appointment, as mentioned hurriedly in my last, of Baron L. A. J. W. Sloet van de Beele, hitherto President of the Board of Inspection of Railways, to that honourable distinction. The next paragraph in the announcement states that the present Governor-General of Netherlands India, Mr. Chr. F. Pahud, having tendered his resignation, the King has been pleased to accept the same. Although these alterations are only now gazetted in this country, the Royal Decrees (Nos. 14 and 15) containing the above are dated the 23rd of June, and were sent out by the last overland mail to Singapore, whence they will be forwarded in the usual way by the Dutch mail steamer to Batavia. The Baron is well known as a nobleman of enlightened views and liberal opinions, and in every way well qualified for the high position which he is called to fill. His appointment is thus in perfect conformity with the principles enunciated by the Colonial Minister in the late debates of the States General. Nevertheless it has created some surprise that the selection has been made of a man who has never yet filled any responsible office abroad, and, indeed, never even been in India. It is also worthy of remark that amongst the legion of names mentioned at different times as the successor of Mr. Pahud, that of Baron Sloet van de Beele has never once appeared. It is, however, but fair to suppose that the Colonial Minister would not have recommended him for the office, nor the King have sanctioned and confirmed the appointment, without being fully convinced that he will prove to be the right man in the right place; and thus it is to be hoped that by his conduct he will justify the confidence placed in him by his sovereign, and wield the large amount of authority with which he is invested with credit to himself and with satisfaction to the Government. It is under-

Digitized by Google

stood that the Baron goes out by the present overland mail to undertake at once the duties of his new appointment.

The official announcement of the sudden suspension of the second bi-monthly China mail has created a great and painful sensation in mercantile circles, as this country has a large interest at stake, second only to England, in the continuance of two mails a month as hitherto, and contributes indirectly a considerable share towards defraying the expenses, the number of letters sent to and from Holland amounting to nearly ten thousand by each mail, thus giving an aggregate of about 250,000 letters in the year, not to mention the passengers, specie, and other remittances, as well as books, parcels, and fine goods, to and from Netherlands India. Great hopes are entertained that the British Government will reconsider the matter and reinstate the second or bi-monthly mail, so that the merchants in this country may also profit by and participate in the *status quo ante* as heretofore.

In the Second Chamber of the States General, Mr. van Bosse lately begged leave to ask the Colonial Minister about a book that has lately appeared on the Dutch East India possessions, "Java; or, How to Manage a Colony," * written by an Englishman (Mr. Money), containing information, which purports to be taken from official documents, obtained for him through the medium of the British Consul at Batavia. Amongst other things the work contains, he said, copious documents concerning the revenue and expenditure from the year 1817 down to 1857. He, therefore, wished to know if the figures given in the book may be relied on as official, and if so, whether it is officially correct for the Governor-General to allow a foreigner to inspect documents that have not been laid before the Second Chamber. On the proposal of the President the permission asked for was granted, a day to be named at a future sitting for putting to the Minister for the Colonies the questions, to allow him time to prepare the needful answers.

The King has appointed the following gentlemen to be members of the Commission for the final examination of students at the Royal Academy of Delft, destined for employment in the Civil Service in Netherlands India:—Mr. J. A. Kurenaer, Director of the Academy; Major General J. P. Delprat, Member of the Second Chamber of the States General; Mr. D. A. Junius van Hemert, late Director of Finances and Domains in Java, now on leave of absence in this country; Mr. J. G. Gallois, ex-Resident of Rembang; Mr. H. P. Potter, ex-Resident of Tagal; Mr. J. R. Couperus, Member of the Supreme Court in Netherlands India, now on leave of absence here; Mr. T. Roorda; Mr. A. van der Gon Netscher, of Delft; Dr. J. Pynappel; Mr. S. Keyzer, Professor of Oriental Languages; Mr. D. J. Storm Buysing, Chief Engineer of Water Works and Professor of Hydraulics; Dr. G. van Wieringen-Boaski, teacher of Oriental languages; and Dr. E. Mulder, teacher of Chemistry. There are eleven competitors for the appointment of Civil Officers of the First Class, and seventeen for the Second Class. The examinations have commenced, and the following gentlemen passed for the First Class:—Messrs. J. Bousquet, Baron W. van Dedem, P. Deketh, H. J. Nahuys, and H. Semler.

Baron J. C. W. van Heckeerentot Walien, of the East India Civil Service, late Assistant Resident of Tebing-Tingie, in the Residency of Palembang, Island of Sumatra, now on leave of absence in this country, has at his own request been permitted to retire from the Service with a pension for life.

The following gentlemen are confirmed in their appointments by the Governor-General:—Mr. J. Blok, late Resident of Tapanoele (West Coast of Sumatra), to be Resident of Ternate; Mr. C. de Waal, to be Secretary of Government; Mr. A. J. Hamers, to be Assistant Resident of Tebing-Tingie; Mr. J. Arnold to be Assistant Resident of Siak, and Mr. C. Boers, to be Secretary of the Residency of Banjoemaas.

Chief Engineer Audemans has published a continuation of his triangulations, longitudes, and astronomical and physical observations. One of the principal results achieved by this learned *savant* is the confirmation of the geographical longitude for several important places in Netherlands India; thus, that of Batavia is ascertained to be 106 deg. 48 min. 7·5 sec. east, and the difference of mean time between that city and London (Greenwich), is 7 hours 7 min. 12½ sec. Cheribon is found to lie 1 deg. 45 min. 50·55 sec., and Samarang 3 deg. 36 min. 59·1 eastward of Batavia.

It is now confirmed that Rear-Admiral G. Vogelpoot, the Commander-in-Chief of the Naval forces in Netherlands India, has been superseded at his own request, his successor being appointed in the person of Rear-Admiral May, Naval Aide-de-camp of Prince Henry. Rear-Admiral Vogelpoot on his arrival in this country will be appointed Director of the Royal Dockyard at Vliessingen and Commandant of the naval forces there.

Captains (R.N.) C. J. Berghuis, B. G. Escher, and J. May are promoted to the rank of Schout-by-Nacht, equivalent to that of Rear-Admiral in the British service. A further promotion has taken place in the Dutch navy, viz.:—Four captain-lieutenants to be captains, four first-class lieutenants to be captain-lieutenants, six second-class lieutenants to first-class, and twenty midshipmen to be second-class lieutenants.

It is understood that as soon as the new steam frigate *Adolph of Nassau* is launched and equipped she will be commissioned for home service, instead of the floating battery *Neptunus* (the cut down line of battle ship *De Zeeuw*), which will be put out of commission and laid up again in ordinary, the officers and crew being transferred to the frigate. This, however, cannot be done earlier than September or October.

Government has received intelligence that the steam corvette *Merapi*, Captain-Lieutenant R. L. de Haes, from the East India station, arrived on the 15th of May in Simon's Bay (Cape of Good Hope), and sailed for this country on the 23rd of same month. All well on board.

The Royal Netherlands Yacht Club has given notice that the annual regatta will commence on the 20th of July at Rotterdam. According to the programme published, there are to be twenty-one different rowing and sailing matches, with prizes in money, medals, silver oars, silk flags, and several gold and silver cups to be competed for. This regatta is very popular and always attracts a large concourse of visitors, both from this country and abroad.

The steam corvette *Djambi* having steamed out to the Outer Roads of Nieuwe Deep, sailed for her destination (Curaçoa) on the 1st of July. In hauling out of the harbour a hawser snapped, and broke the leg of one of the sailors.

Another fourth-class screw steam corvette, called *De Amstel*, has been launched at the dockyard here since my last, and sent down to the Helder, to be fitted for immediate service. She is supposed to be destined to reinforce the squadron assembling at Curaçoa for the coast of South America.

Lieutenant (first class) van Rhyn, R.N., has been sent out to Port Mahon to watch the progress in the health of the sailors belonging to the frigate *Evertson*, suffering from ophthalmia, and left in the hospital there.

Captain Dittloff Tjassens, R.N., has retired from the service with a pension, and Captain Braam-Houckgeest, R.N., is appointed in his stead Superintendent of the Royal Dockyard at Nieuwe Deep.

Orders have been given to accelerate the fitting out of the steamers *Bromo* and *Sindoro*, for the reinforcement of the East India station.

The *Vesuvius*, Lieutenant A. Schotberg, sailed from Helvoetsluys on the 4th inst. for Curaçoa, after exchanging the usual salutes with the batteries on her departure.

The Colonial Minister gives notice that a second-class engineer is wanted for service in the steam squadron in Netherlands India. Salary to commence at 350 florins per month (£350 per annum), with a rise of 30 florins per month for every three years' period of service till it reaches the maximum of 500 florins (£500 per annum).

PASSENGERS INWARDS.

Per *Neckar*, Captain Brolin, at Brouwershaven from Samarang: Captain Ullmann, of the E.I. Artillery, and Mrs. Ullmann, Captain and Mrs. Sonnenberg and child, Lieut. Hartweg, and Mr. van Rooyen.

Per *Gelderland*, Captain Hellingman, at Amsterdam from Padang: Messrs. J. P. and E. Cuperus.

Per *Cornelia and Henrietta*, Captain de Veer, at Amsterdam from Passarocan: Captain J. P. Hermerling, of the E.I. Engineers.

Per *Maria Catharina*, Captain de Bos, at Nieuwe Deep from Banjoewangie: Mr. and Mrs. G. J. Koot and nine children, with four native servants.

Per *Johanna and Gertruda*, Captain Flens, at Rotterdam from Banjoewangie: Mr. and Mrs. Barth, family, and servants; Mr. and Mrs. J. C. Stoltenbach.

Per *Cornelis Anthony*, Captain Reinders, at Brouwershaven from Java: Mrs. Terbruggen and family.

Per *Australia*, Captain Jochems, at Nieuwe Deep from Java: Mr. and Mrs. Voigt and five children, Mr. and Mrs. Ketting Olivier and three children, Miss de Haas, Miss Molenbroek, Mr. Bockhorst, and Mr. van Hart.

Per *Ouderkerk aan den Amstel*, Captain Swart, at Brouwershaven from Batavia: Baron and Baroness W. d'Ablaing van Giessenburg, four children, and attendants; Baron and Baroness O. van Nispen, two children, and governess; Lieut.-Colonel and Mrs. Plancken and child; Lieut.-Colonel and Mrs. F. T. Engelburg and three children; Mr. and

Mrs. A. B. Cohen Stuart and four children; Mrs. A. Martherus and two children, Dr. Bauer, of the Medical Staff, E. I. Army, and nine military invalids.

PASSENGERS OUTWARDS.

Per *Jacoba en Christina*, Captain Jaski, from Amsterdam to Batavia: Mrs. Lawick van Pabst, Miss Ten Cate, Miss Raadt van Oldenbarneveldt, Mr. Piquelmont, two Javanese native servants.

Per *Asia*, Captain Molenaar, from Amsterdam to Java: Messrs. C. Leuring, A. van Lethem, P. Muller, and W. ter Flogh.

Per *Straat Bali*, Captain de Jong, from Texel to Batavia: Mr. H. van Holters.

Per *Argo*, Captain van Teutem, from Rotterdam to Batavia: Mr. and Mrs. J. M. Huysdens and two sons, two Misses ten Brummeler, Miss D. Koenen, Messrs. Edward Chastel, and J. van Leeuwen; two Javanese native servants.

Per *Elizabeth*, Captain Snoek, from the Texel for Batavia: Mrs. L. Berger and three children.

Per *Scheveningen*, Captain van der Velde, from Brouwershaven for Batavia: Mr. A. W. Deerns.

COMMERCIAL.

In COFFEE there is not much doing. The transactions are limited, but the market is very firm.

EAST INDIA SUGARS are rather neglected, and sales amounted to not more than 5,000 bags here and at Rotterdam, at previous quotations.

RICE: Dull, and prices decidedly in favour of purchasers.

At a sale of 2,855 bags brown PEPPER, ex *Johanna Catharina*, from Singapore, 22½c. to 23½c. was paid for undamaged, and 21c. to 22c. for damaged. Sound white, ex same vessel, fetched 33½c.

TEA: Languid. At a sale of the cargo of the *Spray of the Ocean*, from Foo-chow-Foo, held at Rotterdam last week, fine Congou went off heavily at 84c. to 85c.; middling 80c. to 81c. A parcel of Japan, ex *General van Stuers*, fetched 63c. to 64c. for good Japan, and 130c. to 133c. for fine flowery Pekoe.

INDIGO is almost the only article that is steady, and it may even be called firm. 95 chests of Java (private trade) changed hands at very full prices. COCHINEAL: Dull.

At a public sale held here since my last 2,000 chests CASSIA LIGNEA, ex *Asia*, Captain Pens, from Canton, via London, sold at 50½c. to 51c.; 855 packages india-rubber, ex *Anna Maria Wilhelmina*, from Padang, fetched 71½fl. to 71¼fl.; 762 bags of LONG PEPPER, ex *Martaban*, from Sourabaya, realised 14c.; 58 bags CUBEBS, ex *Batavia*, from Samarang, were bought in at 81c.; 377 bags GUTTA PERCHA, ex *Otto*, from Padang, all sold at 71c.; 769 bags CUTCH, ex *Johanna Catharine*, from Singapore, sold at 14fl.; 517 bags GAMBIER, ex same vessel, fetched 9¾c. (sold); and 28,400 MALACCA CANES, ex same vessel, found purchasers at 6¾fl. to 7fl.—all private trade.

TIN.—At the Company's sale of 149,188 blocks of Banca the whole quantity was sold at 69fl., but after the sale 2,000 blocks changed hands at an advance of one florin. At a subsequent sale of 6,405 blocks of Billeton only two lots were sold at 69fl., but after the sale the rest was disposed of at the same figure.

HIDES.—1,042 sea-damaged Samarang ox hides were sold by auction at prices ranging from 20½c. to 52c.

At a sale of 500,000 lbs. of old East India copper coin put out of circulation, held in this city by the Netherlands Trading Company, the whole was sold in lots to six different houses, at prices varying from 42.11 to 45.60 per cwt.

SWITZERLAND.

The Council of the States has voted the sum of 100,000f. to defray the cost of an expedition to Japan, for concluding a treaty of commerce with that country.

Parliamentary Intelligence.

HOUSE OF LORDS.

IRRIGATION AND INLAND NAVIGATION IN INDIA.

(5th). Lord SHAFTESBURY moved that a humble address be presented to her Majesty to assure her Majesty that this House had regarded with great satisfaction the progress of public works in various parts of India, and to beseech her Majesty that, with a view to confer further benefit on that country, she will be pleased to take into her immediate and serious consideration the means of extending throughout it as widely as possible the best systems of irrigation and internal navigation. He prefaced his motion by dwelling upon the importance of an adequate supply of cotton to this country, and the expediency of encouraging the growth of cotton in India and Australia. The principal requisites for promoting the growth of cotton in India were an extensive system of irrigation to fertilise the soil, and a system of inland navigation for carrying the produce to the coast. India, from its conformation, presented great facilities both for the purposes of irrigation and the construction of canals, labour being plentiful and cheap. In addition to these advantages these works were extremely profitable, they protected the districts they traversed from famines and floods, and at the same time that they promoted the general welfare of the country they increased the revenues of the Government by rendering salt cheaper, and thereby increasing the demand for it. Having shown that by the opening up of the Godavery all these benefits would be gained, Lord Shaftesbury proceeded to show the capabilities of India for supplying England with cotton and flax, if only it could be made sufficiently remunerative by providing roads and canals to bring it down for shipping from the interior. At the same time that the promotion of cotton cultivation would benefit India it would do more than anything else to put an end to slavery in America. He concluded by showing by statistics the enormous increase in the value of property in districts properly irrigated.—Lord DE GREY and RIPON acknowledged the importance of extending public works in India, and showed from a recent speech of Mr. Laing at Calcutta that £3,300,000 had been taken up for works for 1860-1, an increase of £230,000 on the previous year, which would give an increase net expenditure on roads and canals of about half a million, as less would be required for repairs than in the previous year. Every effort had been made to reduce the military expenditure in India, and to lay out an increased amount on works of irrigation and on the improvement of communication. If Lord Shaftesbury meant to imply that the Government ought to borrow money to carry out these works, he doubted whether the money market could raise a much greater amount than was absolutely required for the purposes of Indian railroads. He hoped, as the Government was acting in the spirit of the motion, that Lord Shaftesbury would not press it, as if carried it might give rise in India to delusive hopes.—Lord OVERSTONE thought such works should be left to private enterprise. He, therefore, moved the previous question.—The Duke of ARGYLL said that the revenues of India were already greatly burdened by the expenses of the mutiny, that they were already pledged to the amount of £57,000,000 on account of public works, and that they were still further pledged for the present year. Under such circumstances the Government did not feel itself justified in entertaining any proposition for a further advance.—Lord HARRIS having made a few remarks, the previous question was carried, Lord Shaftesbury having recognised the impossibility of carrying the motion which he had brought forward.

HOUSE OF COMMONS.

EAST INDIA COUNCIL BILL.

(27th.) After a short discussion, and a slight amendment, this Bill was read a third time.

EAST INDIA CIVIL SERVICE BILL.

(27th.) On the order for going into Committee upon this Bill, Mr. BAILLIE warned the House against the abuses which might arise under the Bill in relation to the exercise of patronage.—Colonel SYKES objected that the Bill provided no security for the qualification of persons appointed out of the Uncovenanted Service, and that such appointments would affect the interests of a large body of highly qualified natives of India.—Sir H. WILLOUGHBY wished to know what would happen if the Civil Service funds should be seriously affected by this Bill, Parliament being, in his opinion, pledged to protect the interests of the covenanted servants in this matter.—Mr. ADAM desired to know the opinions of the Council of India in regard to this measure. The fullest information should, he thought, be laid before the House, which would otherwise legislate in the dark.—Sir M. FARQUHAR, referring to the dissents from the Bill of last year, insisted that the opinions of the Council as to the present Bill should be distinctly known.—This preliminary discussion was continued by Sir H. Verney, Mr. W. Forster, Sir J. Fergusson, Mr. Ayrton, and other members.—Sir C. WOOD replied briefly to objections. In answer to Sir H. Willoughby's inquiry his opinion was, he said, that the Civil Service was not likely to be injured by the provisions of the Bill, which only contemplated special and exceptional cases. He could not deny, however, that there was a possibility, though a slight one, of the service being injured in relation to the funds by the provisions of the Bill, and if it should turn out, and it could be shown, that the civil servants were injured by any abuse of its powers, they would have a fair right to claim indemnity.—After a few words from Mr. VANSITTART, the House went into Committee on the Bill, when Sir C. WOOD moved a proviso to the effect that, except in the departments of Finance and Customs in the Presidency towns, no uncovenanted person should be appointed to offices hitherto reserved to the Covenanted Service who had not resided at least seven years in India, and passed an examination in the vernacular language of the district in which he is to be employed. The proviso was agreed to, as were also the remaining clauses of the Bill, after a very long discussion.

EAST INDIA (HIGH COURTS OF JUDICATURE) BILL.

(27th.) After much discussion, in which several amendments were proposed, most of which were negatived, the remaining clauses of this Bill were agreed to.

THE SUEZ CANAL.

(28th.) Mr. GRIFFITH rose to explain a misapprehension which had arisen as to some observations which he made a few nights ago upon this subject. He then stated that one of the objections urged by the noble lord at the head of the Government against the canal was, that it would give foreign nations a start on the road to our Indian possessions. He had in a public journal been accused of having, in making that statement, misrepresented the noble lord. To clear himself from that imputation, he would read a statement made by the noble lord on the 17th of July, 1857, which was to the following effect:—"In a political point of view it is objectionable as regards England, in connection with our Indian possessions; for it is plain that if a great canal were cut from the Mediterranean to the Red Sea there are other naval powers with which we may have difficulties, which would have a very important start as compared with ourselves, with regard to any operation that might be undertaken in the Indian Seas."

(28th.) The House went into Committee on the Army Estimates, on the London Coal and Wine Dues, on the Inland Revenue Acts, &c., and the East India Council Bill was read a third time and passed.

REPORTS FROM CHINA.

(4th.) Colonel SYKES wished to ask the Secretary of State for Foreign Affairs whether there was any foundation for the statements in the newspapers by the last China Mail, that the departure of the British troops from China, consisting of 7,403 men of all arms, had been postponed for an indefinite period? Whether the report in the *China Mail* newspaper be true that, on the 30th day of April, a body of 200 armed men, from the villages of Swa, Boey, and Ou-tenz, in the neighbourhood of Swatow, marched through the streets of Swatow, at three o'clock in the day, into the hong of Messrs. Bradley and Co., and plundered the same, the Tartar authorities not interfering, and refusing a guard to protect Messrs. Bradley from further outrage? Whether information had been received that deserters from Her Majesty's navy, and Europeans of different nations to the amount of 200, were known to have enlisted in the Tartar service, twenty-four of whom were seized in Imperialist boats, in a creek in the Yang-tze-Kiang, while carousing, eleven of whom, not being English or Americans, were liberated, and the rest handed over to their respective consuls? And, whether the Secretary of State purposes to direct steps being taken to prevent British subjects enlisting in the Tartar service or that of the Taepings?—Lord JOHN RUSSELL stated in reply that the Foreign Office had received no information on the subject to which his questions referred.

The London & China Telegraph.

LONDON, WEDNESDAY, JULY 17, 1861.

THE POSITION OF FRANCE IN THE EAST.

ALMOST every mail brings us news from COCHIN CHINA which has a strange political, if not commercial, significance. Quietly and steadily the French are establishing a position in that country. The fighting in some cases has been severe enough, and the loss from dysentery and other diseases is, we suspect, far beyond the official announcements; but, in spite of all, the French have pushed their way on and are pushing on still, and when once they have established a military position in the country, we may be sure that neither the unhealthiness of the climate, nor the persistent hostility of the natives, will ever succeed in dislodging them, for this position affords to France that hold upon the East, to attain which has been her settled aim for years. The brilliant prospects which seemed before her in India a hundred years ago vanished, indeed, even while she gazed upon them. It was British endurance and energy, following up the splendid successes of CLIVE, that created a mighty empire for England in that country; but when FRANCE felt her power waning, and when her East India Company was dissolved, the wish to rule in the East was as strong as ever, and there needed nothing but a favourable opportunity in order for her to give full vent to her ambition.

The flimsy pretext which in the first place drew the French troops into Cochin China cannot, it is obvious, afford any valid reason for a military occupation of the country. Long before this they have had a full and terrible revenge for the alleged injury inflicted on their Missionaries. The *flimsy pretext* we say, for Christianity acknowledges a precisely opposite rule of action, and if the French Missionaries died at their post as martyrs to their faith, they fell as thousands have fallen before, and could not if they were "good men and true" have wished for vengeance on their enemies. Not thus can Christianity be promulgated in the world, not thus can the Divine message of peace and good-will be delivered to heathen nations. The French people know this as well as we do, the French Emperor knows it, and if they assert, notwithstanding, that their object has been to inflict a righteous retribution, they will not expect that such an assertion will be credited in Europe. The truth is that by the occupation of Cochin China France becomes a power in the East; by this occupation, if she cannot command the trade of China, she will be able to influence it, and, in case of war, materially to damage our interests in the China Sea. There can be little doubt that Saigon will, ere long, become one of the most important of French colonies. It affords almost unequalled advantages for the establishment of a naval station, and at the same time the occupation of Metho places the whole trade of Camboja under French control. Thus France will be the medium for supplying the great markets of India and China with the valuable products of the country.

We see, from the most recent despatches, that the French expect to have entire possession of the Annamite territory in a year or two. This will give France an influence in Asiatic affairs such as she has never before possessed. The next movement will be to attack and conquer Hué, the residence of the Emperor. She will then possess a magnificent seaboard, the command of harbours and navigable rivers, and all the resources which she requires for establishing her position in the East. Meanwhile, we English may thank ourselves for the detriment, the expense, and, to some extent, the loss of prestige which the military occupation of Cochin China bids fair to inflict upon us. By seeking the aid of France in the war with China, we may be said to have introduced her to that part of the East, to have shown her its treasures, and its capabilities. If ever war should again break out between France and England, our merchants in the Far East, as well as our statesmen at home, will bitterly rue the day when we sought by an unnatural and injudicious alliance to secure those privileges to which we were entitled, and which we were perfectly able to obtain without any extraneous assistance.

THE EUPHRATES VALLEY ROUTE TO INDIA.

IN the City article of *The Times* of the 1st inst., some forcible remarks are made on the uncertain policy of the Government in promoting schemes to which its aid has been pledged. The reader is reminded that some years back a distinct engagement was entered into to assist the development of the Euphrates route to India both for telegraphic and general purposes, in consequence of which a number of shareholders were induced to embark money in the undertaking. Subsequently, however, it was resolved in preference to guarantee £800,000 to the Red Sea line. Truly does the writer say that "it will long be remembered as a painful warning to investors that even at the present epoch in England it is unsafe to trust the pecuniary pledges of any set of politicians." Unfortunately this instance of bad faith, which it is understood arose from deference to the wishes of the French EMPEROR is but one instance amongst many. It is evident that the Red Sea cable will always be liable to interruptions, which are almost certain to turn up at the very moment when some great necessity is felt to communicate with our Indian possessions. We certainly do not recommend the abandonment of the Red Sea cable, which would involve a loss to the country of £800,000; but, on the contrary, we maintain that, both on financial and political grounds, it is the duty of the Government to remedy its defects since at present the sum of £320,000, which they are paying annually as guaranteed interest, is entirely sunk. From what the CHANCELLOR of the EXCHEQUER said lately in the House, as reported in our last issue, we are glad to perceive that Government intend to take early steps in the matter, and we understand that Sir CHARLES BRIGHT and Mr. LATIMER CLARK are now engaged in preparing a report of the probable expense necessary to repair the injured cable.

It is not too much to say that there is no existing or projected railroad that can for a moment compare, in point of interest and importance, with that of the Euphrates Valley. It brings two quarters of the globe into juxta position, and three Continents—Europe, Asia, and Australia—into co-relation. It binds the vast population of Hindostan by an iron link with the people of Europe, it inevitably entails the colonisation and civilisation of the great valleys of the Euphrates and Tigris, the resuscitation in a modern shape of Babylon and Nineveh, and the reawakening of Ctesiphon and Bagdad of old. It will also settle the mail route to and from Australia and China—an element of prosperity of very great importance—for the passenger traffic *from* the Australian Colonies exceeds one hundred weekly, and ere the railway can be completed will be five times that number—of whom more than half will take the shortest route; while the number of emigrants from this country who will prefer a passage of forty to over eighty days may also be fairly expected to be very large.

According to Sir JOHN MACNEILL, who was assisted in the survey by Captain BURGESS, and the officers of H.M.'s steam ship *Stromboli*, there is every facility for making a harbour in the vicinity of the ancient port of Sileucia, near the mouth of the Oroistes, and the country, *via* Antioch, Killes, and Ailam, to Aleppo, ninety miles in length, presents no engineering difficulty. By making a detour, a rich settled country, dotted over with towns and villages is accommodated, and branch lines would be unnecessary. A large traffic is already in existence, as the toll books, at a bridge on the Peoutes, show that about 1,200 camels and horses laden pass each day. This will be the most important portion of the railway, from the Mediterranean to the Persian Gulf, the link from Sileucia to Aleppo is in itself a complete work, having a port at one end and the chief emporium of Mesopotamia at the other, to which the traffic from India, Bagdad, &c.,

Digitized by Google

converges. Or should the railway be carried on to the Euphrates, sixty miles beyond Aleppo, by the route recommended by General CHESNEY and Sir JOHN MACNEILL, there would be a still more perfect work of about one hundred and fifty miles in length, beginning at a port in a great sea and ending at the head of a navigable river in a greater ocean. This would be of itself, and by itself, a complete, perfect, and profitable enterprise; not only would a new country be opened up to European enterprise, but a directness in the route to India obtained, which few would believe who do not work it out on the map.

Taking the line of the Austrian railways to Trieste, thence by rail to Tabor Castle, down the stream of the Euphrates and by the Persian Gulf to Kurrachee, where the Scinde Railway, the first complete Indian line, commences the future net-work of Indian lines, the traveller will follow a route as direct as any railway can be expected to afford. Eight days and six hours will take the traveller through Trieste to Sileucia, thence the railway will take him in five hours to the head of the navigable waters of the Euphrates. Three days and three hours more will see the river voyage completed to Bussorah; and three more days, making in all fourteen—bring the traveller to Kurrachee, where the Scinde Railway keeps the western door of the railways of our Indian Empire. Like most of the other railways for which India is indebted to Mr. ANDREW, this line from Sileucia to Tabor Castle, though complete in itself, is regarded by him as the parent of further lines, whose construction will depend on the success of the parent line, and will gradually lessen the distance between the Mediterranean and the Persian Gulf. Thus he would extend his works by degrees along the valley of the river by Phumsah, the ancient Thapsacus, cross thence into Mesopotamia, working down the valley by Annah and Hit to the environs of Bagdad, and thence by Babylon and Hillah to the point where the Tigris and the Euphrates join at Kurreah, and the united stream becomes deep enough for steamers of the largest size. Other branches, too, might top the Persian Gulf at Schrister, or at Bussorah, where the trade is extensive, and the accommodation for ships of large tonnage already ample.

The extension of the Indian telegraphic lines to Western China through Pegu, and thence to Canton and the ports on the coast, as proposed by Captain SPRYE and his son, is the next question which necessarily becomes facilitated by the adoption of the Euphrates Valley route, and which cannot fail to engage the attention of the Board of Trade and our Ministers. The map compiled by Capt. SPRYE, and which very clearly shows the proposed route, has been already fully described and commented on in this journal.

THE FRENCH EMPEROR'S EDICT ON THE SLAVE TRADE.—FREE EMIGRATION TO BRITISH GUIANA.

THE Emperor has addressed a letter to the Minister of Marine, which appeared untranslated in the morning papers, rescinding the present system of virtual slavery, by which the French colonies have obtained labourers from the coast of Africa, and stating that he has signed a treaty with our Queen —"par lequel Sa Majesté Britannique consent à autoriser dans les provinces de l'Inde soumises à sa couronne l'engagement de travailleurs pour nos colonies, aux mêmes conditions que celles observées pour les colonies Anglaises."

Right glad are we to welcome the Emperor of the French as aider and abettor in the good cause of subverting slavery and promoting "free emigration." The edict, just published, will indeed strengthen the hands of Mr. AUSTIN, the agent in China for the "West India Immigration Committee," and he will no longer be thwarted in his efforts to procure really free emigrants by French agents, such as those employed in despatching vessels from Shanghai, who, as our readers will remember, caused a serious riot in that settlement, in which Mr. LAY, an English subject, was seriously wounded. In fact, owing to their conduct the lives of all foreigners were placed in more imminent jeopardy than at any time during the war. We sincerely hope that the American Government, whose merchant vessels now so largely assist the slave trade from China to Cuba, will be disposed to follow the Emperor of the French in his laudable efforts. At the present crisis with the Southern Slave States such a course of action would promote the stability of the Federal Government, and secure the moral support of England and France.

By the mail just arrived from the West Indies we observe that the *Chapman*, Captain Harland, had arrived at Demerara on the 9th June from Canton, with 289 Chinese emigrants, and the *Mystery*, Captain Stop, on the same day, from Hong Kong with 357. The Rev. Dr. Lobschield was a passenger by the latter vessel. On reference to our files we find the *Mystery* took on board 313 males, 41 females, and 3 children, total 357, being the exact number landed. This is another proof of the care exercised in despatching these vessels, and the superiority of the "free system" over the traffic to Cuba.

THE CHARGE AGAINST A BRITISH OFFICER.

THE fact that *The Times* has recently admitted in its columns a long letter from Mr. FONBLANQUE, describing a visit to the Great Wall of China, and that at the same time the China papers have descanted in somewhat strong terms on the imprudent and irritating conduct of this officer while on the excursion to which his letter relates—seems to justify us in making a few remarks upon the subject. The statements made in the *China Mail*, that this officer violated the 9th Article of the Treaty of Tien-tsin in going to the Great Wall without a passport from the local authorities, or permission from an English Consul, that he insisted on a district magistrate supplying him with a vehicle for the purpose, and that he and his interpreter were insolent enough to demand admission into the Yuen-min-Yuen—are charges which we are loath to credit, but which nothing but a distinct and satisfactory denial on the part of Mr. FONBLANQUE can fully rebut. The connection between this outrageous conduct, which for the present we must take for granted and the suspension of passports by Mr. BRUCE, is denied by some journals and affirmed by others. It is perfectly clear that, apart from this occurrence, Mr. BRUCE may have had legitimate ground for the issue of this order. It is most important that the feelings or prejudices of the people should not be roused against us, and acts which would be neither imprudent nor discourteous elsewhere might, if they occurred at Peking, have an injurious effect upon British interests. Whether then or no Mr. FONBLANQUE'S conduct has been the primary cause of this arrangement, we believe that in making it Mr. BRUCE has exercised "the better part of valour," since until Prince KUNG and the citizens of Peking have become, as it were, *seasoned* to the presence of the barbarian, it is imperative, while maintaining a dignified attitude, to avoid every unnecessary cause of irritation.

RUMOURS OF OFFICIAL APPOINTMENTS.

So long as the appointment of Lord CANNING'S successor remains open we must expect many *positive assertions*, and a still larger number of half-assertions and inuendoes, with reference to the new Governor-General of India. Hamlet implored his friends not to hint at the visit of his father's ghost, by implying that "they could if they would," or "they might an they list" unfold a strange story. We might more reasonably make the request in the present instance, as we firmly believe that nothing positive is known about the matter. The latest rumour, and assuredly the least probable, reaches us from abroad, and is to the effect that the Duke of NEWCASTLE is to leave for India at a fixed date, in company with His Royal Highness the Prince of WALES, who is to inaugurate the new Order of Indian Chivalry. Then there are other rumours afloat, to the effect that Sir C. WOOD is to go to the War-office, and that Lord ELGIN is to be placed at the head of the India-office. We venture to believe that the "Sir Oracle" who fathers these reports will find that he has a spurious progeny.

THE FOREIGN POLICY OF AMERICA.

To those who are accustomed to watch the policy of America in foreign countries, the circumstance of an American expedition having sailed up the Yang-tsze is significant enough. There are certain words—some of them belonging to our slang vocabulary—which we are accustomed to apply to our cousins in the States, and which would be inappropriate if applied to any other people. We call them sharp, smart, go-a-head, 'cute, wide-awake, &c., and certainly their conduct at times justifies us in the use of this inelegant phraseology. The labour and the fighting, and all preliminary difficulties, have to be borne by the old country, but no sooner is the field open than America takes possession, gains all the privileges, and suffers none of the loss or opprobrium. This has been particularly observable in China and other parts of the Far East. We do not complain of this Yankee briskness—we merely note it as a curious fact in psychology.

THE SUEZ CANAL AND THE BRITISH GOVERNMENT.

THOSE of our readers who are well "posted up" on the subject of the Suez Canal, will remember that some time ago the project was strongly opposed by Lord Palmerston, while Mr. Gladstone, on the other hand, took a different view of the matter, considering that, if the French people chose to sink a large amount of capital in the undertaking, it was no concern of ours. The views of the Government now appear to have entirely changed, and we infer from the fact that Mr. Colquhoun, our Consul-General accompanied Mr. Laing on his journey of exploration, that an active interest is felt on the subject. It is not likely that Mr. Colquhoun would have started to examine the canal works unless he had first communicated with our Government, and received permission to do so. We may, therefore, reasonably conclude that it is their intention neither to let the project alone, as Mr. Gladstone at one time advised, nor to denounce it, as Lord Palmerston did once, but to show, in some measure, a concern in the undertaking.

THE AMERICAN AMBASSADOR TO CHINA.

THE Honourable A. BURLINGAME, the newly-appointed American Ambassador to China, is the most prominent of the young statesmen of that country. He is indebted to Austria for the Chinese Commissionership, as in consequence of his rejection by the Court of Vienna, his own Government has transferred him to Peking, where a wider field awaits him for the display of his talents. The Hapsburghs could not endure him, on account of the early, earnest, and successful efforts he made in Congress for the recognition of Italy. His admiration of CAVOUR and GARIBALDI wholly disqualifies him for diplomatic service in Austria.

THE TRANSFER OF THE STRAITS SETTLEMENTS.

THE Straits transfer question is at present in abeyance. We have authority for stating that the arrangement has been approved of at the Colonial-office, the India-office, and the War-office, but the main obstruction arises from a financial cause, and it appears that the Chancellor of the Exchequer stops the way. The transfer will, therefore, be postponed until next year. There is a difficulty, too, not yet solved, as to who is to pay for the fortifications which have been constructed at Singapore and elsewhere. This expense was incurred by the Indian Government, without consulting the Home Government, or even the local administration. In our opinion it would be most illiberal of the Imperial Government to suffer any portion of this expense to fall upon the Settlements.

VISIT OF THE SIAMESE AMBASSADORS.

IN consequence of the representation of Sir Robert Schomberg, our Consul at Bangkok, we understand that our Government have invited the Siamese Ambassadors and suite to visit London. This friendly act will also be an act of policy, as it is most advisable that we should cultivate amicable relations with the King of Siam. By a telegram received yesterday we learn that the Ambassadors have accepted the invitation.

THE LATE HARBOUR MASTER OF HONG KONG.

OUR readers will remember that in our issue of April 26 we mentioned the case of Mr. Inglis, the late harbour master of Hong Kong, and urged upon the attention of the Government the services rendered by that gentleman. We have now the satisfaction of being able to state that Mr. Inglis's claims have been acknowledged, and that on the expiry of his leave on the 1st September next a pension will be granted in consideration of his services and consequent loss of health.

We learn by the present mail that Mr. Inglis's friends and well-wishers in Hong Kong have raised the large sum of $3,065 as a tribute of their esteem for his private character and public services.

OFFICIAL TRIAL OF THE P. AND O. COMPANY'S STEAMER "MOOLTAN."

The Peninsular and Oriental Company's screw steamer *Mooltan* made her official trial trip in Southampton waters on the 11th inst. Several gentlemen proceeded in the vessel, including Messrs. Anderson, Allen, De Salis, and Captain Nairne, Directors of the Company; Captain Engledue, the Company's Marine superintendent; Mr. Lamb, Superintending engineer; Mr. Ritchie, Superintendent at Bombay; Captain Patey, Admiralty surveyor; Mr. Dinnan, Admiralty engineer; Messrs. Rubie and Murray, of the Board of Trade; Mr. Rolt and Captain Ford, of the Thames Iron Ship Building Company; Messrs. Humphreys and Tennant, marine engineers; Mr. Haliburton (Sam Slick), Sir Charles Bright, Mr. Angier, Dr. Beattie, Dr. Finch, Colonel Burnaby, Captain Graham, an officer of the Russian service, two officers of the Spanish service, Mr. Summers, Mr. Pinnock, &c., &c. An elegant champagne luncheon was provided by the Company, and the day being one of the brightest, the trip was most thoroughly enjoyed. It was a day of out-of-door pleasure and escape from the confined precincts of the City, and many of the visitors seemed heartily to appreciate it in this point of view, more particularly as it was unaccompanied with that awful penalty, *mal de mer*.

The *Mooltan* was built on the Thames by the "Thames Iron Ship Building Company," and is the last addition to the Peninsular and Oriental Company's fleet, which now numbers fifty-two sea-going vessels. She is intended to run a few voyages between Alexandria and Southampton, and thence be transferred to the Suez and Calcutta line. She is commanded by Captain Cooper, the Commodore of the service. Her dimensions are—length, 355 feet, or only five feet less than the *Himalaya*; beam, 40 feet; depth of hold, 28 feet—nominal horse power, 400; registered tonnage, 2,257; and she may be considered the QUEEN of the Company's fleet. The "Thames Iron Ship Building Company" were also the builders of the *Lye-ee-moon*, now trading on the coast of China, for her owners, Messrs. Dent and Co., under the command of Captain Hill, and whose extraordinary passage from Shanghai to Hong Kong in 61½ hours was noticed in the *London and China Telegraph* of the 27th of June last.

The *Mooltan* is constructed with teak decks—which we are glad to see is getting into more general use for deck purposes. We observed several improvements for the navigation of so long a vessel, among which we may notice a patented invention of Messrs. Humphreys and Tennant for steering the vessel by an apparatus which works by hydraulic pressure on the rudder-head, and in any weather requires only the very slightest movement of the hand. A double wheel, on the old principle, is also fitted, in case of any accident to the new invention, and which, in a gale of wind, requires eight men to manage. In consequence of her great length, the motion of the screw is scarcely felt on the bridge; and as it is of the greatest importance for the captain or pilot, while taking the vessel in or out of harbour, to know if his orders are correctly acted on, an indicator has been fitted on the bridge, by which the action of the engines, either a-head or a-stern, is shown, as also the number of revolutions. There is also fitted on the bridge a telegraph to the engine-room, by which the commander can communicate the desired speed and movement of the engines. This is a great improvement on the old style of "passing the word," which in bad weather was no small strain on the captain's lungs. There is another ingenious contrivance on the bridge, the invention, we believe, of Captain Cooper, for signalling to the helmsman the direction required. Nothing is so subversive of discipline as the captain screaming at the top of his voice when the steam is roaring off. The hatches are fitted with hoists worked by hydraulic pressure, and the capstan for heaving up the anchors is also of improved construction, and avoids all that "row, rumpus, and rioting" which gave rise to the saying, that "a ship is a thing that you never can be quiet in." All these modern improvements tend very much to reduce the terrors of a sea passage.

The *Mooltan* is barque rigged and fitted with iron lower masts and bowsprit, flush deck, excepting the topgallant forecastle, and her bulwarks are unusually high, to secure dry decks. The cook's quarters are particularly roomy and almost elegant, and the cooking apparatus, constructed by Messrs. Benham and Sons, London, combines the *multum in parvo* most strikingly. A spacious deck-cabin has been built for the special use of the Post-office staff, affording convenience for the sorting of letters, according to the new arrangements. An admirable refrigerator has been erected, which is worked by steam, in connection with the engine-room, and that invaluable commodity ICE can be produced in any quantity. This will be an especial boon to passengers on the other side of Suez.

The engines are constructed by Messrs. Humphreys and Tennant, and fitted with Lamb's patent apparatus for superheating steam, by which a great saving is effected in fuel and in the size of the engines and boilers. They are on Woolf's two cylinder principle, the small cylinders

Digitized by Google

being forty-three inches in diameter, and the large ones ninety-six. They are supplied with steam at twenty pounds pressure from four boilers, each boiler being fitted with three furnaces, and each furnace being three feet wide and four feet six inches long, or about half the usual size. The steam after passing through the engines is condensed in a surface condenser, and is returned into the boilers again. The consumption of fuel appears to be about two pounds per indicated horse power, and the maximum effort of the engines equal to about 1,600 horses.

In consequence of the stiff breeze, and the screw not being at quite the required pitch, the test at the measured mile was not undertaken. The trip, however, which was from her anchorage in the river to about four miles past the Needles, distance twenty-seven nautical miles, and back to the Docks, thirty miles, was performed in four hours thirty minutes, being over twelve and a-half miles per hour, the tide being against her during three hours of the time. The engines worked at an average of fifty-four revolutions. From this it may be assumed that she will have no difficulty in maintaining at sea an average speed of ten knots. Should this prove so she will be the greatest success yet achieved in the construction of marine engines.

THE CHINA POSTAL SERVICE.

DEPUTATION TO THE CHANCELLOR OF THE EXCHEQUER.

The necessity for the continuation of the semi-monthly mail to China has been felt more strongly the more the subject has been considered. A vast trade has been opened to us; we have won by our arms a harvest which it remains for us to reap by our commerce. The barrier which has impeded our onward path for centuries has been suddenly removed, and at the moment of freedom and hope—at the moment when we are, as it were, about to try our strength in a magnificent field of commerce—the Government withdraws its assistance, and says, in effect, that although it has deemed it advisable to spend millions in order to gain a legitimate commercial footing in the Chinese Empire, the expenditure of £12,000 a-year for the purpose of frequent intercourse with the country is an unnecessary and wasteful expenditure of public money. The arguments are so strong in favour of a frequent communication with the Far East, that we are not suprised that they have had their weight with the merchants and others whose names appear in the subjoined memorial.

Our readers will observe from the observations of the Chancellor of the Exchequer that it is proposed to cover the deficit which arises from the semi-monthly mail by increasing the rate of postage. The Postmaster-General has been requested to communicate to Mr. Gregson a statement on the matter, but at present no information has been received from that gentleman. It is, however, probable that some decision may be formed on the subject before the next outward mail. The report of the meeting is appended:—

On the 5th inst. a deputation of merchants, bankers, and others interested in the Chinese and Australian trade, waited upon the Chancellor of the Exchequer, at his official residence in Downing-street, for the purpose of urging upon him the necessity of continuing the bi-monthly postal service to China.

Among the deputation there were Mr. S. Gregson, M.P., Chairman of the East India and China Association; Mr. Walter Buchanan, M.P., Mr. W. Nicol, M.P., Mr. Harvey Lewis, M.P., Mr. James Youl, Deputy Chairman of the Australian Association; Mr. J. Mackinnon, secretary to the above association; Mr. Andrew Henderson (Messrs. Dent, Palmer and Co.), Mr. T. Jones Gibb (Messrs. T. A. Gibb and Co.), Mr. Walter Gledstanes (Messrs. Gledstanes and Co.), Mr. T. Griffith Frith (Messrs. Frith, Sands and Co.), Mr. G. G. Macpherson (Chairman of the Agra Bank), Mr. James Matthews (Messrs. Grindlay and Co.), Mr. Robert Smith (Messrs. Robert Smith and Co.), Mr. C. G. Mansel, Capt. Sprye, Mr. F. J. Angier (*London and China Telegraph*), &c., &c.

Mr. S. GREGSON introduced the deputation, and said that as a copy of the memorial had been sent to the Chancellor of the Exchequer, and had been read and considered by him, he would not read it then, but he hoped they would receive a favourable answer to their application. There was one point that he (the Chancellor of the Exchequer) did not seem to be very clear upon, and that was the £12,000 a-year for the postal service. The whole of that amount would not be required, for as the intercourse between China and this country increased it would be reduced; but considering the advantages England derived from the China trade, it would not be too much if the nation had to pay the whole of it. When they (the deputation) applied to the Chancellor of the Exchequer before, they thought that the Peninsular and Oriental Steam Company might reduce their rate of charges, but they had since ascertained from them that they were not inclined to make any reduction. They had that morning received a despatch from Russia that the Tai-pings were nearer Pekin than ever they had been, and likewise that the Emperor of China was dying; and therefore to cut them off from communication with China now would be a great inconvenience to trade. He was aware that the question of cost was a great one, and that every item was of importance to the Chancellor of the Exchequer, considering the expenses of the nation; but when they had heard that within the last few nights the House of Commons had voted very large sums of money for things of much less importance than that under consideration, he thought the Government might continue the postal service they were asking. England at present received about five millions and a-half a year in produce from China, and there was yet the whole of the north of that country to be opened to our trade, and, therefore, rather than decrease the direct postal communication in that direction, they ought to increase it to once a week. The directors, therefore, hoped that the direct intercourse with China would be kept up.

Mr. BUCHANAN said he had a memorial to present from the Chamber of Commerce of Glasgow, in which they showed that their interests were not confined to China, but extended to the Straits. The mails for China took other mails than those for Hong Kong, for they included those from Foo Chow and other places. Letters were sent from all parts to Hong Kong as a central point, from which they could be despatched to this country; and if the Government broke up that central point by taking away the second mail, branch mails that might arrive at that place just after the departure of the main one would be detained there a whole month, and that was a matter of great importance to merchants in that part of the world.

The CHANCELLOR of the EXCHEQUER said they must consider that the memorial was, in effect, an application for a new subsidy. There was originally a fortnightly service to Hong Kong, but that was commuted to a monthly one to Shanghai, and the Government paid for the monthly service to Shanghai as much as for the fortnightly one to Hong Kong. In 1859 the Peninsular and Oriental Company made a claim on the Government for an increase of the subsidy on political grounds, apart from commerce, and last autumn it was considered. They would observe from what he had said that their application was strictly a claim for a new subsidy, and so they must be pleased to consider it, the Government paying for Shanghai the same as for Hong Kong. Then came the consideration of the cost, and from his experience he could say that the cost to the Government would not be far from the net amount they might agree to pay. To ascertain what that would be the fortnightly mail must be debited with the excess of the expense over what the monthly mail cost, and on the other hand it would have to be credited with a fair proportion of the receipts from the mails it brought. With regard to the increase in the correspondence with China neither he nor the Post-office authorities could see that there had been an increase. Well, then, they must see that it was a very delicate case to give subsidies on grounds not strictly postal, and they must consider the public scandal that might attach to the Government that would do so. He did not mean to allude to one that was now before a Committee of the House of Commons, but they must consider that if once they began the system it would open the door to great scandal. Some few years ago they were giving subsidies to such an extent that if they had not put a stop to them they would be now paying four millions and a-half a-year. It had been said that an increase in the rate of postage might obviate the difficulty, but he was not prepared to give an opinion on it. He should like the deputation to consider the question themselves.

Mr. GREGSON observed that they could not estimate what the loss would be, or if it would be beyond the £12,000 a-year.

The CHANCELLOR of the EXCHEQUER replied that he could not say that £12,000 a year would cover the loss. The question he had to consider was, what they got by the monthly mail, and what by the monthly fortnightly mail, and by what the latter exceeded the former that would be the proceeds of the fortnightly mail.

Mr. BUCHANAN informed the Chancellor of the Exchequer that the merchants wrote and sent their letters to China fortnightly, and therefore they might consider the postage as tolerably certain.

Mr. MANSEL added that all the circulars from China brokers and merchants were issued fortnightly.

Mr. BUCHANAN asked if the Government could not be induced to consider the state of affairs in China, and the necessity for keeping up the communication at least for another twelve months.

Mr. GREGSON urged that there was the approach of the Tai-pings to Peking, and there would be a new Emperor, and affairs were assuming an interest and importance that rendered it most desirable that their communication should not be cut off just now.

Mr. BUCHANAN remarked that the information given in the House of Commons on the previous evening was that the Government had no knowledge either of the advance of the Tai-pings on Peking or of the Emperor's illness, but that information was in all the China papers.

The CHANCELLOR of the EXCHEQUER said the Government had no knowledge of it, neither had they any information of the surrender of Tien-tsin.

Mr. GREGSON said it was only in the China papers that they had seen it, and they had come to hand only yesterday.

The CHANCELLOR of the EXCHEQUER then suggested that they should talk the matter over amongst themselves, and see what they could suggest, and then Mr. Gregson could communicate to him on their behalf.

Mr. GREGSON asked whether the Chancellor of the Exchequer could give him any idea of what the postage would be.

The CHANCELLOR of the EXCHEQUER said that would be a question for the deputation to consider, and also the number of letters likely to be sent.

Mr. NICOL said that seemed to be the practical way of handling the question.

Mr. LEWIS said that a number of his constituents had spoken to him on the necessity of keeping up the fortnightly communication after such great sacrifices had been made to extend our trade with China.

Mr. MACKINNON drew the attention of the Chancellor of the Exchequer to the case of those interested in the Australian colonies. They were much concerned in this alteration, because their letters were now delayed at Galle only five days, whereas if the mail only went monthly they would have to be detained there twenty-one days. A minute had been passed by the Lords of the Treasury, about six weeks ago, in favour of the maintenance of these mails, and a copy of it was in the hands of his friend Mr. Youl.

Mr. YOUL said the minute was to the effect that the service of the mails to the colonies was of the greatest importance to them. He had not got the copy with him, for he had given it to Sir Stuart Donaldson, who was

Digitized by Google

to have been present, but had not been able to attend. The minute had been sent to the Peninsular and Oriental Company, and many had gone to some expense in preparing to avail themselves of that service.

The CHANCELLOR of the EXCHEQUER did not recollect it, and did not think the Government was cognisant of the fact of that minute, but he should like to be put in possession of the date of it, because every consideration ought to be given to those persons under such circumstances.

Mr. GREGSON would like to know what would be likely to be the amount of the increased postage, whether one and a-half the present charge or double.

The CHANCELLOR of the EXCHEQUER said that was entirely a question for them. He would advise them to consider what they would be willing to pay, and then consult the Postmaster-General as to what would be the cost of the working of the service.

Mr. BUCHANAN did not know that postage would be any consideration with the merchants, they were a wealthy class, and did not look to the cost of postage.

The CHANCELLOR said if they liked he would write to the Postmaster-General and ask him in what shape a practicable proposition could be made to him, and then he would write to them on the subject.

Mr. FRITH thought the Chancellor of the Exchequer had not had time to consider the indirect advantages of postal communication, for where there were facilities for correspondence the trade of the country would always expand.

The CHANCELLOR of the EXCHEQUER said he fully appreciated the importance of the mail service and the effect it had in developing commerce, but they must admit that if the Government were not careful to confine their subsidies to postal claims alone it would open the door for innumerable claims and perhaps abuses.

Mr. GREGSON called the attention of the Chancellor to the reduction which had been made in the P. and O. Co.'s contract for this year of £15,000, in lieu of their obligation to convey officers of Government at a reduced rate of passage, and that this sum might be applied towards the outlay for the fortnightly mail.

It was eventually arranged that Mr. Gladstone's last suggestion should be carried out, and that when he heard from the Postmaster-General in reply to his communication, he would write to Mr. Gregson, who would continue the correspondence on behalf of the deputation and their constituents. The interview was, on the whole, considered satisfactory, the right hon. gentleman having throughout shown the greatest desire to meet the wants and wishes of the China and Australian merchants.

The deputation thanked the Chancellor of the Exchequer for the kind and courteous reception he had given them and then retired, promising to carry out his recommendations.

The following is the memorial alluded to:—

To the Lords Commissioners of Her Majesty's Treasury.

Respectfully showeth—

1st. That your memorialists have seen with much concern and surprise the resolution which has been sanctioned by your Lordships in regard to the discontinuance, after the current month, of the bi-monthly mail which for some time past has been despatched on the 20th and 26th of each month.

2nd. That the second monthly mail alluded to now costs the country, after deducting the amount which the line has yielded in postages, about one half of the total subsidy, or £12,000 per annum, that is, £500 for each homeward, and £500 for each outward mail; and your memorialists, therefore, earnestly hope that, considering that so many millions sterling have been expended in furthering our trade with the Chinese, the comparatively trifling outlay involved in this second monthly mail will not be deemed worthy by your Lordships of being put in comparison with the numerous commercial advantages it affords; and your memorialists feel confident of the support of Parliament in passing the necessary vote.

3rd. That your memorialists beg to submit that the sums now derived from postages will, by reason of the augmentation in correspondence caused by the extension of our relations with the Chinese from the opening of so many new ports, be so far increased in amount as to cover a large proportion of the deficit in the subsidy alluded to.

4th. That your memorialists further desire to remind your Lordships that China and the Far East will not be the only sufferers by the discontinuance of this mail, but that the withdrawal of the subsidy will disorganise the mail service between those countries and Australia, as according to the contract the mail steamer for Australia starts from Galle on the 21st of each month, and the second mail steamer from Singapore, China, &c., arrives at Galle on the 16th, while the mails from Australia are due at Galle on the 16th of every month, and the steamer for Singapore, China, &c., leaves on the 21st with the English mails of the 20th and 26th of the preceding month.

5th. That your Lordships have always evinced so great a liberality in the promotion of free trade, and in facilitating communication with all quarters of the globe, that your memorialists believe it is only necessary that a fair representation of this proposed exception should be made in order to stop what must otherwise be stamped as a retrograde and injurious act for a liberal Government in the present day.

6th. That though several other weighty arguments in proof of the great value of our trade with the Far East, and the revenue it produces, might well be urged by your memorialists in support of their views as to the necessity of continuing the mails as heretofore, they would briefly ask your Lordships to accept the subjoined signatures as evidence of the fact of such bi-monthly mail being indispensable for the proper conduct of the vast and increasing trade with the Far East.

And your memorialists will ever pray.

(*Signed at the "London and China Telegraph" Office.*)

GENERAL SIR J. HOPE GRANT.—The magistrates and council of Edinburgh held a special meeting on the 11th inst., for the purpose of conferring the freedom of the city on Sir James Hope Grant, G.C.B. About ten days previously the council had unanimously resolved to take advantage of the presence of this distinguished soldier in Edinburgh to confer on him the highest honour in their disposal. There was a large attendance of the civic body in their official robes, the Lord Provost presiding, and a number of strangers, among whom was Lady Hope Grant, were present at the ceremony. In presenting the burgess ticket, the Lord Provost conveyed to the gallant general the congratulations of the council and of the citizens on the success with which he had conducted an important series of operations in China last year, and also upon his safe return. His lordship alluded to the honours Sir James had received from his Sovereign, and to the esteem and respect which he had won in London and also in this his native country. Sir James Hope Grant, who had been most warmly received on entering the council chamber, was greeted with loud cheering on rising to return thanks.

A PRESENT FROM SIAM.—When the Siamese ambassadors came to England, some three or four years since, they brought with them about fourscore boxes containing specimens of the produce of their country. This precious cargo was stowed most carefully away in the cellars of the Foreign Office, where, a week ago, the boxes giving unpleasant indications of their existence, they were examined, and found to contain various food and animal products. This has led to their transference to the South Kensington Museum. No room at present exists for the exhibition of the whole of the collection, but a few specimens of the food products are exposed in a case in the food department. They consist of elephants' trunks, rhinoceros' hide, sharks' fins, deers' tendons and gelatinous delicacies of that kind, and also of edible birds'-nests, dried fish, betel nuts, tobacco, and various unknown seeds. These are only a small portion of the collection, which has suffered a good deal during its seclusion, especially the tubs containing varieties of *beches de mer*, sea slugs, dried cockles, and other marine delicacies of a perishable nature.

NEW POSTAGE STAMPS.—We are glad to find that the authorities of the Post Office have at last resolved to consult the convenience of those who have large postal communications with foreign countries to issue a nine-penny stamp. The three-penny stamp, which has been the great desideratum in forwarding newspapers to the East, is also said to be in preparation. This will prove no small saving of annoyance and of trouble. We can only wonder that such a stamp has not long since been issued.

The screw steamship *Sanspareil*, 70, was recommissioned at Devonport on the 6th inst., by Capt. George Le G. Bowyear. She will have a complement of 140 men, and will, when fitted, convey to China seamen and marines to relieve those on duty in the gunboats and small craft on the station, and supernumeraries for the squadron. Among others about 100 stokers and several engineers are ordered to hold themselves ready to embark. The *Sanspareil* will bring home troops.

The *Roebuck*, 6, screw despatch-vessel, Capt. Frances Marten, arrived at Spithead on the 9th from China and Japan, and has steamed into Portsmouth harbour to dismantle and pay off. Her dates of sailing are—Japan, March 4; Hong Kong, March 21; Singapore, April 6; Cape of Good Hope, May 22; and St. Helena, June 5.

Monetary and Commercial.

THE BOARD OF TRADE RETURNS.

THE EXPORTS TO CHINA of the principal manufactures from January to May in some instances show a great increase on the five months, as compared with corresponding periods of 1859 and 1860:—

COTTONS.—The quantities exported in May, 1859, were 31,082,443 yards, whilst only 24,539,016 yards were exported in 1860. For the five months, however, the quantities are—78,315,773, 97,495,245, and 149 578,702 yards, whilst the declared value was £1,086,181, in 1859; £1,450,034, in 1860; and £1,933,201 1861.

COTTON YARN.—The quantities were—4,030,400 lbs., 4,284,862 lbs., and 4,528,300 lbs., valued at £190,913, £209,441, and £206,132 for the five months of 1859, 1860, and 1861.

WOOLLENS.—The pieces exported were—31,683, 44,286, 56,008, valued at £142,645, £241,864, and £241,149 respectively for the five months of 1859, 1860, and 1861.

WORSTED STUFFS, 63,257, 97,831, and 83,446 pieces. Exports valued at £127,883, £223,848, and £179,425 for each five months of 1859, 1860, and 1861.

LEAD AND LEAD SHOT.—The reported values were £37,310, £38,728, and £58,843; and the quantities 1,691, 1,704, and 2,694 tons respectively.

THE TOTAL DECLARED VALUE of these items is, for 1859, £1,584,932; for 1860, £2,163,915: and for 1861, £2,618,749: in other words, the value of these five articles during the first five months of 1861 are as near as possible double the value of all our exports to China during the year 1855.

The exports of cotton goods to the Philippine Islands have also greatly increased, having risen from 6,602,106 yards in 1859, to 7,858,717 yards in 1860, and to 19,392,114 yards in 1861 respectively, valued at £97,217, £120,528, and £321,532.

To Java there has been a falling off in the export of these goods as compared with 1860, but an increase, although not large, as compared with 1859. The quantities were in yards—20,108,424, 32,353,541, and 20,372,096, valued at £295,463, £501,013, and £313,321 for each five months.

To Singapore during the five months we exported 19,202,839 yards cotton goods, valued at £263,273, and 737,563 lbs. cotton yarn, valued at £51,369.

Ceylon took in the same period 11,836,510 yards cottons, costing £202,715, and cotton yarns, 89,350 lbs., valued at £6,197.

Bombay, Madras, and Bengal took to the amount of £3,158,617 cottons, namely—calicoes, cambrics, and muslins, fustians and mixed stuffs, which, added to £3,034,042 taken by places before-mentioned give a total of £6,192,659 of these manufactures, or nearly 41 per cent. of a total of £15,193,156 to all parts of the world, during the five months ended 31st May, 1861.

OF COTTON YARNS the East, including £595,596 worth exported to India, took in all only £859,294, out of a total of £3,662,010 exported to all parts. To British India, including Singapore and Ceylon, the falling off is £349,277, as compared with 1859, and £250,354 as compared with 1860.

A deputation, introduced by S. Gregson, Esq., M.P., waited on the Chancellor of the Exchequer on the 5th inst., on the subject of the proposed stoppage of one of the mails to China. The suggestion of the Chancellor was, that an increased rate of postage should be paid in order to assist in defraying the expense of the subsidy. The probable increase is, perhaps, immaterial, but the principal involved should be strenuously opposed. A full report of the meeting will be found elsewhere.

The Compagnie des Services Maritimes des Messageries Imperiales is about to make an issue of 30,000 new shares, for raising the capital for establishing the postal communication between China and India which we have noticed in previous issues. Two steamers are said to be in a forward state at Toulon.

A private company has been formed for the navigation of the Euphrates for purely commercial objects, and the first vessel of the new company is said to be already finished.

According to the statistics of the *East India and China Association*, the entries of British and foreign shipping at London from China from January 1 to June 30, 1861, was:—69 vessels, of 42,775 tons; from Singapore and Penang, 21 vessels, of 10,614 tons; from Philippine Islands, 8 vessels, of 6,227 tons; from Java and Sumatra, 3 vessels, of 1,092 tons. At Liverpool, from China, 7 vessels, of 3,113 tons; from Singapore and Penang, 7 vessels, of 3,624 tons; from Philippine Islands, 13 vessels, of 9,018 tons. At Bristol, from Java and Sumatra, 1 vessel of 186 tons; At Clyde, from China, 1 vessel of 334 tons; from Singapore and Penang, 4 vessels of 921 tons; from Philippine Islands, 2 vessels of 774 tons. And the clearances from London, for China, 36 vessels of 22,932 tons; for Singapore and Penang, 8 vessels of 3,131 tons; for Philippine Islands, 1 vessel of 364 tons; for Java and Sumatra, 4 vessels of 1,359 tons. From Liverpool, for China, 23 vessels of 12,263 tons; for Singapore and Penang, 10 vessels of 5,003 tons; for Philippine Islands, 7 vessels of 3,357 tons; for Java and Sumatra, 8 vessels of 4,332 tons. From Clyde, for China, 1 vessel of 145 tons; for Singapore and Penang, 5 vessels of 1,998 tons; for Java and Sumatra, 2 vessels of 931 tons.

A contract has been made with Mr. John Laird, of Birkenhead, to build two steamers for the China and Japan Steam Company.

The *Money Market Review* notices the despatch of silver to India on Government account:—

"We understand that on the despatch to India of the balance of the silver bullion lying in the Bank of England, the amount of which is stated in the return just published at only £71,964, the remittances of silver to India on Government account will cease. This fact is satisfactory, as indicating a certain improvement in the financial position of the Government in India, and also as denoting some relief to the home money market."

The *Economist*, on the operations in silver in France—considered in connection with the Exchange lately made with the Bank of England, says:—

"An event which nobody would have expected a short time back has occurred; the Bank of France is making payments in silver in preference to gold, and this is owing partly to the excessive drain of silver to Asia having ceased, and partly to large arrivals of that metal from America having taken place. If the bank could have foreseen this early change in

Digitized by Google

that precious metal, it would not perhaps have taken the measures it did some months ago to protect its stock of silver. So abundant has silver become, that even in petty purchases at shops one now receives 5f. pieces in exchange for gold: for a long time coins of that amount had almost entirely disappeared."

The bar silver and dollars brought by the last Mexican steamer have been disposed of at 60½d. and 58½d. per ounce, showing a decline of ¼d. in the former and of ½d. in the latter, as compared with the prices realized for the previous arrivals. Transactions have been effected in the interval at 60¼d. for bar silver, and 58¾d. for dollars. The principal part of the amount sold has been taken for the Continent.

At an adjourned meeting of creditors of Messrs. Mackay and Read, East India merchants, the report of the committee of investigation stated that the trading had continued after the firm ought to have known that they were insolvent, and that the stoppage should have taken place earlier. The committee, however, recommended that an offer of 5s. in the pound, payable in instalments at 6, 10, and 14 months, the last to be secured, should be accepted, and a resolution was accordingly passed to that effect.

A report on the financial and commercial condition of Russia, by Mr. Erskine, Her Majesty's Secretary of Legation at St. Petersburg, has just been printed:—

"It appears that at the present day the expenditure is about £44,500,000, and the revenue about £40,000,000, showing a deficiency of £4,500,000 sterling. In 1858 the cost of the army alone was estimated at about £15,000,000. The most productive source of Russian revenue is the duty on spirits, amounting to the astonishing sum of £19,000,000 per annum."

On the trade with China the following is gathered:—

"Tea is almost the only article imported from that country, and with the view of encouraging the exportation of Russian manufactures in return by the Kiakhta route, the quantity of tea conveyed by sea is limited to one or two cargoes annually. The consequence is that the price is so greatly enhanced as to keep down the consumption of tea far below the natural demand, while the revenue is defrauded by large quantities being smuggled over the frontiers from the German ports. The town of Kiakhta, where this trade is carried on, is more than 3,500 miles from Moscow, and the tea regions are about the same distance from Kiakhta. Hence the internal conveyance amounts to 7,000 miles, and raises the price of middling tea, duty paid, to about 6s. or 7s. the pound, or fully double that at which it could be obtained from England *via* Hamburg. The calculation is that the Russian public, under this system, pay annually upwards of £1,500,000 for the encouragement of an export trade in Russian manufactures valued in the official returns at less than £1,000,000."

THE ORIENTAL AND GENERAL MARINE INSURANCE COMPANY.

The growing want of joint-stock companies for marine insurance purposes has induced the formation of another company, called the "Oriental and General Marine." With the growing wants of the public there is perceptible, also, a tendency to treat the underwriters at Lloyds as one of the remnants of the past usages inaugurated at a time when no better means could be found, and as a body no fault can, perhaps, be found with their liberality in settling claims; but that they should, as individuals, be very desirous of using all legitimate means to avoid the acceptance of a claim, and to drive off to the utmost limit of time, claims which are patent, is only to be expected. That they will eventually, like the old East India Company, be one of the bodies of by-gone days, there is little doubt.

The prospectus of the "Oriental and General Marine Company" will be found in our advertising columns, and among the Directors we observe Mr. A. F. Croom, for many years a resident merchant in Shanghai in connection with one of the large firms, and, coupled with the title of the Company, implies an intention to devote especial care to Eastern risks. The statistics of our increasing trade with that quarter, as shown above, fully confirms the correctness of these views. This, in conjunction with special efforts to the business of the outports, which are well represented in the direction, will afford ample scope for a profitable use of the proposed capital. The shares are already quoted at a premium.

Lloyds have notified that arrangements have been made to telegraph the arrival of vessels from Alexandria in China, India, or Australian waters at a cost of ten shillings each.

The Danish Concession to the North Atlantic Telegraph Company has passed into new hands, preliminary to forming a company.

Government have, it is understood, determined upon taking over the Red Sea cable, and effecting the necessary repairs.

The *Rangoon* has not yet laid her portion of the Malta and Alexandria cable.

The amount of bullion from Southampton by the steamer *Ceylon* on the 4th inst. was—To Ceylon, £2,150 in gold; Madras, £2,986; Calcutta, £600, and £234,634 in silver; Hong Kong, £13,023; Shanghai, £21,388.

ARTICLES OF IMPORT.

TEA.—Our market has continued in the same dull and inactive state as previously advised. Although the deliveries continue to be maintained at a high figure, both for home consumption and export, there is a total absence of life, the transactions being almost of a retail character by private contract, the trade buying only to supply immediate wants, which the large public sales brought forward from time to time have enabled them in a measure to supply, a larger proportion than usual being offered without reserve. Prices for most of the lower descriptions have been barely maintained, whilst the continued scarcity of good and fine descriptions causes prices for these to be fully supported. At the great fire at Cotton's Wharf about 22,000 packages of tea were entirely destroyed, weighing nearly 1,000,000 lbs.; of this 600,000 lbs. were Taysham Congous, but the quantity bears but a slight proportion to the total in stock, and the market for these kinds has not benefited. For the low and fair descriptions of Congou, as also for the dusty kinds, there has been only a moderate inquiry, but prices remain much as before. Good common we quote 11d. to 11½d. per lb., but with little inquiry. Common to fair flavory kinds have in some instances sold ½d. to 1d. per lb. lower. Common to fair Ho Hows show but little alteration. Good Ning Chows and second class Monings and Wopaks have been in fair request, and the sales made have been at previous rates. A chop of fine Moning "Hop Fat" has been sold at 2s. 3½d. per lb. Good and fine Kaisows fully support their former value. Tayshan kinds have been dull, owing to the cessation of speculative purchases. About 1,000 chests of flowery Pekoes have been sold at public auction, without reserve, the prices realised being 1s. 2½d. to 1s. 8½d. per lb. for common to good qualities. Souchongs show but little alteration. There has been a moderate demand for good descriptions. Oolongs realised rather lower prices at public auction. Common Scented Capers have declined about ½d. per lb; the fair to good and fine kinds are saleable at full prices. Common Scented Orange Pekoes remain neglected, but there has been some inquiry for the good and fine qualities at former prices; Foo Chow descriptions remain unaltered. Green Teas are now getting into a small compass, and the prices realised from time to time for those offered show an advance of 1d. to 2d. per lb., the rise being greatest in the lower qualities. Canton Gunpowders sold rather lower. Young Hysons remain much as before. There have been four public sales during the month, comprising 68,564 packages, of which 24,600 were sold, including 18,220 packages offered without reserve, and 1,250 packages Assam tea, the lower kinds of which declined 1d. to 2d. per lb. The stock on the 1st of July of all descriptions of Black was, in London, 57,286,000 lbs., and of Green, 3,774,000 lbs. The total delivery was, of Black, 36,631,000 lbs., and 5,037,000 lbs. of Green. The stock at Liverpool was of Black, 3,740,000 lbs., and of Green, 146,000 lbs. The total delivery of Black was 3,755,000 lbs., and 281,000 lbs. of Green. The imports in London to the 1st of July have been of Black, 47,611,000 lbs., and of Green, 3,090,000 lbs., and at Liverpool, of Black, 5,384,000 lbs., and 279,000 lbs. of Green. The amount of Tea afloat at the present time is 11,561,177 lbs. against 14,062,420 lbs. at the same period in 1860.

SILK.—We have still nothing favourable to report as to Silk. The transactions of the month have again been of the most limited character—even the occasional days of comparatively good business have been wanting, and the deliveries mark reduced employment of the operatives. The prospects of the European crop are felt to be rather less disastrous as to quantity than was at one time feared—in Italy at least the total yield is expected to be in excess of last year, although the quality may be worse—and the prices mentioned for the new Silk are 20 to 25 per cent. below the exaggerated notions of last year. This, however, has been without any quotable effect upon the prices of China and Bengal Silk, which are fairly supported—recent advices inducing the idea that the supply from both these countries may prove materially less than for the season now closing. The only feature in the market has been the arrival of the long-missing ship *Matanzas* from Japan with 350 bales, which being all more or less damaged were sold by public auction without reserve. This commanded more than usual attention, and the whole were taken freely at full prices. Chinese Thrown Silk remains unnoticed.

SUGAR.—Sales have been made at 6d. reduction in some cases. The sales include 200 bags Clayed Manila at 32s. 6d., 1,700 baskets, and 600 native bags of Java, at 24s. 9d. A lot of 16,000 bags Unclayed Manila, has been sold for the Continent, at 26s. 6d., and a further lot of 2,897 bags at 29s. 6d., and 662 bags of good brown Penang, at 32s. 6d.

COFFEE.—Good and fine qualities are in fair request, but common and inferior descriptions remain much neglected. A public sale of 500 casks 256 barrels and bags Plantation went off at steady rates; fine fine ordinary and low middling, 68s to 71s. 6d.: middling to good middling, 72s. to 75s.. In Native little has occurred privately; 682 bags good ordinary, rather small, in auction brought 61s. to 61s. 6d. being the former value.

RICE.—Market dull, with a downward tendency. Sales of Maulmain at 9s. 6d.; Necranzie, 9s. 9d. to 10s. Sales of Bengal, common cargo, at 9s. 3d.

PEPPER.—Supply and demand both small. Sales of 500 bags Penang black at 3¼d. to 5⅛d. Singapore white, 5¼d.

Digitized by Google

SAGO.—In consequence of the fire quotations are now 19s. 6d. to 21s. for small Pearl. Flour: sales at 16s.

SPICES.—Cinnamon: Quotations remain, 1st, 1s. 7d. to 2s. 4d.; 2nd, 1s. 2d. to 1s. 9d.; 3rd, 11d. to 1s. 4d.; and 4th, 7d. to 9d. per lb. Business limited at the currency of the last sales. Cassia Lignea: Quiet. No auctions, and very little trade privately; prices unaltered. Cassia Buds: Held for more money. 13 cases at auction retired at 240s. per cwt. Cloves: The only business of interest has been in Penang, 55 cases of which, recently arrived, offered at auction, were chiefly sold at 1s 2½d. to 1s. 3d. per lb.; 40 bags Amboyna and 97 bags Zanzibar all retired. Mace: Sales of 1 case Penang at 1s. Nutmegs: without change; only 15 cases Penang at auction, sold at 3s. 3d. per lb. for good bold, and 1s. 1d. to 1s. 5d., middling small to medium.

HEMP.—Of 2,000 bales Manila offered, the damaged only sold, the sound being retired at £20 to £22.

COTTON.—The market has been more active and firmer, prices ¼d. per lb. higher, and good inquiry. Business has combined Tinnevelli, middling to good fair at 5¾d. to 6¼d. per lb., and fair to good fair Western 5⅝d. to 5¼d.

JAPAN WAX.—At Liverpool 20 cases sold at 58s., and 50 boxes at 56s. 10 boxes cake Japan vegetable wax were bought in here at 75s.

TOBACCO.—Java in brisk demand, and good qualities much wanted.

TIN.—Banca is quoted at 118s.; Straits, 115s.; antimony ore, £16. 2s. 6d.

GAMBIA.—Prices have declined. Sales of about 1,500 bales at 15s. 6d. to 16s.

CUTCH.—2,500 bags sold at 21s. to 22s.

MISCELLANEOUS.—India-rubber: Sales have been made at 1s. 3d. Market firm. Camphor: Small sales of Japan at 230s. Sapanwood: Firm, and with more inquiry. Of 51 tons Siam at auction, one third sold at £7 to £8. 2s. 6d. per ton; and 11 tons Bombay sold at £5. 10s. Soy: No sales. Mother-o'-pearl Shells: Manila quiet, but held with more confidence. Singapore very scarce. Star Anniseed: No improvement and no sales. Sticklac: Siam quoted at 75s. to 90s. Gum Benjamin: Small sales at previous rates. Damar: As last quoted. Gambouge: No sales. Quotations £7 to £8. Rattans: 1,300 bundles of Batavia sold at 1s. 9d. to 3s. 6d. Saltpetre: A sale of 41 packages of Japan at 37s. Gutta-percha: Of 4½ tons at auction, half sold at 1s. 3½d. to 1s. 4d. per lb. for good genuine, for which there is still some demand. Arrivals and sales advertised privately—Sales have been effected at 1s. 3d. per lb. for good, at which figure the article is firm, but quiet. Rape Seed: 1,700 quarters of Japan sold at 50s. to 52s. 6d. Elephants' Teeth: No sales. Vermilion: No demand and no Sales. Galangal Root: Market flat. Cubebs: Very quiet. Dragons' Blood: No business of consequence doing. Galls: Japan rather cheaper. 638 packages sold at auction at 36s. to 41s. for ordinary to fair stalky. Rum: In more demand. 40 puncheons Penang have been sold at 1s. 8d.

MANCHESTER MARKETS.

The general demand has not improved, but where orders have been held over from want of confidence in prices, buyers in general have been anxious to place them if last week's rates could now be accepted. Both spinners and manufacturers decline these terms, believing that the value of cotton will be maintained, and that a decrease of production in yarn and cloth will be thus ensured. In some mills notices have been given of reduction in the hours of working, and it is expected such will be very numerous indeed by the end of this month. We quote an advance, currently held for but not largely obtainable, of 3d. per piece in shirtings, 1½d. to 3d. in printing cloths, and ¼d. per lb. in yarn, whilst the advance during same time in cotton has been nearly as much again.

COMMERCIAL POSTSCRIPT.

WEDNESDAY AFTERNOON.

A further improvement has taken place in the Manchester market. The circular of Sam Mendel, says:—

"The improvement of last week is still more decided to day. In the interval sales have been made sufficiently large to establish a higher range of prices, with much irregularity in the quoted advances, governed more or less by the position of producers."

ARRIVALS NOT INCLUDED IN TABLE.—July 9, at Falmouth, from Akyab, Chapman; at Portsmouth, from Japan, Hong Kong, and Singapore, H.M.'s str. Roebuck; July 10, at Sourabaya, Malvina, Vidal; at Liverpool, from Manila, Sales; July 11, at Falmouth, from Akyab, Prince Frederick William; June 25, at New York, from Hong Kong, Comet; July 10, at Deal, from Banjoewangie, Aldebaran; at Brouwershaven, from Banjoewangie, Watergens, Ida Wilhelmina; June 9, at Demerara, from Canton, Chapman; from Hong Kong, Mystery; July 15, off Queenstown, from Akyab, Hydaspes; 12, off Dungeness from Sourabaya, Nederlanden; 13, at Brouwershaven from Passarveang, Zephyr; from Banjoewangee, Odilia Margaretha; 13, at Antwerp from Akyab, Chapman; 12, at Hexel from Banjoewangie, Aldebaran; 14, Catharina; 14, at Brouwershaven from Banjoewangie, Sophia Kon der Nederlanden.

From PENANG.—At London: Isabella Harnett, Rajah of Cochin, Barracouta, America.

From BATAVIA.—At Liverpool: Kerr, Shantung.

From BANKOK.—For Falmouth: Pauline.

FREIGHTS AND CHARTERS.

The past fortnight has not been so encouraging to shipowners as might reasonably have been expected at its commencement. The long continuance of a high price of money is telling more and more upon every branch of commercial enterprise, and we have scarcely known a time when there has been such a complete lull as at present.

For India, China, and the Cape of Good Hope the tonnage on the berth has increased to 63,000 tons. There is a little more activity for the Cape, but for India business generally is dull, and the China berths are fully occupied.

Charters can be obtained here on favourable conditions from Mauritius, the rice ports, from Moulmein for Teak, and also from Java and the Malabar coast; but considerable difficulty is experienced in finding suitable outward freights to combine with them. Coal freights to the eastward continue almost a dead letter, scarcely any contracts having been issued for months past, but we notice with satisfaction a somewhat improved demand for this article for local consumption in China.

41s. per ton is offered for Hong Kong, 47s. 6d. Shanghai, 35s. Manila, 31s. Calcutta, 35s. per ton for mixed cargoes to Madras.

Current freights to Shanghai for vessels on the berth, 40s. to 50s. per on weight and meas.; to Hong Kong, 35s. to 40s.; Singapore and Penang, 30s. to 45s.; to Manila, 35s. to 40s.; to Batavia, 45s. weight, 40s. meas.; to Japan, 65s. weight, and 60s. meas.

INSURANCE.

The following are the current rates of premium at Lloyd's, according to the class of vessels, &c.:—To Hong Kong, 40s. to 50s. Shanghai, 50s. to 60s. Singapore, 30s. to 45s. Batavia, 30s. to 40s. Manila, 50s. to 60s. Japan, 50s. to 60s.

At Hamburg, for Batavia and Singapore, 40s. China and Manila, 40s. to 50s.

CASUALTIES.

The Glendower, from Manila for Cork, which arrived off Crookhaven June 18, had lost sails, &c.

Cape Town, April 27.—The Maria Adriana Van der Heldt, from Batavia for Rotterdam, which arrived in Simon's Bay April 24, had put in for repairs.

The Jane Wakefield, How, which sailed June 15 from Cardiff for Shanghai, put into Queenstown, June 27, leaky, and was towed back to Liverpool, July 1.

The steamer Chevy Chase, which arrived off Liverpool June 26 from Hong Kong, had lost her funnel.

Amsterdam, June 29.—The Pollux, Crays, from Banjoewanjie to this port, was in contact in the Great North Holland Canal, off the Zyper sluice, and had her starboard bow stove in.

The Emma Mathilde (barque), of Lubeck, Behrens, from Liverpool for Batavia, with a general cargo, put into Rio Janeiro, May 27, in distress (with foremast sprung), and will have to discharge part of her cargo.

The Hero, Young, which sailed from Cardiff June 24 for Manila, put into Milford, July 5, through stress of weather.

Table Bay, April 23, Ouderkirk, A. D. Amstel, Grants, from Banjoewanjie, and sailed 27 for Rotterdam; 26, Sydpolen, Fritz, from Stockholm, and sailed 18th May for Batavia; May 12, Maria Adolphina, Bloen, from Batavia, and sailed 15 for Amsterdam.

Simon's Bay, April 24, Maria Adriana, Vander Helts, from Batavia; 15, H.M.'s str. Nimrod, from Singapore: 17, H.M.'s str. Roebuck, from Japan.

LAUNCH OF THE "ARRATOON APCAR."—On the 4th inst. this vessel was launched at Renfrew from the building yard of Messrs. James Henderson and Son. She is 1,500 tons register, fitted with patent diagonal engines of 250-horse power, and her model is strikingly handsome. The christening ceremony was performed by Mrs. Alexander Apcar, one of the members of the firm of Apcar and Co., Calcutta. She is intended to trade between that port and Hong Kong. The same owners have, as already noticed, laid down a paddle steamer on the Thames, intended to run between Hong Kong and Shanghai.

TEA LEAD FOR INDIA AND CHINA.

WIMSHURSTS PATENT METAL, FOIL, AND SHEET METAL COMPANY (Limited) are now prepared to supply in any quantity, and of suitable lengths and widths, to meet the requirements of the trade, their PATENT CUT LEAD for packing Teas, of which they invite an examination and trial. The Lead will be found not only more economical as to price, but in all respects superior in point of quality to that at present used for the packing of Teas. The Committee of Lloyds have reported most favourably as to its perfect adaptation for preserving Teas from sea and other damage, and strongly recommend its general adoption.

The Company's Lead is exclusively used by the Assam Company, to whom it has given the utmost satisfaction.

Samples of the Lead, Price Lists, and every information, had on application to the Company's Works, Old Ford Road, Bow, or to the Secretary, 16, Bishopsgate-street Within, London, E.C.

COMMISSION MERCHANTS, NAGASAKI, JAPAN.

NORWICH UNION LIFE INSURANCE SOCIETY.—Instituted 1808.

SECRETARY—Sir SAMUEL BIGNOLD.

The whole of the profits divided with the assured.

Ample security offered by an accumulated capital of £2,000,000.

One-half of the first five annual premiums may remain as a permanent charge upon policies granted for the whole duration of life.

The income of the Society is upwards of £237,000.

The amount insured is upwards of £5,078,000.

Since its commencement 32,700 policies have been issued, and £5,666,555 paid to the representatives of 6,854 deceased members.

The bonuses may be applied at the option of the assured as follows:—

As a bonus added to the policy, or the amount may be received at once, that is, its cash value, or it may be applied in reduction of the future annual premium.

The rates of premium are lower than those of some offices by nearly 10 per cent., a benefit in itself equivalent to an annual bonus.

For prospectuses apply at the Society's Offices, Surrey-street, Norwich, and 6, Crescent, Blackfriars, London.

CHINA OR JAPAN.—A respectable Young Man, age 28, of good abilities, wishes for an ENGAGEMENT in the Chronometer and Watchmaking business, to proceed to either of the above places. First-class references to character and abilities given.

Address J. W., 88, Park-street, Grosvenor-square.

TO CHEMISTS, STATIONERS, AND CONFECTIONERS.—AGENTS WANTED.

PLUMBE'S GENUINE ARROW-ROOT should be used in preference to any other. It is greatly preferred by the most eminent Physicians in London for invalids, and as the best food for infants.

REPORT ON PLUMBE'S ARROW-ROOT, BY DR. HASSALL

"I have subjected Plumbe's Arrow-root to careful examination, microscopical and chemical. I find it to be perfectly genuine, and of superior quality; equal in all respects to the best Bermuda, for which so high a price is usually charged. (Signed) ARTHUR HILL HASSALL, M.D."

Directions and testimonials with each packet, which bears the signature of A. S. PLUMBE, 3, Alie-place.

Retailed in London by Snow, Paternoster-row; Ford, Islington; Morgan, Sloane-street; Williams and Lloyd, Moorgate-st.; Starling, Islington; Weatherley, Peckham.

HOLLOWAY'S PILLS.—ERUPTIVE AND OTHER FEVERS.—Throughout the summer febrile diseases prevail more or less; and the unusual number of storms has caused a proportionate increase in fever cases. On the first feeling of lassitude, before the thirst and heat of skin set in, the patient should resort to Holloway's Pills, which will thoroughly cast out all fever poison, both from the blood and every organ. For many years no other treatment has proved so efficient in removing the seeds of these perilous complaints, whether afflicting young, middle-aged, or old. These Pills purify the whole system, greatly improve the digestion, regulate the circulation, to the minutest vessels of the skin, and cool that pungent heat which always attends cases of fever.

DR. CURTIS'S MEDICAL WORK, "MANHOOD."

An Essay on Nervous and Generative Diseases.

The 140th Thousand, with numerous plates in a sealed envelope, price Half-a-Dollar,

MANHOOD: the CAUSE and CURE of PREMATURE DECLINE IN MAN, with plain directions for perfect restoration to health and vigour, being a Medical Essay on Nervous and Generative Diseases, their Prevention and Cure, with the Author's experience in the Treatment of the various Disqualifications of Marriage—whether resulting from Youthful Abuse, the Follies of Maturity, the Effects of Climate or Infection. The result of Twenty-five Years' successful practice. By Dr. J. L. CURTIS, 15, Albemarle-street, Piccadilly, London.

Consultations, Ten till Three and Six till Eight.

REVIEWS OF THE WORK.

"We feel no hesitation in saying, that there is no member of society by whom the book will not be found useful—whether such person hold the relation of a Parent-Preceptor, or Clergyman."—Sun, Evening Paper.

"Dr. Curtis has conferred a great boon by publishing this little work, in which is described the sources of those diseases which produce decline in youth, or more frequently premature old age."—Daily Telegraph, March 27, 1858.

The Book concludes with numerous varied and interesting cases, to which is added the Author's Receipt of a Preventive Lotion.

Dr. CURTIS may be consulted, as usual, either by letter or personally, at his residence, as above. Patients in INDIA, CHINA, and the COLONIES can be cured by correspondence only, and have their medicines sent with secrecy and despatch. The efficacy and harmless nature of the remedies employed by Dr. CURTIS, having been demonstrated by the most complete success during a practice extending over a period of Twenty-five Years, nervous sufferers of every class have a perfect guarantee that the utmost skill and experience will be made available in the treatment of their cases.

THE PEN SUPERSEDED.—Mark your Linen. The best and only method of Marking Linen, Silk, Stockings, Coarse Towels, or Books, so as to prevent the Ink washing out, is with CULLETON'S PATENT ELECTRO-SILVER PLATES. By means of this novel invention a thousand pieces of linen can be marked in a few hours. Initials, 1s. each; Name, 2s. 6d. Set of Moveable Numbers, 2s. 6d.; Crest Plate, 5s., with the necessary directions for use. Post free. Certificate from the eminent Dr. Sheridan Muspratt, F.R.S., Professor of Chemistry, &c.

"Several trials with Mr. Culleton's Patent Electro-Silver Plates, for marking linen, induce me to pronounce them excellent; the letters are beautifully marked in a deep black colour, without blotting, and after a long boiling, with either potass or soda, they remain unaltered. Other plates which I tried decomposed the ink, and in many cases burned holes in the linen. I can testify Mr. Culleton's Plates are incorrodible, and will not hurt the finest fabric.—(Signed) "SHERIDAN MUSPRATT

"College of Chemistry, Liverpool

PROSPECTUS.

The Company is established for effecting the general insurance of shipping and cargoes, also the insurance of bullion.

The Directors, on publishing the prospectus of the Oriental and General Marine Insurance Company, announce that in consequence of the progress made since the registration of the Company, they are in a position to state that the allotment of the shares will be proceeded with at an early date.

A clause in the Deed of Settlement especially provides that every policy issued shall distinctly bear on the face of it that the capital and property of the Company shall alone be answerable for the settlement of its claims and engagements, and that no shareholder shall be liable beyond the amount of his or her share or shares in the stock of the Company.

Marine insurance companies, as a medium of investment, increase every year in public favour. The liberality and promptitude of their settlements, their safety, and the ease with which insurances are effected with them, are now fully appreciated.

The principle of marine insurance has been practically tested; its wisdom is now generally recognised, and the averages of hazard can be calculated with the nearest conceivable approximation to accuracy.

During the last few years a very lucrative field for marine insurance has been opened by the immense increase in the importation of the precious metals to this country, and their exportation to other parts of the world. The bullion trade, so far as it appears in the late official returns (which take no account of large parcels of gold passing by private hands), had risen to the amount of £72,758,959.

By calculations based on these and other accounts of the Board of Trade, it appears that the field of marine insurance is extending at the rate of at least £15,000,000 sterling per annum.

The immense profits realised by the old-established companies during the last ten years have greatly increased the value of their shares, as shown by the following list of present prices:—

Alliance—£25 paid, is worth about £60.
Indemnity—£5. 13s. 6d. paid, increased by bonuses to £50, is worth about £170.
London—£12. 10s. paid, is worth about £43.
Marine—£15 paid, increased by bonuses to £18, is worth about £110.
Royal Exchange—(Stock) £100 is worth about £300.

We may fairly assume that the four new Marine Insurance Companies established in 1859 and 1860 tended partially to supply a public want; and the prosperity which has attended them is shown by the accompanying statement of premiums received by each:—

Ocean, from 19th December, 1859 ...	£140,000
Universal, from 23rd January to 31st December, 1860	526,783
London and Provincial, from May, 1860, to May, 1861	100,257
Thames and Mersey, to 31st December	107,700
	£874,745

It is evident that the commercial community require greater facilities for effecting marine insurances; the Directors, therefore, cannot resist the conviction that there is abundant room for the successful prosecution of the present undertaking.

Application for shares will receive immediate attention; but no application will be taken into consideration unless a deposit of 10s. per share be paid into the Company's bankers, to be allowed in payment of the first call, or returned in the event of shares not being allotted.

All communications on the business of the office to be addressed to the Secretary, at the temporary offices of the Company, 79, Lombard-street, London, E.C.

Oriental and General Marine Insurance Company; Incorporated pursuant to Act of Parliament, 7 and 8 Vict., cap. 110.

Capital £1,000,000.

Ceylon Rifles in China, and Ceylon (retired), may be consulted by his China and Eastern friends returning home suffering from tropical disease. Address, Mandarin Villa, 8, Abbey Road, St. John's Wood, London.

FOREIGN CORRESPONDENCE!

THE greatest novelty of the Day in Paper is the NEW INDIA PAPER, which is an entirely New Fabric, possessing a peculiar surface which renders it admirably suited for rapid writers. It is further distinguished from the usual kind of Foreign Paper, by its being as pleasant to write upon as stout writing paper, whereas with any other than a very light hand the pen is very liable to catch in the thin paper used ordinarily for Foreign Correspondence. It may be had in various note and letter sizes, plain, ruled, and black-bordered. The New India Envelopes possess two most valuable qualities, viz., lightness, and the strength and toughness of stout Cartridge Paper. They are less than half the usual price of Foreign Envelopes.

Three Sheets of India Note and Envelope, weigh under the ½-oz. The Envelopes may be had plain, or printed "via Marseilles," or Southampton. Ostend, France, Belgium, Liverpool, Halifax, Trieste, Lisbon, or in any other manner to order, and likewise with Mourning Border.

Sold only by E. TOWNSEND HAMBLIN, Stationer 421, Oxford-street, London, W.

Linzan, Crelanney, Villamit, Boot, Dounie, Young, and Kettle.

CONTINUATION OF THE SEMI-MONTHLY MAIL.

The information which we announced in our last number will have apprised our readers of the successful result of our efforts to procure the continuation of the semi-monthly mail. We have now to add that the additional rate of postage will apply to both mails. This arrangement did not come into force with the mail which has just left, and the letters and papers sent by it will have to take their chance of being forwarded by the first steamer from Galle. But as the matter is proceeding in due official course, there is every reason to believe that it will be carried out by the mail of the 20-26th August.

Summary of News from the Far East.

THE TWO OVERLAND PARTIES.

We have endeavoured from time to time to make our readers familiar with the narrative of the two expeditions which started some months since—the one from Canton overland to Thibet and India; the other, far less ambitious in aim, from Canton to Hankow. News of both expeditions has reached us by this mail, but there is very little in the intelligence which need be transferred into our columns. The "great overland party," as it is correctly termed by the *China Mail*, has, it seems, reached Kwei-Chau-Fu, 1,203 English miles from Shanghai. Major Sarel writes a description of the voyage from Hankow for the North-China branch of the Royal Asiatic Society, but his narrative contains few novel features, although it carries us about a hundred miles further from Shanghai than the account published in our last issue, and dated the 12th April. Major Sarel describes Kinchow, distant from Hankow five days' journey by land, as a flourishing town inhabited by Tartars and Chinese. He gives the value of different articles there as follows:—

"1 Mexican dollar, equal 1,000 cash; tea, 140 cash per catty; charcoal, 1,800 cash per picul of 100 catties; flour, 29 cash per catty."

The description Major Sarel gives of the river above I-Chang agrees with what we have already given. Between I-Chang and Kwei-Chow, the river, he says, is full of rapids, and the navigation at certain seasons of the year impracticable for steamers. He then adds:—

"In a great number of places, in the gorge between I-chang and Kweichow, coal is worked in galleries driven into the hill-sides close to the river; it is worked into bricks with water, and sent in boats down to I-chang, which place they reach in a day. About Kweichow the poppy is cultivated and opium made; we were asked nearly four dollars a catty for it, but the Prefect of the district said that its proper cost was little over two dollars. Raw silk was seen in some shops. Mexican Dollars have always been current at 1,000 cash; we have no more, or they would probably be current here. We got yesterday seventeen hundred and twenty cash for a tael of silver."

The four travellers who formed the "little overland party" reached Shanghai on the 26th May, in one of the American ships of war from Hankow. It will be remembered that they left Canton on the 11th April. The whole trip was performed without any serious accident, or any interruption by Imperialists or insurgents, the people and officers everywhere, with one or two exceptions, showing themselves civil and obliging.

In our last account of the expedition we left the travellers at Ee Chag-ung, from whence they were about to start over the mountains for Chung-Chow. From this place they took boat again to Yoh-chau, a place at the mouth of the Tung-ting Lake, near the centre of Hu-Kwang. The particulars received about this portion of the route are extremely meagre.

Digitized by Google

Through the whole trip, from Canton to Yoh-chau, no part of the country was found occupied by rebels; in many places, however, traces of their devastations were still visible, especially in temples and altars of the pagan deities.

On the whole, we cannot but regret that the reports at present received of this novel and interesting journey are so comparatively meagre, but in all probability the travellers are reserving their strength, and will eventually give us a fuller narrative.

JAPAN.

There is no definite news from Japan of an interesting character. There is, however, a rumour that the Japanese are about to send embassies to the Treaty Powers for the purpose of begging off that article in the treaties which opens Yedo from Jan. 1, 1862. It is declared that their objection to this point is so strong that they would rather have recourse to war than concede it and thereby cause disaffection amongst their own people, which might lead to a civil war.

Mr. Rutherford Alcock has just published, at the London Mission, Shanghai, a work entitled "The Elements of Japanese Grammar."

The crop of new silk is reported to be large. Samples of the new teas had been produced. The *Vision* had sailed, bound to London with a cargo of rags.

CHINA.

PEKING.

All is tranquil in the Imperial city; but there is no sign of the Emperor's return.

Mr. Bruce still suspends permission to visit Peking, but his official intercourse with the Chinese is perfectly satisfactory.

Hang-ke, now well-known from Mr. Parkes' narrative of his captivity, and Tsung-lun, the mandarin who met Sir John Bowring at Takoo in 1854, have been appointed Under-Secretaries of State for Foreign Affairs to assist Prince Kung, who, from all that is heard about him, appears sincerely to wish to carry out the provisions of the Treaty.

Tsung-lun arrived at Tientsin on the 8th from Peking to treat with Count d'Eulenberg, who has hoisted the Prussian flag and taken up his residence on shore; but it is not known with what powers the Mandarin is invested.

Three separate victories are announced at Chaoyang in Shingking; in the first of which the rebels are said to have been annihilated, only, however, to rise again to lose several hundred men, and finally, in a still greater fight, to lose seven guns and ten matchlocks.

The Emperor is delighted, but begs the victorious general Kosingah to make the most of his opportunities, and follow up the rebels.

A victory, too, is reported near Tsingpu, in which Li, the newly-appointed General at Sungkiang, is reported to have sallied out from his head quarters at Kwangfolin, about ten miles from Sungkiang, and, after a protracted fight, to have destroyed one mounted rebel, for which promotion is given him and the officer he recommends.

TIEN-TSIN.

According to the latest advices the aspect of affairs is more satisfactory. Trade was progressing favourably. The Rebels had retired southward from the provinces of Chih-li and Shantung. They were supposed to be in Honam.

A mandarin had arrived at Tien-tsin to treat with the Prussian Ambassador, Count d'Eulenberg. No less than fourteen committees of defence were established in the city and suburbs to provide for its defence against the Rebels. The Men-fi were in the vicinity of Ta-ming-fu, and Liu-ching-chow, in the provinces of Pecheli and Shang-tung.

THE YANG TSE-KIANG.

At Tsinpoo there has been a slight "misunderstanding" between ourselves and the rebels. The following account of the affair is extracted from the *North China Herald* of June 1:—

On the 24th ult., Captain R. Dew and one or two other naval and military officers went up the river in H. M.'s gun-boat *Flamer* to deliver a letter to the Commander-in-Chief of the rebel forces in this neighbourhood, intimating that any interference on their part with boats engaged in conveying silk for foreigners from the producing districts to Shanghai, would be treated as a hostile step, and warning them that if they approached within two days' march of Ningpo they would come into collision with the British forces. They proceeded about 40 miles up the river in the steamer, and then in ships' boats, by creeks, to Tsingpo, when a small party, consisting of Captain Dew, Mr. Alabaster, and a boy carrying a white flag on a boat-hook, left the boat and advanced towards the gate. On their approach the walls were manned, and a fire from gingalls and guns was kept up upon them. They exhibited the letter to indicate the object of their visit, but the firing continued. No other course was left than to retire; this they did after placing the letter in the cleft of a bamboo, and sticking it in the ground. This occurred at the same place where the Imperialists were lately repulsed, and twenty-two of the Chinese Foreign Legion killed or wounded. They then returned to the *Flamer*, and arrived here late on last Saturday night. The French steamer *Contest*, with a small iron steamer, having on board the French Admiral and other officers, accompanied the British party up the river, but returned without proceeding to Tsingpo. We believe a party will go up again next week to demand an apology on which occasion the gun-boat will be taken within range of the city wall.

At Hankow the natives were slowly returning, but much uneasiness was felt at the proximity of the Rebels who are at Hwang-chau, a distance of between forty and fifty miles. Several masters of the new crop of black tea were in the market.

Chin-kiang was being closely invested by the Rebels. The British Consulate is removed to Silver Island.

SHANGHAI.

The American expedition has arrived at Shanghai from its trip up the Yangtse river. The Americans have succeeded, as usual, in adopting the course previously followed by the British; no novelty has been developed by this expedition.

Between Shanghai and Soonkong, a number of Imperialist soldiers attacked three native boats under the charge of Europeans, and plundered from them treasure to the extent of 72,000 taels. The case has been laid before the Taoutai in such terms as will doubtless insure a speedy return of the property or its equivalent. The carrying trade with the Northern ports and the Yangtse has passed into the hands of foreigners, who were feeling very uneasy as regards the transit of silk to the Shanghai market.

NINGPO.

The people say that so long as Hangchow holds out there is no fear of the rebels getting Ningpo.

Consul Sinclair and family left in the *Hainan* on the 13th May for Foo-chow, and Mr. Harvey, who succeeds him, had not arrived. This was felt inconvenient by the foreign residents there, as difficulties were arising from the establishment of the foreign inspectors of Customs.

There is no further news from Chapoo, which is still held by the insurgents.

The Chinese steamer *Paoushun* has been on shore near Wanchew, and has received such serious damage that she is quite unfitted to go to sea again.

FOO-CHOW-FOO.

The steamers *Confucius* and *Feiloong* left this place for Shanghai after having collected $46,000 of the indemnity money.

SWATOW.

No satisfactory arrangements have been arrived at with the Chinese officials in regard to compensation for the property stolen from Messrs. Bradley and Co.'s premises. The American war vessels *John Adams* and *Dacotah* have been dispatched to take the matter in hand.

HONG KONG.

Among the shipping casualties reported in our last was the loss of the *Osprey*, and mal-treatment of the crew. It appears that the authorities at Hong Kong sent out H.M.S. *Pearl* to the west coast to discover the pirates, and six ruffianly-looking fellows were apprehended on shore by the Mandarins, five of whom were identified by Captain Allen of the *Osprey*, as having been concerned in the attack upon his vessel. They have been taken to Hong Kong for trial.

We mentioned in our last the sale of three vessels by the P. and O. Company. We have now to notice the sale of the *Oriental* for $18,500, to Messrs. Jairuz, Fazul and Co., who intend to make a warehouse of her, and to save the $1,500 a month which they have been paying for storage in Hong Kong.

The *China Mail* of the 12th ult. contains a review of the Rebel movement in China considered in its religious and political aspect.

The passengers from Galle to Hong Kong by the *Singapore*, P. and O. steamer, have written to Captain Wright, acknowledging the "unceasing manner in which he has at all times considerably added to their comforts and amusements," and requesting, at the same time, his acceptance of a silver cup as a remembrance of their pleasant intercourse.

Digitized by Google

The great "scandal case" in which Colonel MacMahon and other officers were charged with having injured the character of an officer's wife, still formed food for gossip for that class of individuals whose tastes run riot in such matters.

Mr. George B. F. Swain, R.N., has been appointed as one of the marine surveyors to Government.

Chief Justice Adams was holding the usual sittings of the Supreme Court. We see no mention of Mr. Smale, the new Attorney-General, who, we presume, has entered on his duties.

A sentence of six months' imprisonment has been passed upon Costello, for the embezzlement of coals, the property of his late employers, Messrs. Walker, Borradaile, and Co.

THE CHAMBER OF COMMERCE.

We mentioned in our last that a meeting of the subscribers to the Hong Kong Chamber of Commerce was to be held on the 29th May. The following report of the proceedings on the occasion is extracted from the *China Mail*. The *Daily Press* was unable to give them, and is extremely angry in consequence. Nothing can be stranger to quiet and unprejudiced readers in England than the way in which the editors of the local press in the Far East abuse each other :—

A meeting of subscribers to the Chamber of Commerce was held in the Club-house on Wednesday at 3.30 P.M. There were twenty-six gentlemen present. Mr. Perceval moved that Mr. Murray take the chair. On occupying the chair, Mr. Murray remarked that those present were aware that the object of the meeting was for the purpose of carrying out what was very much wanted here, namely, a Chamber of Commerce. It was a singular thing, he said, that such a large mercantile community as was to be found here, should still be without anything of this kind, but there had long been a desire to have it established. He pointed out the objects that a Chamber of Commerce was calculated to serve, and had no doubt that all would be agreed as to the utility of such an institution, particularly in one of its functions, namely, the arbitration of disputes. He then called upon Mr. Walkinshaw, who proposed the following as the rules and regulations. They had been taken principally from those of the Calcutta Chamber of Commerce :—

RULES AND REGULATIONS FOR THE HONG KONG CHAMBER OF COMMERCE.

1. That the Society be styled the Hongkong Chamber of Commerce.
2. That the object of the Chamber shall be to watch over and protect the general interests of Commerce, to collect information on all matters of interest to the mercantile community, and to use every means within its power for the removal of evils, the redress of grievances, and the promotion of the common good; to communicate with authorities and others thereupon; to form a code of practice whereby the transaction of business may be simplified and facilitated; to receive references, and to arbitrate between disputants—the decisions in such reference to be recorded for future guidance.
3. That all mercantile firms and persons engaged or interested in the commerce or shipping of China shall be eligible for admission as members in the manner hereafter described, and on payment of $100 for firms and $50 for single individuals for the current year, and an annual subscription of $100 payable in advance on 1st January.
4. That candidates for admission, proposed by one member, and seconded by another, shall be ballotted for, and a majority of votes shall decide the election.
5. That voting by proxy or by members whose subscriptions are in arrear be not allowed, and that each firm be restricted to one vote.
6. That in the absence from the colony of all the partners in a firm, their representative by power of attorney shall be entitled to a vote.
7. That the Chamber retains to itself the right of expelling any of its members, such expulsion to be decided by the votes of three-fourths of the members of the Chamber.
8. That any number of members not less than seven, in addition to the committee, shall be held to constitute a general meeting called in conformity with the rules of the Chamber for the despatch of ordinary business.
9. That the business and funds of the Chamber be managed by a committee of seven members, consisting of chairman, vice-chairman, and five members, to be elected annually at a general meeting of the Chamber in the month of May. In the absence of the chairman and vice-chairman, the committee to choose another from its members. Four to form a quorum, and the chairman in cases of equality to have the casting vote in addition to his own.
10. That the committee shall meet on such day of every fortnight as it may fix to be most convenient for the transaction of business, and that its proceedings be laid on the table open to the inspection of members, subject to such regulations as the committee may deem expedient.
11. That in case of a vacancy in the committee, it shall be filled up *pro tempore* by the committee until the next general meeting, and that they have the power to appoint a sub-committee from their own number for any purpose whatever.
12. That a paid secretary be elected by the committee, such election to be subject to confirmation at the next ensuing general meeting.
13. That the general meetings of the Chamber be held on 1st May and 1st November of each year, and that special general meetings shall be called by the chairman, or in his absence by the vice-chairman, or by his order, on the requisition of any five firms or individuals, members of the Chamber, to be held within ten days subsequent to the receipt of such requisition.
14. That all proceedings of the committee be subject to approval or otherwise of general meetings duly convened.
15. That the committee be empowered to make bye-laws which shall not be of any force until approved of at a general meeting.
16. That an annual report of the proceedings be prepared, and after being approved at a general meeting, printed and circulated.
17. That all disbursements shall be made on orders signed by the secretary, and countersigned by the chairman or vice-chairman; and all accounts shall be submitted to, and audited, by two members of the Chamber at each annual meeting.
18. That the above rules be added to or altered only by a majority of the members of the Chamber present at a general meeting, of which previous notice of ten days has been given.
19. That the foregoing rules be printed, and an authenticated copy subscribed by each member on admission, be kept as part of the records of the Chamber.

The Chairman said he did not purpose to ask them to pass these rules at the present meeting; they could not then have sufficient time to examine and criticise them. They would, therefore, be printed and circulated among the members, and be considered at another meeting which would shortly be held. At the same time it seemed desirable, as this appeared to be a full meeting, to proceed to elect a committee, including a chairman and vice-chairman. It seemed rather out of order to elect a committee before these rules were passed, but unless any gentleman present objected to Rule No. 9 (which empowered the election of a committee) being passed at the present meeting, the election could be proceeded with.

A member said he did not see why the rules as at present proposed should not be passed at once—they had been seen by the subscribers.

The Chairman explained that they had since undergone alteration.

After a general conversation which lasted for a few minutes, it was moved by Mr. Purdon, and seconded by Mr. Nissen, that Rule No. 9 be passed.

The motion was carried unanimously.

The Chairman said that the next thing they would have to do would be to proceed with the election of seven members to act as a committee. He requested those present to write down the names of whoever they proposed as members of committee, having the goodness to distinguish the names of those whom they selected as chairman and vice-chairman.

The election then took place with the following result :—Chairman of committee, Mr. Perceval; Vice-chairman, Mr. Walkinshaw; members, Messrs. Murray, P. Campbell, Gibb, Delano, and Reddie.

The Chairman inquired whether any gentleman present had any proposition to make with regard to the business before them; if no gentleman had anything farther to say, he believed the object of the meeting had been attained. At the next meeting, the rules and regulations would be again submitted for approval.

This closed the business.

The following certified minutes of meeting has been kindly supplied to us :—

HONG KONG CHAMBER OF COMMERCE.

Minutes of a Meeting of the Subscribers to the Hong Kong Chamber Commerce," held pursuant to notice, at the Club House, on Wednesday the 29th of May, 1861.

Present—Messrs. Perceval, Chomley, Macandrew, Reddie, Duns, Brodersen, Nissen, Sharp, Purdon, Cryder, Baldwin, Lapraik, Noble, Maclellan, Still, Linstead, P. Campbell, Maclean, Gibb, Delano, P. Dhunjeebhoy, Johanus, Murray, Johnson, and Bosman.

It was moved by Mr. Perceval, and seconded by Mr. Walkinshaw, "That Mr. Murray be invited to take the chair, and Mr. Johnson to act as honorary secretary to the meeting."

The Chairman having briefly alluded to the objects of the meeting, called upon Mr. Walkingshaw to move the following resolution, which was seconded by Mr. C. F. Still:—"That the Honorary Secretary be requested to read the proposed rules and regulations for the Chamber."

The rules and regulations having been read accordingly, the Chairman stated that it was not proposed to pass them at this meeting, but that copies would be printed and circulated for the information of the members, to be confirmed or revised at the next general meeting, which will be called at an early date, when the by-laws also to be adopted by the committee will be submitted for consideration. It would, however, be necessary for the meeting to settle the number of members to compose the committee before proceeding to elect them – in fact to make an exception in favour of rule No. 9.

It was then moved by Mr. Purdon, and seconded by Mr. Nissen,—"That Rule No. 9 of the proposed rules and regulations be confirmed by the meeting." Carried unanimously.

Digitized by Google

Votes of the members present were then taken in election of the committee, the result of the scrutiny being as follows:—

Mr. ALEXANDER PERCEVAL, Chairman.
„ W. WALKINSHAW, Vice-chairman.
„ C. W. MURRAY.
„ P. CAMPBELL.
„ J. D. GIBB.
„ W. DELANO,
„ R. M. REDDIE.

The Chairman then declared the above-named gentlemen to be duly elected, and the business before the meeting to be concluded.

A vote of thanks to Mr. Murray terminated the proceedings.

C. W. MURRAY, Chairman.

F. B. JOHNSON, Honorary Secretary.

CANTON.

We mentioned in our last the case of Captain Libbey, an American, having shot the cook on board his vessel, the *Orion*. He has been declared not guilty, and "honourably acquitted" of the offence charged, and a perusal of the evidence brought forward at the trial leads us to believe that this verdict is correct, and that the case was one of "justifiable homicide."

The *Friend of China* is extremely severe on our review, some time since, of Mr. Brown's book on Cochin China, the perusal of which has afforded them "a good deal of pleasure, and no small amount of intellectual profit." We are leashed with *The Times* in the reprimand which we receive, and are told that while the writers are deliberately blind to all that is good in the book, "all that is peccant is ungenerously commented on." We can only say that we wrote without prejudice what we believed to be the truth, of Mr. Brown's narrative.

Mr. H. S. Parkes has returned from the North, to take up his former position as British Commissioner. It has been stated that Mr. Parkes will leave for England to represent to our Government the difficulties of our position with regard to the contending parties in China. There appears, however, no ground for the rumour.

It is said that there is no prospect of our troops leaving Canton until the month of September next.

A missionary expedition up the Canton river has lately been made, and places unvisited hitherto, as well as places more familiar, have been visited by the Rev. Dr. Legge and his two friends, Mr. Chalmers and Mr. Hawke, accompanied by the Doctor's teacher, Yam, the church treasurer, A-muk, the colporteur, Leong-nan-shing, and two servants. A full account of this interesting journey appears in the *Overland Register* of June 12. The party left Canton on the 1st of May, on board "a beautiful Ho-tow, spacious, and bright with fresh paint and gilding." Wherever they stopped the people came out of the fields, and were very friendly, eagerly receiving books. Pleasantly does Dr. Legge chronicle their route along the "East River." Mountain heights, noble streams, and meadows deliciously green, are all described with feeling and delight. Once more he listens to the skylark, and with that song, unheard for several years, the old joys of his boyhood come back once more. Then they have pleasant walks along the river's banks, and pleasant snatches of Scotch song or hymn reminds them of "Auld Lang Syne." The following extracts, taken from the letter, will, we think, interest our readers:—

We landed not far from Hop-chuk Chow, near a Buddhist temple of small dimensions, but forming a striking object, built upon the side of the rock. We found it in good repair, and dedicated to T'am Seen-Shing, a man of the Sung dynasty, as the attendant priest told me. The priest himself was in good condition, but on the way to bad, through the use of opium, for smoking which we found all the apparatus in readiness in his own apartment. On the wall was a sheet tract, with illustrations, against the drowning of female infants, which he gave me in exchange for a tract. Bad as Buddhism and Taouism are, it may be a question whether they do not keep before the people some moral lessons which it would be a pity to take from them violently. The system must pass away gradually, as they are supplanted by the higher and completer teachings of the Gospel.

Pok-lo, on lat. 23.10 and long. 114-23, is walled, like all other cities of the same degree in China, but it is not a place of large population or of flourishing trade. I should think the inhabitants may amount to about 15,000. Shek-lung, on the west, and Wye-chow, to the east, have attracted all the commerce of the district. Much of the space within the walls is unbuilt upon, and at the east end are two small pleasant hills, the tops of which are largely composed of shells. The houses and shops are poor, the only exception being the temples and ancestral halls. It cannot be said of the Chinese, that they dwell in ceiled houses, while their gods are in mean habitations. We visited the temple of Confucius next day, and found images of the sage, of his four assessors, and of the twelve more distinguished of his followers. The mass of the disciples in the courts were only represented by their spirit-tablets. I had a long conversation with the schoolmaster resident at it, who has under his training a few more advanced pupils. He seemed open enough to conviction, but happening to go by mistake into his bedroom, I found the opium pipe and lamp, so that there is not much hope of him.

We resolved to spend the forenoon in distributing tracts and preaching in the streets, when, just as we were leaving the boat, four young gentlemen from the *nga-moon* came on board, and wished for some conversation on "the doctrines of Jesus." I discoursed to them for some time from the first paragraph of the 1st Cor., ch. xv. When they left us, we went on shore, and spent a toilsome couple of hours, though the people heard us gladly.

By 2 o'clock the boat was full of visitors—Christians that had been baptised last year, and friends who wished to be baptised now. Most applicants were from Chuk-un, but three brethren had come as far as from Nam-shea-t'ong and Mooey-lung, two villages eight or ten miles on the way from Pok lo to Lo-fow mountain, and reported that there were many in their neighbourhood also who believed. I preached and exhorted from Acts xi. 19-23, and afterwards we examined about a dozen applicants. Three were from Pok-lo, and the rest from Chuk-un. All possessed considerable knowledge, and could repeat the Commandments. There were two lads who were there contrary to the wishes of their friends, but they declared that they must obey God rather than man. One little fellow, only nine years old, was presented by his brother, and repeated accurately and distinctly nearly the whole of our Christian primer. Great pains must have been taken with him by his instructor; and this was one of the best proofs of the genuineness of the whole movement.

COCHIN CHINA.

The news from Saigon is by no means favourable. The French appear to make no progress in colonising the country, nor in subsidising its rulers. The mortality of the force is excessive, and unless some terms be come to soon, further augmentations of troops will be required.

THE PHILIPPINES.

MANILA.

A notification has just been issued by the acting Spanish Consul here, to the effect "that all foreign vessels leaving this port for Manila, Sual, Yloilo, and Zambuanga, as being the only ports opened to foreigh trade in the Philipine islands, without due documentation from the Spanish Consul at this place, such vessels will unavoidably incur a very heavy fine at their arrival at any of the above-named ports, besides other responsibilities to which these might be liable."

SIAM.

BANKOK.

The *Lavinia* and *Hannah Salkeld* are loading for Europe. Sugar is in moderate supply. Sapanwood, plentiful. Pepper, rates advanced to 11 taels. Hides, scarce. Hemp, supply small.

BORNEO.

H.M.'s steamer *Charybdis*, the Hon. Captain Vreane, returned to Singapore on the 15th June from Muka. Mr. St. John, the British Consul-General to Brune, proceeded up the river accompanied by the armed boats of the *Charybdis*, and delivered to the Chiefs of the place, Pangerans, Diepa, and Wahar, the Sultan's firman ordering them to thrown down their defences, and receive Sir James Brooke as his representative. Mr. St. John was received with great respect, and implicit obedience to the behests of the Sultan was promised. The forts are said not to be so strong as was supposed, and the feeling amongst the chiefs, as well as people, was in favour of submission. It was thought that Sheriff Massahore would give himself up if he received a promise that his life would be spared.

JAVA.

The news received by this mail is to the 14th of June. The programme of colonial policy of the new ministry in the Netherlands had caused great disappointment.

The news from the South and East division of Borneo contains nothing of importance. The result of a renewed and energetic attempt to capture Antasarie was still unascertained.

The earthquakes on the west coast of Sumatra still continued, but with less violence than at first. Accounts had been received of the great devastation caused by a sea quake on the island of Simoon on the 9th March, in which 778 persons perished.

Intelligence had been received by telegraph from Djocjocarta, of an attempt to excite a disturbance by a small party of sixty or seventy persons, which was at once repressed. Disaffection to the Netherlands rule appears to have had nothing to do with the affair, which arose entirely out of local events.

There was a great dullness in all mercantile affairs. The firm of Macmillan, Marten, and Co., at Sourabaya, had stopped payment. The debts were estimated at 750,000 guilders, and it was feared that the assets would not nearly reach the half of that amount.

MALACCA STRAITS.

SINGAPORE.

The Chinese pirates are again infesting the Gulf of Siam and China Sea, and during the absence of the *Charybdis* on the coast of Borneo there is no steamer at Singapore capable of pursuing them. It seems a great error to leave Singapore and our trade in those seas unguarded. The Dutch Government acts more vigorously in this matter, and has a number of steamers cruising in different parts of the Archipelago for the suppression of piracy.

On June 10 the Singapore Rifle Volunteers had a match for two prizes; one offered by the Governor and the other by the corps. Mr. Murray, a sub-officer of the corps, was declared victor, having scored nineteen shots, being the highest numbers at the three distances of 100, 150, and 200 yards. The next day the match was resumed, and Mr. Murray again carried off the prize.

Her Majesty's steamer *Chesapeake*, bearing the flag of Rear-Admiral Jones, having left Hong Kong on the 21st May, arrived at Singapore on June, 8 *en route* for England.

The French steam-ship *Soane*, Mons. Callas, arrived on the 7th ult., having left Saigon on the 2nd with 293 passengers, *en route* for Bourbon.

The new steamer *City of Nantes* continues to run between this and Bankok, and is a great convenience to the public. She left on the 11th June for Bankok.

The *Straits Times* in noticing the "transfer question," says:

We cannot suppose that any Government would be so insane as to attempt to impose Customs duties, and if we are to be taxed, the impost will probably come in the shape of an Income-tax,—a method of levying revenue the most obnoxious possible to the native population. It will be argued that we are putting an extreme case, and suggesting improbabilities, if not impossibilities. But let our new rulers at the Colonial-office look to it, that they do not, as in the fable, "destroy the bird to get faster at the eggs,"—and in attempting a self-supporting military post, drive away the traders, and destroy a flourishing and increasing trade.

PENANG.

The following items are from the *Penang Argus*:—

Her Majesty's steamer *Simoom* made her appearance from Madras in our harbour on the 11th June with Brigadier Babbington on board, who arrived and left to hold his new position as Brigadier of the Straits under the usual salute.

At last a native has come forward to "bag" the tiger and the $200. He purposes, we understand, trapping him, and is very confident of success, but (discreetly enough) will not reveal his *modus operandi*.

Another "mad" buffalo made his appearance in our streets It appears that he broke loose somewhere in the direction of the Prangin, where, having slightly gored one man, he came tearing down Beach-street, where he wounded a peon and a convict, the latter, now in hospital, severely hurt. The police, headed by Inspector Magness, who has bitter reminiscences of such adventures, went in pursuit, but the brute ultimately escaped, and is still *non est*.

Births, Marriages, and Deaths.

(Announcements for Subscribers are made free of charge.)

BIRTHS.

BEHRENS.—On the 15th inst., at Oak House, Fallowfield, near Manchester, the wife of Edward Behrens, Esq., of a son.

HANMER.—On the 11th inst., at Cairness, Aberdeenshire, the seat of J. W. Gordon, Esq., the wife of Captain F. H. Hanmer, H.M.'s Bengal Army, of a son.

HICKS.—On the 16th inst., at Shirehampton, Gloucestershire, the wife of Colonel William Charles Hicks, of a daughter.

HOW.—On the 15th inst., at 29, Gloucester-place, Hyde-park, the wife of Thomas How, Esq., of a son.

LITTLE.—On the 19th inst, at Vanbrugh fields, Blackheath, the wife of J. M. Little, Esq., of a son, still-born.

MENDS.—On the 9th inst, at 3, Blomfield-crescent, Westbourne-terrace, Hyde-park, the wife of Captain W. R. Mends, R.N., C.B, of a son.

WITHINGTON.—On the 15th inst., at the Dane John, Canterbury, the wife of Captain Withington, 7th Dragoon Guards, of a son.

MARRIAGES.

BUXEY—BULLARD.—At Shanghai, on the 26th May, by the Rev. John Hobson, Walter Buxey, of Ryde, Isle of Wight, to Jane, second daughter of William Bullard, Ross, King's County, Ireland.

COMPTON—BURRARD.—On the 9th inst., at Lyndhurst, by the Rev. Berdmore Compton, the Rev. John Compton, rector of Minesteed and Lyndhurst, to Laura, third daughter of Vice Admiral Sir Charles Burrard, Bart.

DICKSON—NORTH.—On the 10th inst., at St. George's, Hanover-square, by the Lord Auckland, Bishop of Bath and Wells, Major Dickson, of the 13th Light Dragoons, to Charlotte Maria, widow of Dudley, Lord North.

DOWNES—CHALMERS.—On the 3rd inst, at St. Mary's, Cheltenham, by the Rev. H. Monsarrat, John Downes, Esq., late of Kinlet, Salop, to Caroline Augusta, widow of the late Captain J. H. Chalmers, 4th Rifles, East India Company's Service.

EDWARDS—BALLEY.—On the 4th June, in San Francisco, by the Right Rev. Bishop Kip, Henry Ferne Edwards, of Hong Kong, to Lizzie Teresa Balley, daughter of the late W. G. Balley, Esq., of London.

MAW—BROWN.—On the 18th inst., at Hemingstone Church, Suffolk, by the Rev. R. H. Cobbold, rector of Broseley, and late Archdeacon of Ningpo, George Maw, F.L.S., F.S.A., of Benthall Hall, Broseley, Shropshire, to Frederica Mary, second daughter of the Rev. Thomas Brown, vicar of Hemingstone, Suffolk.

WROTTESLEY—DENISON.—On the 18th inst., at St. Martin's Church, by the Hon. and Rev. Orlando Forester, the Hon. Arthur Wrottesley, eldest son of Lord Wrottesley, to the Hon. Augusta Denison, second daughter of the late, and sister of the present, Lord Londesborough.

DEATHS.

ALEXANDER.—On the 15th inst., at Milton Abbott, Devonshire, in his 91st year, Robert Alexander, Esq., formerly of the Madras Civil Service.

BERRY.—Drowned at Bankok, on the 16th May, — Berry, master of the barque *Celerity*, by falling from a boat into the river.

CARVALHO.—At Macao, on the 8th June, Ricardo H. de Carvalho.

DEWAR.—On the 19th inst., at Middleton Stoney, Oxfordshire, in his brother's house, James William Dewar, Major 97th Regt., second son of the late Sir James Dewar, Chief Justice, Bombay, aged 33.

KIMBALL.—At Bankok, on the 15th May, S. Kimball, late of Shanghai.

OSGOOD.—At sea, Horace, son of Captain Osgood, of the American ship *J. W. White*, aged 19 years.

ROBERTS.—On the 15th inst., at Southampton, Capt. Richard Roberts, of the P. and O. Company's Service, aged 39.

WAN DOOT.—At Telloh, Blangah, on the 18th June, Inche Wan Doot, aged 31, nephew of H. H. the Tomunggong.

YOUNG.—At Hong Kong, on the 5th June, Mrs. J. Young.

COMMERCIAL REPORT.

JAPAN.—KANAGAWA.

IMPORTS.—Transactions in imports have been very limited, the only inquiry being for grey shirtings and camlets, and those in small quantities. Grey shirtings, 7 lbs., per piece $2. 45c. to $2. 50c.; ditto 8 lbs., $2 70c. to $2. 85c.: white shirtings, $2. 40c. to $2. 60c.; white spots, $285 last sale; dyed ditto, $3. 90c. to $4; white brocades, $2. 85c. to $2. 90c.; dyed ditto, $3. 90c. to $4.; chintzes, red, $2. 30c. to $2. 35c.; assorted, $2. 40c. to $2. 60c.; camlets, per piece $21. 50c. to $23; ditto best, $24; velvets, dyed, $5. 50c. to $6.

EXPORTS.—Fish oil, per picul, $4. to $4. 80c.; gall nuts, $6 to $6. 50c.; vegetable wax, $14; bees' wax, $35; mother-o'-pearl shells, $1. to $1. 50c.; iron, $2. 80c. to $3. 20c.; copper bolts, $17. 50c. to $18; copper nails, $18 to $19; copper plates, $17. 50c. to $18; copper wire, $20 to $21; coir, $3. 50c.; cassia, $3 to $5. 80c.; tea, ordinary, $1. 50c. to $4; common to good ditto, $7. 50c. to $10; fair to good ditto, $15 to $21; good to fine ditto. $22 to $27; finest, $30 to $33; tobacco, inferior, $4. 50c.; seaweed, large, $3. 50c.; small, $1. 80c. to $1. 90c.; cut, $2. 50c. to $3; mushrooms, new, $21 to $22; isinglass, $22 to $24; fokling, $1. 50c. to $3. 50c.; sharks' fins, $13; sulphur, $2 to $2. 80c.; saltpetre, $13 to $14; cuttlefish, $8 to $9. Tea: But a very small business in this article has been done during the past month; tea suitable for shipment to England being scarce; settlements are estimated at from 700 to 800 piculs; medium kinds are from $1 to $2 per picul lower, and there is but a small quantity fine leaf on the market for which former rates are asked. Musters of the new crop are arriving and a few piculs of very fine have been settled at $28 per picul. Silk:—The unfavourable accounts from home have to a great extent checked purchases, and dealers being anxious to realise prices continue to decline, from the highest rates a reduction has been established of fully $50 to 55 per picul on the common and inferior grades of $25 to 30 on medium, and $15 to 20 on the fine. Quotations, Ida, No. 1 & 2 none, No. 2 & 3, $460 to $480. Mybask, No. 1 & 2 $490 to $515, No. 2 & 3, $460 to 485, Sodai, No. 1 & 2 none: No. 2 & 3, $380 to 400. Re-reeled, No. 1 & 2 $450 to 500; No. 2 & 3, $310 to 430. The total export of Silk from 1st July, 1860, to 7th April, 1861, as follows:—England, 1,917 bales; Shanghai, 7,584 bales: Hong Kong, 191 bales; total, 9,692 bales.

NAGASAKI.—There is no change of any consequence to notice on our last report. The new season's teas were shortly expected.

TIEN-TSIN.

A fortnight's clearances are thus reported—75,000 pieces grey shirtings, 24,000 pieces white ditto, 10,000 pieces T cloths, 15,000 pieces white spots, 18,000 pieces brocades, 8,000 pieces chintz. Quotations:—Grey shirtings, 5¼ to 7 catty, Tls. 2.3 to 2.5.0. 7¼ catty, Tls. 2.55; sales 30,000 pieces. White shirtings, 56 reed, Tls. 2.20; 64 reed, Tls. 2.4.5.; 70 reed, Tls. 2 6.5., sales 11,000 pieces. Blue shirtings, Tls. 3.6.0; red shirtings, Tls. 3.40, T-cloths 4¼ to 5½ catty, Tls. 1.3.5. to 1.5.0.; sales 8,000 pieces. Spotted Shirtings, White, Tls. 2.40; sales 2,500 pieces. Coloured, Tls. 2.7.0.; sales 1,000 pieces. Chintzes, Tls. 1.4.5.; sales 3,000 pieces. Handkerchiefs, blue and bronze, mace 5 per doz. Brocades, White, Tls. 2.1.5; sales, 3,000 pieces. Coloured, 2.6.5. per piece; sales 3,000 pieces. Damasks, Blue, Tls. 4.4.0.; sales, 100 pieces. Coloured, Tls. 4.2.; dimities, white, 12 yards, Tls. 1.7.0.; sales 127 pieces. Grey sheetings, 40 yards, 11 catty, Tls. 2.9.0.; 12 catty, Tls. 3.2.0. American goods: Drills, 40 yards, Tls. 2.9.0.; sales 3,800 pieces. Jeans, 30 yards, Tls. 2.75; sales 3,000 pieces. Camlets, Dutch, Tls. 24; English, Tls. 16. Lastings, Tls. 11. Spanish stripes, no demand. Long ells, HH Scarlet, Tls. 6.5.0. Assorted, Tls. 6.0.0. Iron, no demand. Lead, Tls. 6.5.0. per picul. Tin, Tls. 26 per picul. Tin plates, Tls. 5.5.0. per box. Window Glass, Tls. 3.3.0. to 4.0.0. per box. Ratans, white, Tls. 5.5.0.; yellow, Tls. 3.5.0; black, Tls. 2.4.0. per box. Sandalwood, Tls. 10 to 13 per picul. Sapanwood, large, Tls. 3.5.0. per picul. Mangrove bark, no demand. Alum, Tls. 1.2.5. per picul. Putchuck, Tls. 10 per picul. Pepper, white, none. Black, Tls. 7 per picul. Sugar, white, Tls. 6; brown, Tls. 2.8. per picul. Sugar candy, Tls. 7 per picul. Rice, Tls. 1.6.0. per picul.

SHANGHAI.—There is considerable demand for manufactured goods for transhipment to the new ports, which tends greatly to relieve this

Digitized by Google

market, although no doubt formerly they were supplied, to a certain extent by the Chinese merchants from Shanghae. Five vessels have left for Tien-t-in, and five for Hankow during the past fornight with full cargoes, whilst to the former port four vessels are now under despatch, and two to the latter. There is not much demand for American goods, and but a few local sales only have been made of the favourite marks of drillings. The clearances of the fortnight, exclusive of the shipment to Hankow and Tien-tsin, are reported as under:—Shirtings, 38,000 pieces grey, and 9,000 pieces white; T cloths, 5,000 pieces; spotted shirtings, 6,000 pieces; American goods, 28.500 pieces drills, 6000 pieces sheetings, and 1,000 jeans, stocks 250,000 pieces drills, 12.500 pieces sheetings, and 8,750 pieces jeans; camlets, 170 pieces; lastings, 40 pieces.

FOO-CHOW-FOO.—The sales of the fortnight are reported as under:—grey shirtings, 8lbs. to 9½lbs., 11,000 pieces, at $2. 20c. to $3; T-cloths 20,000 pieces, 6½lbs to 8 lbs, $1. 80c. to $2; American drills, 1,000 pieces, at $3. 40c.; American sheetings, 1,500 pieces, at $3. 25c. to $3. 50c.

CANTON.—The sales of the fortnight are reported as under:—yarn, 118 bales; shirtings, 2.750 pieces grey and 1,000 pieces white—scarlet long ells, 100 pieces; betel nut, 1 400 piculs; sapanwood, 150 piculs; lead, 100 piculs; quicksilver, 100 flasks; hoop iron, 650 piculs (at $3. 15c. to $3 50c.).

HONG KONG.—Sales of the fortnight: yarn, 600 bales; shirtings, 5.000 pieces grey and 1.000 pieces white; long ells, 500 pieces; black pepper (of which there have been large supplies) 1,000 piculs: besides a large quantity of damaged goods sold at auction. Coals: shipments have been made to Shanghai, yet still $10 for English steam and $6 for Sydney, are the full quotations for cargoes afloat. Shanghai: the demand appears to have improved owing to the impetus given to the navigation by steam on the Yangtsze. The following quotations would warrant the belief that the abundance of coal about Hankow is either a report not demonstrable by facts or otherwise, that the quality must be unsuitable. Engiish steam 13 to 14 taels; Japan, 7 to 8 taels: Sydney, 10 to 11 taels. Flour: although the market has been relieved of large quantities by re-exports, still Gallego and Haxall are dull at $8 to $9. American beef is quoted $6 per barrel wholesale, and pork about $13. The quotations for canvass, rope, &c., show a heavy loss.

CHINA.—EXPORTS.

SHANGHAI.—TEA (BLACK).—There has been very little passing since last report; settlements only reach 1 900 chests, say 1,000 chests Ningchows at 24 to 25 taels, and 200 chests very common Flowery Pekoe at 20 taels. Total settlements to date are now 76.780 chests against 272,950 same time last year. The stocks consist of 2 000 chests Ningchow and 4,000 chests of other kinds of Congou, chiefly common; 400 chests new and 300 chests old Flowery Pekoe. Prices are without alteration, and the small stocks are firmly held for higher prices than are likely to be given at this period of the season. From Hankow musters of new teas have reached here, and are found to be of very good quality. Nothing very reliable is known as to probable opening prices, but it is likely that they will leave a good margin for profit, if common prudence be exercised by buyers there.—In Greens there is little to report; on this market only 600½ chests have been settled, the chief transactions again having taken place at Ningpo. Settlements to date are, China teas, 140,400½ chests; Japan teas, 48,800½ chests against a total last season at same time of 442,116½ chests.

FOO-CHOW-FOO.—New Congous have arrived very freely the last few days, the supplies having already amounted to 35,000 chests; of which 6,500 chests are under contract to foreigners. Supplies come forward daily at the rate of 6,000 to 7,000 chests. The quality of the crop is decidedly an inferior one, the weather during the time of picking having been very unfavourable, and the quantity of first-class tea is very limited. There have been as yet no arrivals of Souchongs or Congous from the Sinchune district. About 100 chests of Flowery Pekoe are to hand, further arrivals being shortly expected. Oolongs are not expected before a week hence, and Scented Teas, now in course of preparation, will be on the market in three or four days. The new Congou Market was opened on 31st May at very irregular prices, ranging from 29 to 30 taels short, for second to first-class quality, to the extent of nearly 10.000 chests, one parcel of 200 chests, very inferior tea, only fetching 19 taels short.

AMOY.—The first of the new season's Orange Pekoes are to hand to the extent of 6,190 ½ chests, but out of these the proportion of really fine tea is very small. For the best $19 to $20 is asked, but the market has not yet been opened. A few musters of Congou have arrived. but these are not of the finest quality. No musters of finer quality Oolongs from the Ning-yong district are to hand. It is reported, however, that the finest will cost $25 to $26 laid down here.

CANTON.—The intelligence regarding the new Congous is very contradictory. That some Oonams and Oopacks may be expected shortly, there is no doubt. Advices overland have been received, stating that the market at Hankow for Oopacks has actually opened by the settlement of 16 chops at 22 to 25 taels short, and as these rates will pay the owners better than sending them to Canton, orders have, it is said, been sent up hurriedly to alter the destination of the teas. The duty and freight on Hankow teas are estimated at 6 taels. It should be observed that the natural difficulties of the transit from the western tea districts, are greatly increased as Canton is approached, on account of narrow passes, rapids, &c., and therefore it is that Hankow possesses the advantage over Canton. The intelligence from Hankow and Foo-chow relative to the new teas having naturally made foreigners less anxious to invest in old, the little business transacted in Congous has been at a reduction of 2 taels. The sales of the fortnight are reported as under:—Congous, 6 chops Oonams and Oopacks at 20½ to 28½ taels; 900 half-chests, Canton packed, at 18 to 19 taels. Scented Teas, 500 boxes Orange Pekoe at 26 to 27 taels, and 1,600 boxes Caper at 25 to 31 taels. Country Greens, 1,400 packages, at 37 to 47 taels for Gunpowder and Imperial, 27 to 42 taels for Young Hyson. 32 to 40 taels for Hyson, and 22 to 28 taels for Hyson Skin. Canton Greens, 3,200 half-chests Young Hyson at 17 to 26 taels, 700 half-chests, 3,500 boxes Gunpowder at 19 to 22 taels, and 300 chests Skin at 16 to 17 taels.

RAW SILK.—Shanghai.—During the fortnight the transactions are estimated at 650 bales, bought at about 5 taels to 10 taels per picul reduction, which will lay down the silk in Europe at a higher cost than last mail, in consequence of the advance in the rate of exchange. One or two hanks of new silk have been shown, but little opinion of the crop can be formed from them. Some boats have lately been robbed of a considerable amount of bullion whilst on their way to the silk country, and it is possible this may somewhat interfere with the early arrival of the new crop and increase the cost by rendering an expensive convoy necessary. Quotations are:—Tsatlees, Nos 1, 2 and 3: none; middling to good No. 4, 365 to 385 taels per picul; No. 5 and common, 320 to 355 taels. Hangchow Tsatlees, Hong: none. Yuenfa and Hainings: 260 to 360 taels. Taysaams, Nos. 1 and 2: none; 2½ to fair 3. 280 to 300 taels; 4 and 5, and common, 235 to 265 taels. Sewhings: 270 to 310 taels. Laeyongs: 240 to 250 taels. Throwns: 310 to 370 taels.

CANTON.—Contracts have been made of the new crop during the fortnight to the extent of 200 piculs for shipment to England. The following are the current quotations: Cumfook, re-reeled $430 to $440 for No. 1; Loonkong, No. 1, $390 to $400; Gowkong $376.

DRUGS AND OTHER EXPORTS.—Cassia Lignea: Settlements are reported at Macao at $15. 50c. to $16, there being a stock on the market of 800 piculs. At Canton the quotation is nominal at $17. 50c., no settlements reported, and little if any stock on hand. Cassia buds: Macao, $33 to $35, none; Canton, $36, none. Cassia oil: Macao. $240, no buyers, stock 60 piculs; Canton, $265, no settlements. Star Aniseed: Macao. $15 to $15. 50c., no settlements reported, stock moderate. Aniseed oil: Macao, sales of 60 piculs reported at $140 to $145, stock heavy; Canton, $160, no settlements. Rhubarb: There is a little of the new crop at Canton. for which exorbitant rates are required. Vermillion: Canton, $37 per box. Galangal is scarce and wanted at $4 to $4. 25c.

MANILA.—Since our last the arrival of the *Nueva Engracia* from Liverpool and *Tiempo* from Singapore with further supplies of goods, dealers having fairly supplied themselves ex *Julio*, *Soberana*, *Jesusa*, *Joaquina*, *Victoria*, and *Pepita*, demand has been languid, and sales during the fortnight have not been heavy. Large sales were made to arrive ex *Nueva Engracia*. Plain cottons have changed hands at former rates. Coloured fabrics are difficult of sale unless at low prices Current Sugar has advanced 25 cents. per picul, but only little has been done. Unclayed kinds have sold at former rates. Current hemp is selling at $3. 62½c. to $3. 68¾c. per picul.

SINGAPORE.—The demand for European manufactures is still without any improvement, and the amount of clearances during the fortnight even smaller than before. The arrivals, however, are small, and as the shipments from Great Britain are on a reduced scale, stocks will gradually work off even at the present low scale of clearances; when, and not till then, some improvement in prices may be looked for. In exports a moderate amount of business has been done, and prices have not, as a rule, undergone any particular change. Tin has continued in fair inquiry for Europe and prices are steady at last mail's rate. Gambier has not been quite so much wanted, and within the last few days has given way slightly in price.

The picul is 133⅓ lbs. weight; the tael at Shanghai is equal to 1 dollar and 40 cents. and is divided into decimal parts of ten.

EXCHANGES ON LONDON.

[For dates, see first page.]

		Bank.	Private.

EXPORTS FROM CHINA

Per Sir R. Abercrombie, from Shanghai, May 26, to London.—Tea, 754,627 lbs.; silk. 674 bales; rhubarb, 150 piculs; wool, 300.

Per Dora, from Shanghai, May 25, to New York.—Tea, 938,624 lbs.; silk. 40 piculs.

Per Emeu, mail steamer, from Hong Kong, May 29, to London.—Silk, 915 bales; to the Continent, 320.

Per Cimber, from Hong Kong, June 4, to San Francisco.—Tea. 282 packages; rice, 2,500 piculs; sugar, 1,900; matting, 420 rolls; opium, 5,000 taels; China goods, 2,090 packages; beef, 140 barrels.

Per Matilda, from Hong Kong, June 6, to Melbourne.—Tea, 50,000 lbs.; sugar, 1,750 piculs; oil, 350; China goods, 16,591 packages; opium, 72,000 taels; tobacco, 200 boxes; preserves, 100 casks.

EXPORTS FROM MANILA.

Per Juverna, to Sydney, May —Sugar, 12,970 piculs.

EXPORTS FROM SINGAPORE.

Per Mayola, to Liverpool, June 18. Gambier, 1,698 piculs; sago flour, 5,095; black pepper, 856; tin, 168; sapanwood, 228; wood oil, 9 casks; japanware, 5 cases; sundries, 8.

Per Granville, to London, June 10.—Gambier, 7,061 piculs; black pepper, 3,330; india-rubber, 539; gutta percha, 92; coffee, 1,560; tin, 214; nutmegs and mace, 19; rattans, 262; cassia buds, 18; gum benjamin, 6 cases; shells, 200 cases and 35 baskets; private effects, 15 packages.

EXPORTS FROM PENANG.

Per Sirocco, for London, June 19.—Tin, 2,079 piculs; sugar, 1,372; black pepper, 1.792; white pepper, 60; cutch, 1,253; tapioca, 1.104; india-rubber, 230; gutta percha, 134; ratans, 82; buffalo hides, 281; cow hides, 10; nutmegs, 143; mace, 28; gum benjamin, 8; fish maws, 3; rum. 3,100 gallons.

Per William and Jane, for London, June 20 —Tin, 745 piculs; sugar, 3,978; black pepper, 1,087; india-rubber, 735; tapioca, 505; ratans, 234; nutmegs, 208; mace, 60; isinglass, 4; tortoise-shells, 3; preserves, 3 cases; rum, 15,365 gallons.

SHIPPING INTELLIGENCE.

ARRIVED.

At SHANGHAI.—From London: May 20, Empress of India; 28, Polinaise. June 5, Ballarat. From Liverpool: May 24, Coromandel; 27, Albion. From Shields: 27, Naval Brigade. From New York: June 1, Union.

At HONG KONG, MACAO, and CANTON.—From London: May 29, Runnymede. June 4, Napoleon III.; 9, Northfleet. From Cardiff: May 29, Manila. June 10. Carlota. From Newport: 2, Huntress, Martaban. From Toulon: May 30, Edouard; 31, Orixa. From Nantes: 30, B. de Sufferin. From New York: June 7, Howqua.

At BATAVIA.—From Liverpool: May 17, Margaretha Johanna; 20, Souverain. June 5, Cadiovus. From Amsterdam: May 17, Koning Willem III. From Rotterdam: 20, Alcor. From New York: June 11, Surprise. From Melbourne: May 15, Therese.

At SINGAPORE.—From Liverpool: June 7, Tigris. From Bordeaux: 9, Reunion. From Glasgow: Prince Charlie.

SAILED.

From SHANGHAI—For London, May 20: Sir R. Abercrombie. For New York; 25 Dora.

From HONG KONG, MACAO, and CANTON.—For London, June 1: Caribbean; May 27; Faders Minde. For Bordeaux: June 10, St Clair. For Sydney and Melbourne: 1, Matilda. For San Francisco: 4, Cunbeo.

From BATAVIA.—For Hamburg: June 2, Princess au Louise. For Holland: May 23, Nyverbeid, Augusta; 24, Lammina Elizabeth; 27, Drie Gebroeders, Vrede; 28, Bilverdyk, Alcyone, Prius Marits; 29, Burg Hoffman; June 5, Doggersbauk; 8, Adriana Petronella; 11, Buitenzorg. Christina Helena, Jan Hendrik. For Channel: 8, Therese.

From SINGAPORE.—For London: June 10, Granville. For Liverpool: 18, Mayola.

From PENANG.—For London: June 19, Sirocco; 20, William and Jane.

LOADING.

At SHANGHAI.—For London: Glenclune, Sharpshooter.

At FOO-CHOW-FOO.—For London: Banian, Beemah, Ellen Roger, Falcon, Fiery Cross, Flying Spur. For Liverpool: Robin Hood, Veronica. For Australia: Commodore.

At HONG KONG, MACAO, AND CANTON.—For London: Geelong, West Australia, Northfleet. For England: C. S. Lemon. For New York: Alexander. For Australia: Leontine. For Sydney: Stately. For San Francisco: Benefactor, Harriet and Jessie, Seaman's Bride, Taffarette.

At BATAVIA.—For Holland: Van Golen, Jacobus Martinus, Wilhelmina Lucia, Koning, Willem III. J. H. Ferdinand, Batavier, Sourabaya, Packet, Karel August: Fernate, Krumpenerwaard, Huydecooper.

At SINGAPORE.—For London: Weymouth. For Liverpool: Canadian, Tigris. For Marseilles: St. Anne. For Falmouth: Lettice Catherine. For Bordeaux: Reunion. For New York: Rocket.

At PENANG.—For London: Norwood.

At MANILA.—For Liverpool: Joaquina Victoria, Julio, Pepita, Soberana. For Havre: Jesusa, Souvenance. For New York: Independence. For Boston: Saracen. For Sydney: Rosette.

FREIGHTS AND CHARTERS.

At SHANGHAI.—To London: Tea, £4; silk, £6 to £6. 10s A moderate amount of business has been done, principally for the northern ports. Newchwang is attracting more attention, two vessels loading for that port at $9 per ton weight, and 50 cents. per picul. To Swatow there is no improvement, and for the other ports there is not much doing. The charters are—for coast and rivers of China, Burgermeister Duckwitz, at $1,500 per month; Wilhelm, $1.200; Cordonan. $1,600; Madras and Albis, $1,500; August and Melne, $1,450—China and Japan, Rosencash, $1,300; Nagasaki and back, Imperial, $7,500; Kanagawa and London, Kent, £2.500 sterling.

At FOO-CHOW-FOO.—To London, £5. 5s., at which rate the Falcon and Fiery Cross will load, with an extra allowance, in the event of arriving first. Other vessels would accept £5.

At AMOY.—Still in good request at profitable rates. The Collingwood has been chartered for six months at $1,520 per month.

At HONG KONG, MACAO, and CANTON. For London, £3; for New York, $10 to $12. The market for the past fortnight has been rather dull, and has been relieved mostly by the requirements of the Manila trade. The tea season for Great Britain is about to commence, and as there is a redundancy of first-class clippers, rates are lower than last season. For New York, business is a little more brisk. Several French ships are loading coolies at Callao. Small handy vessels continue to be wanted for the coast and Japan trades, for which the requirements seem unlimited. The charters reported are—Northfleet to London, terms not fixed Canvass Back to New York at current rates. C. S. Lemon with invalids to Europe, at £17. 10s. per man and £2. 10s. per ton. Canton for five months, at $1,000 per month. Sophie Frederike, for four months, at $750 per month. The Esmeralda sold for $4,400. Tropic, $6,000, and Rolla, $1,750.

At MANILA.—All the seeking ships in port have found employment. The Victor Emanuel and Marchioness of Londonderry load for the continent at £3. 10s. for sugar, and £4 for hemp. Zealandia, for London, at £3 for dry, and £3. 5s for wet sugar, and £4 for hemp. The following have also been chartered at Hong Kong, to load from here. Ethereal, to Europe, terms unknown. Bahia, to Great Britain, at £3. 10s. and 10s. extra for continent. Merrimac, to the United States, at private terms. And Antagonist, to Sydney, on owner's account.

At SINGAPORE.—There is still more enquiry for tonnage, although the demand is not quite so brisk as formerly. Seeking vessels continue scarce, and the only engagements since last mail are the following:—Birman, to load from Bankok for Rio de Janeiro, 500 tons, guaranteed at £5 per ton; Hercules, hence to Amoy, for £1,900 in full; Lettice Catherine, hence to Cowes for orders, to London or Bremen, at £4 per ton for dead weight, and £4. 10s. for light freight; Odin, hence to Shanghai, for $3,000 in full.

CASUALTIES.

Mr. Phelps, chief officer, and Mr. Perry, second officer of the American ship Lexington, which was lost on the 1st August, 1860, when going out through the passage from Strong's Island, arrived here in the Flying Fox. The captain of the Lexington and all of the crew, with the exception of Mr. Phelps, chief officer, and Mr. Perry, second officer, proceeded to Honolulu in the American whale ship Vesper. After remaining a number of months on the island, they built a small schooner, which they named the Flying Fox, the principal part of her being procured from the wreck of the Lexington. When leaving Strong's Island the crew consisted of Mr. Phelps, Mr. Perry, and one Kanaka. During the passsage they stopped at Eloto Island for water, when the Kanaka deserted them. They proceeded on their voyage to this spot, and arrived safe this morning after a passage of thirty-nine days. When off the Bashee Islands, had heavy gales for five days, in which the Flying Fox proved herself to be a noble sea-boat.

The Norma (Brit.) from Newcastle, (N.S.W.), to Hong Kong, is reported as having struck somewhere near Drummond's Island. The captain and part of the crew arrived at Guam in the boats, the remainder staying at the wreck. H.M.S. Pioneer, was hourly expected to be despatched in search of the missing ones.

The American ship, Alfred Hill, from Boston to Hong Kong, was wrecked on the Paracels, on the 23rd May. The crew arrived at Hong Kong, after having been attacked by pirates. The American ship Kensington is reported as having got on shore when dropping down the river, and broke her back. The Runnymede (Brit.), from London to Hong Kong, sprung a leak in the Bay of Biscay, making sixteen inches of water an hour, and had a succession of heavy gales during the passage.

PASSED STRAITS OF SUNDA.

From Japan to London: May 27, Canton. From England and Continent to China: 27, Jacoba, Helena; June 3, Southern Cross, Romeo. From New York: 1, Penguin. From China to London: May 29, Paine. Continental Intelligence.

FRANCE.

The *Bulletin de Paris* explains in the following terms the sudden reappearance of large amounts of silver coin in Paris and other great towns of France:—

"During the monetary crisis which prevailed some three years ago the Bank of France purchased all the silver it could obtain, both in France and abroad. It was, indeed, at one moment so overstocked with silver as to have reason to fear the necessity of touching its reserve. It then made an arrangement with the Bank of England to deposit with it £50,000,000 of silver, to receive in return a similar sum in gold. That contract was scarcely concluded when the news arrived that the war with China was ended, and the crisis in the United States took place. Gold was wanted for America and also for Italy, and the Bank employed that which it had procured. Meanwhile, China, instead of drawing silver from Europe as previously, sent us considerable quantities in payment of the war indemnity. On the other hand, the expedition to Syria was drawing to a close, so that at the same time the demand for silver ceased and the demand for gold became more active; and this occurred at the very moment when the Bank of France was taking back the silver it had deposited with the Bank of England. Thus the metallic crisis caused by the scarcity of silver money now threatens to recur through the scarcity of gold coin."

The *Pays* announces that General Montaubau has arrived in Paris from China.

RUSSIA.

(FROM OUR OWN CORRESPONDENT.)

ST. PETERSBURG, July 20.

Accounts have been received here from Irkutzk to the 12th of June, stating that active measures are being taken to organise a commercial club and establish an exchange in that city, the want of which was becoming deeply felt from the daily increasing traffic with China, and the necessity for which will become still more obvious when the frontier Custom-house is removed from Kiachta to Irkutzk as contemplated.- A-Mr. Yourganoff, a merchant of Kiachta, who lately went to Ourga with an assortment of goods for sale to the Chinese, had returned and expressed himself perfectly satisfied with the result of his expedition, no impediments having been thrown in his way. On the contrary, he states that on his arrival at Ourga, the authorities sent a deputation to welcome him, had the best apartments in the hotel prepared for his reception, and treated him with the utmost consideration and politeness. The Mongolians at first exhibited much apathy in their purchases, though many of them had come on purpose from great distances, some as much as 500 wersts, but they afterwards made up for it to such a degree that there was but a poor assortment left for the Chinese to select from, and he has received some large orders for future delivery. Before his departure Mr. Yourganoff was asked by the authorities whether there were any sums still due to him on accounts not yet settled, inquiring also with evident interest whether other merchants would soon visit them? At his departure Mr. Yourganoff bought some horses without difficulty, and hired a string of camels, spontaneously offered him by the Mongolians, to carry the brick tea and other commodities he had purchased as returns, and which he took with him from Ourga to Kiachta.

A fourth caravan, belonging to the house of Paramanoff, started from Kiachta on the 6th of June for Ourga, the beasts of burthen having been hired of Mongolians at the very moderate rate of 35½ copecks per pood of 40 lbs. for the whole distance.

A letter of the 21st of May, from Selenghisk, mentions as a fresh instance of the advantages arising out of the Treaty between Russia and China, the arrival in that town of Hasanday, the head partner and manager of the great Peking firm of Kynhe-Sine-Ty, who came from the Chinese capital to pay a visit to his old friend Startzoff, and concert measures with him for realising his most ardent wish of proceeding in person to Russia, to acquaint himself practically with the way in which business is conducted in this country with a view of introducing it into China. He stated that several other merchants of Peking entertain similar views, and that their arrival may shortly be expected.

HOLLAND.

(FROM OUR OWN CORRESPONDENT.)

AMSTERDAM, July 23.

The flourishing state of the finances of this country has again permitted the Government to bring in a Bill to the Second Chamber for authorisation to purchase Dutch funds at the market price, to the amount of three millions of florins, to be cancelled and go towards the gradual extinction of the national debt. In the explanations accompanying the proposal, the Minister of Finances dwelt with great satisfaction on the general position and prospects of the country. Within the next eight years the emancipation of the slaves in the colonies would be completed, the river communication with the sea improved, the railroads constructed, and the navigable ship canal to the North Sea be dug, and notwithstanding the enormous expense of these national undertakings, there would still remain in the Treasury a surplus of eight millions of florins. Government also brought in another Bill to enable them to apply twenty millions of florins from the surplus of this year's revenue (ten millions this year and as much in the next) towards the completion of the network of railroads. The lines to be commenced immediately are those between Arnheim and Zutphen, Breda and Tilburg, Harlingen and Leeuwarden, Rosendaal and Bergen-op-Zoon, and Alkmaar and Nieuwe Deep.

In reply to a question with reference to the position to be assumed by Holland in the complications in North America, put by a member of the Second Chamber, the Minister for Foreign Affairs stated that the Government would strictly follow the same course of neutrality as that adopted during the Crimean war; that they adhere to the principles laid down by the Congress of Paris in 1856; that the prohibition of privateers with and without prizes from entering Dutch ports would be extended to the colonies; and that the right of search was excluded, though only applicable to vessels not sailing under convoy.

In my last I informed you of the notice given in the Second Chamber by Mr. Van Bosse to ask the Colonial Minister if the figures and documents published by Mr. Money, in his late work on Java, are to be considered as official. The interpellation was made on the 13th inst., when the Minister in reply stated there was every reason to believe them to be substantially correct, and derived from communications made by the Governor-General, that he was perfectly ready to produce the documents in question, and that he had already for that purpose written out by the last mail to India as the quickest way of obtaining them, for as they go back as far as the year 1817 it would take too much time to extract them from the books in the Record-office in this country.

His Excellency Baron Stoet van de Beele, the newly-appointed Governor-general of Netherlands India, has postponed his departure for his seat of government, and it is now understood he will go out by the overland route in the month of September next.

It is stated on good authority that Mr. Goudswaard, managing director of the Netherlands Trading Company, has tendered his resignation to the King.

The following gentlemen connected with India have been nominated Knights of the Royal Order of the Netherlands Lion:—Mr. S. van Deventer, jun., Resident of Banjoemaas; Mr. A. W. Kinder de Camarecq, Resident of Bagalen; Mr. H. M. Andrée-Wiltens, Resident of Padang; and Mr. H. W. du Cloux, Director of Finances and Domains in Netherlands India.

Captain F. G. Steck, of the East India army, now on leave of absence to this country, has received the Royal license and permission to accept and wear the insignia of a Knight of the First Class of the Order of Philip the Magnanimous, conferred on him by H.R.H. the Grand Duke of Hesse-Darmstadt.

Mr. A Prins, Vice-President of the Supreme Court of Netherlands India, and Mr. H. C. van der Wyk, member of the same court, have been gazetted as Knights Grand Commander of the Crown of Oak; and Captain H. F. Versteg, of the E.I. Engineers, and Radhen Adhipatti Tjokro Negoro, Regent of Banjoemaas, to be Knights of the same Order.

Dr. N. J. Hoorweg, of the University of Leyden, has been appointed by the King, on the recommendation of the Colonial Minister, to the important and influential post of Chief Professor of the Faculty of Philosophy in the High School called the Gymnasium of Willem III., at Batavia.

On the arrival of the alarming intelligence of the late ineffectual attempt to assassinate the King of Prussia at Baden-Baden, the King of the Netherlands immediately despatched his principal aide-de-camp, Major-General Count van Lynden, to congratulate his Prussian Majesty on his miraculous escape.

A writer in the *New Rotterdam Courant* complains of the arbitrary conduct pursued by the Netherlands Trading Company. According to the 89th Paragraph of their Charter, the Directors are bound to give notice of their intention to charter vessels for the shipment of produce, as well as for the purchase

Digitized by Google

of all goods and stores they require, and to advertise for competitive tenders or inscription, or any other mode usually resorted to amongst merchants, as may be considered most advantageous for the interests of the Company. But in spite of this regulation the Company lately bought a parcel of oats for shipment to Australia, and gave the order privately to a corn merchant at Groningen in the way of decided favoritism. In the same way the President of the Factory at Java lately chartered, without advertising for tenders, the Dutch ship *Jacob Roggeveen*, belonging to the eminent firm of Messrs. Trakranen and Co., of Amsterdam, at 100 florins for coffee from Menado to Holland, whilst other vessels were seeking freights at 65 florins.

On the 11th inst. the works for the new naval dock at Willemsoord were commenced, the first stone being laid by Vice-Admiral D. Byl de Vroe with masonic ceremonies, in the presence of a large concourse of naval and civil authorities and an imposing crowd of spectators.

The number of books published in Holland in 1860 was 1,963, being 133 more than in the preceding year.

On the proposal of the Academical Senate of Delft, it has been resolved to celebrate the fourth lustrum of the Royal Academy in that city (in June, 1862) by a costumed procession on the part of the students there. The subject selected for the festive occasion is "an historical romantic *tableau* of India offering Allegiance to the Batavian Republic in the person of Prince Maurice of Nassau." This allegiance was really offered by a special embassy from the Sultan Alciden Riotza Lillo Lahe Felalam, King of Achem (Atsyn) in Sumatra, on the 4th of September, 1602.

From the report of the Netherlands Bible Society for the past year, it appears that the receipts were 77,544 florins, and the expenses 53,171 florins. Mr. Roorda was busily engaged in the laborious work of completing the New Testament in the Javanese language, whilst Mathes and others were employed in the translation of the Macassar Chrestomatie. A new and improved edition of the translation of the Bible in the Malay language is in great state of forwardness.

A letter from Harderwyk states that a detachment of 150 men, supplementary troops, under the command of Captain G. J. Eschauzier, of the East India Infantry, returning to duty from leave of absence to this country, and accompanied by Lieutenants A. Lamot and A. J. Beck, and Quartermaster H. Roby, are under orders to embark at Nieuwe Deep, on the 3rd of August, for Java, on board the *Electra*, Captain H. Wegman, belonging to the eminent house of Messrs. Eeghen and Co., of Amsterdam.

Captain-Lieutenant J. O. H. Arntzenius, R.N., is appointed naval aide-de-camp to H.R.H. Prince Henry, vice Rear-Admiral May, promoted to the chief command of the naval forces in Netherlands India.

H.N.M. first class screw corvette *Djambi* (which lately returned from the East India station), Captain M. J. Jansen, R.N., left Nieuwe Deep on the 17th inst. under steam for Curaçao, after exchanging parting salutes with the guard-ship and batteries at that port.

A vessel lately arrived here from Charleston, S.C. (the *Gauss*, Captain Wieting), has brought over 124 Germans, who have left America for fear of being compelled to take up arms in the war that has unhappily commenced in that country.

At a meeting of the shareholders of the Netherlands Trading Company, held here on the 18th inst., Mr. J. R. Veder was elected as commissarie, in the room of Mr. D. Dunlop, who retires by rotation on the 1st of August, as provided for in the bye-laws of the company.

Great satisfaction was generally expressed on the Exchange in this city, on the arrival of the *London and China Telegraph* of the 17th inst., announcing the continuation of the semi-monthly mail to China, as it is of the utmost importance and convenience for the merchants and shipowners of this country connected with China, Japan, and Netherlands India. Since no official intimation had been given of the intention of discontinuing the second mail, the Post-office here will make no publication of the new arrangement, except with regard to the increased rates of postage, which will be cheerfully paid by the merchants for the great accommodation offered them.

The following ships have been chartered by the Netherlands Trading Company since my last letter:—*Alida*, Captain P. H. Kievit, and *Wilhelmina*, Captain J. F. Ihnen, to sail from Amsterdam; the *Tollens*, Captain B. J. Verhagen, from Rotterdam, and the *Paulina*, Captain B. Post, from Middelburg.

COMMERCIAL.

COFFEE.—East Indian descriptions are much inquired after, but there being very little offered, business done is but trifling, and the market may be called quiet but firm with a tendency to improve.

SUGAR.—The dulness that has prevailed in the raw market since the company's last sale is gradually giving place to a more normal state of things, and a slight advance in Java has taken place. Refined is decidedly better. A sale of 500,000 kilogr. B. and H. crushed No. 1 at 37¼fl., and No. 2 at 36½fl., shows that the market is firm.

RICE.—Calm, and in some descriptions lower. This is especially the case with the cleaner sorts. A small parcel of 654 bags Java paddy changed hands at 6¼fl.

TIN.—The late fall of £4 per ton in the price of Banca tin in the London market has caused a corresponding depreciation in this article here, and though there is no demand purchases might be effected without any difficulty at 69½fl.

In TOBACCO no alteration to report. Several parcels of private trade Java have been dropping in, but are not yet in the market.

INDIGO.—There has been a brisk business done in this article since the departure of the last mail, at previous rates. A sale of 11 chests of Manila, each weighing about 100 kilogr., is announced for the 26th inst. The valuation price runs from 195c. to 235c.

COCHINEAL dull.

At the company's sale on the 16th inst., 185,394 bundles of rattans were all sold (except only two lots) at from 5fl. 50c. to 13fl. 40c.: a parcel of yellow Sandal wood found purchasers at 3½fl., add 592 pieces of Amboyna-root wood fetched from 28¼fl. up to 35fl.

PETITION AGAINST THE CHINESE INDEMNITY.

The following is a copy of a petition against the Chinese indemnity, which was presented to the House of Lords by Earl Grey, on Wednesday, June 19th, and to the House of Commons by Mr. Somerset Beaumont, M.P., on Tuesday, June 18th. The petition was placed in the hands of Earl Grey and Mr. Beaumont by a deputation from the Newcastle Foreign Affairs Association. Earl Grey expressed to the deputation his agreement with everything contained in the petition:—

To the Honourable the Commons of the United Kingdom of Great Britain and Ireland, in Parliament assembled.

The Petition of the Newcastle Foreign Affairs Association, SHOWETH—

(1) That a treaty and a convention have been recently concluded between Her Majesty the Queen and His Majesty the Emperor of China.

(2) That the consent of His Majesty the Emperor of China to the said treaty and convention has been obtained by means of hostile operations, directed by Her Majesty's Ambassadors to the Court of Peking.

(3) That these hostile operations have been undertaken and carried on without the observance of those legal and constitutional forms, without the observance of which all acts of war are piracy and murder.

(4) That it has been untruly alleged, as a pretext for the unlawful employment of force against the Empire of China, that His Majesty the Emperor had committed acts in violation of the law of nations, and of his treaty engagements with Her Majesty the Queen.

(5) That, on the contrary, the hostilities which resulted in the said treaty and convention were commenced at Canton, in the year 1856, and were resumed at Taku, in the year 1859, by the naval and military forces of Her Majesty the Queen, as much without just cause as without those legal forms without which even just wars are unlawful.

(6) That up to the year 1834 the trade with China was conducted by the East India Company.

(7) That subsequently to that period the superintendence of trade with China has been a function of the Foreign Office.

(8) That, under the pretext of superintending the trade with China, the Foreign Office has been engaged since the year 1834 in carrying out, by such unlawful means as aforesaid, a scheme of aggression against the Empire of China, and has used for this purpose the superintendents of trade in China.

(9) That, after a long interval of peace, the recommencement of hostilities with China in the year 1856 has been characterised by a new and alarming feature, the French, American, and Russian Governments having been invited to combine in extorting concessions from the Government of China.

(10) That if this country had had any just cause of complaint against the Emperor of China, it was competent to Her Majesty's servants to have obtained redress by lawful means.

(11) That the course actually pursued, and which has resulted in the conclusion of the aforesaid treaty and convention, has also resulted in the French occupation of China, and in the attainment by Russia of territorial and other advantages in China, as the price of the good offices of her agents in acting as mediators between the Chinese Government and the English and French Ambassadors; so that the interests no less than the honour of England have been thereby sacrificed.

(12) That under these circumstances no part of the aforesaid treaty and convention between Her Majesty the Queen and His Majesty the Emperor of China can be held otherwise than as null and void.

(13) That the main provision of the said treaty, to the effect that an Ambassador from Her Majesty the Queen shall reside at the Court of Peking, is in itself contrary to the law of nations, no less than repugnant to the natural sense of mankind.

(14) That it is provided by the aforesaid convention, that the sum of 8,000,000 taels (£2,666,666) shall be paid to her Majesty as an indemnity for the expense incurred by the aforesaid hostilities against China.

(15) That on a recent occasion of war carried out against a power which menaces all Europe, by Her Majesty's army and navy, and at a heavy expenditure of treasure, no indemnity was, at the conclusion of the peace, so much as asked by Her Majesty's servants.

(16) That it is further provided by the same convention, that this sum (2,666,666) shall be collected quarterly out of the gross revenues of the Chinese customs.

(17) That it is further provided by the same convention that until the aforesaid sum of £2,666,666 shall in such manner have been collected, Her Majesty's forces shall continue to occupy the territory of China at four points, viz., Taku, Tien-tsin, the coast of Shan-tung, and Canton.

Digitized by Google

(18) That the Earl of Elgin, in a despatch to Her Majesty's Minister of State for Foreign Affairs, dated Peking, October 25, 1860, has stated that the collection of the aforesaid sum will occupy four years.

(19) Your Petitioners, therefore, pray your Honourable House to take such measures as to your wisdom may seem fit, to save this country from the further shame and dishonour of receiving this money into the Treasury.

And your Petitioners will ever pray.

Signed on behalf of the Newcastle Foreign Affairs Association,

GEORGE CRAWSHAY, Chairman.
THOMAS NEWTON, Secretary.

June 11, 1861.

Naval and Military.

The Lords of the Admiralty have decided to accept the tender of Messrs. Laird, of Birkenhead, to build an iron screw steam-transport at the rate of £26 per ton, and that of Messrs. Samuda Brothers, of Millwall, to construct a sister ship at £24. 5s. per ton. Here we have a difference of £1. 15s. per ton, or a gross sum on the tonnage of £4,900, or, in round numbers, £5,000.

Orders have been received at Portsmouth for the examination and preparation for immediate service, whenever required, of 30 gunboats, as a portion of the first-class steam reserve. They are to have their 68 and 32-pounders taken out; to be replaced by 100-and-40-pounder Armstrong guns. These pieces will remain in charge of the naval storekeeper at the gun wharf until the boats are brought forward for the pendant.

The following letter has appeared in the *Army and Navy Gazette*:—

"Sir,—A rumour prevails at the clubs that only those troops present at the peaceable occupation of the Anting Gate of the city, are to receive the clasp for Peking. Now, as the two battles of the 18th and 21st of September deprived the enemy of the whole of his guns, broke up his magazines and camps, and dispersed the whole of his army to the winds, it is only common justice to give the Peking clasp to the troops that were there engaged, for these actions took place respectively within 16 and 10 miles of the capital, and there was no fighting afterwards.—I am, &c., PEIHO."

The *Roebuck*, 6, screw despatch vessel, Capt. Frances Marten, arrived at Spithead on the 9th from China and Japan, and steamed into Portsmouth harbour to dismantle and pay off. Her dates of sailing are—Japan, March 4; Hong Kong, March 21; Singapore, April 6; Cape of Good Hope, May 22; and St. Helena, June 5.

Captain Vine Hall, brother of Captain Hall of Hong Kong, late commander of the *Great Eastern*, has been appointed foreign manager to the Intercolonial Steam Packet Company, at a salary of £1,000 a-year. He will shortly sail to New Zealand, where he is to be stationed.

The *Iris*, 20, sailing frigate, Commodore W. Loring, C.B., arrived at Spithead on the 24th, from Australia and New Zealand, having sailed from Auckland on the 6th of April. She touched at St. Helena on the 7th of June. She left that island next day, as did also Her Majesty's steamer *Assaye*, coming to England under canvas, with a portion of the Enniskillen dragoons on board; the *Sirocco*, hired troopship, with part of the 24th Regiment on board, bound to Spithead; and the ship *George Kendall*, also homeward bound.

At the trial trip made by the *Black Prince* on the Clyde on the 24th, the speed realised was nearly fifteen knots.

The demolition of the Halfmoon and Cavalier batteries, at the entrance to the river Medway, which originally mounted, conjointly, 28 8-inch guns, each of 65 cwt., was commenced yesterday, in order that preparations may be made for the erection of the new line of fortifications which are to be placed on that part of the coast. The powerful casemated battery ordered to be constructed at Garrison point, for the security of the important naval establishments and arsenals at Chatham and Sheerness, will be erected on the site of the old works now being demolished, and will mount, when completed, the heaviest armament carried by any similar line of fortifications in the United Kingdom, consisting of the 100-pounder Armstrong guns, 10-inch, and 68 pounders on the basement tier; with 8 inch and 32-pounders, each of 56 cwt., mounted *en barbette*. By the terms of the contract the whole of the concrete foundations for these colossal forts are to be completed by January next. The indented lines which form a continuation of the defences to the east of the Medway, and which are connected by a loop-holed musketry wall with the centre and No. 1 bastions, mounting 68-pounders and 10 inch guns, are not to be interfered with at present, or until considerable progress has been made in the erection of the new casemated fort at Garrison-point. The foundations for the line of casemated batteries to be erected on the north side of the entrance of the Medway, abutting on the Isle of Grain, are being forwarded with all dispatch under the superintendence of Lieutenant F. G Oldham from the office of the commanding Royal Engineer, who has taken up his temporary residence on the island while the works are in progress.

The *Warrior*, 36, screw, iron-plated ship, fitting in the Victoria Docks, will have her pendant of commission hoisted on the 1st proximo, by Captain the Hon. Arthur A. L. P. Cochrane, C.B., an officer who has served with much distinction in all the naval operations in which this country has been engaged since 1840.

The *Defence*, 22, screw, iron-plated ship, completing at Jarrow, by Messrs Palmer Brothers, will leave that port for Chatham or Portsmouth on the 9th proximo. She is expected to proceed direct to the latter port, and on her arrival will be immediately commissioned by Captain Richard Ashmore Powell, C.B. Captain Powell bears the character in naval circles of being a most energetic and pushing officer.

Rear-Admiral Sir Alexander Milne, the Commander-in Chief on the North America and West Indies station, has a very powerful squadron under his command at present, with the probability of its being shortly increased by several vessels now fitting at the different home ports. The ships at his disposal, according to the official list published on the 1st inst., were 29 in number. They mounted 434 guns, and were manned by nearly 6 000 seamen and marines. They included two line-of-battle ships, each mounting 90 guns, propelled by a steam-power of 500 horses, manned respectively by 880 and 850 seamen and marines. One frigate of 40 guns and of 1,000 horse power, one of 26 guns and 800 horse power, one corvette of 22 guns and 400 horse-power, two corvettes of 21 guns and 400 horse-power, one paddlewheel sloop of 6 guns and 400 horse-power, one paddlewheel sloop of 6 guns and 410 horse-power, one screw steam-sloop of 8 guns and 400 horse-power, one screw steam-sloop of 17 guns and 200 horse-power, one paddlewheel sloop of 6 guns and 300 horse-power, two paddlewheel sloops of 6 guns and 280 horse-power, one paddlewheel sloop of 6 guns and 220 horse-power, one screw steam-sloop of 17 guns and 150 horse-power, four screw steam-gunvessels of 5 guns and 80 horse-power, one screw steam-gunboat of 2 guns and 60 horse-power, two screw steam-gunboats of 2 guns and 20 horse-power; one floating iron screw steam-battery of 16 guns and 200 horse-power, and one paddlewheel steam tug of 170 horse-power.

THE *Assaye*, paddle frigate, Commander G. N. Adams (Her Majesty's Indian Navy), arrived at Spithead yesterday from India with troops, time-expired men, and invalids. The *Assaye's* wheel floats were taken off in India, and the passage home has been made under canvass. It is expected that she will proceed to the Thames and undergo repairs and alterations similar to those made on the *Punjab*.

THE *Nimrod*, Commander Arthur, arrived at Spithead yesterday morning from China. The *Nimrod* has brought home a few supernumeraries from the station and the Cape

GENERAL Ignatieff, late Russian Envoy to China, has proceeded to Turkey, to congratulate the Sultan on his accession to the throne.

CHANGES AND PROMOTIONS IN HER MAJESTY'S ARMY AND NAVY.

WAR-OFFICE, JULY 16.

1st Regiment of Dragoons – Capt. Richard Molesworth, from the 19th Foot, to be capt., vice Walter Balfe, who exchanges, receiving the former difference between a lieutenancy of cavalry and infantry.

4th Light Dragoons—Cornet John Lawrence, from the 7th Light Dragoons, to be cornet, vice Henry Benjamin Pedder, who exchanges.

6th Dragoons—Major and Brevet Lieut.-Col. John De Montmorency Murray Prior, from the 12th Light Dragoons, to be major, vice William Sawrey Rawlinson, who exchanges; Maitland Rossiter Coleman, gent., to be cornet, by purchase, vice Wallace, promoted.

7th Light Dragoons—Cornet Henry Benjamin Pedder, from the 4th Light Dragoons, to be cornet, vice John Lawrence, who exchanges.

12th Light Dragoons—Major William Sawrey Rawlinson, from the 6th Dragoons, to be major, vice Brevet Lieut.-Col. John De Montmorency Murray Prior, who exchanges; John Hervey Browne, gent., to be cornet, by purchase, vice Chichester, promoted.

13th Light Dragoons—George John Woods, gent., to be cornet, by purchase, vice Saunders, promoted.

1st Regiment of Foot – Gent.-Cadet Robert Charles Dudgeon, from the Royal Military College, to be ensign, without purchase, vice John Hammond, appointed to the 66th Foot.

4th Foot The surname of the ensign appointed in the *Gazette* of the 18th of June, 1861, is "Laurence," and not "Lawrence," as then stated.

8th Foot – Lieut. Alfred Downie Corfield to be capt., without purchase, vice Brevet-Major Lewis John Fillis Jones, appointed adjutant of a depot battalion; Ensign Thomas Palmer Senior to be lieut., without purchase, vice Corfield; Gent.-Cadet Matthew Liddon, from the Royal Military College, to be ensign, without purchase, vice Arundel Hill Cotter, who retires; Lieut. Richard Reynell Aylmer, from North Cork Rifles Militia, to be ensign, by purchase, vice Bridge, promoted.

10th Foot Gent.-Cadet Gerard Paul Townshend, from the Royal Military College, to be ensign, without purchase, vice Alfred Seymour, appointed to the 16th Foot.

15th Foot—Robert Hill Wyllie, gent., to be ensign, by purchase, vice Hodge, promoted; Henry John Lancaster, gent., to be ensign, by purchase, vice Tabor, promoted.

16th Foot Ensign Alfred Seymour, from the 10th Foot, to be ensign, vice Davies, promoted.

19th Foot—Captain Walter Balfe, from the 1st Dragoons, to be capt., vice Richard Molesworth, who exchanges.

23rd Foot – Assist.-Surg. Florence Theobuld M'Carthy, from the 90th Foot, to be assist.-surg., vice Richard Westrop, Saunders, M.D., appointed to the Staff.

41st Foot – William Robertson Shand, gent., to be ensign, by purchase, vice Henry Ernest Glanville Crean Lynch, who retires.

42nd Foot—The surname of the gentleman appointed to an ensigncy, by purchase, in the *Gazette* of the 18th June, 1861, is "Crosse," and not "Cross," as then stated.

50th Foot—Gent.-Cadet John Edward Crossman Doveton, from the Royal Military College, to be ensign, without purchase, in succession to Lieut. Clarke, promoted.

56th Foot—Gent.-Cadet Hamilton Hamilton Johnston, from the Royal Military College, to be ensign, without purchase vice Heyland, promoted.

66th Foot—Ensign and Adjt. John Mahony to have the rank of lieut.; Ensign Walter Cecil Strickland to be lieut., without purchase, vice Richard Thomas Hughes, deceased; Ensign John Hammond, from the 1st Foot, to be ensign, vice Strickland; Gent.-Cadet Harry Alworth Fellowes Merrewether, from the Royal Military College, to be ensign, without purchase, vice William Bridgman, whose appointment, as stated in the *Gazette* of the 4th of June, 1861, has been cancelled.

69th Foot—Lieut. Henry Scott Turner to be capt., by purchase, vice Henry Beauchamp Brady, who retires; Lieut. Henry Albert Platt, from the 2nd West India Regiment, to be lieut., vice Charles Richard Williams, who exchanges; Ensign Edward Williams to be lieut., by purchase, vice Turner; Horace Augustus Thewles, gent., to be ensign, by purchase, vice Williams.

75th Foot—Gent.-Cadet William Clode Braddon, from the Royal Military College, to be ensign, without purchase, vice Oliver Ormerod, deceased.

Digitized by Google

82nd Foot—Stephen Pitt, gent., to be ensign, by purchase, vice Charles Paget Miller, who retires.

85th Foot—Gent.-Cadet Frederick Chaloner, Lewin, from the Royal Military College, to be ensign, without purchase, vice Stace, promoted.

90th Foot—Assist.-Surg. Thomas Turnville Gardner, from the 1st Foot, to be assist.-surg., vice Florence Theobald M'Carthy, appointed to the 23rd Foot.

96th Foot—Gent.-Cadet Talbot Henry King, from the Royal Military College, to be ensign, without purchase, vice James King, appointed to the 89th Foot.

97th Foot—Ensign Peter Lawless to be lieut., by purchase, vice Henry Champante Crespin, who retires; Frederick Henry Vigne, gent., to be ensign, by purchase, vice Lawless.

99th Foot—Lieut. Edward Beevor Batcheler to be capt., by purchase, vice William Speke Dickinson, who retires; Ensign Joseph Ward to be lieut., by purchase, vice Batcheler; Ensign Kearns Deane Tanner to be lieut., by purchase, vice Martin Joseph Browne, who retires; Edward Shilson, gent., to be ensign, by purchase, vice Tanner; Robert George Tosswill, gent., to be ensign, by purchase, vice Ward.

100th Foot—Lieut. James Lamb to be capt., without purchase, vice Richard Charles Price, deceased; Ensign Charles Arkoll Boulton to be lieut., without purchase, vice Lamb.

2nd West India Regiment.—Lieut. Charles Richard Williams, from the 69th Foot, to be lieut, vice Henry Albert Platt, who exchanges.

PURVEYOR'S DEPARTMENT.—To be Principal Purveyors.—Purveyor James M'Innes Green, vice William Macdonnell, deceased; Purveyor Charles John Mimney, vice Matthew Wreford, placed on the retired list. To be Purveyors—Deputy-Purveyor Thomas Matravers, vice Green; Deputy-Purveyor George Hendy Pooley, vice Minney.

BREVET.—The undermentioned officers to have the temporary rank of brigadier-general while in command of a brigade—:Lieut.-Col. and Brevet-Col. George William Key, half-pay, 44th Foot; Lieut.-Col. and Brevet-Col. the Hon Alexander Gordon, C.B., half-pay, unattached; Lieut.-Col. and Brevet.-Col. William Gustavus Brown, 24th Foot; Lieut.-Col. and Brevet-Col. Henry Bates, 98th Foot. The promotions in succession to Major-General George Congreve, C.B., deceased, to bear date the 1st of May, 1861, instead of the 30th of April, 1861, as stated in the *Gazette* of June 18, 1861.

MEMORANDUM.—The undermentioned officer upon half-pay has been permitted to retire from the service by the sale of his commission under the conditions of the Horse Guards Circular Memorandum of the 15th of February, 1861:—Capt. Edward Welch, half-pay, unattached.

THE NAVY.

PROMOTIONS.

CHIEF ENGINEERS.—Jno. Robson, W. T. Fry.

ACTING ASSISTANT-ENGINEERS.—First Class: Alfred Lawton, in the Leopard.

APPOINTMENTS.

CAPTAIN.—T. F. Birch to the Amphion, vice Cochran, invalided.

COMMANDERS.—M. R. Pechell (additional) to the Majestic; G. Durbin (additional) to the Russell; D. Herbert (additional) to the Cornwallis.

LIEUTENANTS.—The Hon. H. Baillie Hamilton William Clark, J. L. F. Paul, H. Berkeley, T. Stackhouse, and B. L. Lefroy (additional), to the Impérieuse for disposal in China; C. F. Walker to the Pembroke for service in the Magnet tender; A. Young and R. Hoops to the Asia; E. Barkley and H. Rogers to the Cumberland; J. C. Snell and C. J. Didham to the Indus; H. J. Martin to the Surprise; A. R. Tinklar to the Excellent. C. F. Walker to the Cornwallis; J. L. F. Paul to the Sanspareil.

MASTER.—Henry B. Akaster to the Sanspareil, Francis Hixon (additional) to the Pelorus.

PAYMASTERS.—John Burke to the Hibernia, Richard Allen to the Melpomene.

ASSISTANT-SURGEONS.—Martin Magill and John Mulvany (acting) to the Impérieuse.

ASSISTANT-PAYMASTER.—Thomas Elliott to the Melpomene.

MASTER'S-ASSISTANT.—E. K. Barnes to the Trident.

CHIEF ENGINEERS.—John Lee to the Indus, for the Leopard; Edwin Pearce to the Racoon, William F. Cap to the Icarus.

ASSISTANT-ENGINEERS.—First-class: William Powell to the Marlborough, W. H. Bambury to the St. Jean d'Acre, W. C. Brewer to the Asia, for the Escort. Second-class: Richard Oliver to the St. Jean d'Acre. Acting: Henry H. Symcock to the Asia, for the Fire Queen; Andrew Stewart to the Asia, for the Wallace; W. R. Abbott to the Asia, for the Traveller; Alexander Beattie and James Stirling to the Himalaya; Herbert W. Hart to the Asia, for the Wallace; James Radford to the Cumberland, for the Widdire; Samuel Lloyd to the Fisgard, as supernumerary.

A SIAMESE PRESENT.—M. Etienne Gallois, assistant librarian of the Senate, who has written a work on the relations of France with the kingdom of Siam, was a few days ago invited by the Abbé de La Renaudie, the missionary interpreter of the Siamese ambassadors, to visit him at his hotel in the Champs Elysées. On arriving there he was as pleased as surprised to have delivered to him an autograph letter, which the principal Siameso Sovereign had written to him. This valuable autograph was accompanied by a beautiful cigar-box in silver, enamelled and gilt, and lined with gold. On the inside was the inscription, "To him who wrote on the history of Siam." The letter is in very good English: the superscription in Siamese, and all in the handwriting of the King. It was folded and enclosed in an envelope of yellow silk, sealed with gold wax with the arms of the Sovereign. The envelope contained a second one, in which was a visiting card, the edges of which were ornamented with silvered filagree work. On one side of the card is the lithographed name of the Sovereign, and on the other the following words written in English:—"Compliments and esteem to M. Etienne Gallois conservator of the library of the Luxembourg, from his worthy friend whose name is annexed."

SIR JOHN and LADY BOWRING arrived at Southampton from Malta in the *Pera* on the 21st inst.

MARINE NOMENCLATURE.

Every ship has a name, and, doubtless, names have been given to ships from very early times, although not many of the older ones have been handed down to us. The most favourite names for ships are those of sweethearts and wives, or of women at least who may be sweethearts and wives. Their number is something prodigious. Look at the varieties under the letter A only. The Amelias are 40 strong, the Alices 69; while the varieties of Ann, Anne, Anna, and Annie rise to the formidable number of 550. The most prodigious name, perhaps, is Mary, with its allied forms Maria, Marian, Marianna, Marianne, Marion, Marie, Marietta; these, with duplicate names beginning with Mary, figure in the Mercantile Navy to the amount of 1,100! The loyalty, too, of the ship-namers is something to admire; besides a goodly list of kings and emperors, princes and princesses, we have 76 Queens and 22 Queen Victorias, besides a sprinkling of Queen Adelaides, Queen Annes, Queen Carolines, and Queen Charlottes. There are other Queens, too, whose regality is of a somewhat different kind—Queen Bee and Queen Mab, Queen Esther and the Queen of Sheba, the Queen of Beauty and the Queen of Trumps, the Queen of Clippers and the Queen of Freedom; as well as Queens of the East, West, North, and South; and Queens of the Sea, the Ocean, the Lakes, the Isles, the Forest, and the Chase. All the jewels, including the Koh-i-noor, have representatives among our trading ships, such as the Diamond, Sapphire, Ruby, and so forth; and all the flowers—such as Daisy, Forget-me-not, Mignonette.

FINANCES OF INDIA.

The finance and revenue accounts of India have been laid before Parliament. It is estimated that the gross income for the year ending the 30th of April, 1861, amounted to £39,509,631. The chief item is that of "land revenue," including tributes and subsidies, £20,656,711, followed by the item of opium revenue, £5,638,699; customs, £3,768,677; salt, £3,391,030; Income-tax, £803,550; trade taxes, £213,980; with the various other sources of revenue. On the other side there is deducted £7,705,431 for charges of collection and allowances payable out of revenue, including charitable grants and cost of salt and opium; £31,905,454 for charges payable in India, including military charges, £15,279,005, and navy, £556,870, civil and political establishments, £3,684,451, judicial and police charges, £1,004,500, interest on debt, £3,168,819; public works, £4,084,001; £5,384,340 charges in England (including £1,395,961 for claims in respect of troops serving in India, and £946,467 for furlough and retired pay to military and marine officers, with £266,761 for transport of troops; interest on home debt, £1,061,234); and, lastly, £1,072,771 for interest on railway capital guaranteed, after deducting net traffic receipts. In the whole the expenditure is £16,067, 996, or £3,558,365 in excess of the year's income.

THE GREAT GLOBE.

The various objects comprising this exhibition in Leicester-square, which has been long deservedly popular, were, with the woodwork and roof of the building itself, sold last week. The attendance was large, considerable excitement being kept up by the nature of the articles disposed of. A collection of 165 life-size figures in Turkish and other Eastern costumes, described as "the Oriental Museum," was sold for £220. The dioramas of the Rhine, Italy, China, and India, brought respectively £55, £55, £150, and £180. The great model of the Earth, 60 feet in diameter and 188 in circumference, was sold for £900. The building, comprising the leaden dome, the iron stairs, and various fittings, exclusive of brickwork, fetched £880.

SIR JAMES C. MELVILL, K.C.B.—We regret to have to announce the death of Sir James C. Melvill, K.C.B., which took place on the 23rd inst. His name has been familiar to all who have been connected with Indian affairs during the last thirty years. He occupied a high and influential position in the home service of the East India Company, shortly before whose political death in 1858 he retired, having served the Company with zeal and ability for half a century. He was the eldest of four sons of Captain Melvill, Governor of Pendennis Castle, in Cornwall. This officer, who was in the Royal army, commenced his career in India, and was among those who were taken prisoners upon the defeat of Colonel Baillie's force in 1780 by Hyder Ali, the grandfather of the present Ghulam Mahomed. Sir James Melvill entered the home service of the East India Company at an early age. He soon displayed those qualities which distinguished his future career, and he rose by rapid steps to the highest permanent position at the East India House, being appointed in 1834, Chief Secretary, which office he held till his retirement in 1858. He was also Government Director of the Indian railway companies. He was at one period, we believe, offered high office under the Crown, but he resisted the invitation, and remained a faithful and zealous servant of the East India Company. He was always regarded as an eminent authority on all questions of Indian policy, and he was among the first whose opinions were taken in any Parliamentary inquiry. In the discharge of his public duties he brought the highest integrity and zeal to bear upon a clear and vigorous intellect. His death will be mourned by a large circle of admirers.

THE SIAMESE AMBASSADORS AT PARIS.—The *Moniteur* gives some particulars respecting the visits of the Siamese Ambassadors to various sights at Paris:—"At the Musée d'Artillerie they examined with the greatest interest the armour and arms used by the old French knights, and the explanations given soon made them understand the different improvements which have taken place. Everything connected with the military art appears to excite the deepest interest on the part of these illustrious foreigners. The extraordinary animation of the public thoroughfares, both as regards carriages and foot passengers, also much surprised them, and they expressed their admiration at the fineness of the horses. When at Versailles, the Ambassadors were present when the great waterworks played, and were much delighted at the effect."

THE Museum of the old India House, in Leadenhall-street, has been removed to Fife House, Whitehall.

LONDON, MONDAY, JULY 29, 1861.

COMMERCIAL CAPABILITIES OF WESTERN CHINA.

A LETTER from Tien-tsin, published in *The Times* of the 19th inst., corroborates the statement we have frequently made that, "intercourse with the Chinese country people has in all cases "proved that they cherish no prejudices against foreigners; "but, on the contrary, are anxious to promote intercourse." The same letter, after dwelling upon the difficulties of commercially reaching the central and western provinces of the Empire from the east, expresses the opinion,—"that if money "is to be spent in opening up China, our best course is to "penetrate to the great central valleys *by the overland route to "the western provinces.*"

We cannot but be gratified to find the opinions we have so often strongly advocated thus supported in the columns of our leading journal. The publication of this letter is the more valuable, inasmuch as it confirms the opinion expressed in a city article of *The Times* so long back as the 9th March, 1860. It also justifies the remarks, made last December in the same journal, with reference to the reply given by the Foreign-office to the memorials of the Yorkshire and Manchester Chambers of Commerce, praying Her Majesty's Ministers to open up commerce with Western China, by the route from Rangoon to Esmok. Our knowledge of the five provinces which comprise Western China is mainly derived from the researches of a few travellers who have boldly penetrated into the country animated by the spirit of adventure, the love of science, or by the laudable desire to open a path for commercial enterprise. Of recent authorities on the subject the Abbé HUC is one of the most notable; but he descended into the fertile plains of China at the north-west of Se-chuen, and did not traverse the vast and wealthy province of Yunnan. Dr. RICHARDSON and Colonel MCLEOD have given, in manuscript, most valuable itineraries of their missions, before we acquired the province of Pegu, to open a line of commerce with China from Moelmyen across the Tanon-Tong-Ghee mountains, which lie between the Tenasserim provinces and the Siamese Shan States of Labong, Lagong and Zimmai. Those missions were despatched for commercial objects by the Government of India after the first Burman war; and though, owing to the length and difficulties of *that* route and the jealousy of the Zimmai chiefs, their main object proved unsuccessful, we are indebted to them for the most valuable accounts we possess of the Shan States of Burmah and Siam, lying between our Pegu territory and China. Of the provinces which may be regarded as forming the Western half of China proper, Yunnan and Se-chuen are the most westerly and by far the largest and most important. And from the manuscript of Captain and Mr. SPRYE, to which we have already confessed our obligation, we shall now describe, as briefly as possible, the products and capabilities of these two Chinese provinces; premising that the provinces adjoining them, viz., Kweichow, Chensi, Kansu, &c., are, in their degree, equally fertile and of equal commercial value.

YUNNAN, they state from DU HALDE, is one of the richest provinces in the empire. It contains twenty-one cities of the first order, and fifty-five of the second and third order. Access to every part of it is afforded by navigable rivers and lakes which create an extraordinary fertility of the soil. Much of the country is mountainous and abounds with mineral wealth; indeed, it is said in this respect to be the richest of all the provinces of China, exporting gold, silver, copper, zinc, various stones, and marbles of great value. The valleys yield indigo, and other dyes, wax, gums, oils, wool, hemp, and textile fibres of the finest description. Yunnan is also celebrated as a tea-growing district, of which the more ordinary sorts are exported to Thibet and Tartary, in cakes; while in a department called Purrh the most precious and highly priced tea is grown of any produced in China. Passing with DU HALDE from city to city of this noble province we find that the capabilities they possess for commerce cannot be surpassed: and we must also remember that the rich products of Yunnan—a few only of which we have enumerated—are all in the hands of a dense trading population, who would be certain to improve every opportunity of selling or exchanging the products of their country; for the Chinaman in Yunnan has the same passion for trade which the Chinaman exhibits in Hong Kong or Shanghai. He proves this by the labour he at present undergoes in carrying his wares to Thibet, to Tartary, to Zimmai, to Moni, and Amarapoora. But the energy thus evinced would be doubly roused by such a prospect of direct and speedy returns as it is in our power to offer him. A province which abounds with tea and silk—not to mention its many other precious objects of merchandise—and which is but a short distance from our Pegu territory, will be equally benefited with ourselves by free commercial intercourse. To this intercourse the prejudices of the Western Mandarins and people oppose no barrier; for, according to RICHARDSON and MCLEOD, they are ready to afford every facility to trade. Neither is it the case, as in Japan, that an influential body in the State is opposed to the influx of foreigners. The real difficulty, if difficulty it can be called, rests with ourselves; and this difficulty is one which proper action on the part of our Government, combined with British energy and capital, will speedily remove. In describing to the Geographical Society the extraordinary fertility of Yunnan, the treasures hidden in its mines, and the general capabilities of this province, and of those adjoining it, Captain and Mr. SPRYE were not satisfied with stating their own impressions, but accumulated an amount of corroborative testimony which cannot but convince the most sceptical.

It is surely then high time that our merchants should be brought into commercial intercourse with the many millions of inhabitants of these, as yet, commercially unknown half of China And if we look at the rivers of Yunnan, spanned, as many of them are known to be, with good bridges, and covered with trading junks, if we observe how the hills are terraced and cultivated to the very summits, and how these people have forced nature to satisfy their wants by making, as LE COMTE says, "artificial plains where she had raised mountains," can we doubt that the energy and industry thus evinced will be equally shown in trading with ourselves, and that in removing the slight obstructions that at present exist, we shall be met half way by the good wishes and cordial co-operation of the Chinese? Passing from Yunnan to Se-chuen, we enter the largest province in China. It measures about 170,000 square miles, of which more than ten millions of acres are under cultivation, and the population fully equals if indeed it does not exceed that of the united kingdoms. This province, as our readers are aware, is watered by the many streams which form the upper Yang-tse river. It is remarkable for the quantity and value of the silk and tea it produces, and is also rich in mines of iron, tin, and lead, in amber, loadstones, and lapis lazuli. The best rhubarb comes from Se-chuen, and here the sugar cane is largely cultivated. Musk deer and horses are plentiful: and the latter are said to be the best in China. Listen to what the Abbé HUC says of this province:—

"Vast plains covered with rich harvests of wheat and other kinds of corn alternate with mountains crowned with forests, magnificently fertile valleys, lakes abounding with fish, and navigable rivers. Such is the fertility of the province, that it is said the produce of a single harvest cannot be consumed in it in ten years. Great numbers of textile and tinctorial plants are cultivated here, among others the herbaceous indigo, which gives a fine blue colour, and a kind of hemp from which extremely fine and delicate fabrics are produced. On the hills are fine plantations of tea, of which the most exquisite kinds are kept for the epicures of the province. It is to Se-chuen that the pharmacists from all the provinces of the empire send their travellers to lay in their stocks of medicinal plants." M. Huc adds, "that the manners of the people are much superior to those of the other provinces, and that they are a fine robust race of men."

Digitized by Google

The few remarks we have made and the extract we have given will at least serve to show that in Western China e elements exist for a magnificent and *wholly new* commerce with this country and with India. Its provinces, as we have shown*, can, if our rulers please, be made accessible from Rangoon in the Bay of Bengal, and trade with them will not diminish but rather encourage commerce with the eastern seaports of China. The products yielded in the West of the Empire are exactly those which we require; and that the people generally are eager for trade has been testified by every traveller who has approached the country. Indeed, upwards of twenty years ago, when McLEOD visited Kiang-Hung, not only did the Chinese traders frequently express the desire to traffic with us, and to have a road opened for that purpose from the Bay of Bengal, but even the Chinese authorities of the West, and the intervening ruling Princes of Kiang-Hung and Kiang-Tung proffered to him for our merchants every encouragement in their power to give, with the assurance that no duties should be imposed. That wish and disposition has been greatly increased by the subsequent turn of events in Eastern China. What, then, remains for us but to open the Western door from which our war successes to the eastward have withdrawn every bolt, and of which we hold the key in our hands? Surely such an opening for their enterprise cannot be undervalued by our merchants of the present day, or be left by them supinely to the proverbial *vis inertiæ* of statesmen and officials, and to years of routine correspondence between London and Calcutta.

OCCUPATION FOR THE TROOPS AT TIEN-TSIN.

OUR troops at Tien-tsin are beginning to feel the dreariness of their position, now that their "occupation's gone," and many have been the complaints and murmurs at the prospect of another winter passed in the Liverpool of China. The truth is, our soldiers would not be worth their salt if they did not love work, and work does not appear to be forthcoming. But why should they not be employed in effecting one of those peaceful victories which it is within our power to gain, and which will give us a higher prestige among the Chinese than any successful fighting could secure.

From Tien-tsin to the capital of the Empire is about thirty miles. It would be quite practicable to lay down a railroad over that distance. There are engineers at Tien-tsin, there are sappers and miners; engines and rails could be procured from Calcutta; and there are ready hands in abundance who would join in the work. We apprehend that there would be little difficulty in gaining the permission of the Government—we are sure that there would be no practical difficulty in the work itself which British energy could not overcome. We throw this out as a suggestion, believing that the work would benefit the health of our soldiers during the coming winter, consolidate our position in the country, and compel the Chinese, in the best possible manner, to do homage to the barbarians.

THE CANTON CLAIMS.

OUR readers will remember that in the month of May last an influential deputation waited on Lord JOHN RUSSELL upon the subject of the Canton claims. It is a curious fact that in the same month the merchants in China whose rightful claims were thus urged upon the attention of the Government drew up themselves a memorial to our Foreign Secretary, representing the extreme hardship of the case, and the injustice of allowing the matter to remain any longer in abeyance. So long back as 1858 the whole question was officially considered by Mr. RUTHERFORD ALCOCK, and as the claims were passed by that gentleman, it was understood that they would be settled without unnecessary delay. This is stated in the letter now addressed to our Foreign Secretary, but we mention it as affording another proof, among many, of the tardiness of official routine, even when the pressing distress of individuals demands prompt and speedy action. This memorial states the case so fully and so clearly, and our own views on the subject have been expressed so recently, that it will be needless for us to introduce the document by any further preface:—

* See *London and China Telegraph*, June 27.

Hong Kong, May 27, 1861.

My Lord,—As the representatives of what are known as the "Canton claims," being the amount of losses sustained through the destruction of the foreign factories at Canton by the Chinese in the latter part of 1856, we venture to bring this long-deferred matter under your lordship's notice, having already exhausted every means of application to the Government authorities in this part of the world. The claims were closely scrutinised by Mr. Rutherford Alcock, the officer deputed by the Queen's special Envoy, Lord Elgin, to examine them in the year 1858, and all that where then passed as being regular it was understood would be liquidated with the least possible delay. Nothing, however, has been done, and to the various applications, both personal and in writing, made by different parties interested, no definite reply has been returned either by Lord Elgin or the resident Minister, Mr. Bruce, which induces us to believe that they were not in a position finally to settle the claims without your lordship's instructions.

We would respectfully bring to your lordship's notice the inconvenience and hardship to private merchants of having withheld from them for a period of upwards of four years sums for which the very considerable amount of two millions of taels, not far short of seven hundred thousand pounds sterling, has been set apart by treaty. It is now seven months since the convention of Peking was signed by which it was stipulated that the indemnity should be paid by regular instalments, and although considerable amounts have already been paid by the Chinese Government in pursuance of such stipulation, not a dollar has been appropriated to liquidating mercantile claims, nor has any intimation whatever been made to the claimants as to when they may expect payment.

Your lordship is doubtless aware, if not from other sources, from the lucid statement given by the late President of the United States in his last Message, that American claimants for the Canton losses of 1856 have already received the greater part of the amounts due to them. They have, moreover, been allowed interest upon their claims at the customary rate in this country of 12 per cent. per annum. French claimants, we believe, have likewise been fully satisfied. We therefore earnestly beg that your lordship will be pleased to give the necessary directions to the officers of Government in China to proceed forthwith to the liquidation of these Canton claims, and to admit 12 per cent. per annum interest, in addition to each claim, so far at all events as the two million taels reserved by treaty will extend. We cannot for a moment doubt that the mercantile claims will be made a first charge upon the moneys now being collected from the Chinese Government, on the double ground that private debts incurred under such circumstances should take precedence of national debts, in consequence of the severe individual distress which their indefinite postponement would occasion, an argument that could in no way apply to the finances of the nation; and, secondly, as a simple act of justice, inasmuch as the claims now pressed on your lordship's favourable notice had their origin months, indeed years, before the Government expenditure, for which an indemnity was granted, had been incurred.

We have the honour to remain,
Your lordship's most obedient servant,
(Signed)
JARDINE, MATHESON, and Co., and others interested.

The Right Hon. Lord John Russell, H.M.'s Sec. for Foreign Affairs, London.

FROM CANTON TO HANKOW IN 1655 AND IN 1861.

THE quaint story designated "The Exact Relation of the Embassy sent by the East India Company of the United Provinces to the Grand Tartar Cham, or Emperor of China," in the year 1655, presents us with a few interesting facts relative to the journey which three Englishmen and one American have been making from Canton to Hankow during the present year. The Dutch East India Company's Ambassadors and these gentlemen took the same route, and the folio which contains the account presents us with curious pictures of the very localities which they both visited. Here we have the narrative of a journey from Canton to Peking made in the reign of the first Emperor of the present Dynasty, Kang-hee, which corresponds in many particulars with the account given of the recent journey in the *China Mail*. Our modern travellers are *en route* for Hankow, and intend to drop down the Yang-tse and to call at Shanghai, we presume, on their voyage home. The Dutchmen and our friends of Hong Kong both enjoyed Imperial authority for making the journey; the former, indeed, had a special permit, the latter, thanks to our late successful diplomacy in China, received their leave to travel in common with all civilised nations who are in the enjoyment of treaty rights. The Dutch Ambassadors hoisted the yellow Imperial flag as their ensign, where the roving Britishers may now in safety float their Union Jack, other explorers, the Tri-colour or the Stars and Stripes. We have often asserted our belief that the old accounts by the Jesuits and the travellers in China of the seventeenth century were worthy of credit, and although perhaps highly coloured, we have always felt that they contained much that was true and genuine. The journey of these enterprising travellers now proves us to be right, by the remarkable coincidence which exists between their account and the story of the Dutch Embassy.

The Ambassadors sailed from Batavia on the 14th of June, 1655, about ten years after the Tartar conquest in China, and in the course of a month they reached the Canton river, and after a good deal of ceremony on the part of the Chinese they

Digitized by Google

arrived at Canton, where they were entertained by the Viceroy senior and the Viceroy junior. After sundry compliments, the native authorities strove to extort a large sum, some hundred thousand taels of silver, but the honest Dutchmen were averse to this, and determined to depart, replying, that "it was not "their design or intention to buy the permission of a free-"trade in China." The Viceroys, however, advised them to await the reply from Peking on the subject, and finally succeeded in "squeezing" the Ambassadors to the amount of 135 taels, with which they were so much pleased that they made an entertainment, and dressing in all their brave attire, did honour to the new comers. After staying six weeks at Canton, they at last obtained a pass to proceed to Peking. They appear to have taken the same route as our modern travellers have done; they mention the rapids of the river, and the tugging of the boat by "track-men," but it is not until they reach *Tsing-yuen*, which they call *Cingyoen*, that we can reconcile the different accounts of the travellers. They came first to a village which they call *Sahu*, pleasantly situated a few miles above Canton, and two days after they reached the city of *Xantsin*. The country was then suffering from the effects of the recent Tartar invasion, which had left some great cities in ruins and made slaves of the whole population. *Tsing-yuen* is said to be eighty-seven miles from Canton, and about ten miles above the place itself is the remarkable pass or gorge through which the river has made its way. The work before us presents a picture of the rugged cliffs and gigantic rocks which skirt the river's course at this place, and along the ridges of its rocky banks runs a pathway for foot-passengers, and for the towing "track-men." The Dutch account calls it *Szng-wanhab*, which accords with the proper orthography *Tsing-yuen-hap*. The picture reminds us of scenes on the upper Rhine, and wants only the fortresses of the middle ages which that river can boast of, to constitute this a rival of the "beautiful Rhine." In due course the Dutchmen reached *Ingtak* (by the moderns spelt *Ying-tuk*), the description of which by the Dutch is worth giving here. We may carry on the illusion and suppose ourselves travelling up the Rhine, with its Lurlei-felsen and many echoing rocks. "The 'echo' in the *Tsing-yuen Pass*," says our Canton friend, "is loud and clear. Even the explosion of "small Chinese crackers equals the report of a musket fire." But to return to the account of *Ying-tuk* by the Dutch. "This small city lies very pleasant upon a corner of the river "on the right side, over against the mountain *Sang-won-hab*; it "is fortified with high walls, and beautified with stately houses, "and magnificent idol temples; surrounded with pleasant hills, "delightful in prospect, the suburbs well and sufficient, which "was formerly very rich and populous, and is provided with a "safe harbour for vessels against the impetuous current of the "river." They say, too, that a pagoda stands at the entrance to the harbour. Near to *Ying-tuk* is the celebrated idol-temple and rock the *Kuan-yin-gan*, where, in the sides of a huge precipice, appears a temple to the Goddess of Mercy. The Dutchmen and our modern travellers alike speak of this place. "It lies on the river side, as you may observe (and they have "given a good sketch of it), in a solitary, wild, and mountainous "country; your first approaches conduct you up with conve-"nient stone steps, after which you make your way through "blind paths and cavernous passes, forced with much art and "industry." The engraving ekes out the scanty description, but we trust that a more lively picture of this interesting and picturesque spot will be shortly forthcoming, for we beg to differ from the writer to the *China Mail*, where he says that "pen and paper are insufficient to report" on some incidents in the trip. Wherever nature and art combine to form a beautiful picture that picture may be depicted, only the colours, like those of an eminent painter of the English School, must be "mixed with brains."

We have every reason to believe that this Dutch account is credit-worthy, and we hope to give a fuller description of it before long. After reaching *Sechu*, which is also called *Xaochen*, and which corresponds to *Shee-ne-chow* of the letter in the *China Mail*, the Dutchmen proceeded amid rapids and strong currents, through a region of mountains picturesque in the extreme. They mention the "*Five Horses Heads*," which is perhaps the same as *Man-tow-shan*, which they mistook for *Ma-tow-shan*, the "Horses Head Mountain." We should think that the camera of some enterprising traveller might be filled with many a pretty photographic gem from these regions, and if elucidated by an "Albert Smith," the story would find attentive listeners here in England.

Parliamentary Intelligence.

HOUSE OF LORDS.

FROM JULY 10TH TO JULY 24TH.

(11th.) The Royal Assent was given to several Bills by commission. The Tramways (Ireland) Act Amendment Bill, on the motion of Lord CLANRICARDE, was read a second time. The Poor Law Assessment (Scotland) Bill, and the Ports and Harbours Bill passed through Committee.—Lord GRANVILLE, in reply to Lord WESTMEATH, stated that it was not the intention of the Government to introduce any measure to control the speed of railway engines.

THE MORRILL TARIFF.

(12th.) Lord CARNARVON asked the Duke of Newcastle whether the Government had received any information that goods sent from this country to Canada *via* Portland, and which were conveyed through Portland by railway in bond were subjected to an examination at the Custom-house at Portland, causing great delay, and, in some cases, great loss, since the Morrill Tariff had come into operation. He also asked whether any representations had been made to the United States Government on the subject.—The Duke of NEWCASTLE said no such information had been received. If such inconveniences existed representations would be made on the subject to the United States Government.

THE STATE OF TURKEY.

(12th.) Lord STRATFORD DE REDCLIFFE, in moving for copies of correspondence between the Foreign Department and Her Majesty's Embassy at Constantinople, on the subject of financial or administrative reform in Turkey, since the late Sultan's Hattihumayoon of the year 1856, observed that it was of the greatest importance to England, in a commercial point of view, that the reforms so often promised should be duly carried out, while politically the preservation of the Turkish Empire, which had been a matter of solicitude for more than two centuries to this country, depended upon a thorough administrative reform. Recent accounts from Turkey justified the idea that the present Sultan, by his acts and proclamations, was fully alive to the importance of economical reform. In order, however, to carry out the reforms which have been promised there must be a steady, friendly, but sufficient pressure upon the Turkish Government. In addition to these reasons for supporting our old policy in Turkey, we were bound by every tie of honour to give her our full and vigorous support in case of need, and to help her to carry out the reforms which she had undertaken.—Lord WODEHOUSE considered it would be better to wait and see whether the Sultan persevered in he course he had commenced, than for the British Government to deprive him of the credit which would be due to him by tendering unseasonable and premature advice. Already important economical changes had been made, and he thought it would be wiser to allow the subjects of the Sultan to understand that the reforms inaugurated were not pressed on him by foreign Powers, but were his own spontaneous acts. He would not object to the motion if modified so as not to include the correspondence with the present Sultan.—Lord HARDWICKE reiterated his opinion that Turkey should be allowed to conduct her affairs without the interference of foreign Powers, and expressed his pleasure at hearing the statement to that effect of Lord Wodehouse.—The motion being modified as suggested, was agreed to.

JUDICIAL ADMINISTRATION (INDIA).

(15th.) Lord ELLENBOROUGH presented a petition from European residents in various parts of India, praying that in all criminal cases Europeans should be tried only by European judges; that they should be tried before a single European judge; that, if they desired it, they should be tried by a jury entirely composed of Europeans; and that the proceedings in such cases should be conducted in the English language. In bringing forward the petition, Lord Ellenborough interspersed these demands with comments as to their expediency.

TREASURE TROVE.

(15th.) Lord TALBOT DE MALAHIDE called the attention of the House to the present state of the law of treasure trove, in hopes of facilitating the preservation of ancient articles of gold and silver as works of art. He concluded by moving for correspondence upon the matter.—The LORD CHANCELLOR said the subject was full of difficulty, owing to the fact that this particular prerogative right of the Crown had been made the subject in former times of a variety of grants. He was not aware that any steps had been taken by the Government in the matter; if anything could be done he would bring it before the Government.—After a few words from the Duke of ARGYLL in reference to Treasure Trove in Scotland, the motion was agreed to.

ADMINISTRATION OF JUSTICE IN IRELAND.

(15th.) Lord CLANRICARDE, on moving that an humble address be presented to Her Majesty to issue a Royal Commission to inquire into the constitution, establishment, practice, procedure and fees of the Superior Courts of Common Law in Ireland, and the differences between the constitution and the forms of practice, procedure and fees of the Courts of Chancery of England and of Ireland, complained that the result of not extending the reform of the practice and procedure of the English Courts to Ireland had led to a great waste of money and time to the suitors in Ireland, and to an extravagant expenditure for the judicial establishment, a position which he proved by quoting a variety of statistics.—Lords WENSLEYDALE, GRANVILLE, and BROUGHAM, all thinking that a clear case had been made out for inquiry, the motion, slightly modified, was agreed to.

EASTERN AFRICAN SLAVE TRADE.

(15th.) Lord STRATHEDEN moved "That, in the opinion of the House, it is desirable without delay to restore the consular authority of Great Britain at Mozambique, in order to assist the Government of Portugal in repressing the Slave Trade on the Eastern Coast of Africa."—Lord WODEHOUSE having stated that this motion last year was carried by surprise, proceeded to state the objections which existed to the address, one of which was that the Houses of Parliament, by forcing the Government to appoint a consul here or there, were usurping the functions of the Executive. The appointment of a consul on the East Coast of Africa would be useless without a large squadron, and would probably lead to much correspondence and useless exasperation between England and Portugal. The Portuguese Government earnestly desired to suppress the

Digitized by Google

West Coast. He hoped the House would leave the matter to the discretion of the Government.—Lord BROUGHAM believed the Portuguese sincere in their desire to suppress the slave trade, but they complained that they had not sufficient authority on the East Coast, and that they were not supported as they expected, by the appointment of a British consul.—The Bishop of OXFORD advised Lord Stratheden not to press his motion. He thought it would be better to leave the Government free to act on what he believed would be their nobler aspirations. He proceeded to show the advantages which would arise from the appointment of a consul, among which the greatest would be the exposure of "deeds of darkness" to public opinion, which would soon render them impossible.—Lord STRATHEDEN said a few words in reply and withdrew his motion.

EAST INDIA COUNCIL, &C., BILL.

(16th.) On the motion for going into Committee on this Bill, Lord CLANRICARDE asked Her Majesty's Government to lay upon the table copies of all reports, minutes, or other recorded opinions of members of the Indian Council, or of committees of that Council, relating to the Bills concerning India now before Parliament, and briefly stated at the same time his reasons for making such a request.—Lord DE GREY and RIPON said that Lord Clanricarde was under some misapprehension as to the functions of the Indian Council and the mode in which business was conducted in the Indian Department, or he would not have preferred a request with which, in the interests of the public service, he must decline to comply.—Lord ELLENBOROUGH regretted that the Indian Council transacted business in such a way as to have no record of its proceedings to produce.—In Committee on Clause 10, Lord GREY moved an amendment to the effect that, in addition to the Governor-General in Council, there shall be appointed also a Council of State to assist in the preparation and consideration of laws and regulations, the members of which Council, to consist of different races and professions, shall be appointed and removable at the will of the Governor-General, but such appointments and removals to be provisional until confirmed by the Secretary of State for India in Council.—The amendment was negatived, and the Bill passed through Committee after a short discussion.—(22nd.) This Bill was read a third time.

MILITARY AND NAVAL SERVICES IN CHINA.

(18th) The LORD CHANCELLOR read to the House communications which had been received from General Michell and Admiral Hope, in acknowledgment of the votes of thanks passed by their lordships to the army and navy for their services during the recent campaign in China.

EAST INDIA HIGH COURTS OF JUDICATURE BILL.

(18th.) Lord DE GREY and RIPON, in moving the second reading of this Bill, explained that the object of the measure was to unite in one the two chief courts of judicature existing in each of the Presidency towns, which, although sitting in different courts, exercised jurisdiction of the same kind. The Bill proposed to abolish the present Supreme Court and Sudder Courts, and to substitute a High Court of Justice, and also contained provisions for the appointment of judges, their qualification, and their salaries.—Lord BROUGHAM objected to the provision that the Indian Council should have power not only to appoint the salaries of judges upon their entrance into office, but from time to time to alter those salaries, as it was obvious for what purposes such a power might be used.—Lord ELLENBOROUGH considered the Bill was well adapted for producing discontent from one end of India to another, for it proposed to appoint English barristers as judges, who would know nothing of the laws, languages, caste, and customs of the country. He then proceeded to call attention to the additional cost, which would be no less than £262,000, if the Bill were passed.—The LORD CHANCELLOR replied to Lord Ellenborough's statements, and said that one object of the Bill was to place Europeans and Natives upon an equal footing.—Lord DE GREY and RIPON also replied to the objections raised against the Bill, which was then read a second time.

EAST INDIA CIVIL SERVICE BILL.

(18th.) Lord DE GREY and RIPON moved the second reading of this Bill, and said that the object was to legalise appointments already made, and to define the powers of the Governor-General in making future appointments either from the covenanted or uncovenanted service.—Lord ELLENBOROUGH did not think the Bill just to the present civil service, interfering as it did with their rights and privileges. Lord LYVEDEN wished the measure had been confined to appointments already made, and objected that uncovenanted servants were not required on appointment to submit to the same examination as the covenanted service, nor was any provision made for the employment of natives. The Duke of ARGYLL and Lord CLANRICARDE supported the Bill, which was then read a second time.

PRINCE CZARTORYSKI.

(19th.) Lord BROUGHAM presented a petition from the inhabitants of Stockport, praying for the publication of correspondence with regard to the partition of Poland, which had passed between England, France, and other countries in 1831, 1832 and subsequent years. It was impossible to utter the name of Poland without reflecting on the irreparable loss which that country had just sustained, or without expressing the sorrow which men of all parties, even of that most adverse to Poland, must feel at the death of that great and good man Prince Czartoryski. Having known him for over half a century, and been intimate with him, he would venture to assert that a man of more pure character or of greater virtue, public and private, never breathed. Born to an immense fortune, he had been content of late years to live on the very moderate income which he accidentally possessed. In early life he occupied the highest place in the Government of Russia, and was a prime favourite at Court, but never for an hour forgot his duty or his affection for his native country. Afterwards he threw himself into the contest which unhappily had no good results for Poland; but he could not help remembering that Mr. Burke pronounced a panegyric on the constitution of Poland which was established after the elective monarchy the worst form of Government in Europe had been put an end to, and declared that it was the best and most workable of the free constitutions which had ever been established in Europe. Prince Czartoryski when he lived in Paris, not alone upheld the spirit of Poland, but was the friend and adviser of all who bore relationship or interest to that country.

POLAND.

(19th.) Lord HARROWBY, on moving that an address be presented to Her Majesty for copies or extracts of all correspondence which passed in the years 1831 and 1832 between the Government of Great Britain and those of Russia and other countries on the subject of Poland, said that recent events in Poland had caused people to ask whether the state of affairs in that country was such as was contemplated by the Powers who signed the Treaty of Vienna, and the publication of the papers might tend to check the tyranny under which the Poles suffered.—Lord WODEHOUSE said he looked upon the recovery of Polish independence as an impossibility, considering the overwhelming forces which could be brought against Poland by three powerful nations. The attitude of the Poles during the late events at Warsaw had shown great moderation, and gave promise of better days. He had no objection to accede to the motion, so far as the correspondence with Russia was concerned.—Lord ELLENBOROUGH passed a high eulogium on the Poles for the patience and dignity with which they had borne their misfortunes at home, and upheld the military reputation of their country abroad, and expressed at the same time his astonishment that Russia should not have done her utmost to conciliate so great and noble a people. It was for the interest of Russia to conciliate the Poles, for as long as they were discontented the action of Russia was paralysed in Central Europe—a circumstance almost as injurious to Europe as to Russia itself.—Lord MALMESBURY concurred with the valuable advice given by Lord Ellenborough. If the Poles contrasted their present position with their position seven or eight years ago, they had every reason to congratulate themselves. He hoped nothing said in this House would encourage the Poles to attempt impossibilities.—After a few remarks from Lord BREADALBANE, Lord STRATFORD DE REDCLIFFE, and Lord TALBOT DE MALAHIDE, the motion, as modified, was agreed to.

DUCHY OF MODENA.

(22nd.) Lord NORMANBY complained of the attacks made by Mr Gladstone on the Duke of Modena, and moved for copies or extracts of any despatches relating to the affairs of the Duchy of Modena from Her Majesty's Minister accredited to the Central Courts of Italy during the years 1855, 1856, 1857, and 1858.—Lord WODEHOUSE justified the charges which Mr. Gladstone had made.—Lord DERBY thought the conduct of Mr. Gladstone as a Minister of the Crown highly improper in bringing charges against the Duke of Modena not justified by the evidence, and which the accused party was precluded from answering. Proof was wanting that the papers on which the charges were founded were genuine, and, even if they were, they were insufficient to establish the charges made by Mr. Gladstone.—Lord BROUGHAM thought Mr. Gladstone had made out his case if the documents were not forgeries.—The motion was agreed to.

REVISION OF THE LITURGY.

(22nd.) Lord EBURY, in presenting a petition in favour of a revision of the Book of Common Prayer, said that next year would be the 200th anniversary of the Act of Uniformity, and he hoped then that the terms of subscription would be modified. He intended next year to propose that the terms of subscription to the Thirty-nine Articles should be relaxed.—The Bishop of LONDON was glad that Lord Ebury had confined himself to the question of relaxing the terms of subscription. With regard to the general revision of the Liturgy, no such revision, in his opinion, ought to take place at the present time. Such changes had been always confined to periods of great revolutions, and if any such changes were now desired, Lord Ebury ought to specify the exact reforms he wished to see introduced. He thought the terms of subscription were not so rigid as generally supposed. If it were desired, the services of the Church might be considerably shortened, but to this course the laity, and not the clergy, were the chief obstacle.

(23rd.) The Voters (Ireland) Bill, the Salmon Fisheries Bill, and, after a long discussion, the Irremoveable Poor Bill, with some others, were read a second time.—The Attorneys' and Solicitors' (Ireland) Bill was read a third time and passed.—The Ecclesiastical Dilapidations Bill was read a first time.

HOUSE OF COMMONS.

FROM JULY 10TH TO JULY 24TH.

(10th.) The subjects brought before the House at the morning's sitting were not of sufficient interest to be mentioned in detail.—Sir F. BARING moved for the House to go into Committee on the Fictitious Savings Banks Bill, but after a discussion the motion was withdrawn and the Bill also.—The Church-Rates Law Amendment Bill was also withdrawn.—The several clauses of the Vaccination Bill were agreed to or amended.—The second reading of the Metropolis Local Management Acts Bill was moved by Mr. TITE, who explained that its object was to amend the powers of the Board of Works for the benefit of the metropolis. The debate that ensued was interrupted by the SPEAKER, the hour (a quarter to six) having arrived when the House, according to the usual rule of the Wednesday morning sittings, proceeds to dispose of the remaining business on the paper.

EDUCATION COMMISSION.

(11th.) Sir J. PAKINGTON called attention to the Report of the Education Commission, with the view of learning, according to the terms of his notice, to what extent Her Majesty's Government intended to adopt its recommendations. He gave a summary of many of the conclusions at which the Commissioners had arrived, and of their recommendations. They said that, whatever might be the merits of the present system, it was not adapted to spread education so widely as was required. He concluded by urging the Government to give their serious attention to the report.—Mr. HENLEY drew conclusions from the report different from those of Sir John, remarking that it was clear that a great discordance of opinion had prevailed among the Commissioners. In specifying the conditions upon which they thought public assistance should be given to schools, they said not a word, he remarked, of religious teaching; and he read opinions expressed by some of the most ardent and the soundest advocates of national education, that, if the report of the Commissioners was carried out, it would be destructive of the present system, and effect such a radical change in it as would prepare the way for bringing the schools under the control of the ratepayers, and ultimately extinguish the religious element. slave trade on the East as effectually as they had already done on the

Digitized by Google

A BENGALEE PLAY.

(12th.) Sir J. SHELLEY inquired of the Secretary of State for India whether the Government had received any information relative to the circulation by the Government of Bengal, in official envelopes marked "On Her Majesty's Service," of an English translation of a "Bengalli Play" containing attacks on British settlers connected with the manufacture of indigo in Bengal, on their wives and families?—Sir C. WOOD replied, that if his hon. friend had any curiosity to read the play, he would send him a copy; but he had received no information whatever that it was of the character described.

THE BELGIAN TARIFF.

(12th.) Mr. W. FORSTER asked the cause of the delay of the Belgian Government in applying the new tariff arrangements between France and Belgium to this country, pointing out the injury which this country suffered from the delay, and from the preference shown to France.—Lord J. RUSSELL gave explanations on the subject, observing that the Belgian Government had always assured that of Her Majesty that whatever terms were granted to French manufactures would be granted to British.

DENMARK AND THE DUCHIES.

(12th.) Lord JOHN RUSSELL, in reply to the remarks of Sir H. Verney, Lord H. Vane, and others, described the present state of the quarrel. He was glad, he said, to hear that the King of Denmark had consented to an arrangement by which further negotiations would be entered upon, which he hoped would issue in a solution of the question, though he could not say what terms would be deemed reasonable by both the parties.

OFFICERS OF THE INDIAN ARMY.

(12th.) Col. SYKES asked the Secretary of State for India whether officers of the Indian army accepting the invitation to volunteer for general service or into the Staff Corps in India in any way compromised the rights guaranteed to them under the Act 21 and 22 Victoria, cap. 95, sec. 56, of 1858, and the Act 23 and 24 Victoria, cap. 100, sec. 1, of 1860, with respect to pay, pensions, allowances, privileges, promotions, and otherwise; and whether the reported appointment of Colonel Heyland, C.B., of Her Majesty's 56th Regiment, in supercession of the field officers of that regiment, was made with the sanction of the Secretary of State?—Sir C. WOOD said the order referred to was on the table of the House and every member could judge of its character. It had been received in India with general satisfaction, which was the best proof that the officers did not consider that by accepting the invitation it offered they compromised their rights.

UNIVERSITY ELECTIONS BILL.

(12th.) The third reading of this Bill was opposed by Lord PALMERSTON and the CHANCELLOR of the EXCHEQUER on the ground that the Bill had come out of the Committee a totally different measure from the original Bill, since it now authorised all electors for the Universities, resident or not resident, to empower a proxy to vote or not, as he may think proper.—In spite of this opposition the Bill was read a third time and passed.

THE IRISH EDUCATIONAL SYSTEM.

(15th.) Mr. BUTT moved a resolution that it is inexpedient, in distributing the grant for the purposes of Irish education, to enforce the rule of refusing aid to all schools in which religious teaching is made a part of the general instruction of the school. He contended that, as a system of united education, the National system had utterly failed, and, if so, and if Protestants and Roman Catholics were receiving education in distinct schools, he asked what justification there was for imposing this restriction? By rescinding the rule education would be made more advantageous to the recipients—for it could not be an advantage to exclude religion—and the grant would be a real boon to the country.—After a considerable discussion the motion was negatived.

CIVIL SERVICE ESTIMATES.

(18th.) On the vote for 110,000 to complete the sum of £125,090 for the Treasury chest abroad, Sir H. WILLOUGHBY complained that large sums had been paid out of the Treasury chest without the consent of Parliament for the payment of troops in India and China.—The vote was agreed to.—On the vote of £64,646 being proposed for services in China, Japan, and Siam. Colonel SYKES drew attention to the fact that, while a sum of £8,000 was taken for the Envoy Extraordinary and Minister Plenipotentiary and Chief Superintendent of Trade at China, only £2,500 was taken for the Envoy Extraordinary and Minister Plenipotentiary and Consul-General at Japan.—After a few words from Mr. Alderman SALOMONS, Lord John RUSSELL was glad to state that he had yesterday received information that our diplomatic agents had now been received with great kindness by the people of China, and without any of that wonder and strangeness which had hitherto been exhibited.

THE EXPEDITION TO CHINA.

(18th). The SPEAKER announced that he had received a letter from the General in command of the troops, and one from the Admiral in command of the naval forces, engaged in the late expedition to China, acknowledging the thanks voted to them by the House in February last.—Both letters were read by the Clerk at the table.

MEDICAL OFFICERS OF THE ARMY IN INDIA.

(18th). Mr. BAZLEY asked the Secretary for India when his promise to place the medical officers of Her Majesty's Indian army upon a perfect footing of equality with medical officers of Her Majesty's British army would be carried into effect, and asked other questions regarding the standing of the former.—Sir C. WOOD said that the whole question of the Indian medical service was under consideration. A communication had been made to the Indian Government, but until an answer had been received no definite steps could be taken. The matter was one, however, that must be settled before long.

SUEZ CANAL.

(23rd.) Mr. GRIFFITH asked the Secretary of State for Foreign Affairs whether Mr. Colquhoun, the English Consul-General in Egypt, together with the English Consul in Alexandria and other gentlemen, had lately (on the 29th of June) visited the works of the Suez Canal, and had expressed his satisfaction with what he had seen and heard there; and whether such approval was to be understood to be qualified by the condition that forced labour should not be employed on the works of the canal, and that the obligations in that respect of the Pasha of Egypt towards the Porte be faithfully fulfilled?—Lord J. RUSSELL said that he had seen the report to which the hon. gentleman alluded in some foreign newspapers, but he had received no account from the Consul-General of a later date than the 15th ult. That officer spoke in a previous despatch of his being about to go to see the works of the Suez Canal, but no account of his having so gone had yet arrived.

PUBLIC EMPLOYMENT (INDIA).

(23rd.) Colonel SYKES moved the following resolutions:—"That on all occasions when candidates are invited to compete for public employment under the Crown British subjects born in India should be allowed to compete on the same footing as other British subjects;" and "that Doctors Thomson, Goodhall, Pulney Andy, Muncherjee Beramjee Colah, and Surgeon Pickachy, all British subjects, having been prohibited from competing for the office of assistant-surgeon in the Royal army, at a publicly advertised meeting appointed for the 18th of February last in London, it is the opinion of this House that such prohibition was unjust, impolitic, and uncalled for." He contended that the prohibition, while it was a violation of guarantees given by Parliament and the Crown, was disadvantageous to the public service in India, and it disappointed hopes and expectations which the people of our Eastern Empire were encouraged to entertain.—The motion was seconded by Mr. LAYARD.—Mr. T. G. BARING, remarking that the second resolution conveyed a direct censure upon the Secretary of State for War, said this was not a question of the employment of natives of India, but whether they should be employed in the British army, in the general medical service of the Crown, in all parts of the world. The opinion of the best authorities, upon which the Secretary of State had acted, was that natives of India were constitutionally unfitted for service in all parts of the world, and, so far from the prohibition being unjust, impolitic, or improper, the Secretary of State would not have fulfilled his duty had he acted otherwise.—After a few observations by Mr. J. B. SMITH and Captain JERVIS, and a reply by Colonel SYKES, who considered the objections of Mr. Baring utterly groundless, the motion was withdrawn.

INDIAN RAILWAYS AND FINANCE.

(25th.) Sir C. WOOD rose to ask for powers to raise whatever money might be necessary for the year's railway work in India, beyond the sum that might be raised by the different railway companies. Last year he had estimated the probable expenditure for railways at £6,000,000, and it reached £5,900,000, showing the very great accuracy of the estimates Up to April last eight millions had been expended, and this year he believed that six millions would be required, of which between £1,700,000 and £1,800,000 would be raised by the companies. What he wanted the House and the country clearly to understand was, that the money which he now asked power to raise was exclusively for railway purposes. In alluding to the political administration of India, he stated his belief that Lord Canning's policy in respect to the native princes and chiefs in India was sound in principle, and would lay the surest foundation for the maintenance of our power in that country. In past years the tendency of our rule had been rather to oppress than to conciliate these influential persons, but in late years that line of policy had been entirely reversed. New treaties had been made with several native princes, and territories had been assigned to them which, without weakening our empire, had increased their dignity and honour, and made them feel that their rights would not be usurped or invaded by the British Government. The Sikkim war just concluded presented a remarkable proof of our improved policy in dealing with the native rulers. The Rajah of Sikkim having carried off some of our subjects a force was despatched to the frontier, and the rajah was informed that our object was to obtain reparation, but not to annex a single acre of territory. In a very short time a treaty was arranged with the rajah, our subjects were restored, and the whole affair passed off in the most friendly manner. Not only did our negotiator obtain that, but the rajah engaged to allow a free passage for merchandise through his territory from India into Thibet, and by another way on the payment of a reduced duty. It had long been a desideratum to procure the opening of a road from India to China, and that had at length been satisfactorily accomplished by the aid of the Rajah of Sikkim.—Several members spoke upon the subject, and the resolution was agreed to.

SLAVE TRADE.

(26h.) Mr. BUXTON called the attention of the Government to the great increase of the Slave-trade, and the importance of supplementing the exertions of the squadron on the African coast by additional measures for the uppression of that trade. He affirmed that since the American Government had refused to acknowledge our right of visit, our naval force had been rendered, not indeed useless, because he believed that fourteen slave ships had been captured during the past year—but far less potent than it used to be. He was anxious, therefore, to call the attention of the Government to two or three supplementary measures which would, he thought, be of great value. One of these was suggested last year, by Lord John Russell himself. This was, that an attempt should be made to supplant the Slave-trade in Cuba by the introduction, under the most stringent precautions, of a free immigration from China and India. This would require the greatest possible care, and it might be thought that experience as to the abominable traffic in Chinese with Cuba ought at once to condemn the suggestion. But the truth was, that recently Her Majesty's Government had made great, and, he believed, successful exertions to put a stop to the cruelty with which that coolie immigration had formerly been attended. Our authorities in China, in conjunction with the Chinese authorities, had placed the emigration under strict regulations, and it also appeared that in Cuba the Chinese had asserted their independence, and had enforced considerate treatment for themselves. He trusted that the noble lord (Lord J. Russell) would direct the British Commissioner at Havannah to make strict inquiries on this point, and, if it could be shown that humane treatment and fair wages could effectually be secured for India and Chinese emigrants, then by encouraging such an

Digitized by Google

immigration, we should supplant, not only the Slave-trade, but in the long run slavery itself in the island of Cuba. Another point of great importance would be to establish a consulate at Mozambique. The fact was, that the Portuguese Government was well disposed on this subject. It was fain to stop the Slave-trade, but was too feeble to enforce its views on that far distant coast, where many of their own authorities had excellent reasons for cherishing the Slave-trade. Nothing, then, would so much tend to enable the Government of Portugal to carry out their views as the fact that England had a commissioner there to watch all that went on, and report the proceedings of the slave-traders, and the action taken by the local authorities. A Consul had originally been appointed at Mozambique after full inquiry by Mr. Hume's Committee in 1853, and experience seemed to him (Mr. Buxton) to have shown the value of having such a representative of England on that coast, and in urging the reappointment of a Consul on the Government he was expressing the views entertained by Lord Brougham, by the Bishop of Oxford, the Anti-Slavery Society, the African Aid Society, and, in fact, nearly every one acquainted with the question of the Slave-trade. More than this, the same point had been strongly urged by the *Economist* newspaper, and by others who looked on the matter from a mercantile point of view. There seemed real grounds for believing that English influences exerted on that coast might do much to suppress the Slave-trade and open a large commerce.—Lord PALMERSTON said that the subject was one of very deep interest. He denounced in strong language the retrograde course which had been pursued by France in allowing the Regis contract for the emigration of so-called free labourers into a French colony, but which was nothing more nor less than the Slave-trade in its purest and simplest form, at least as far as the acquisition of the labourers was concerned. In alluding to the new treaty which will annul that contract next year he explained the object of our Government in entering into it. He denounced in strong language the conduct of Spain and of America, and observed that the Portuguese shipments from the East Coast of Africa were mainly carried on under the American flag. He trusted that some means would be found of completing the noble work in which this country has been engaged for so many years.

SUPPLY.

(26th.) On a vote of £1,000,000 for the expenses of the China war. Mr. PEEL said this was a vote of credit for necessary expenses connected with the China war. The Chancellor of the Exchequer had stated to the House that he would propose this vote, and they would recollect that provision was made for it in the service of the year, which provision had received the sanction of the House. This was the third vote of credit that had been taken on account of the Chinese war; there was one of £850,000 for 1859-60, and one of £3,800,000 for last year. A sum of £750,000 still remained of the vote of credit of last year, but that could only be expended for that year; and a sum of £1,000,000 was now asked to meet the expenditure of the forces in China for the present year. Extra allowances were required for the European troops, and, as it was doubtful how long they might require to remain there the present vote became necessary. He believed, however, that the sum of £1,000,000 now asked for would be amply sufficient for all purposes, and he hoped the vote would be agreed to by the Committee.—Sir H. WILLOUGHBY said there was for the year 1859-60 a vote of credit for £850,000, and last year of £3,800,000. He wished to know whether any assurance could be given that this additional million would cover all the expenses of this costly China war. He expressed a hope also that better arrangements would be made with regard to our accounts with India, otherwise British finance would fall into the utmost disorder. For seven years there had been a sort of running account with India, and no one knew what would be the end of it. He was afraid they were going on very much in the dark in this matter, and they had much reason to complain of the Indian transport expenses especially.—The CHANCELLOR of the EXCHEQUER agreed with the hon. baronet that the Chinese war had been a costly war. He believed, however, that the provision now made, if not large, was amply sufficient, and that another vote would not be required. With regard to the India question, the charges made by the India departments were not always to be taken as absolutely correct, and therefore the charge for transports might not be so high as the hon. baronet anticipated. The charges this year in China would be chiefly under two heads—the charge for transport, and the charge for pay and allowances; and it was hoped that the payments under these heads would not be very large, if the instructions sent from home were strictly followed out. He did not think that the state of our account with India was likely to prove very formidable to British finance. There was a sum of £750,000 standing over from the Chinese vote granted last year, and he hoped that that and the million now provided would clear off the whole expense of the China war.

THE LAST VOTE FOR CHINA.

Only £1,000,000 more and the expenses of the China war are to be entirely wound up. The hero of "great expectations" in making an estimate of his debts adds a wide margin for possible contingencies. We sincerely trust that the Government has done so in the present case, and that Mr. Gladstone's belief may prove correct that another vote will not be required.

TRIAL TRIP OF THE STEAMER "SHANTUNG."—The following account is from the *New York Herald* of the 15th inst.:—"This fine new steamer, on a trial trip, satisfied those who were on board of her capabilities for any work to which she might be put. The *Shantung* was built by Thomas Collyer, for Messrs. Augustine Heard and Co., of the China trade. The length of the vessel is 151 feet, the beam 25 feet, and the depth of hold 9 feet 5 inches. She is iron-braced diagonally, and draws five feet of water. She has a beam engine, with a 3-inch cylinder, and ten feet stroke of piston. The paddle-wheels are 22 feet in diameter. On the trip the *Shantung* made sixteen knots an hour, and the engines worked admirably. The Government, it seems, has a refusal of this fine vessel, should they desire to take it and convert it into a gunboat. If not accepted within a few days, it will be sent to the China waters. It has four howitzers on board."

THE BISHOP OF VICTORIA.

We are glad to learn that the health of the Bishop of Victoria has been thoroughly recruited by his visit to England. He and Mrs. Smith purpose leaving our shores for Hong Kong by the Southampton steamer sailing on October 4th. The bishop has not been idle during his stay in this country. During the last few weeks he has visited Dublin, Cork, Bath, York, Leeds, Doncaster, and Birmingham on behalf of the Church Missionary Society; and has also preached sermons advocating the cause of China missions in York Minster Cathedral and in St. Patrick's. In addition to this arduous labour he has held a series of confirmations for the venerable Archbishop of Canterbury.

DR. MACGOWAN IN DUBLIN.

The Dublin papers all concur in giving laudatory accounts of Dr. Macgowan's lectures. Archbishop Whately presided over the course on China, and Sir W. Hamilton, the astronomer royal, and Lord Gough over the Japanese course. Among Dr. Macgowan's patrons we note the Lord-Lieutenant, the Lord Mayor, the Lord Chancellor, the Ulster King of Arms and other notabilities. The Doctor figures also at the vice-regal levée. The newspaper paragraphs seem to incline to blarney. One of the least laudatory is the *Freeman's Journal*—Roman Catholic. It says:—"The Lord Archbishop of Dublin presided yesterday at a lecture given by Dr. Macgowan in the pillar-room of the Rotunda, on the subject of China. The honour was mutual. The president was a scholar and a philosopher, a man of science, and a scholar, and an accurate observer, imparting instruction with as much ease as he could tell a string of Chinese beads. Dr. Macgowan's morning audience was limited, but those in attendance were eminently qualified to appreciate what they heard, and to profit by the information conveyed in it. China is not now to be regarded as a *terra incognita*, and at no former period could lectures in relation to its people, their habits and customs, be delivered with more advantage. The information conveyed by Dr. Macgowan is not of an ephemeral or accidental character. He has realised it by practical experience, and a scientific mind enables him to communicate with effect the practical observations which a considerable period of residence placed at his command."

Literature.

The Chinese Classics: with a Translation, Critical and Exegetical Notes, Prolegomena, and Copious Indexes. By James Legge, D.D., of the London Missionary Society (in Seven Volumes); Vol. I. containing Confucian Analects, the Great Learning, and the Doctrine of the Mean. Hong Kong: at the Author's. London: Trubner, and Co, 60, Paternoster-row. 1861.

We noticed the appearance of Dr. Legge's first volume in a recent issue, but were unable at that time to do more than mention the publication of the work. Having since then read the preface and *prolegomena*, and examined the contents of the volume, and the process of dealing with this most difficult subject—the translation and elucidation of the philosophical treatises of the Chinese—we can confidently recommend the work to all who are interested in finding out the peculiar dogmas of Confucius and his disciples. Dr. Legge appears to have wrought among native authorities, and has, we should think, left little to be sought for amongst the original commentators on the Chinese classics. The book leaves scarcely anything to be desired; it is a sort of *ne plus ultra* work on the subject. The native text is given in beautiful bold type, and a translation and notes appear on each page below the text. The volume is increased in value by the copious indexes which are appended. One or two points, which it may not be too late to attend to in the remaining volumes, if the learned author thinks fit—we may be allowed to notice. First, the translation, we think, would be more acceptable if more free and less literal in some places. Few passages, probably, are obscure to the indefatigable translator, and therefore we might well depend upon his free version, which we venture to anticipate would be superior to a close rendering. The author would certainly have to express his own opinion with greater decision than at present, but the production would be worth more. It cannot be said that Dr. Legge's translation is quite literal, a thing which, we conceive, would be almost impossible, but if a free translation be not given of the other classical works, some of which are more difficult to understand than the present, we fear that to the general reader the perusal will become tedious and uninteresting. The second point only to which we will refer is the mode of reference adopted in the indexes. As the divisions in the book are not indicated on each page, it would have been more prudent to have given the pages as references. And this, we trust, will be done in the next volume, as the present mode of reference is most troublesome. Besides these exceptions to the excellence of the work we have nothing more to say; it is the earnest of much that will be very valuable to everyone who studies the subject of China and the Chinese; and it is a monument more enduring than marble

Digitized by Google

of the liberality of one of our great China merchants, the late Mr. Joseph Jardine, who generously undertook the expense of the publication, concluding that as "we make our money in China, we should be glad to assist in whatever promises to be of benefit to it."

Monetary and Commercial.

The fire insurance companies have issued the particulars of the increased scale of terms they have deemed it necessary to adopt since their losses at the wharfs at London-bridge. In many cases the new charges are more than three times as high as those in use, the rate for each of the docks, for instance, having been raised from 3s. 6d. to 10s., for waterside warhouses (specific insurances) from 3s. to 10s., and for general floating policies from 10s. 6d. to 35 per cent. These terms, however, are subject to reductions ranging from 30 to 50 per cent. in the event of certain requirements being complied with for the improvement of risks, and which are modelled very much on those which in the year 1844 were rendered compulsory at Liverpool by Act of Parliament, and which are said to have caused that town, formerly one of the most dangerous, to become one of the most safe. London is understood to be the worst in the kingdom, and the companies assert that according to the experience of a leading office during the past eleven years, while the average of premiums on dock and warehouse policies has been 5s. 6d. per cent. (from which about 1s. must be deducted for expenses), the average of losses has been 12s. 8d. per cent. The new tariff includes a scale of charges for floating policies, limited to two but not exceeding four specified wharfs. There is also a new and increased scale for ships in the port of London. The whole of the present rates are to apply to all new insurances from and including the 24th of June last, and to all existing policies for which the renewed notices had not been issued on that day. These new rates have caused great dissatisfaction, as a strong opposition is being organised against them.

The *New York Times* publishes the usual yearly summary of the traffic at New York :—

The imports for the year ending June 10, 1861, were...	$191,328,000
Besides the above amount of merchandise there was imported of specie...	33,197,000
Making a total of	$224,525,000
The exports from New York for the same period were—	
Exports of domestic produce	$117,933,000
„ foreign articles re-exported	7,035,000
„ specie...	23,845,000
	$148,813,000

This shows a decrease of imports as compared with the return of the previous year, including specie of $70,834,000, and an increase of exports, including specie, of $10,775,000.

A private company has been formed for the navigation of the Euphrates for purely commercial objects, and the first vessel of the new company is said to be already finished.

The Oriental and General Marine Insurance Company have appointed Mr. Philip Secretan, a well-known underwriter of Lloyds, as manager.

In reference to the announcement in our last number, it is stated that the steamers contracted for by the China and Japan Steam Navigation Company will be ready to leave this country in the early part of the ensuing year.

A new undertaking is announced under the title of the Compressed Coal Company (Limited), with a capital of £100,000, in shares of £2 each. It is proposed, by means of a clever invention, to utilise the slack or refuse coal, which is now almost wasted. By the Company's process the slack can be compressed into blocks of any size, very suitable for maritime purposes. It is an important feature that, according to the statements put forward, this can be accomplished at a very low rate of working cost. Works for supplying the metropolis are to be erected on the banks of the Thames, but other sites are to be selected in the provinces, particularly in the northern coal-fields, where the small coal can be obtained at an almost nominal cost. The quotation this afternoon was ¼ to ½ prem.

It is understood that Government have decided on receiving a report on the condition of the Red Sea cable and the amount necessary to effect the repairs, and that Sir Charles Bright and Mr. Latimer Clark, the electricians, are now engaged in preparing the same.

THE MALTA AND ALEXANDRIA CABLE.

The screw steamer *Rangoon*, Captain Atkins, arrived at Malta from Ras-el Millah, on the north coast of Africa, having safely laid the cable she had on board to within ten or fifteen miles of that place. On the evening of the 5th inst., at six o'clock, the shore end of the cable was disembarked at Alexandria from the *Rangoon*, in the paddle-box boats of Her Majesty's corvette *Scourge*, Commander Jones, escort d by other boats of that vessel and the *Medina*, Captain Spratt, C.B., the *Mohawk*, Commander E. H. Howard, having been previously sent on the same morning to lay down buoys for the guidance of the ships. The *Rangoon*, having on board Messrs. Canning, Clifford, Dr. Whitehouse, De Santy, and a staff of electricians on the part of the contractors, and Messrs. Forde and Laws on the part of the Government, started on the following day at 6 A.M., preceded closely by the *Medina*, with the *Scourge* on the starboard beam. In this order they proceeded till nightfall, the *Rangoon* paying out the cable all the while, when the signal was made by Captain Spratt to anchor. They started again next morning at five in the same order, with the *Mohawk* still ahead laying down buoys. On the evening of the second day, the depths varying considerably within short distances, the *Rangoon* was ordered to remain at anchor while the *Mohawk* and *Medina* proceeded slowly ahead, sounding and marking the course. On the third day, about noon, the *Rangoon* weighed anchor, and the ships proceeded in the same order as on starting. Little progress was made during the 9th and 10th inst, on account of the variable depths. On the 11th the squadron passed the Ishilah Rocks, and at five the same evening had paid out all the cable on board, electric communication with Alexandria being perfect. Here the end was taken into shallow water, hermetically sealed, and buoyed. In no spot, we understand, was the cable laid in more than 100 fathoms water, but for the most part in about 50, and at an average distance of four or five miles from the coast. The weather was fine, with a light north-westerly wind and smooth water all the way till the morning of the 11th inst., when a swell set in, and the wind freshened from the north-west. On the same evening the *Rangoon* parted company for Malta, and arrived there at half-past 9 at night on the 15th inst, having encountered rough weather from the north-west on the 12th and 13th which, had it occurred during the laying of the cable, would have endangered the success of the operation. The *Medina* was to continue sounding along the coast preliminary to submerging the last sections of the cable expected from England, to connect the two ends.

The steamer *Mooltan* took out on the 20th of July specie to the amount of £70,801 in silver and £7,076 in gold to the following places :—Malta, £625 in gold ; Alexandria, £1,000 ; Ceylon, £2,050 ; Madras, £2,244 gold, and £37,501 silver ; Calcutta, £1,157 gold, and £33,300 silver.

ARTICLES OF IMPORT.

TEA.—During the past fortnight business has continued on a most limited scale. The trade still only purchase such kinds as they require for immediate use, whilst importers generally are anxious to realise, and thus occasionally prices rule in favour of the buyer, although we can hardly quote any general decline. The questions of insurance arising out of the late fire have also slightly affected our market, as the country dealers finding that for teas past prompt they are not protected by the wholesale houses, in the event of a loss by fire, seem less than ever disposed to hold stock. There has been only a limited demand for the low to good common qualities, and prices remain without change, the quotation for the latter being 10½d. to 11d. per lb. Common to fair flavour kinds continue in abundant supply, and are heavy of sale at former rates. Common to good Ho-Hows and Ning Chows show but little alteration. Good and fine Monings are in moderate demand at the late advance. Good to fine Kaisows continue to be well supported. Common to fair quality Tayshans are neglected; but good kinds are in fair request. Common to fair Oolongs remain as before ; good and fine have met with a moderate inquiry. Souchongs show no alteration. A further considerable parcel of Flowery Pekoes is declared for sale this day. A large parcel is reported as sold for Hambro' at low prices. Common scented Capers remain dull at rather lower prices. Good and fine are in request. Common to fair Orange Pekoes are difficult of sale, but the finer kinds have been saleable in small parcels at full prices. Green Teas, from their scarcity, are still commanding extreme rates, especially for any parcels which are newly offered, and in some cases a further advance of 1d. to 2d. per lb. has been obtained. The quantity afloat now scarcely exceeds a fortnight's consumption, exclusive of the *Ziba's* cargo. There has been one small public sale, comprising 6,298 packages, of which 3,576 packages were sold, including 3,376 packages without reserve. To-day a sale comprising 32,709 packages will commence, of which 9,571 packages are to be offered for absolute sale.

Digitized by Google

SILK.—There is no change to notice in this article, the market being in a very quiet state.

SUGAR.—A better feeling has prevailed in the market, and a steady demand has been experienced, sales in most cases being 6d. to 1s. per cwt. higher than our last quotations. 1,809 bags Penang were realised on relatively moderate terms; 29s. to 30s. for middling brown, 34s. 6d. to 35s. for low yellow, 39s. to 40s. 6d. for good and fine yellow.

COFFEE.—A steady demand still continues for good and fine descriptions, which have mostly been taken at about previous rates. 314 bags mixed Singapore, and 98 bags black Manila, were taken in. The public sales of Plantation have gone off mostly at previous rates. Native has been in less request.

RICE.—There has been more inquiry, and the transactions that have taken place have been at rather better rates. A floating cargo of Necranzie is reported at 10s. for the United Kingdom, and another at 10s. 3d. for open charter, and one for Liverpool at 9s. 7½d.

PEPPER.—Of black, 1,733 bags Singapore, part sold at 3⅞d. to 4d.; 1,208 bags Penang, half sold at 3½d; and 100 bags Batavia at 3⅞d. Of white, 638 bags Singapore sold at 5⅜d. to 5½d. per lb.; 528 bags Penang all retired.

SAGO.—Quiet, and 6d. to 1s. per cwt. lower; of 1,233 packages at auction, two-thirds sold at 19s. to 20s. per cwt. for fair to good small, and 18s. medium. FLOUR.—Rather dearer; of 571 bags at auction, two-thirds sold at 16s. per cwt. for good. Subsequently more money obtained in private treaty.

SPICES.—Cinnamon: no alteration. Cassia Lignea declined 1s. to 2s. per cwt.; of 544 boxes, half sold at 78s. to 89s. for fourth to first pile. Cassia buds: scarce and firm. Cloves: steady; 1 case Penang sold at 1s. 1d. Mace: flat; of 25 cases Penang, about one-third sold at 10d. to 1s. per lb. for middling to fair reddish. Nutmegs: dull; of 224 cases Penang, 34 chests Singapore, and 4 chests Cochin at auction, about two thirds sold at 3s. 1d. to 3s. 2d. per lb. for good bold; and 10d. to 1s. 6d. inferior small and shrivelled to good medium.

HEMP.—Market very quiet. 502 bales of Manila at auction were all withdrawn.

COTTON.—Good demand. The amount obtainable being very limited has rather confined the sales. Surat 4¾d. to 6⅝d.

JAPAN WAX.—197 cases of ordinary yellow were retired at 40s. 1 lot of good block sold at 56s.

TOBACCO.—Market very dull, and no alteration in prices.

TIN.—Market very flat. Banca is offering at 117s., and Straits at 111s.

GAMBIER.—Quiet, and of 1,650 bales at auction, one-third sold at 15s. to 15s. 3d. for fair quality.

CUTCH.—Of 2,407 bags, one-third sold at 22s. to 22s. 6d., for fair to good, with a few bags superior in quality and condition, at 23s. to 23s. 6d.

MISCELLANEOUS.—India-rubber: In more request.; about 60 baskets sold at auction at 1s. 3d. for good. Camphor: No sales. Sapanwood: Siam in demand; 25 tons of Malabar sold at £5. 12s. 6d. to £10. 15s. per cwt. for second quality, being cheaper, and £5. to £5. 15s. 6d. for third quality. Damar: Steady. Gamboge: Very dull. Rattans: 8,966 bundles Penang, all sold at 2s. 5d. to 5s. 3d. per 100. Saltpetre: Quiet. Gutta Percha: Sales at 10½d. to 1s. 2d. for middling to fair genuine. Rape seed: More demand, and improved rates. Elephants' teeth: No inquiry. Vermillion: No sales. Galangal root: Very flat, and no business. Cubebs: Steady, 50 bags sold at £7. 10s. for fair quality, but stalky. Dragon's blood: No business doing. Galls: 28 cases China, all retired and 125 bales Japan, sold at 38s. for middling, stalky. Rum: Market very inactive.

ARTICLES OF EXPORT.

IRON.—The quotations in London are for Welsh bars, £6. 0s. 0d. to £6. 5s.; nail rods, £7 to £7. 17s. 6d.; hoops, £8. 10s. to £9; sheets, single, £9 to £9. 10s.; Staffordshire bars, £7. 15s. to £8; rails, £5 to £5. 10s.

STEEL.—Swedish keg, £17.

COPPER.—Sheet and sheathing, 10½d.; yellow metal, 9d.

TIN.—117s. for block; 118s. for bar. Tin plates, best charcoal, I.C., 29s. per box.

LEAD.—English pig, £19. 15s. to £21. 10s.; shot, patent, £23. 5s.; sheet, £21; spelter, £15. 10s. to £15. 15s.; zinc, English sheet, £22; quicksilver, £7 per bottle.

COMMERCIAL POSTSCRIPT.

MONDAY AFTERNOON.

The Oriental and General Marine Insurance Company may be considered as successfully established. The allotment of shares will take place on the 1st August.

TEA.—The continuation of the sales on the 26th inst. brought 14,181 packages to the hammer, and of these 5,720 (including 1 823 boxes) found buyers, 3,669 being "without reserve." A chop of Ning Chow congou, "without reserve," sold easily at 1s. 1½d. per lb.; also some Oolongs, at 9½d. and 9¼d. per lb., went below valuations. Two parcels of Foo Chow scented orange pekoe, at 1s. 6d. and 1s. 8⅜d. per lb. also went at reduced rates. Red leaf congous from 1s. to 1s. 2d. per lb., and low dusty kinds at 6d. up, supported previous quotations. Of the total quantity offered on the three days 14.703 packages were sold.

In the Manchester market we note:—In yarns there has not been much doing for India or the East, though the inquiry for China was considerable. A good deal of business has been done, however, by the home-trade houses, and also by the Germans. The sales made have been at the highest rates, which have advanced again by ⅛d. to ¼d. per lb. since Tuesday. In 32's twist the rise is especially decided.

The Russian screw steam corvettes *Boyarina*, 11, Commodore Captain Maydell; and *Voyvoda*, 11, Commander Matrieff; and despatch boat *Dyignite*, 3, Commander Korniloff, arrived in Plymouth Sound on the 27th. These steam-ships have been four years in commission; the corvettes have been chiefly on the China station and in the Boyarin river; the despatch boat was occupied at Japan.

ARRIVALS NOT INCLUDED IN TABLE.—July 25, at Falmouth, from Akyab, Vortigern; 23, at Hambro' and Hong Kong, Rostock; 26, at Liverpool, from Manila, Queen of the East; at Spithead, from China, H.M.S. Nimrod; 27, in Downs, from Foo-chow-foo, Morayshire; at Falmouth, from Akyab, Neraul, Western Continent; at London, from Manila, Avalanche; from Shanghai, Bacchante; 26, at Liverpool, from Akyab, Marion; 23, at Cuxhaven, from Macao, Dr. Juris Jantzen; June 26, at Havana, from Canton, Independence; July 2, at Havana, from Macao, Messenger; 27, at Falmouth, from Moulmein, Carntyne; at Plymouth, from Akyab, Jane Ewing; in Channel from Japan, Medina; 18, at Stockholm, from Batavia, Amalia Maria; 24, at Bremen, from Akyab, China; 29, at London, from Rangoon, Irene; 28, at Deal, from Foo-Chow-Foo, Humphrey Nelson.

DEPARTURES.—July 26, from London for Shanghai, Harkaway; 25, from Glasgow for Singapore, Congo.

LAID ON.—At Liverpool, for Batavia and Sourabaya, Stad, Middleburg, Acolus; for Singapore, Clis, Rance.

SPOKEN.—Straat Baly, Amsterdam to Batavia, June 25, 41 N., 10 W.; Admiral von Heemskirk, Amsterdam to Batavia, June 14. 4 N., 26 W.; Donna, Sourabaya to Havre, May 21, 33 S., 16 E.; Queen of the East, Manila to Liverpool, July 13, 43 N., 37 W.; O'Holina, Dutch barque, from Java, 8 July, 38 N., 39 W.; Jacoba Cornelia, Clasina, Amsterdam to Batavia, 19 July, 49 N., 8 W.; Kathay, American ship, New York, to Shanghai, 11 N., 26 W., June 20; Lord of the Isles, London to Hong Kong, May 28, 21 S., 20 W.; Prins van Oranje, Batavia to Rotterdam, July 12, 41 N., 39 W.; Volunteer, barque, Liverpool to Hong Kong, June 12, on the Line, 22 W.; Maria Adolphina, Banjoewangie to Amsterdam, May 24, 25 S., 9 W.; Honigby, Dutch ship, Batavia to Rotterdam, June 14, 5 N., 24 W., Amazon, Hambro' barque, Java to Rotterdam, July 13, 43 N., 37 W.

At Santa Cruz, Teneriffe, July 1, Curacao, Wilkin, from Amsterdam, and sailed, 5th, for Batavia.

At St. Helena, June 8, Albrecht Boyling, Muller: at Batavia, Sea Park, Stewart, from Canton; 9, Rosseau, from Macassar; 10, Admiral de Ruyter, from Java.

At TABLE BAY.—May 26, from Batavia, Hebe; 25, for Batavia, Canton.

From BATAVIA.—At Liverpool: Kerr, Shantung.

From BANKOK.—For Falmouth: Pauline.

FREIGHTS AND CHARTERS.

Current freights to Shanghai for vessels on the berth, 40s. to 50s. per ton weight and meas.; to Hong Kong, 35s. to 40s.; Singapore and Penang, 30s. to 45s.; to Manila, 35s. to 40s.; to Batavia, 45s. weight, 40s. meas.; to Japan, 65s. weight, and 60s. meas.

The freight market is at present in a dull state, and transactions are consequently limited. But from the recent advices from the various markets being more favourable, some improvement may be expected. The Admiralty have received tenders for the conveyance of about 1,200 tons navy provisions, &c., to Malta. Coal freights to the East are a little firmer, but the tonnage offering is sufficient for the requirements. £28 has been been paid from the north of England to Bombay, and £41. 10s. for Shanghai; 35s. per ton is offered Wales to Manila, 26s. Singapore, 24s. to the Cape of Good Hope. Homeward charters, on this side, are few; 60s. per ton is offered from Bombay, 65s. from Calcutta, 70s. from Ceylon, 90s. to 100s. teak from Moulmein, 75s. rice from Akyab, &c.; 65s. per ton tea from China, 70s. from Manila. The tonnage on the berth for India, China, and the Cape of Good Hope, is at last reduced, it being now about 48,000 tons.

INSURANCE.

The following are the current rates of premium at Lloyd's, according to the class of vessels, &c.:—To Hong Kong, 40s. to 50s. Shanghai, 50s. to 60s. Singapore, 30s. to 45s. Batavia, 30s. to 40s. Manila, 50s. to 60s. Japan, 50s. to 60s.

At Hamburg, for Batavia and Singapore, 40s. China and Manila, 40s. to 50s.

CASUALTIES.

The Augustin Grange, troop ship, Cottineau, from Bordeaux to Singapore, in leaving the Gironde, got on shore on the mud banks off the Island of Aix, in the night of July 7, during heavy weather She has since been floated and taken into Rochfort. Extent of damage not yet ascertained.

The Comet, Todd, which arrived at New York on June 25 from Hong Kong, had sprung her mainmast head, and sustained other damage, in lat. 29 S., lon. 14 E., in a sudden shift of wind.

The Humboldt, Holmes, which arrived at Boston July 3 from Penang, had sprung her mizenmast, May 2, in a W.N.W. gale off Cape of Good Hope.

At ST. HELENA, May 31: Queen of the East, Healey, from Manila, and sailed for Liverpool; Montmorency, Sowerby, from Hong Kong, and sailed for Demerara; Isabella Harnett, Whelan, from Penang, and sailed for London June 1; Honigby, v. d. Valk, from Banjowangie, and sailed for Rotterdam; Knight, Reed, from Singapore; 4, Morayshire Mathews, from Foo-Chow-Foo, and sailed for London; Marie Elise, Rocher, from Sourabaya; 5, Ferdinand and Louis, Nolting, from Penang.

STEAM VESSELS IN THE UNITED KINGDOM.—A parliamentary return of sixty pages has been issued, giving full particulars of the whole of the steam vessels registered in the United Kingdom on or before the 1st of January last. The number of vessels registered was 1,495; the amount of register tonnage, 440,880; the amount of gross tonnage, 686,417.

THE GREAT EASTERN.—The Great Eastern is to be employed regularly in the trade between Liverpool and New York, but as at this season prospects of receipts from visitors at Liverpool is good, it is intended to exhibit the ship at that port from the second week in August, when she is expected to return from Quebec, until about the 10th September, when she will sail from New York, returning to the Mersey about the middle of October.

THE MIN.—On the 12th inst. a beautifully-modelled wooden ship, named the Min, was launched from the building yard of Messrs. Robert Steele and Sons. Her dimensions are—170½ ft. keel and forerake; 30½ ft. beam; depth of hold 19½ ft.; and her tonnage, 750, old measurement. She is the property of Mr. Cairney and Captain Rodger, of Glasgow. The vessel's destination is Singapore and China, in which line she will sail in conjunction with the Kate Kerney and the Ellen Rodger, both of which were built by the Messrs. Steele some years ago for the same owners.

NOTICE.—ORIENTAL AND GENERAL MARINE INSURANCE COMPANY.—The Directors beg to announce that they have secured the services of Mr. Philip Secretan, of Lloyds', as the Superintendent of the Underwriting Department of this Company.

NOTICE.—ORIENTAL AND GENERAL MARINE INSURANCE COMPANY.—Notice is hereby given, that the SHARE LIST of this Company will be CLOSED on THURSDAY NEXT, the 1st day of August, after which the ALLOTMENT will take place.

SECRETARY (pro tem.)—A. H. Gunn, Esq.

TEMPORARY OFFICES—London, 79, Lombard-street, E.C.

PROSPECTUS.

The Company is established for effecting the general insurance of shipping and cargoes, also the insurance of bullion.

The Directors, on publishing the prospectus of the Oriental and General Marine Insurance Company, announce that in consequence of the progress made since the registration of the Company, they are in a position to state that the allotment of the shares will be proceeded with at an early date.

A clause in the Deed of Settlement especially provides that every policy issued shall distinctly bear on the face of it that the capital and property of the Company shall alone be answerable for the settlement of its claims and engagements, and that no shareholder shall be liable beyond the amount of his or her share or shares in the stock of the Company.

Marine insurance companies, as a medium of investment, increase every year in public favour. The liberality and promptitude of their settlements, their safety, and the ease with which insurances are effected with them, are now fully appreciated.

The principle of marine insurance has been practically tested; its wisdom is now generally recognised, and the averages of hazard can be calculated with the nearest conceivable approximation to accuracy.

During the last few years a very lucrative field for marine insurance has been opened by the immense increase in the importation of the precious metals to this country, and their exportation to other parts of the world. The bullion trade, so far as it appears in the late official returns (which take no account of large parcels of gold passing by private hands), had risen to the amount of £72,758,959.

By calculations based on these and other accounts of the Board of Trade, it appears that the field of marine insurance is extending at the rate of at least £15,000,000 sterling per annum.

The immense profits realised by the old-established companies during the last ten years have greatly increased the value of their shares, as shown by the following list of present prices:—

Alliance—£25 paid, is worth about £60.
Indemnity—£5. 13s. 6d. paid, increased by bonuses to £50, is worth about £170.
London—£13. 10s. paid, is worth about £42.
Marine—£15 paid, increased by bonuses to £18, is worth about £110.
Royal Exchange—(Stock) £100 is worth about £300.

We may fairly assume that the four new Marine Insurance Companies established in 1859 and 1860 tended partially to supply a public want; and the prosperity which has attended them is shown by the accompanying statement of premiums received by each:—

Ocean, from 19th December, 1859 ...	£140,000
Universal, from 23rd January to 31st December, 1860	526,788
London and Provincial, from May, 1860, to May, 1861	100,257
Thames and Mersey, to 31st December	107,700
	£874,745

It is evident that the commercial community require greater facilities for effecting marine insurances; the Directors, therefore, cannot resist the conviction that there is abundant room for the successful prosecution of the present undertaking.

Application for shares will receive immediate attention; but no application will be taken into consideration unless a deposit of 10s per share be paid into the Company's bankers, to be allowed in payment of the first call, or returned in the event of shares not being allotted

All communications on the business of the office to be addressed to the Secretary, at the temporary offices of the Company, 79, Lombard-street, London, E.C.

Oriental and General Marine Insurance Company; Incorporated pursuant to Act of Parliament, 7 and 8 Vict., cap. 110.

Capital £1,000,000.

NORWICH UNION LIFE INSURANCE SOCIETY.—Instituted 1808.

SECRETARY—Sir SAMUEL BIGNOLD.

The whole of the profits divided with the assured.

Ample security offered by an accumulated capital of £2,000,000,

One-half of the first five annual premiums may remain as a permanent charge upon policies granted for the whole duration of life.

The income of the Society is upwards of £237,000.

The amount insured is upwards of £5,078,000.

Since its commencement 32,700 policies have been issued, and £5,066 555 paid to the representatives of 6,854 deceased members.

The bonuses may be applied at the option of the assured as follows:—

As a bonus added to the policy, or the amount may be received at once, that is, its cash value, or it may be applied in reduction of the future annual premium.

The rates of premium are lower than those of some offices by nearly 10 per cent., a benefit in itself equivalent to an annual bonus.

For prospectuses apply at the Society's Offices, Surrey-street, Norwich, and 6, Crescent, Blackfriars, London.

PAYNE'S CELEBRATED CURRY POWDER, unequalled for its delicious flavour and stimulating qualities.

The celebrated woollen Shirt now universally worn, price 18s. each.

Under Shirts, Socks, Neck-ties, and all articles suited for gentlemen, supplied at the lowest prices, for first-class goods.

HOLLOWAY'S OINTMENT AND PILLS.—COLDS, FEVER, INFLUENZA.—The uncertain weather is now producing these complaints, which demand immediate attention, or serious consequences may ensue. As curative agents nothing equals Holloway's remedies. The Ointment should be well rubbed, twice a day, on the back and chest at the same time that the Pills are taken internally. These diseases weekly endanger the lives of thousands who would have been speedily restored to health by these grand preservatives, which must in every case do good and never harm. They purify the blood and arrest fever. The palpitation of the heart, shortness of breath, and sense of oppression are at once removed. The feeble and exhausted frame, regaining vigour, testifies to the virtues of Holloway's preparations.

NOTICE.

DELFINO, NORONHA, PRINTER, OSWALD'S-TERRACE, VICTORIA, HONG KONG (Established 1847), begs to inform the community that being amply provided with printing materials of all kinds, from the best London tradesmen, he can undertake every variety of job-printing, and execute the same with neatness and despatch, upon moderate terms.

Overland prices current, embracing tabular work, executed on the shortest notice.

DR. J. McGRIGOR CROFT, M.R.C., Physician, London, Fell. E.S.; Fell. O.S.; late Staff-Surgeon and Medical Officer of H.M. Ceylon Rifles in China, and Ceylon (retired), may be consulted by his China and Eastern friends returning home suffering from tropical disease. Address, Mandarin Villa, 8, Abbey Road, St. John's Wood London.

DR. CURTIS'S MEDICAL WORK, "MANHOOD."

An Essay on Nervous and Generative Diseases.

The 140th Thousand, with numerous plates in a sealed envelope, price Half-a-Dollar,

MANHOOD: the CAUSE and CURE of PREMATURE DECLINE IN MAN, with plain directions for perfect restoration to health and vigour, being a Medical Essay on Nervous and Generative Diseases, their Prevention and Cure, with the Author's experience in the Treatment of the various Disqualifications of Marriage—whether resulting from Youthful Abuse, the Follies of Maturity, the Effects of Climate or Infection. The result of Twenty-five Years' successful practice. By Dr. J. L. CURTIS, 15, Albemarle-street, Piccadilly, London.

Consultations, Ten till Three and Six till Eight.

REVIEWS OF THE WORK.

"We feel no hesitation in saying, that there is no member of society by whom the book will not be found useful—whether such person hold the relation of a Parent-Preceptor, or Clergyman."—Sun, Evening Paper.

"Dr. Curtis has conferred a great boon by publishing this little work, in which is described the sources of those diseases which produce decline in youth, or more frequently premature old age."—Daily Telegraph, March 27, 1858.

The Book concludes with numerous varied and interesting cases, to which is added the Author's Receipt of a Preventive Lotion.

Dr. CURTIS may be consulted, as usual, either by letter or personally, at his residence, as above. Patients in INDIA, CHINA, and the COLONIES can be cured by correspondence only, and have their medicines sent with secrecy and despatch. The efficacy and harmless nature of the remedies employed by Dr. CURTIS, having been demonstrated by the most complete success during a practice extending over a period of Twenty-five Years, nervous sufferers of every class have a perfect guarantee that the utmost skill and experience will be made available in the treatment of their cases.

THE WORK SOLD BY HINNAM, QUEEN'S ROAD HONG KONG.

TEA LEAD FOR INDIA AND CHINA.

WIMSHURSTS PATENT METAL, FOIL, AND SHEET METAL COMPANY (Limited) are now prepared to supply in any quantity, and of suitable lengths and widths, to meet the requirements of the trade, their PATENT CUT LEAD for packing Teas, of which they invite an examination and trial. The Lead will be found not only more economical as to price, but in all respects superior in point of quality to that at present used for the packing of Teas. The Committee of Lloyds have reported most favourably as to its perfect adaptation for preserving Teas from sea and other damage, and strongly recommend its general adoption.

The Company's Lead is exclusively used by the Assam Company, to whom it has given the utmost satisfaction.

Samples of the Lead, Price Lists, and every information, had on application to the Company's Works, Old Ford Road, Bow, or to the Secretary, 16, Bishopsgate-street Within, London, E.C.

THE PEN SUPERSEDED.—Mark your Linen. The best and only method of Marking Linen, Silk, Stockings, Coarse Towels, or Books, so as to prevent the Ink washing out, is with CULLETON'S PATENT ELECTRO-SILVER PLATES. By means of this novel invention a thousand pieces of linen can be marked in a few hours. Initials, 1s. each; Name, 2s. 6d. Set of Moveable Numbers, 2s. 6d; Crest Plate, 5s., with the necessary directions for use. Post free Certificate from the eminent Dr. Sheridan Muspratt, F.R.S., Professor of Chemistry, &c.

"Several trials with Mr. Culleton's Patent Electro-Silver Plates, for marking linen, induce me to pronounce them excellent; the letters are beautifully marked in a deep black colour, without blotting, and after a long boiling, with either potass or soda, they remain unaltered. Other plates which I tried decomposed the ink, and in many cases burned holes in the linen. I can testify Mr. Culleton's Plates are incorrodible, and will not hurt the finest fabric.—(Signed) "SHERIDAN MUSPRATT

"College of Chemistry, Liverpool

"May, 15, 1854."

All orders to be sent to the Patentee and Sole Maker.

T. CULLETON, 25, Cranbourn-street, corner of St. Martin's-lane, London, W.C.

All Orders executed by Return of Post.

By order, HENRY C. ORTON, Secretary.

FOREIGN CORRESPONDENCE!

THE greatest novelty of the Day in Paper is the NEW INDIA PAPER, which is an entirely New Fabric, possessing a peculiar surface which renders it admirably suited for rapid writers. It is further distinguished from the usual kind of Foreign Paper, by its being as pleasant to write upon as stout writing paper, whereas with any other than a very light hand the pen is very liable to catch in the thin paper used ordinarily for Foreign Correspondence. It may be had in various note and letter sizes, plain, ruled, and black-bordered. The New India Envelopes possess two most valuable qualities, viz., lightness, and the strength and toughness of stout Cartridge Paper. They are less than half the usual price of Foreign Envelopes.

Three Sheets of India Note and Envelope, weigh under the ½-oz. The Envelopes may be had plain, or printed "via Marseilles," or Southampton. Ostend, France, Belgium, Liverpool, Halifax, Trieste, Lisbon, or in any other manner to order, and likewise with Mourning Border.

Sold only by E. TOWNSEND HAMBLIN, Stationer 421, Oxford-street, London, W.

THE LONDON AND CHINA TELEGRAPH.

List of Passengers.

PASSENGERS INWARD.

By this Mail.—From Hong Kong for Southampton.—Messrs. Dundas, Sibbald, Jamieson, Beauchamp, Rowe, Wood, Thomas, G. T. Aldricks, Master, R.N.; Lieut. Bontein, R.N.; Assistant-Surgeon Robinson, Messrs. Coutts, Dawkins, Corbett, Blades, and Schmidt. For Marseilles.—Mr. and Mrs. Campbell, Messrs. D. O. Clarke, and C. Rottish. For Alexandria.—Rev. Mr. Raimundo.

PASSENGERS OUTWARD.

Per P. and O. str., 4th August, from Southampton to Singapore: Mr. A. K. Cockran, Mr. J. D. Vaughan, Mr. C. Velge. To Hong Kong: Mr. O. Bullock, Mr. Rennie, Mr. G. Aye s, Mr. Cheverton, Captains Nollett and Coldbeck. To Shanghai: Messrs. Cheshire, W. G. Stronach, C. T. Gardiner. From Marseilles, 12th August, to Singapore: Mr. H. Borel. To Shanghai: Mr. J. Conrad Morf, Mr. F. St. John. To Hong Kong: Mr. Vielle, Mr. A. L. Peary. From Alexandria to Shanghai: Mr. John Gavin. To Singapore: Miss Theresa Collu, Mr. H. Gonzenbach. From Suez to Hong Kong: Mr. G. Ladage, Mr. Niemer.

Per P. and O. str., 20th August, from Southampton to Hong Kong: Mr. Tillinghast, Master J. Camo, Mr. D. Walsh. From Marseilles, 28th August, for Hong Kong: Mr. and Mrs. F. Woods, Master G. Duddell, Mr. Laprak.

Per P. and O. str., 27th August, from Southampton to Hong Kong, via Bombay: Rev. J. Cox.

Per P. and O. str., 4th Sept., from Southampton to Hong Kong: Messrs. Ramsay, F. Blackhead, A. Brown, H. R. Shaw, R.N., J. Cann, A. Wright, J. Mc L. Brown, G. P. Thomson. — Winstanley, and W. Dieckmann. To Shanghai: Mr. K. C. Dow, Mr. J. M. Beatty, Mr. E. D. Jones. To Singapore: Governor-General of Dutch Possessions, lady and son, Mr. T. T. S. de Bech, daughter, Miss de Bech, Miss Scheefmaker and two servants, Mr. Jno. Pryce. From Marseilles, 12th Sept., to Hong Kong: Mr. W. Maxwell, Mr. A. K. Johnston, Messrs. Inde, Azcarraga, and R. G. Caldecon, Mr. and Mrs. Heira.

Per P. and O. str., 27th Sept., from Southampton to Hong Kong, via Bombay: Mrs. Fox. From Marseilles, 5th October, to Hong Kong, via Bombay: Mr. Francis Porter, Mr. Mourilyan. To Shanghai, via Bombay: Mr. T. N. Besier, Mr. W. L. Hartmans.

Per P. and O. str., 4th Oct., from Southampton to Hong Kong: Mrs. M. H. Dowbiggin, Mrs. Fox and lady friend, Dr. Smith (Bishop of Victoria) and Mrs. Smith, Mr. T. H. Thompson, Mr. Lawrence, Mr. J. W. Powell, Mr. Gilman, Mr. H. B. Lemann. To Shanghai: Mr. Garrett. From Marseilles, 12th October, to Singapore: Admiral and Mrs. May. To Shanghai: Mr. and Mrs. Winchester, Mr. M. L. Kniffler. To Hong Kong: W. H. Overton.

PASSENGERS ARRIVED OUTWARD.

At Hong Kong.—Per Maggie Miller from Calcutta: Messrs. G. E. Petter, J. J. Patterson, G. R. Pinder, and Mons Guilbert. Per City of Carlisle, Mr. Smith, from Bombay. Per Columbian from England, &c.: Mr. and Mrs. Thorburn, Mr. and Mrs. Jackson, Messrs. Simpson, Holsworth, and, and Beckwith; from Galle, Messrs. Kingsmill, Baker, Andrews, Storey, Thomas, Fabris, Tranter, Harris and Medhurst; from Bombay, Lieut. Brown, Bomanjee, Framjee, Lallarakah, and Ruttunjee. Per Penguin from New York: Messrs. Fisher, and Clark.

Summary of News from the Far East.

JAPAN.

The news from Japan contains no point of interest. Some surprise is expressed that Mr. Alcock should have returned to Yedo without having first ascertained that steps had been taken to apprehend the murderers of Mr. Heusken; but as no active steps were taken by Mr. Harris, the American Consul, in this matter, whose personal interest was so much greater, we do not think that our consul is to be blamed for his conduct.

By the latest advices we learn that Mr. Alcock was at Osaca, and intended to accompany H.M.S. *Ringdove* in her survey of the harbour.

CHINA.

PEKING.

The following items are from the *Peking Gazette*:—The following is an edict relative to the capture, recapture, and second capture of Hai-yen, reported by the Tartar General and Governor of Hangchow and Imperial Commissioner here:—

Sui-chang and Wang-yu-ling have reported the recapture of Hai-yen, and the defeat of the Rebels at Chung-li.

In March last the Rebels took Hai-yen, and it was recaptured in April by the degraded General Chang-wei-pang who had been despatched by Sui-chang in aid of the acting Commander-in-chief of Keang-nan, Tseng-ping-chum.

The Rebels who had taken up their quarters at Chung-li were also attacked by the degraded Major-General Mih-siug-chao and their water post destroyed, their boats sunk, and their barricades burnt; and Ting-hu district is (consequently) quite cleared of Rebels.

We have received a memorial from Hsieh-huau that after Hai-yen was retaken it was again taken on the 17th of April, that a portion of the Rebels had gone on to Chapu, and that the Lieutenant-General Hsieh-ling-an was not to be found and also that Ping-hu Hsun had fallen.

The officers therefore reported by Sui-chang with the exception of Hsieh-ling-ah and Mih-sing-chao whose whereabouts Sui-chang must discover and report, General Tseng-ping-chaun, Colonel Huang-chin-yu, and other meritorious officers, must wait till Hai-yen is retaken, when we will issue our orders with regard to their reward or punishment.

From Peking the little news we have is satisfactory, a very good understanding existing between the foreign legations and the Prince of Kung. The Emperor's health was improving, and his return to the capital was apparently the only thing required to restore confidence, and rescue it from the stagnant state into which it has fallen. Mr. Bruce has, in some measure, removed the restriction which prevented British subjects from visiting the capital.

THE YANG-TSE-KIANG.

The weather at Hankow has been very stormy, with heavy falls of rain. All the low ground around Hankow seemed under water, and the inhabitants appeared much afraid that the town itself would be flooded. The current of the Yang-tse had greatly increased in force, and vessels found good holding ground in situations eligible for the discharge of cargo, very difficult to meet with. Anchorage in the Han river during the freshes seemed impossible, on account of the "Chow Chow" water and the shifting nature of the bottom; the best situation seems to be opposite to Han-yang. Nothing but steam vessels could find safety. A good deal of activity was observable among the natives at Hankow, many boats laden with

Digitized by Google

China goods were to be seen moving about; but the streets were not thronged, and little more than half the shops were open. No especial apprehension of Rebels was expressed, and small, but well-found, Mandarin-boats seemed numerous. For foreign imports no demand whatsoever existed, and sales even in barter could not be effected to any extent. Storage-room was very difficult to meet with, and the Chinese asked high rents. Samples representing a few chops of Congou were on view, and two or three parcels have been purchased at 22 to 25 taels short price.. The quality of these samples was not unusually good, and they were not very well made in leaf. No large quantity of tea (except, perhaps, under contract) appeared to be immediately looked for.

The Yangtse had overflowed its banks very generally above Nanking, thereby increasing the difficulties of navigation to vessels ascending the stream. Below Kiukiang very few boats are to be seen, and as Nanking is approached a sense of solitude oppresses the traveller. The Rebels are laying a desultory siege to Chin-kiang, and it is the effect of their stray shots which has driven the British Consul to Silver Island.

TIEN-TSIN.

From Tien-tsin we learn that the Prussian Consul has been carrying on some negotiations with Tsunghow. We believe that Baron Eulenberg wanted to go to Peking, but could not arrange matters with the official at Tien tsin. The trade in native junks at this port is said to have been quite paralysed by the civil commotions in the Southern provinces, and particularly by the fall of Soochow. The prospects of a brisk foreign trade springing up here are still as encouraging as ever, but the native trade is said to be paralysed owing to the fall of Soochow and the disturbed state of the Southern provinces. The number of junks which entered the port in the spring of 1860, between the breaking up of the river ice, and the 25th May, was 1,200, whereas this year during the same period scarcely more than twenty have entered. Mr. Mongan, the acting-consul, has established Custom-house regulations.

CHEFOO.

By the last accounts from Chefoo everything was dull, house-rents high, and the people very extortionate, which simply means as anxious to get large profits as we are ourselves whenever we can command the market. The climate is reported to be pleasant, seventy degrees being the maximum temperature.

NEW-CHWANG.

From New-Chwang, the newly opened port in Manchuria, accounts have been received describing it as situated in a low, flat, swampy country. The town stands on a creek eight miles from the main river and eighty from its mouth. It is approached by a very tortuous river which is full of sand banks. About fifteen miles below New-Chwang the river forms into two branches, one of which called Wy-leaou-ho runs on about 330 miles to Le-mun-tun, a place of great trade. The other branch, called the Le-leaou-ho, goes on to Mard-ka. At Tai-tsze the Tien-tsin and Shangtung junks load, while those from Ningpo and Shanghai load at Yenko. There is a large junk trade at both these places, which export peas, beans, tobacco, pea-cake, oil, and drugs. Yenko is a filthy place of mud huts built in a swamp, the streets so full of uncleanliness that it is difficult to walk about, and nothing is to be seen but poverty and dirt. The country all round is flat, with not a blade of grass to relieve the eye. Cattle and a few fruits are procurable with difficulty. Altogether the prospects of this port are not encouraging.

SHANGHAI.

Her Majesty's ships *Encounter* and *Flamer* left Shanghai for Chapoo. Having anchored as close in as the depth of water would admit, Captain Dew, accompanied by Mr. Alabaster, the interpreter, proceeded on shore displaying a flag of truce. They landed this time without opposition, the place appearing deserted, but while advancing up the hill to where innumerable banners were displayed, parties of Rebels crept out from their hiding-places and gathered round them. After a little pressing, the commandant was made to come out and receive in person a letter, the delivery of which was the object of the visit. Several mandarin boats (they called themselves gunboats even in the face of an English 68-pounder), came and anchored near, asking permission to join in, what they imagined was going to be, the bombardment of Chapoo, but finding that the men-of-war were going away, they speedily moved off to a more secure and certainly more distant anchorage. The *Encounter* proceeded to Ningpo, the *Thunder* returning to Shanghai with Mr. Alabaster.

The "Chinese Foreign Legion" has been disbanded, and the following account is given of its termination:—"On the 11th of May last this band, who were reduced to seventy, made a night attack upon Tsing-poo, in which, owing to the failure of great assistance promised by their Chinese brethren in arms, they were completely worsted. One hundred dollars each was to have rewarded their success, but after fighting one hour and forty minutes their attempt became hopeless. At dawn twenty-three of the European assailants were *hors de combat*, along with five Chinamen." The *North China Herald* thus describes matters after the repulse:—

"They buried three of the dead, namely, Boyer (*Actæon*), Shaw and Foley (merchantmen), the only funeral service being a few rounds of musketry and a handful of clay cast by each upon the grave of their dead comrades. The wounded were sent to Soon-kong. All were more or less hurt—a drummer (*Actæon*), Street (R.A.), Darby, Peters, and Brown, dangerously. They saw nothing of the twenty gunboats and 9,000 men who were to have co-operated with them, until they met them on their return about three miles from the city. After this affair they were directed by their captain not to land at Shanghai, but to proceed to Woosung, where vessels would be provided for them as quarters, and to return in six weeks, during which time their pay should continue.

"Most of them, however, fell into the hands of the parties in search of them, and have been handed over to their Consuls, of whom the British alone has brought any of them to trial.

"The first time an expedition was sent up the river to try and capture these men, a courier had been despatched to warn them of the approach of a gun-boat, when they were got into heavy marching order and marched off to a kind of hiding-place within the Yamuns of some of the city authorities, under the assurance from Ward that they should never be captured by the British if China was large enough to hold them, for he would march them away over the hills first.

"The road to their hiding-place led through many obscure and intricate passages, and from their lair they actually witnessed the interview between the searching party and the blue button mandarin who coolly told them that no foreigners had been in the city.

"The force is now disbanded. Some have probably suffered capital punishment at the hands of the Chinese, some have fallen in action, some are expiating their offences against our laws in common gaols, and some few have escaped, it is to be hoped, with sufficient examples before them never to again engage in such an illegitimate mode of earning a livelihood as enrolling themselves in such disreputable ranks as those of a 'Chinese Foreign Legion.'"

Two or three chops of new tea, received from Hankow, have been shipped per *Glenclune* for London, and some parcels of new silk go forward by the present steamer.

The robberies committed in the interior have been more frequent. The last man murdered was James Roberts, a Swede, well known here for the past three years as a most respectable quiet man and formerly sailing with Captain Lynch. He started to go up the country in a boat on the 6th inst. with silkmen for the purpose of purchasing cocoons. On the afternoon of the 7th inst. when near Lo-ka Hong, they were met by four boats, each containing about twenty men wearing their hair long and dressed in white with red sashes, who, under pretence of wanting to buy arms, obtained from Roberts his two revolvers to look at; when in that defenceless state he received a stab from behind and fell, and was then despatched by repeated sword cuts, and his body thrown into the river. The Chinese in the boat were threatened with instant death if they did not produce money, and the miscreants eventually left, taking with them 4,000 Carolus dollars, 80,000 cash, and everything else of value in the boat. The place where this occurred is about sixty miles from Shanghai and twenty this side of San-lee Jaou.

The *North China Herald* gives the following account of the piracies committed by Europeans:—

"It will be remembered by most of our readers that in November last a boat belonging to Mr. Trannack was stolen from her anchorage at Hong-que, and for a long time we received no further intelligence of her than was furnished by the lowda of the boat in his deposition before H.M.'s Vice-Consul on the 19th of that month, although three of the men who were engaged in the robbery were subsequently captured, tried for piracy, and sentenced to one year's imprisonment by H.M.'s Consul.

"We are, however, now enabled to give an account from a statement made by one of the pirates engaged, Smith, who was lately apprehended, tried on the 28th ult., and sentenced to twelve months' imprisonment in Hong Kong gaol.

"The gang of pirates who committed the robbery, viz., Allen, Smith, Kelly, and Neil, with three others whose names are given as George, Fred, and William, were living over on the Hong-que side previous to the event. Having laid their plans they sallied forth at 2 o'clock in the morning, accompanied by a Chinaman said to have been a rebel officer, and seized the boat which was lying off Mr. Pinder's yard, got her under weigh and proceeded towards Woosung, where they released the Chinese crew, whom they had bound, and then compelled them to take her to a place called Lew-ho, where they managed to escape. From thence they proceeded to Soochow, and landed the rebel officer who accompanied them. They then proceeded down the river towards Tsze-kiang, and stopped two up-country boats which they plundered, taking about $200; after that they returned up the river to about twelve miles above Tsze-

Digitized by Google

kiang, where they remained a short time, and fell in with a boat on her way down from Soochow, which appears to have been trading with the Rebels, for the pirates threatening to bring them before the mandarins, they gave up $2,000 and a quantity of arms, rather than go before the Imperial authorities.

"These appear to have been their first operations after becoming possessed of the boat, and remaining inactive for a couple of days, after that they again commenced their nefarious work. Their next prey was a boat coming from Soochow, having on board about $3,000 in sycee and coin, which they seized, allowing the boat with the rest of her cargo and passengers to proceed on her way to Shanghai. On the same day they boarded another boat from Shanghai, loaded with arms, ammunition, and silk, and about twelve catties of opium; she had an English flag flying, and had five Cantonese on board, who were all armed. The pirates hailed her from the bank to come alongside of their boat, which she did, and was boarded by the two men, Smith and Neil, who disarmed the crew and then took all the arms and ammunition out of her. The Chinamen then asked to be allowed to go down to Shanghai, from whence they had promised to return with a ransom of $1,500, in the meantime leaving all the arms, &c., and one man as hostage. They promised to be back in 36 hours, but at the expiration of 48 hours they had not arrived. In the interim the pirates occupied themselves in plundering, and stopped two small Soochow boats, from which they took $150. They then went some ten or twelve miles further up the river, where this notable gang broke up —Allen, Kelly, William, George, and Fred returning to Shanghai, the men Smith and Neil remaining by the boat. Smith then tried to induce the Chinaman who remained in the boat to go to Soochow and sell the firearms, and offered him $25 wherewith to procure a small boat; but this he refused to do unless Smith and Neil accompanied him. This they did under a promise of $400 from their prisoner, agreeing, however, to see him safe back to Shanghai. Owing to contrary winds, they were obliged to anchor at Dee-cho, from whence they proceeded in a small boat to Lew-ho. The man Smith had a Rebel pass in his possession which the Chinaman somehow persuaded him to let him have, and which he had no sooner obtained than he informed some of the Rebels that Smith was a pirate and wanted to rob him, upon which one of them levelled a pistol at Smith and fired, but missed his aim. Smith then left Lew-ho in the small boat which the Chinaman had engaged to bring up the firearms, and taking Neil out of the other boat, left her and the arms, &c., at anchor, and they both returned to Shanghai, where they remained for five days, and then went to Ningpo. Smith, however, revisiting Shanghai, was apprehended as above stated.

"As a sequel to the history of this piratical expedition, it is said that the boat was found at Dee-cho by a party of Europeans on their way down from Soochow, that they took possession of her, and made themselves so noxious to the country people that they were all subsequently killed by the Chinese Authorities."

NINGPO.

The only item of news from Ningpo is, that the Foreign Customs Collectorate gives utter dissatisfaction to the Chinese merchants, many of whom having vessels which fly the British flag, come under its regulations. They are escaping the delay and trouble, by removing their trade into native bottoms. Heavy floods have been reported in the vicinity of Hangchow, and many dead bodies along with much debris have been floated down the river past Ningpo.

SWATOW.

A letter from Swatow on the subject of the attack on Messrs. Bradley's premises, says:—

"You will be glad to hear that the robbery of Bradley and Co.'s hong is likely to be settled without resort to hostilities. The Chinese officials have agreed to recover for these gentlemen within six days the stolen property—or see that they are remunerated in full for the loss. The *Dacotah* in the meanwhile visits Hong Kong, and will return if it be necessary to assist in the final arrangement of the matter. The arrival of the *John Adams* and the *Dacotah* convinced the authorities that the Consul was in earnest in his demands, and that they must be complied with. The Captain of the *Dacotah* was instructed by the Commodore, we understand, to insist upon an ample satisfaction. We hope the officials will be able to do all that they have promised. Time will show. The Swaboey people are noted for their daring and turbulence, and are the most hostile to foreigners of all the Chinese in this region. It is almost more than we dare hope for that they will quietly submit to what must be to them a real humiliation and loss of prestige."

A number of foreign vessels have recently arrived at Swatow, and trade is looking up again. Most of the imports find their way into the country through other channels, nor do all the exports come through Swatow. Large quantities of goods, especially Opium, find their way into the country direct from Hong Kong through Kow-loon.

The operations, by means of a diving apparatus, on the wreck of the *Mazeppa*, are likely to prove a success—a success, too, some suggest, in ascertaining that the Chinese during these two years have not been idle.

Mr. Consul Caine is making the attempt to pay a visit in person to the Taou-tai at Chau-chau-fu. He started in the gunboat *Firm* to go up by the branch of the river leading by Chung Lun, but was unable to proceed for want of water, but he makes another attempt by the channel of the river passing by Kiet-yang.

The Siamese barque *Kim-Hong-Seng*, Captain Christian, was stranded in attempting to get into the harbour. She is likely to prove a total loss.

HONG KONG.

The Executive Council resumed their inquiry into the charges against Mr. Caldwell. The stage which this inquiry has now reached renews the interest that has been felt from time to time throughout its progress. Mr. Caldwell's defence has been handed in, and ordered to be printed. The case against him has been affirmed by the Governor to be closed; all we now wait for is the decision of the council. But the work of the council does not end here; they met for the purpose of entertaining charges against Mr. May. Three charges were made, only one of which was entertained, namely, that Mr. May had stated on oath that Mr. Caldwell had no knowledge of the written Chinese character. These charges have been declared not proven.

The appointment of Mr. Callaghan, the Chief Magistrate at Hong Kong, to the Governorship of Labuan, is thus noticed:—

"The colony is about to lose its chief magistrate. Mr. Callaghan, after a very brief stay amongst us of six months, is leaving by next mail steamer for Singapore, *en route* to Labuan, of which colony he has been appointed Governor. The salary is nominally only £880 per annum; but the home government, we are told, by some means not specified, are to add £380 and £100 to his income, thus raising the total to the amount of his present pay, viz., £1,200. During the time he has filled his present office, Mr. Callaghan has been indefatigable in the discharge of his duties, which, however, being entirely new to him, he must have fretted over considerably; so that independent of the advancement in position, he doubtless welcomes the change as quite a relief. We beg to congratulate him on his preferment."

The Supreme Court has decided the actions of Mr. T. T. Meadows, the late Consul at Shanghai, against Messrs. Fitzroy and Davies, the Chinese Commissioners, for slander, in favour of Mr. Meadows, damages in each case being given at $500.

Mr. Robert Brand is announced as authorised to sign the firm of Smith, Kennedy and Co., and Mr. John Howard Gwyther has been announced as Manager at Shanghai of the Chartered Bank of India, Australia, and China.

The *China Mail* of the 13th June has the following on the new Sailors' Home:—

"The committee of the Sailors' Home had a meeting yesterday afternoon, to consider the reports sent in at their request by Mr. Rawling, with reference to the eligibility of two sites, one at the back of the Murray Barracks, and the other to the eastward of the Naval Stores. The site at the back of the Murray Barracks would cost, to clear it and otherwise prepare it for building upon, about $25,000. By adopting the plans sent in, the reasons for dreading unhealthiness in this site would be all taken away, so that the question resolved itself into one of cost, and on that ground this site had to be rejected. To acquire the other site, which is about 700 feet by 100, and situated rather low, a sum of $20,000 would have to be expended, and this fact was again fatal, in the views of the committee. It is really painful to see a good work which has been so handsomely begun by the community coming to a standstill for want of a site, when the Government possesses a piece of ground such as Possession Point, which some old tradition tells us is reserved for a battery. Every practical man who views the altered state of the colony, and sees such a place as Stonecutter's Island in our possession, knows that this site will never be made use of as a fortification, but might be handed over gracefully to the Sailors' Home committee to-morrow. We hope the Government will consider the state of affairs and concede this piece of ground, or the part of it required for the erection of a structure so honourable to the colonists and to the cause of humanity as a Sailors' Home."

(FROM AN OCCASIONAL CORRESPONDENT.)

HONG KONG, JUNE 27.

I have recently paid a visit to Newchwang, one of the new places of trade that has been opened to us, not that I think it can ever be of much service, for the town, which is a wretched mud-built place, is seventy miles up the river from the port of Yenko, which is itself eight miles inside the bar of the Min Leako. Thus it is most unfavourably situated, and, moreover, it is literally built in a marsh, and as far as the eye can see, there is nothing but a dead muddy flat. The town contains about 40,000 Tartar inhabitants. The only trade at present appears to be in beans, peas, the oil extracted from them, coarse tobacco, and a few drugs. This trade is carried on by junks, principally from Shanghai and Ningpo, and Shangtung. There is not a place for the consul to live in at Yenko, where his services would be of value, while at Newchwang, standing as it does on a shallow river, so that gunboats of the lightest draught cannot get within twenty-five miles of it, and possessing the other disadvantages I have mentioned, I cannot think that they will prove of much avail.

The *Woodcock* gunboat, Lieut. Bosanquet, is left for the disposal of Mr. Consul Meadows. Everything is very quiet at Tien-tsin, and Mr. Bruce has removed his recent restriction, and allowed persons to visit Peking. It is quite decided now that none of our troops are to leave Tien-tsin for the present. A great many of the French have left, and have been sent on to Cochin China. Indeed, there are not more than 500 at Tien-tsin, about 250

Digitized by Google

at Shanghai, and 400 in Canton to represent their whole military force in China. From Chefoo all their troops are withdrawn, but they have two troopships lying there, and a vessel as a coal depot.

Lord John Hay, in the *Aden*, is the senior officer in the gulf of Pecheli and Chefoo, where he has established a dockyard as his head-quarters. He has under him the *Slaney* and *Watchful* gunboats at that place, the *Clown* and *Drake* at the Peiho, and the *Atalanta* to run the mails between Shanghai, Chefoo, and Peiho. At Shanghai the senior officer is Captain Dew, of the *Encounter*, who will be relieved by Captain Corbett in the *Scout* (now refitting here,) when the *Encounter* goes to Ningpo, where the *Reynard* (Commander Goodenough) is now. It is anticipated that the Rebels will attack that place.

The *Ringdove* (Commander Craigie) is at Japan, having relieved the *Pioneer*, which vessel is on her way down here to be docked, having been ashore. The *Vulcan* started on the 25th June, with Sir John Michel and staff, for the Peiho. He intends to visit Shanghai and Japan, after inspecting the troops at Tien-tsin. The *Vulcan* took up troops of the 60th rifles, artillery and others, amounting to 450, for Tien-tsin. The *Simoom* (Commander Cooke) arrived at Hong Kong this morning, having taken troops from here to Madras. She has made a very good passage. Admiral Hope is here in the *Imperieuse*, but leaves immediately after the arrival of the next mail, for Japan and the North. Sir Hercules Robinson goes with him for a cruise. Captain Borlasi, in H.M.S *Pearl*, remains here as senior officer. The *Sphinx* starts to-morrow to tow the transport *Lemar*, with invalids, some 800 miles on her way home, and then returns here, after which she proceeds to Chefoo, to relieve Lord John Hay in Odin, who, it is supposed, goes as Commodore to India, vice Commodore McCleverly. It is now settled that our troops are to leave Canton in October. In fact, the stores are being fast cleared out of it now by H.M.'s ships *Waterman* and *Cooper*. Twiss Battery of Artillery then goes on to Mauritius in the *Sphinx*. The 99th Regiment from Canton relieve the 60th, who go home; the 44th go to India and the 5th Bombay (part of which are now at Hong Kong from Canton,) relieve them here. Brigadier Craufurd is expected down here to-day to take command in Sir John Michel's absence. The troops are all quartered at Kowloon in comfortable huts, and appear very healthy notwithstanding the heavy rains and intense heats everyone seems very healthy.

CANTON.

Under a warrant from the British Vice-Consul at Whampoa, the Customs authorities removed a quantity of timber brought from Macao in China boats, and placed in Mr. Cowper's shipyard. Mr. Cowper had thought, it appears, that, if the timber were brought up in native boats—the right to charter native boats being specially provided for in Art. XIV. of the Treaty—he might save the duty. The Customs ruled otherwise.

Mr. Harry Parkes, C.B., arrived back in Canton on the 17th June, and resumed his duties as chief of the Allied Commission, Mr. D. B. Robertson returning to the British Consulate. Mr. Parkes says, we are told, that every soldier will be out of garrison by the 1st October. Then comes the question—What next? With the garrison will go the Allied Commission as a matter of course, the action of the body at present being almost solely confined to matters of police, and for such action the treaties make no provision. The breaking up of the commissioners' establishment will be deeply regretted by Canton citizens, a majority of whom, if they were not afraid to move, would pray our officers to remain where they are, and take a more general part in the government of the city, admittedly under the control of as venal a crew as ever figured on the rolls of the Manchou civil service.

The *Friend of China* of the 15th and 22nd June contains a review of our trade and position in China during the present century, with a special view to the change which has occurred in our relations with the country during the last twenty-five years.

SIAM.

BANKOK.

His Majesty the First King of Siam has communicated to the Siamese Consul at Singapore, that a fleet of Siamese steamers will leave Bangkok on the 10th of July, and visit the different dependencies of the kingdom in the Gulf of Siam, coming on to Singapore, from whence it will proceed to Kedah and the Siamese possessions to the north of Penang. His Majesty's second son Prince Krom Mun Visnunarth Nibhadhoon, his fifth son (a boy of six years of age), and his Lordship Chauphya Sri Suri Wongs Samuh Pra Kralahome, will accompany the expedition.

BORNEO.

LABUAN.

Dates from Labuan are to the 15th June. The *Yarro*, with machinery from England, for the coal mines, had arrived on 13th May; and everything was progressing favourably. The water was not yet completely out of the pit, but with the new pumps this would soon be attained. Much sickness had prevailed during April and May, but no serious case existed at the date of writing.

JAVA.

BATAVIA.

The results of the frightful "seaquake" which effected such injury on the island of Sino, on the 9th March last, are detailed at considerable length in the *Singapore Free Press*. It appears that more than eight hundred persons lost their lives in the catastrophe. Most of the bodies were carried into the sea.

MALACCA STRAITS.

SINGAPORE.

The *Straits Times* advocates the adoption of a land telegraph between Rangoon and Singapore, and asserts that there are no physical difficulties to be encountered of an insuperable nature.

We observe that the same paper publishes in extenso, Mr. Simmonds' admirable Paper, read at the Society of Arts, on the trade of the Eastern Archipelago.

His Highness the Bindahara of Pahang visited Singapore in June, on the invitation of the Governor, who offered to mediate between His Highness and his relative, Wang Ahmat, in the quarrels which exist between them. His friendly intervention has, however, proved fruitless.

Births, Marriages, and Deaths.

(Announcements for Subscribers are made free of charge.)

BIRTHS.

COHEN.—On the 7th inst., at Albert Lodge, Brixton-road, the wife of Henry J. Cohen, Esq., of a daughter.

COURT.—On the 27th ult., at Nottingham, the wife of Francis Court, Esq., of the General Post-office, of a daughter.

COX.—On the 7th inst., at the Rectory, Deal, the wife of the Rev. F. Cox, of a daughter.

CRAKANTHORPE—On the 25th July, at Lynn, Norfolk, the wife of R. H. Crakanthorpe, Esq., Postmaster of Lynn, late of Hong Kong, of a daughter.

DRUMMOND.—On the 5th inst., at No. 1, Montagu-square, the Hon. Mrs. Edgar Drummond, of a daughter.

LAWRENCE—At Canton, on the 16th June, the wife of F. W. Lawrence, Esq., of a son.

MORGAN—At Batavia, on 1st June, the wife of William Morgan, Esq., of a son.

NIAS.—On the 29th July, at Surbiton, Surrey, the wife of Rear-Admiral Nias, C.B., of a daughter.

NORONHA—At Macao, on the 13th June, Mrs. Jose, Noronha, of a daughter.

RUAULT.—On the 6th inst., at Harrow-on-the-Hill, Madame Gustave Ruault, of a daughter.

SCHMIDT.—At Singapore, on the 14th June, the wife of E. A. Schmidt, Esq., of a son.

SOUZA.—At Singapore, on 3rd July, the wife of W. F. de Souza, of a son.

MARRIAGES.

BEDFORD—BROUGHTON.—On the 6th inst., at Christ Church, St. Marylebone, by the Rev. Henry Vivian Broughton, vicar of Wellingborough, Charles St. Clare Bedford, Esq., Westminster, to Harriet Emma, eldest daughter of the late Robert Edward Broughton, Esq., F.R.S., of Dorset-square.

BUXEY—BALLARD.—At Shanghai, on the 26th May, by the Rev. J. Hobson, Walter Buxey, Esq., to Miss Jane Ballard.

DUNLOP—DOWSON.—On the 1st inst., at Putney parish church, by the Rev. J. Henley, R. H. Wallace Dunlop, Esq., C.B., of H.M.'s Bengal Civil Service, to Lucy, second daughter of the late Joseph Dowson, Esq.

ERSKINE—SEYMOUR.—On the 26th ult., by special license, at Windsor Great Park, Henry David Erskine, Esq., of Cardross, Perthshire, to Horatia Elizabeth, eldest daughter of Major-General and Lady Emily Seymour.

HERVEY—BENYON.—On the 30th July, at St. George's Hanover-square, by the Rev. Henry Howarth, Lord Augustus H. C. Hervey, to Mariana, widow of Ashton Benyon, Esq., 63rd Regt., of Stetchworth-park, Cambridgeshire.

INGLIS—ROSE.—On the 1st inst., at Park-place, Elgin, by the Rev. D. C. Gordon, Miss Lilias B. Rose, daughter of Mr. R. J. Rose, late of Calcutta, to Archibald Inglis Esq., indigo planter, Tirhoot, East Indies.

LUGG—ROBINSON.—On the 6th inst., at Landewednack, by the Rev. P. Vyvyan Robinson, the Rev. John Lugg, of St. Keverne, and chaplain of H.M.S. *Sanspareil*, to Mary Sophia, eldest daughter of Philip Vyvyan Robinson, Esq., of Nansloe, Helstone, Cornwall.

MASON—HERRON.—At the Parish Church, Lewisham, by the Rev. H. Legge, D.C.L., on the 20th ult., D. K. Mason, Esq., of Bankok, to Kate, eldest daughter of James Herron, Esq., of Blackheath.

TWINING—STILWELL.—On the 27th ult., at Dorking, Richard Radcliffe Twining, Esq., of the Strand, London, to Mary Jane, eldest daughter of John Gilliam Stilwell, Esq., of Arundel-street, Strand.

WILSONE—SARLE.—At Singapore, on the 29th June, C. H. H. Wilsone, Esq., to Miss Fanny A. Sarle.

DEATHS.

BELL.—At sea, on the 12th June, Andrew Bell, aged 24 years, carpenter of the British ship *Primula*, of fever.

CARY.—At the Government Civil Hospital, Hong Kong, on the 19th June, P. C. Cary.

COLE.—At Spring-gardens, Hong Kong, on the 23rd June, William Cole, Chief Dispenser, Military Medical Department.

DIXON—At Shanghai, on the 7th June, Mr. E. W. Dixon, of Boston, U.S.A.

HOLLAND.—At Hong Kong on the 12th June, on board the P. and O. Co.'s steamer *Peking*, John Holland, chief saloon waiter, aged 61 years.

JOY—At Alexandria, Captain Joy, P. and O. Co.'s steamer *Ellora*.

ROOKE.—At Hong Kong, on the 13th June, on board the Siamese barque *Rapid*, James Rooke, Master.

COMMERCIAL REPORT.

CHINA—EXPORTS.

Shanghai.—Tea (Black).—No further arrivals have taken place and every parcel of fair tea has been bought, leaving only some 4,000 chests of common to very common Hohows, Hoochows, &c., and 1,300 chests of low Flowery Pekoes. Settlements amount to 2,345 chests of fair Hohow and Ningchow at 21 to 23½ taels, chiefly in barter, and the total purchases to date now amount to 79,130 chests against 274,214 chests at the corresponding period last season. Stocks: Hohow 1,600 chests, Hoochow and other low grades 2,400 chests, new Flowery Pekoes 1,000 chests, old 300 chests. There have been a few more small musters of new season's Teas received from Hankow, and two or three contract chops have arrived from thence and have already been shipped to London. Greens.—Little or nothing has been done here, and transactions at Ningpo for America have been large, while prices are said to be rather higher. Settlements—China tea, 1,160 half-chests, Japan 2 530 half-chests; total to date, 141,540 half-chests China, and 51,370 half-chests Japan, against 442,358 packages at same time last year. Stocks—6,100 half-chests China, and 2,000 half-chests Japan teas.

Foochow.—Just prior to the departure of the last mail steamer the market was opened for the new season's Congou, at 29.7 to 33.7 tls. ship off, the settlements then amounting to 8,400 chests; since then a large business has been done, and 38,440 chests have found buyers. The teamen have been willing to accept of fully one tael reduction on the medium to Kaisow kinds, but for finer qualities full opening rates are obtained. The new teas have been arriving freely; the receipts are estimated at 68,700 chests for the market and 15,000 chests under private contract, and had it not been for the late heavy rains, no doubt a larger quantity would have come to hand. Some 3,700 chests of the new Souchongs have arrived, which are reported to have cost more in the country than last year, although, judging from the musters, the crop does not appear to be equal to that of last season. Oolong.—About 3,700 packages have been received, but the musters warrant the opinion that they are inferior in quality to those of last year; no price has hitherto been named for them. The settlements for the fortnight have been:—Congou (new), 46,800 chests at 17.7 to 33.7 taels ships off. Flowery Pekoe (new), 732 chests at 29.7 to 40.7 taels ship off. Scented Tea (new), 3,800 boxes at 28.2 to 35.7 taels ship off. The above settlements of Congou have been made at the following quotations:—Good common to flavoury kinds, 17.7 to 24.7 taels ship off. Good flavoury to Kaisow kinds, 25.7 to 27.7 taels ship off. Fine to finest kinds, 28.7 to 33.7. taels ship off.

Macao.—New Tyshan Congous, sales on the market 8,000 half-chests at 15.5 to 16 taels, with some 5,200 half-chests of contract deliveries, rates not transpired, leaving in stock about 24,000 half-chests, including 10,000 of contract teas; the stock of Ankois last reported remain untouched. Green Teas: Sales of 1,000 half-chests Young Hyson and 2,700 boxes Gunpowder are reported, at 15 to 16 taels, leaving on the market 1,000 half-chests Young Hyson, with 500 half-chests Hyson, for the latter 18 to 19 taels are demanded.

Canton.—The market has been swept of old Congou. Taysaan Congous continue to be avoided, owing to their being mixed. In scented teas the teamen have yielded somewhat. In Green teas more business has been done; full rates have been paid for Moyunes to the United States. Canton kinds have also been in demand, especially young Hysons, which are now being manufactured largely. Regarding the new Congous, say the Oonam and Oopacks, the Canton dealers, being perfectly conversant with the trade, have managed to secure the first crop, which will be directed to Canton this season, and not to Hankow as expected. The second and third crop will probably be sent to Hankow. The first crop is expected at Canton in a few weeks. The following are the settlements of the fortnight:—Congou, two chops middling Oopacks at 24 to 24½ taels. 150 chester Taysaans at 21 taels. Scented Teas: 6,000 boxes orange Pekoe at 24 to 31 taels. 2.000 boxes Caper at 25 to 31 taels. Country Greens: 6,000 boxes at 33 to 56 taels for Gunpowder and Imperial; 29 to 46 taels for young Hyson; 33 to 65 taels for Hyson; and 22 to 29 taels for Twankay and Hyson skin. Canton Greens.: Gunpowder, 2,000 packages at 21 to 22 taels; Imperial 50 half-chests at 21 taels; young Hyson, 4,000 half-chests at 21 to 24 taels; Hyson skin, 1,500 packages at 16 taels. The stock for sale on the market is limited to 1 chop Souchong, 60 half-chests Oolong, 500 chests flowery Pekoe, 3,000 boxes plain Caper, 2,000 packages country Greens, besides Canton-made teas in various stages of preparation.

Raw Silk.—Shanghai: The transactions in old Silk have been on a larger scale than usual at this period of the season, amounting to 1,100 bales. Tsatlees have been completely neglected, but may be quoted nominally the same as last mail. Purchases have been almost entirely of low class Taysaams, Yuenfas, and Hainings, at an advance of 10 to 15 tae'ls per picul. The plunder of another boat on its way up country for cocoons, has tended to increase the firmness of holders in this market, notwithstanding the heavy stock and the receipt of news of the commencement of hostilities in the United States; nearly 200 bales of new Silk on European account have arrived, and the outgoing steamer takes a portion of them. It is again characterised as coarse and mixed, the Tsatlees more particularly so. The arrivals from Japan are about 800 bales. Prices: Middling to good No. 4, 365 to 385 taels per picul; middling No. 5 and common, 320 to 355 taels per picul; Yuenfa and Hainings, 275 to 370 taels per picul; 2½ to fair 3, 290 to 310 taels per picul; 4, 5, and common, 250 to 275 taels per picul; Sewhings, 280 to 315 taels nominal; Laeyongs, 250 to 315 taels nominal; Throwns, 310 to 370 taels nominal.

Canton.—The only settlement reported during the fortnight is 100 piculs No. 2, Loonkong for England at $400 to $415. Re-reeled Cumchook is quoted $430 to $440. Gowkong $360 to $380.

Drugs, &c.—Cassia Lignea, Canton: No settlements reported—the quotation is $16. At Macao there have been large supplies. The sales of the fortnight are reported at 3,000 piculs at $15. 25c. to $16, leaving 4,000 piculs in stock, which can be bought at $15. Cassia oil, Canton: $250, no settlements. Macao, no settlements reported. The stock is called 100 piculs, the quotation being $235 to $240. Cassia buds, scarce and wanted. Star aniseed: Sales at Macao, 50 piculs at $15, leaving 200 piculs in stock. Aniseed oil: At Macao sales are reported to the extent of 200 piculs, at $142½ to $145, stock 150 piculs. Galangal root, Macao: Sales 300 piculs at $4, leaving no stock. Vermillion: No demand; the Canton quotation for the best is $37 to $38. Rhubarb: A sale of 50 piculs is reported at Canton at $50. Galls, no transactions.

TIEN-TSIN.

The market has been very dull during the past fortnight, in consequence of the commissioner for the three ports, Tien-tsin, Chefoo, and Newchwang, having given notice to the inland traders to report their purchases from foreign hongs to his office, that he may levy transits duties and fees thereon. The traders had also gone away to the interior as usual in June and July: they are expected to return in August.

Quotations:—Grey shirtings, 5½ to 7 catty, Tls. 1.8.0 to 2,3.0; 7½ catty, Tls. 2.4.0; sales, 33,000 pieces. Grey domestics, 22 to 23 lbs. Tls. 6.5.0 to 7.0.0. White shirtings, 56 reed, Tls. 2.2.0; 64 reed, Tls. 2.4.5; 70 reed, Tls. 2.6.0; sales 20,000 pieces. Blue shirtings, Tls. 3.3.0, red shirtings, Tls. 3.2.0. T-cloths, 4½ to 5½ catty, Tls. 1.3.0 to 1.5.0; sales 10,000 pieces. Spotted shirtings, white, Tls. 2.2.0; sales 3,000 pieces. Coloured, Tls. 2.6.0.; sales 500 pieces. Chintzes, Tls. 1.4.9.; sales 5,000 pieces. Handkerchiefs, blue and brown, mace 5 per doz. Brocades, white, Tls. 2.1.5.; coloured, Tls. 2.6.0. per piece. Damasks, blue, Tls. 4.0.0.; sales none. Assorted, Tls. 3.8. 0. Dimities, white, 12 yards, Tls. 1.4.0. Grey Shirtings, 40 yards, 11 catty, Tls, 2.8.0.; 12 catty, Tls. 3.1.0. American Goods: Drills, 40 yards, Tls. 2.7.0. Jeans, 30 yards, Tls. 2.6.0. Camlets, Dutch, Tls. 12; English, Tls. 13. Lastings, Tls. 11. Spanish Stripes, no demand. Long Ells. HH. scarlet, Tls. 7.5.0. Assorted, Tls. 6.0.0. to 6.5.0. Velveteens, black, mace, 1.2.0. per yard. Iron, no demand. Lead, Tls. 6.0.0 per picul. Tin, Tls. 24.0.0 per picul. Tin plates, Tls. 5.5 0 per box. Window glass, Tls. 3.3.0 to 3.8.0 per box. Rattans, white, Tls. 5.0.0. Yellow, Tls. 4.5.0; black, Tls. 3.5.0 per picul. Sandalwood, Tls. 12 per picul. Sapanwood, large, Tls. 3.5.0 per picul. Mangrove bark, no demand. Alum, Tls. 1.2.0 per picul. Putchuck, Tls. 7 to 14 per picul. Pepper, white, Tls. 11; black, Tls. 7 per picul. Sugar, white, Tls. 6; brown, Tls. 3 per picul. Sugar candy, Tls. 7 per picul. Rice, Tls. 1.6.0 per picul.

CHINA—IMPORTS.

At Shanghai there has not been many sales, but re-exports to the North have been large, and one ship on arrival, the *Ballarat*, was at once sent to Tien-tsin without breaking bulk. The clearances for the fortnight, inclusive of sales made to foreigners for re-shipment to the new ports are reported as follows:—Shirtings, grey, 33,550 pieces; white, 8,100 pieces—demand dull: white spotted, 2,150 pieces; coloured, 300 pieces. T-cloths, 10,170 pieces, said to be for Tien-tsin and Hankow. Brocades, 950 pieces; chintzes, 1,690 pieces, very little demand except at a loss; velvets, 104 pieces, duller; handkerchiefs, 900 dozen, saleable; American goods drills, 23,880 pieces; jeans, 2,960 pieces; sheetings, 2,020 pieces, very dull and little inquiry except for best marks, and sales only at a reduction. The stocks are—Drills, 272,455; jeans, 5,980; sheetings, 11,155 pieces; woollens, long ells, 160 pieces; camlets, 90 pieces, lastings, 20 pieces; scarlets are saleable for other kinds, there are only buyers under first cost, and even then only in small quantities. Iron and window glass, as last reported. Lead, small supply, and some demand for the North.

Canton.—Sales for fortnight reported as cotton yarns, 320 bales; grey shirtings, 3,000 pieces; white, 1,500 pieces; demand very dull, and no further sales of cotton piece goods. Woollens: Spanish stripes, 200 pieces; stocks heavy; iron bar, 600 piculs; stocks very large and little inquiry. Wire, 50 piculs and no stock; lead, 600 piculs; quicksilver, 250 flasks; sandalwood, 100 piculs; sapanwood, 550 piculs; no change in price. Window glass, 300 boxes: stocks very large. Steel, 300 tubs.

Hong Kong.—Provisions, &c.—The demand is very slack. The following are the quotations which importers are desirous to realise at:—Flour, Gallego, $8.50 to $87.5 per barrel; beef, American mess, $6 to $6.50 per barrel; pork, prime, $13 to $13.50 per barrel. For other articles under this heading the quotations are purely nominal. Stocks are excessive and the demand light. Coals.—There are none in first hands, and rates have advanced materially. Dealers ask $14 for English steam, and $10 to $11 for Sydney. At Shanghai English steam are quoted 14 tls., Japan, 8 tls.

Manila.—Owing to previous heavy sales the demand has been dull, and transactions during the fortnight have been limited. Small sales of white shirtings at last quotations. Grey shirtings and grey long cloths are without alteration. Gdey twills can only be placed at low prices. Coloured fabrics are difficult of sale unless at low rates. Sugar and hemp have changed hands at former rates.

JAPAN—KANAGAWA.

Imports.—During the past month cash transactions in imports have been entirely confined to camlets, for which there has been a good demand but at low rates, and one sale of 6½ catty grey shirtings at $2. 75c. In barter we have heard of a few operations in 5½ catty grey shirtings at $2. 50c., in 6½ catty at $2. 80c., and scarlet chintz at $2. 50c.; excepting these all quotations are nominal.

Tea.—Recent advices from the home market having tended to curtail operations for direct shipment to England, the business of the past month has been confined to a few cash transactions in new leaf at a decline of from $2 to $3 per picul on previous rates to fair barter business in the fine grades of the old crop. The new crop promises to be abundant, but appears to be faulty in the manipulation and insufficiently fired. Settlements for the month about 1,500 piculs. Stock in Yokhuma, about 1,000 piculs.

Digitized by Google

Silk.—The market has shown great activity, and settlements are estimated at from 1,100 to 1,200 bales; rates have still further declined, but a large portion of the business done having been in barter against imports, correct quotations are not easily obtained. Quotations: Ida, No. 1 and 2, none; No. 2 and 3, $400 to $500. Mybash, No. 1 and 2, $460 to $480; No. 2 and 3, $400 to $430. Sodai, No. 1 and 2, none; No. 2 and 3, $360 to $400. Re-reeled, No. 1 and 2, $360 to $380; No. 2 and 3, $280 to $320. Coten, $290 to $320. The total export of silk from 1st July, 1860, to 18th May, 1861, was as follows:—England, 1,997 bales; Shanghai, 7,962; Hong Kong, 191; total, 10,150 bales.

NAGASAKI.

Imports.—But few transactions have taken place during the last fortnight, and those chiefly in barter. A temporary stagnation prevails in consequence of the heavy stocks accumulated at Miaco; these are, however, working off, and an improvement may soon be expected.

Exports.—Produce generally in little demand. Tea: The new crop now coming forward is expected to be very plentiful; prices will probably open low.

Vessels Loading.—For London: *Antagonist* to load shortly.

At Singapore.—A reference to the quarterly return of stock of imports on hand, will be found of service, as showing that the market is beginning, although slowly, to take off the heavy stock of goods. The inquiry for piece goods generally is still far from active, but there is rather more demand than has been the case for some time back, and as the supplies coming to hand are small, the next list may be expected to show a considerable change for the better. In face of the stocks as shown in the list, it is impossible to look for any improvement in prices. In produce the business done during the fortnight has been limited, in some cases from scarcity of the articles, and in others from unwillingness of exporters to operate. Tin has been taken to moderate extent at last mail's rate, but is not in very brisk inquiry. Gambier is rather scarce for immediate delivery, but has been purchased for delivery in two to three weeks at last quotations.

Bankok.—The reports from thi place mention a quiet market for produce. Money scarce. The *Hannah Salkeld* is loading for Europe. Black pepper: The demand is fair, and there are large supplies on the market. A parcel of 2,000 piculs found a buyer at Tls. 10⅛, equal to $7.07 per picul f. o. b. Holders refuse as yet to accept a less price. Rice: There is scarcely any demand for this article at present, and good cargo can be purchased at Tls. 26 to 28 per coyan, equal to $1.14 to $1.20 per picul f. o. b. White rice may be quoted Tls. 52 per coyan, equal to $1.67 per picul, and in no demand. Sugar (white): The demand is dull with small supplies at our former quotations, viz., for No. 16, Lachonchaissie, Tls. 8⅜ per picul, equal to $5.45 per picul f. o. b. Sugar (brown): Is in fair request for China, and we quote No. 1 quality worth Tls. 4½ per picul, equal to $3 per picul f. o. b. Supplies are on a moderate scale.

KANAGAWA CONSULAR RETURNS FOR 1860.

EXPORTS FROM JAPAN.

Per James Lemon, from Kanagawa, May 5, to London.—Tea, 7,245 packages; copper, 105; lacquered ware, 38; silk, 241 bales.

Per Onward, from Kanagawa, May 27, to San Francisco.—Japan Tea, 48,000 lbs., and 139 packages; China tea, 6,750 lbs.; wax, 10,000 lbs.; cuttle fish, 10,240 lbs.; lacquered ware, 650 packages; porcelain, 513; charcoal, 460 barrels.

EXPORTS FROM CHINA.

Per Glenclune, from Shanghai, June 11, to London.—Tea, 525,218 lbs.; silk, 246 bales; silk waste, 8 piculs.

Per Falcon, from Foo-chow-Foo, June 11, to London.—Tea, 1,294,000 lbs.

Per Ellen Rodger, from Foo-chow-Foo, June 13, to London.—Tea, 760,400 lbs.

Per Fiery Cross, from Foo-chow-Foo, June 15, to London.—Tea, 870,000 lbs.

Per Flying Spur, from Foo-chow-Foo, June 15, to London.—Tea, 830,000 lbs.

Per Robin Hood, from Foo-chow-Foo, June 11, to Liverpool.—Tea, 1,092,000 lbs.

Per Commodore, from Foo-chow-Foo, June 5, to Adelaide.—Tea 156,600 lbs.

Per Mutlah, from Canton, June 12, to London.—Tea, 813,600 lbs.; silk, 11 bales.

Per Alexander, from Canton, June 25, to New York.—Tea, 677,424 lbs.; pongees, 1,000 pieces; Levantine handkerchiefs, 100; crape shawls and scarfs, 17,304; sewing silk, 3 piculs; raw silk, 11; camphor, 225; matting, 16 rolls; sweetmeats, 179 boxes; vermillion, 50; china ware, 101; fire crackers, 4,500; fans, 335.

Per Geelong, from Macao, June 20, to London.—Tea, 1,156 chests, 6,150 half-chests.

Per Pekin (mail steamer), from Hong Kong, June 12, to London.—Silk, 646 bales; to the Continent, 146.

Per Singapore (mail steamer), from Hong Kong, June 28, to London and the Continent.—Silk, 1,046 bales.

Per Benefactor, from Hong Kong, June 13, to San Francisco.—Sugar, 777 piculs; rice, 1,450; oil, 25; tea, 1,075 packages, opium, 9,350 taels; fire crackers, 25 boxes; China goods, 2,004 packages; drills, 298 bales; cigars, 40 cases.

Per Stately, from Hong Kong, June 18, to Sydney.—Sugar, 2,500 piculs; oil, 160; matting, 600 rolls; China goods, 300 packages; saltpetre, 2,302 bags.

EXPORTS FROM MANILA.

Per Roebuck, to Cork, June 17.—Sugar, 10,170 piculs; sapanwood, 270.

Per Victor Emmanuel, to Cork, June 20.—Hemp, 6,000 piculs; sugar, 12,800; sapanwood, 154.

Per Soberana, to Liverpool, June 20.—Hemp, 1,400 piculs; sugar, 4,600; sapanwood, 203.

Per Independence, to New York, June 7.—Hemp, 12,200 piculs; sugar, 4,800; sapanwood, 100; cigars, 250 mils.

Per Saracen, to Boston, June 18.—Hemp, 11,324 piculs; sugar, 8,788; sapanwood, 600; hides and cuttings, 640; cigars, 730 mils.

Per Telegraph, to Melbourne, May 6.—Sugar, 8,156 piculs.

Per Julia, to Melbourne, May 28.—Sugar, 7,120 piculs.

Per Palma, to Melbourne, ——.—Sugar, 6,242 piculs.

Per Rosette, to Sydney, June 18.—Sugar, 5,707 piculs; coffee, 610; cordage, 1,120; cigars, 1,150 mil.

EXPORTS FROM SINGAPORE.

Per St. Anne, June 21, to Marseilles.—Gambier, 6,530 piculs; black pepper, 1,959; white, 317; gutta percha, 111; India-rubber, 32; ratans, 211; sapanwood, 103; almaciga, 75 cases; gum damar, 8; gum benjamin, 10; gambouge, 30; nutmegs, 3; mace, 2; feathers, 4; fancy mats, 2; cigars, 2; salted hides, 4 casks; fruits in brandy, 1; books and curiosities, 3 boxes.

SHIPPING INTELLIGENCE.

ARRIVED.

At Shanghai.—From London: June 3, Challenger, Jubilee; 4, Ballarat; 18, Gauntlet. From Liverpool: 18, Clara Novello. From Cowes: 3, Eloise. From Newport: 7, Pacific.

At Hong Kong, Macao, and Canton.—From London: June 17, Prince Alfred. From Bordeaux: 14, Farwell. From Newcastle: 14, America. From Cardiff: 16, Resolution. From New York: 24, Penguin. From Boston: 25, Kate Howe. From San Francisco: 23, Lotus; From Newport: 26, Lucretia.

At Manila.—From Liverpool; June 20, Gertrudio. From Havana: 8, Carmencita. From Melbourne: 8, Amy Scheffer.

At Singapore.—From Newcastle: June 29, Nancy. From Sunderland: July 2, Post. From Greenock; 4, Burnside. From Marseilles, 4, Mayotte.

SAILED.

From Shanghai.—For London: June 11, Glenclune.

From Foo-chow-Foo.—For London: June 11, Ellen Rodger, Fiery Cross, Falcon; 14, Flying Spur. For Liverpool: 14, Robin Hood.

From Hong Kong, Macao, and Canton.—For London: June 13, Mutlah; 20, Geelong. For Australia: 18, Stately. For San Francisco: 13, Benefactor.

From Manila.—For Liverpool: June 20, Pepita, Soberano. For Cork: 17, Roebuck; 20, Victor Emmanuel. For Boston: 18, Saracen. For New York: 7, Independence. For Sydney: 18, Rosette.

From Singapore.—For London: July 7, Weymouth. For Marseilles: June 21, St. Anne.

LOADING.

At Shanghai.—For London: Challenger, Charlotte Ann, Jubilee, Polmaise, Sharpshooter. For New York: Sarah H. Snow, Union.

At Foo-chow-Foo.—For London: Banian, Beeman, Georgiana. For Liverpool: Veronica. For Europe: Victor Emmanuel.

At Hong Kong, Macao, and Canton.—For London: C. S. Lemon, Northfleet, Star of the North, Maiden Queen, West Australian. For Europe: F. Westphalia. For New York: Alexander, Canvass (Back), Heroine. For Melbourne: Laughing Water, Seaman's Bride. For Australia: Kosmos. For San Francisco: Lotus, Sardinian.

At Manila.—For London: Zealandia, Ethereal. For Liverpool: Ashmore, Joaquina Victoria, Julia. For Cork: Marchioness of Londonderry. For Falmouth: Yarra. For Havre: Jesusa, Souvenance. For Melbourne: Amy Scheffer, Sweepstakes.

At Bankok.—For Europe: Hannah Salkeld.

At Singapore.—For Liverpool: Canadian, Tigris. For Falmouth: Lettice, Catherine. For Bordeaux: Reunion.

FREIGHTS AND CHARTERS.

At Shanghai.—To London: Tea, £4; silk, £5 to £6. 10s. The demand for tonnage to the northern ports still continues, Tien-tsin being the more important, and commanding most attention. To Swatow the trade is nearly at a stand still, the new impost on sugar having failed to resuscitate business. The settlements reported are—Ballarat to Tien-tsin (with original cargo) at £1 per register ton per month till return here. Empress of India to Kanagawa and London, £5 per ton measurement. Martha and Emily at $1,300 per month for coast and river. Syrian, $1,500; P. C. Kinch, $1,850; Wilhelmina to Swatow and back $3,900 in full.

At Foo chow-Foo.—To London, £5. 5s., and 10s. per ton extra for first ship in dock.

At Hong Kong, Macao, and Canton.—To London: £3. To New York: $12. A fair business has been done, and rates are lower. Vessels are abundant, the coast trade being rather dull. For the rice ports the rates are also lower, and rather an extensive business has been done, as the charters will show. Maiden Queen to London, and Star of the North, and Sir F. Williams from Foo-chow-Foo, at rates not settled. Heroine to New York at $12. Kosmos to Australia and back, £2,100 in full. Sardinian to San Francisco $12,000 in full. To Saigon and back: Admiral Baudin and Stad Leyden at 50c. per picul; Sir Jamsetjee Jeejeebhoy, $1,750 in full. Fortuna on owners' account. 6 vessels to Bangkok and back at 45c. to 50c. per picul. Farvel for 6 months at $1,000 per month. The Chin Chin has sold for $7,500.

At Manila.—To London: £3. 10s. to £4. To New York: $9½ to $10. There is no great demand for tonnage, and it is not abundant. The Yarra proceeds to Falmouth or a port in Great Britain, at £3. 10s., and extra rates for Continent. Martabau chartered at Hong Kong from here to Sydney at £3. 5s. per ton.

At Bangkok.—Business is dull, there being no inquiry for vessels, and no recent charters are reported.

At Singapore.—To the Continent, £4. 12s. 6d. The inquiry for tonnage, noticed in our last, still continues, and every disengaged vessel has been taken up. There is not one on the berth for London. The Franco loads rice from Rangoon to Falmouth for orders at £4. 12s. 6d., if to the Continent 30 lay days. Screamer from Moulmein at £3. 10s. to the United Kingdom, £4 to the Continent, and £1 per ton extra for timber. Amalia to Saigon for $2,500 in full, and then to Hong Kong with rice at 50c. per picul.

PASSED STRAITS OF SUNDA.

From England and Continent to China:—June 8, Shaa Ze; 11, Britania; 20, Metaris; 21, Chene; 23, Peterborough; 24, Ocean Mail, Queen of the Ocean; 26, Prince Alfred, Wynard, Assyrian. From New York: 20, N. B. Palmer. From Philadelphia: 23, Elizabeth F. Willets. From China to England and Continent: 9, Strathallan. To New York: 9, Mary and Louisa; 11, Potosi. To Sydney: 12, Velox. From England and Continent to Singapore: 20, Nancy; 21, Post; 22, Mayotte. From Melbourne: 13, Amelia. From Australia: 21, Manuelita. From Singapore to England and Continent: 10, Newton, Commerce, Titania; 18, H.M.'s str. Chesapeake; 22, Britannia, Procymatia. To Australia: 9, Spec. From New York to Batavia: 8, Surprise. From Newcastle: 20, Koerier. From Melbourne: 23, Homer. From Batavia to Holland: 10, Adriana Petronella; 13, Christina Helen; 20, Cheribon; 22, Almelo. To Hamburg: 9, Therese. From Boston to Amoor River: 21, Mongol.

CASUALTIES.

It is reported that the Danish brig Thor has been capsized in a squall in the Peiho, but no particulars have arrived.

The Siamese barque Kimhongsem is likely to become a total wreck, having run aground, on the 20th of June, on the beach between the lighthouse and the Pilot's point. There was no pilot on board. The cargo was being discharged as quickly as possible.

The Washington (Hamb.), with Mr. Stanman, late of the firm of Siemssen and Co., Hong Kong, on board, has been totally lost on the bar at the entrance to the Peiho.

The steamer Sphynx, on her passage to the North, captured two piratical junks attacking a lorcha. The junks were deprived of everything that would have been of service to them, and one of them was burnt, the crew having been removed to the other.

Continental Intelligence.

FRANCE.

The *Pays* says:—"It is said that a number of officers are about to be dispatched to Cochin China. What is certain is, the Government is occupying itself very actively with the civil and military organisation of the new French colony. Among other things it has sent Dr. Dury to Japan, with the powers necessary for founding an European hospital under the auspices of the Japanese authorities of Yedo." Why the physician should have been dispatched to Japan the *Pays* does not state.

According to a letter in the *Moniteur de l'Armee*, the French force in China has suffered an embarrassing loss from an accidental fire. A Tien-tsin correspondent writes:—

"We have had a destructive fire here, which, had it occurred a few hours earlier, must have been attended with most disastrous consequences, as it would have caused the explosion of thirty-six caissons loaded with cartridges for the infantry. Fortunately, however, they had been put on board a junk the day before, and so escaped the danger. The fire began in the stables, containing more than 100 horses belonging to the artillery, and burned with such rapidity that, in spite of all our efforts, twenty-two of the poor animals perished in the flames; eighty others, which were let loose, galloped off into the country, and we have not yet had time to get them back. The stables and all the forage were totally destroyed, as the means at hand were altogether inadequate to extinguish such a conflagration. The junk containing the ammunition was for a time in some danger, but we soon removed the vessel to a safe distance. There was no personal injury received, but the pecuniary loss is considerable."

A decree, dated 22nd July, concedes to the Compagnie des Messageries Imperiales a subsidy for the purpose of carrying the French mail bags between the branch lines from China and Suez and Reunion, and the Dutch, Spanish, and French Indies.

HOLLAND.

(FROM OUR OWN CORRESPONDENT.)

AMSTERDAM, August 10.

The Parliamentary Session of the Second Chamber of the States-General has been brought to a close, and the members are now enabled to repose for a while from their labours. In taking a summary review of the results, the most important act of the Session—judging from the length of the debates, which occupied the Chamber no less than forty-three days—was a subject of mere home policy, the Militia-law, which, after a severe Parliamentary battle, was finally gained by Ministers by thirty-nine votes against twenty-three. The effective force of the militia is to remain unaltered at 55,000 men, but the incorporation of that body with the standing army is allowed, though not in accordance with the constitution of the country. In consideration of the favourable state of the finances, it was agreed to devote three millions of florins for the amortisation of Dutch bonds to that extent towards the gradual reduction of the National Debt. The Bill for the payment to Hanover of the Dutch quota for the abolition of the Stade Dues passed without opposition, as was also the case with the Ministerial plan of converting the Treasury Bonds in circulation, which form a fictitious debt of ten millions of florins.

In the course of the debates on the Bill to confirm the decree of the Governor-General of Netherlands India for the free importation of rice into Java and Madura without the payment of any duty, the Colonial Minister took the opportunity of stating that in the next Session he should bring in a Bill for a new Customs' tariff for Netherlands India, in which it was his intention to propose the unconditional free importation of rice throughout the whole of the Dutch possessions in the East.

In one of the last sittings before the prorogation several members wished for information as to the results arising from the opening of the different free ports in Netherlands India, and what influence it had had on the commerce of the other ports. The Colonial Minister replied in answer to the first question that the Molucca ports (Amboyna, Ternate, Banda and Kadjeli) were declared free ports in 1854, but that the returns respecting their trade only went as far as 1856, which did not contain sufficient scope to form a judgment as to the results. Menado was declared free in 1848, and an increase of the traffic is perceptible both in the imports and exports, though to no great extent. During the two years before the opening of the port, the imports amounted to 565,000 florins, and in the succeeding two years 909,000 florins, whilst the exports (not including the coffee for account of the Government) were respectively 318,000 florins and 514,000 florins as above. Pontianak and Sambas were opened in 1853, but owing to the almost uninterrupted state of warfare and rebellion the trade had suffered very materially. Rioun was declared a free port in 1828, and the commerce had improved very considerably. The imports, which in the two years 1846 and 1847 amounted to 1,462,000 florins, had risen in 1855 and 1866 to 1,885,000 florins. But the greatest increase was in the exports, which in 1846-7 were only 1,606,000 florins, but had more than doubled themselves in 1855-6, and amounted to 3,426,000 florins. The trade of Macassar the Minister described as eminently prosperous. The imports in 1846 were 1,038,000 florins, whilst in 1856 they had risen to 3,473,000 florins, and in 1858 to as much as 4,976,000 florins. The exports of the same periods were respectively 867,000 florins, 4,065,000 florins, and 5,241,000 florins, whilst the Governor estimated the aggregate of the imports for 1860 at twelve millions of florins. With reference to the second part of the question the Minister could only say that, without going into particulars, the general results were highly satisfactory, and that there was a very perceptible increase both in the imports and exports, which he partly attributed to the increased facilities afforded by the annual development of steam communication generally throughout the Indian Archipelago.

Now that the Second Chamber is prorogued the First Chamber is convened, and will be opened to-morrow (the 8th inst.) by commission.

The King has appointed a Board to take the needful measures for the due representation of the productions and industry of this country at the Great Exhibition of London next year. The Board is composed of a president and nine members. The chairman is Mr. J. W. van Oordt, director of the Rotterdam Steam Navigation Company, whilst amongst the members are found the names of the following gentlemen connected with India: viz., Mr. J. Groll, formerly Chief Engineer of the Government telegraphs in Java, now residing in Haarlem, and Mr. W. Poolman, late President of the Netherlands Trading Company's Chief Factory at Batavia, now of Gouda.

The Conservative journals still continue to denounce the appointment of Baron Sloet van de Beele as Governor-general of Netherlands India, maintaining, as one great reason for the injudiciousness of the selection, that he has never been in India. On the other hand, the Liberal organs defend the appointment as an extremely happy one just for that very reason, which places him free from all influences of party, which was by no means the case with the former Governors-general de Kock, van Zuylen, van Keemstra, van Lynden, and others, who, on entering the duties of office, found themselves entrammelled by party views, and surrounded by local intriguers and one-sided advisers. Under these circumstances it is but fair to wait, and see how the new Governor-general inaugurates his official line of conduct.

The following appointments made by the Governor-General of Netherlands India have been confirmed by the King:—Major-General C. A. de Brauw, hitherto Commandant of the Second Military Division of Java, to be Civil and Military Governor of the West Coast of Sumatra; Mr. L. Hooy, President of the Court of Justice at Amboyna, to be Member of the Court of Justice at Batavia; Mr. P. A. Byk, Comptroller of the First Class, to be Assistant Resident of Tebing-Tinggie, in the Residency of Palembang; and Mr. A. W. Swaving to be Secretary for Inland Affairs at Macassar.

According to the *Arnheim Courant*, Mynheer van Heemstra, the Minister of the Interior, is appointed President of the Railway Board, vice Baron Stoet van de Beele, the new Governor-General of Netherlands India.

Every year gives satisfactory evidence of the great and increasing interest taken by the Dutch in aquatic amusements. The annual regatta held last week at Rotterdam, under the auspices of the Royal Netherlands Yacht Club, went off with unusual *éclat* this year in the presence of an immense throng of spectators, attracted by the amusements of the day and the brilliancy of the weather. H.R.H. Prince Henry, President of the Yacht Club, was present the whole day, and afterwards distributed the prizes, to which he had himself liberally contributed, and which were well contended for. The first prize of 400 florins (the gift of the Prince) for four-oared gigs of all nations, was won by an English boat and crew, the *Albion*, Mr. E. Wyld, of London. Altogether there were twenty-one rowing and sailing matches. The regatta of this city, which succeeded that of Rotterdam, was attended by an equal if not

Digitized by Google

more numerous assemblage, and it is pleasant to add that in neither case any accident occurred to mar the amusements of the day.

Despatches have been received at the Naval Department announcing the safe arrival at Rio de Janeiro, on their outward passage to the East India station, of H.N.M.'s steamers *de Heldin*, Capt. P. Toutenhoofd; *de Vecht*, Lieut. H. Nodderman, and *de Berkel*, Lieut. P. van der Velden-Erdbrink. The former arrived on the 20th, the second on the 19th, and the third on the 17th of June. All well on board.

By virtue of a Royal Decree of 29th of July, the second class steamer *Bromo*, and the third class steamer *Sindoro*, are ordered to be commissioned on the 16th of August, and fitted out for the East India station. The officers for both vessels are appointed. The command of the *Bromo*, lying at Helvoetsluys is given to Captain-Lieutenant J. Brutel de la Rivière, and that of the *Sindoro*, now at Vliessingen, to First Class Lieutenant J. M. de Jongh.

The steam corvette *Cycloop* has gone round from Nieuwe Deep to Helvoetsluys with a detachment of sailors for the *Bromo*, after which she proceeded to Vliessingen to await further orders. She will probably be employed towing round to Nieuwe Deep the new steam frigate *Adolph van Nassau*, which is to be manned by the crews of the *Castor* and the floating battery *Neptunus*.

H.M.'s steamer *Merapi*, Capt. G. F. Servatius, R.N., arrived at Nieuwe Deep on the 27th of July from Batavia, from which port she sailed on the 4th of April last.

The Netherlands Trading Company advertises for cabin accommodation for forty officers to Java, to be distributed in different vessels, ten or twelve in each. To be ready to sail in September. They are also enquiring again for tonnage, on usual conditions. The vessels to be ready to sail from a port in this country by the 10th of September, and those now on the passage out to be placed at the disposal of the Company's Chief Factory at Batavia on or before the 10th of January next.

Dr. P. Bleeker, Director of the Medical Department of the East India army with the rank of Lieutenant-Colonel, now in this country and residing at present at Haarlem, has been decorated by H.R.H. the Grand Duke of Hesse-Darmstadt with the insignia of a Commander of the Second Class of the ancient Order of Philip the Magnanimous.

PASSENGERS ARRIVED.

Per *Marinus Willem*, Captain van Duyn, at Amsterdam from Java: Captain J. P. Hassels, late Commander of the Dutch ship *Louis*, wrecked.

Per *Davo*, Captain Wytenhorst, at Brouwershaven from Java: Mr. Luking.

Per *Louise*, Captain Buys, at Nieuwe Deep from Java: Major Aufmorth, of the E. I. Infantry, Mr. and Mrs. J. Versteeg and two children, Mr. J. van der Bor, Miss H. Cramer, and two military invalids.

Per *Malvina Vidal*, Captain Kessel, at Brouwershaven from Java: Mr. Przynstanty.

Per *Ida Wilhelmina*, Captain van Wyland, at Brouwershaven from Banjoewangie: Messrs. Stickel, van Dam, Hommel, and D. G. Jonge.

Per *Zephyr*, Captain de Vries, at Brouwershaven from Java: Mynheer Wynen, Resident of Sumatra, lady, and four children, with attendants; Mr. de Serriere, Comptroller-General of Krawang, Mr. Varkewisser, jun., Mrs. Davide, family, and attendants.

Per *Cornelia Hendrika*, Captain Jaski, at Nieuwe Deep, from Banjoewangie: Messrs. Stoelman and van der Bent, two Misses van der Bent, and one Javanese native servant.

Per *Aldebaran*, Captain Meyboom, at Amsterdam from Banjoewangie; Mrs. G. E. Vievez.

Per *Maria Adolphine*, Captain Blom, at Nieuwe Deep from Banjoewangie: Mr. and Mrs U. de Haas and family, Mr. and Mrs. D. van Heerdt and family, Mr. J. A. Evin.

Per *Prince van Orange*, Captain Hensing, at Brouwershaven from Java: Captain W. de Rochemant, of the E.I. Infantry, and son, Mr. Kappers. Adjutant, and five military invalids.

Per *Albrecht Beyling*, Captain Mueller, at Nieuwe Deep from Java: Colonel and Mrs. Boelhauwer, Mr. J. Heffener, and Miss van der Trappen.

PASSENGERS OUTWARDS.

Per *Bellatrix*, Captain Sundberg, from Amsterdam to Batavia: Messrs. W. Santveer, J. P. Falkenburg, A Reinicke, P. Prins. and J. Rynenburg.

Per *Julie Claire*. Captain van Osteroom, from Amsterdam to Batavia: Mrs. Blume, born Kolitz, three Misses Hageman, Mrs. Hennequin, Mr. and Miss Nys, Mr. van Streven.

Per *Josephine Bernhardine*, Captain de Bos, from Amsterdam to Batavia: Mr. J. Rentmeester.

Per *Princess Amalia*, Captain Groneseld, from Amsterdam to Padang: Mr. Meyer.

Per *Theodora Machtilda*, Captain Baelhower, from Amsterdam to Batavia: Mrs. Bosse and a Javan lady.

Per *Javaan*, Captain Bodeman, from Amsterdam to Batavia: Messrs. Marschalk and E. van Nooten.

Per *Jacoba Cornelia Clasina*, Captain Delclisur, from Amsterdam to Batavia: Mr. J. van Soelen, Mr. and Mrs. J. Verbruggen, two Misses Hoevekers, Rev. J. Benkhoff, missionary, with lady, and family; Miss Hegeman, and Miss L. Heedman, and the the Javanese gentlemen, J. Kodo, C. Aden, A. Kawok, and J. Ponrou.

Per *Twee Gezusters*, Captain Bergmans, from Rotterdam to Sourbaya: Mrs. Bendix-Kortmans and two children.

Per *Bezokie*, Captain Russman, from Rotterdam to Batavia: Mrs. Bastiaanse and two daughters, Miss Linting, Mr. and Mrs. Laguaune and family, Mr. and Mrs. K. Folkeringa and two children, Mr. and Mrs. J. Meyer and two children, Mr. and Mrs. G. A. Omlo and two children, Messrs. Meyer, Azon Jacometti, A. Moter, and van der Bergh, and two Javanese native servants.

Per *Petronella Catharina*, Captain van der Veen, from Amsterdam to Samarang: Mr. and Mrs. P. Stram and family, Messrs. D. Gerth van Wyk, H. and B. Henckel, W. Iskauder, A. Kuntze, and J. C. Asieck.

COMMERCIAL.

Coffee continues in favour, and in some few descriptions there is even a slight advance. Favourite qualities, such as the good ord. of last sale are scarce, and readily fetch 40c. No. 7 has been done at 40¼c. and No. 8 at 40½c. The sales of the month amounted to about 12,500 bags of East India, as follows:—

6,500	bags Java ord. to good ord.	38½c. to 39¼c.
2,200	„ „ clean and bright,	40c. to 42c.
900	„ „ yellow,	42½c. to 43½c.
1,200	„ Padang, greenish bright,	39c. to 39½c.
1,100	„ Sumatra ord.,	32c. to 37c.
600	„ Java, triage,	15½c. to 37c.

The subjoined table gives a comparative view of the stocks of unsold company's East India coffee in warehouse at the different ports of the kingdom on the 31st of July in the undermentioned years:—

July 31, 1861	389,931 bags
„ 1860	492,700 bags
„ 1859	593,759 bags
„ 1858	765.156 bags
„ 1857	559,000 bags
„ 1856	628,200 bags

Sugar.—The company's sale of 60,782 kranjangs of Java was held on the 30th ult. and went off with spirit, the whole quantity being readily sold. It was in anticipation of this sale that the market had been very quiet, during the preceding week the transactions being confined to a few trifling orders for immediate shipment to the North of Europe. The result of the sale was as follows:—

	Valuation.	Sold at.
No. 8—469 light brown	29¼c.	29½c.
„ 9—569 blond.....	30¾	31
„ 10—836 „	32	32¼
„ 11—1,223 „	33	33¾
„ 12—2,516 grey	34	34
„ 13—1,096 „	35	35¼
„ 14—1,977 half white	36	36½
„ 15—5,037 „	36¾	37¼
„ 16—20,052 white.....	37½	37¾
„ 17—14,414 „	38	38¼
„ 18—4,546 „	38½	38¾
„ 19—164 „	39¼	39¾
„ 20—284 „	39¾	40

The stocks of East Indian Sugar in the company's warehouses at the end of July were as follows:—

	1861.	1860.
Unsold	377,755 bags	493,021 bags
Sold	54,251 „	120,056 „
Total.....	432,006 „	613,077 „

Rice experienced a steady sale for the interior, and prices may be quoted a shade higher. A parcel of 484 bags Java ex *Louise* sold at 9½fl., and 1,000 bags Necranzie ex *Æolus* (at Rotterdam) fetched 6¾fl.

Indigo.—The 11 chests of Manila mentioned in my last, were sold at public auction, and fetched from 1fl. 80c. to 2fl. 30c. Little else has been going in this article.

Spices.—The company's periodical sale is advertised to take place on the 20th inst., and will consist of—

889	casks nutmegs,	in warehouse	at	Amsterdam.
1,170	„ do.	„	„	Rotterdam.
461	„ mace	„	„	Amsterdam.
392	„ do.	„	„	Rotterdam.
336	„ cloves	„	„	Amsterdam.
782	„ do.	„	„	Rotterdam.
3,096	bags black pepper	„	„	Amsterdam.
60	„ white do.	„	„	Do.
4,247	„ black do.	„	„	Rotterdam.
99	„ white do.	„	„	Do.
1,376	bales cinnamon	„	„	Amsterdam.
1,338	„ do.	„	„	Rotterdam.

Drugs.—At a sale held at Rotterdam on the 25th ult., 67 bags cubebs fetched 27c., 250 chests Japan arrowroot sold at 9fl. to 10fl., 225 packages cassia vera went off at 12c., 8 serons China root bought in at 110c., and for a parcel of Japan mother-o'-pearl, 20fl. was offered, but the owners refused to part with them at that figure.

SALES OF SHIPS IN HOLLAND.

Barque Yssel, at Rotterdam.....	13 000 florins.
Steamer Stad Amsterdam, at Amsterdam...	11,500 „
Do. Hertogenbusch „	12,000 „
Tjalk Gertruide „ „	405 „
Barque Zwyger (640 tons) Dordrecht ...	11,000 „
(Sold to an English house.)	
Ship Amazone, at Amsterdam	20,000 „
Barque Eerstelling (740 tons) at Rotterdam	55,300 „

Digitized by Google

HAMBURG.

(FROM AN OCCASIONAL CORRESPONDENT.)

August 10.

From the official tables of the navigation of this port during the year 1860, just published by the Board of Commercial Statistics, it appears that the total number of vessels arrived from foreign ports amounted to 5,029, with an aggregate tonnage of 1,261,539 tons, of which 1,803 vessels of 631,113 tons (being one-third of the number of ships and just one-half of the tonnage) were under the British flag. The total number of vessels that sailed during the same period amounted to 5,045 vessels of 1,270,461 tons, of which 1,804 vessels of 631,461 (showing about the same proportion as in the arrivals) were under the British flag.

During the year the arrivals from the Far East were as follows :—

From China	14	vessels of	5,235 tons.
„ Netherlands India	12	...	6,846 „
„ Siam	2	...	726 „
„ Singapore ...	3	...	1,038 „

whilst those from Great Britain and Ireland amounted to 2,277 vessels with 758,097 tons.

The departures during the same period were as follows :—

For China	21	vessels of	7,611 tons.
„ Netherlands Inda ...	7	...	2,691 „
„ Singapore	2	...	648 „
„ Russian Asia ...	3	...	777 „
„ Australia	10	...	4,908 „
„ Sandwich Islands ...	2	...	882 „
„ South Sea	1	...	196 „

The total number of vessels that sailed for Great Britain and Ireland was 2,381 of the aggregate tonnage of 816,561.

A striking feature in the navigation of this port is the annually increasing number of steamers, which has gradually risen during the last five years from 10 per cent. to 25 per cent. of the total number of vessels, so that at present the proportion is one steamer to three sailing vessels, whilst the proportion in tonnage is still greater, the steamers showing more than a third of the whole amount of arrivals and departures when expressed in tons.

Col. Shaffner and Mr. Croskey have passed through Hamburg on their way to Copenhagen, whither they are bound for the purpose of taking measure to induce the Danish Government to grant them a further extension of time for laying down the North Atlantic Telegraph *via* Iceland and Greenland, the original period mentioned in their "concession" having elapsed, and as the works are not completed—nor even commenced—at the stipulated time, the Danish Government are not bound to renew the charter.

London Gazettes.

The *Gazette* contains a Treasury Warrant fixing the charge on every letter not exceeding half-an-ounce in weight between the United Kingdom and Penang, Singapore, Hong Kong, or China, at 1s.; on every letter not exceeding half-an-ounce in weight between Penang, Singapore, Hong Kong, or China, and any colony or foreign country, through the United Kingdom, at 1s. for the conveyance to the United Kingdom, and the usual rates on British letters for the conveyance from the port of arrival in the United Kingdom to the colony or foreign country; provided that, in all cases where such additional rate includes both inland and sea services, there shall be deducted from the said rate of 1s. the sum of 1d. in respect of the inland conveyance under this clause of every such letter sent through the United Kingdom. On every letter not exceeding half-an-ounce in weight transmitted by the post between Penang, Singapore, Hong Kong, or China, and any of Her Majesty's Australian colonies or New Zealand, without passing through the United Kingdom, at 1s. There shall be charged on every letter exceeding half-an ounce, and not exceeding one ounce in weight, two rates; exceeding one ounce, and not exceeding two ounces, four rates; on every letter exceeding two ounces, and not exceeding three ounces, six rates; on every letter exceeding three ounces, and not exceeding four ounces, eight rates; and on every ounce above the weight of four ounces, two additional rates of postage. Every fraction of an ounce above the weight of four ounces shall be charged as an additional ounce. The postage of letters addressed to China is directed to be paid at the time of the same being posted, under penalty of the letter being returned. The postage of every letter addressed to Penang, Singapore, or Hong Kong is directed to be paid at the time of the same being posted; and if any such letter shall be posted without any postage having been paid thereon, every such letter shall be forwarded charged with the amount of the postage to which it would have been liable if the postage had been paid when posted, together with a further and additional rate of postage of 1s.; the value of postage stamps affixed to said letters being allowed. Any letter which shall be forwarded through France shall be chargeable, in addition to the British postage, to any French transit rate chargeable.

Literature.

Everyone who can escape from London is anxious now for a sea change, or a continental excursion, or a month of quiet enjoyment among the mountains. If books are published in August they should be such as are suitable for out-door companions, small in size, lively in contents: books that touch the imagination and quicken the fancy, and take us back for the nonce to the delicious summers of our youth. One or two such volumes lie before us. Here is a "Golden Treasury of Songs and Lyrics," arranged by Mr. Palgrave, dedicated to Alfred Tennyson, and published by Macmillan and Co. The getting up of this charming little book is beautiful exceedingly, and disposes us at once to think well of the contents. And truly we have in about three hundred pages a collection of precious and priceless gems of English poetry, such as will gladden the heart of the poetic student. With such a volume as his companion no man should be dull, for it will yield "a perpetual feast of nectar'd sweets." The collection has been made with the utmost care, and not without a systematic perusal, twice over, of the whole body of English poetry. No important omission can, therefore, be due to oversight, but we are surprised to find that some choice lyrics are wanting, and that some sweet poets are entirely unrepresented. Spenser's glorious nuptial song, the purest, and yet withal the most impassioned epithalamium ever written by a poet-lover, is considered out of harmony with modern manners. Among the Scotch songs we must think that "Bessie Lee" deserved a place; and surely one page at least might have been spared for Mrs. Hemans. Where, too, is "The Isles of Greece"? and where, to go back more than two centuries, is the "Sweet Day so Cool" of saintly George Herbert? But Mr. Palgrave is evidently a man of poetic taste and critical sagacity, and has, doubtless, good reasons, not only for what he has done, but for what he has left undone in the arrangement of this "Golden Treasury."

We have received a copy of Mr. Alexander Smith's new poem, "Edwin of Deira." It is a poem in blank verse, which, although stamped with originality, constantly reminds us of Tennyson's "Idylls." Had that noble poem never been written, this would never have seen the light, at least in its present shape. Yet Mr. Alexander Smith is not to be blamed for the family likeness which exists between his poem and the Laureate's, neither is the younger poet to be termed a plagiarist. It is almost a necessity that the greatest poet of the day should by the force of his genius affect, for good or ill, the other singers, his contemporaries. This poem deserves all commendation. It is finely conceived, and executed with rare artistic skill. It may not be as popular as the "Life Drama," yet there can be no doubt that in all the higher poetic qualities it is immensely superior to that warmly-coloured poem.

The last number of the *Quarterly Review* contains, under the title of "Russia on the Amoor," an able article on the aggressions of that country in Eastern Asia. The apprehensions of the writer with regard to the policy of Russia have often found expression in our columns. It is true that the latest authority on this question—Mr. Tilley—is of opinion that the peopling of Eastern Siberia cannot take place for a long period to come, and that Russia is desirous rather to keep away disagreeable neighbours than herself to colonise. But the simple fact that Russia has within a comparatively brief period added to her empire a territory equal to the combined areas of France and Italy is a sufficient answer to Mr. Tilley. The frontier of Russia is now less than six hundred miles from the capital of China. "She has," as the *Quarterly* truly observes, "obtained an extensive seaboard on the North Pacific, access by one of the noblest rivers in Asia to the centre of her dominions, a considerable increase of population, and a position in Central Asia in dangerous proximity to the weakened and distracted empire of China." There are several passages in this article which demand attention from us, and which we would willingly transcribe. We shall return to it on a future occasion, but for the present we must content ourselves with recommending it to the careful perusal of our readers. Meanwhile we may remark that the same subject was taken up by Dr. Macgowan a few years since, and that in a pamphlet entitled "Chinese and Foreign Relations" he maintains, looking at the subject from an American stand-point, that the extension of Russian colonies in the

Digitized by Google

Pacific is likely to be beneficial to all the dwellers upon its widespread coasts. If Dr. Macgowan still regards this subject as he did in 1857, we advise him, and all who think with him, to read and inwardly digest the article in the *Quarterly Review*.

We may add, in conclusion, that Messrs. Longman and Co. will publish in October "A Narrative of the China Campaign of 1860, and of a Short Residence among the Rebel Forces at Nanking." By Lieutenant-Colonel Wolseley, Deputy-Assistant Quartermaster-General to the Expeditionary Force.

Parliamentary Intelligence.

HOUSE OF LORDS.

INDIA.

(2nd Aug.) Lord MONTEAGLE presented several petitions from natives of Bengal, Behar, Orissa, Bombay, Madras, and Tanjore, representing the state of the British possessions in India, and praying for the redress of grievances. He wished to know whether the Government would lay on the table of the House the speech which Mr. Laing lately made in the Legislative Council of India, and also when the financial accounts of the Indian Government would be published.—Earl DE GREY and RIPON said that, not having had notice of the question of his noble friend, he could not undertake to produce Mr. Laing's speech. It was very undesirable that it should be made a practice to lay speeches by members of the Legislative Council before Parliament, as they ought to be encouraged to work and not to speak. The financial accounts of the Indian Government had already been circulated.

HOUSE OF COMMONS.

PRIZE MONEY.

(30th.) Mr. DEEDES asked the Secretary of State for India whether he was enabled to fix a more decided time for the settlement and distribution of the Delhi and Lucknow prize-money than he did on the 3rd of August last year, and again at the commencement of the present Session, and what was the cause of delay.—Mr. SCHOLEFIELD also inquired whether any medals granted for military service in India were still undistributed.—Sir C. WOOD said that with respect to the prize money, he had never been able to fix any period for its distribution, nor was he able to do so at present; but he had urged the Indian Government to lose no time in the matter. He did not know whether any medals for service in India were undistributed, but if the hon. member applied in a formal way to the India-house he would receive an answer.

SUEZ CANAL.

(1st August.) Mr. GRIFFITH asked the First Lord of the Treasury whether accounts had been received from the Consul-General in Egypt giving the assurance that no forced labour was being employed or would be employed on the works of the Suez Canal.—Lord PALMERSTON said a report had very recently been received from the Consul-General, who had made a tour along the line of the intended canal, and it appeared that a considerable number of labourers were compelled to work on the canal; that they were very liberally paid by the company, but that they had been brought to the spot without their wishes having been much consulted.

CHINA.

(2nd.) Col. SYKES asked the First Lord of the Treasury whether any further papers regarding affairs in China were to be given to members.—Lord PALMERSTON said that no additional papers with regard to China were in preparation at the Foreign-office, and he was not aware that any more were required.

COLONIAL MILITARY EXPENDITURE.

The Report of the Select Committee appointed to inquire whether any alterations may be advantageously adopted in regard to the defence of the British dependencies, and the proportions of cost of such defence as now defrayed from imperial and colonial funds respectively has been published. The committee are of opinion, amongst other matters, that no uniform rule as to the cost or mode of their military defence can be laid down which shall be applicable alike to communities so various as those which compose the British colonial empire, but that as to what are called the second class of dependencies the responsibility and main cost of their defence properly devolves on the Imperial Government. The cost of the dependencies properly called colonies ought, the committee think, to devolve mainly on themselves. They submit the following further suggestions as arising from the evidence laid before them:—That it is inexpedient that the proportions of cost of colonial defence to be borne by the Imperial and Colonial Governments respectively should be the subject of negotiations with the various dependencies, but that evidence has been given tending to show that the mode of proceeding adopted by Lord Grey in 1851, in announcing to the Australian colonies the terms on which alone imperial troops could be sent there, may be gradually applied to other dependencies. That in the case of the Australian colonies, comprised in the first class, the number of imperial troops, ought to be reduced. That with respect to New Zealand, while it may not be right, under all circumstances, to withhold from the settlers in that colony assistance in protecting themselves against the attacks of native tribes, so long as the Imperial Government retains a control over native policy, their principal reliance ought to be on their own resources. That with respect to the South African colonies, and all those similarly circumstanced dependencies which contain large European populations, their security against warlike tribes or domestic disturbances should be provided for, as far as possible, by means of local efforts and local organisation; and that the main object of any system adopted by this country should be to encourage such efforts, not merely with a view to diminish imperial expenditure, out for the still more important purpose of stimulating the spirit of self-reliance in colonial communities. That the settlers in South Africa should be called upon to contribute a larger sum than they do at present towards the military expenditure of those colonies. That the expense of the troops in Ceylon should be in a greater degree borne by the colonial treasury. With respect to the West Indies, it appears that about 4,200 troops (consisting of European and coloured regiments, in nearly equal proportions), are now maintained there, mainly for the purpose of securing those colonies against internal disorder; that the defence in time of war of these possessions of the British crown, as well as of the other distant colonies, must be principally naval, and that it is for many reasons inexpedient that the duty of a local police should be performed by scattered detachments of imperial troops, at the cost of this country; it is, therefore, in the opinion of the committee, desirable that, due regard being had to the peculiar circumstances of these colonies, the force now maintained in them should be gradually reduced. The committee are further of opinion that the multiplication of fortified places and the erection of fortifications in distant colonial possessions, such as Mauritius, on a scale requiring for their defence a far greater number of men than could be spared for them in the event of war, involve a useless expenditure, and fail to provide an efficient protection for places, the defence of which mainly depends on superiority at sea. In conclusion, the committee submit that the tendency of modern warfare is to strike blows at the heart of a hostile power; and that it is therefore desirable to concentrate the troops required for the defence of the United Kingdom as much as possible, and to trust mainly to naval supremacy for securing against foreign aggression the distant dependencies of the empire.

ADMIRAL SIR THOMAS HERBERT.

We have to record the death of Vice-Admiral Sir Thomas Herbert, K.C.B., who expired on the 5th inst., after a protracted illness. This distinguished officer was born in the county of Kerry, in 1793. He entered the navy on the 23rd of July, 1803, as first-class volunteer on board the *Excellent*, and on that ship proceeding to the Mediterranean was rated a midshipman the following year. On the 1st of August, 1809, as a reward for the gallant conduct he exhibited while prizemaster of the *L'Alert*, 20, he was nominated by Sir Alexander Cochrane to a lieutenancy in his flagship, the *Neptune*, 98. On the 19th of October, 1814, he was advanced to the rank of commander. On the 10th of November, 1837, having been ashore for a period of fourteen years, he was appointed to the *Calliope*, 26, and proceeded to the Brazils, where, until the arrival of Commodore T. B. Sullivan, he executed the onerous duties of senior officer. He was subsequently ordered to assume the command of the naval force in Rio de la Plata. In January, 1840, he proceeded to join Rear-Admiral C. B. H. Ross at Valparaiso, whence in the following June he sailed for China. Arriving in the Canton river on the 10th of October, Capt. Herbert assumed, and, until the arrival of Rear-Admiral the Hon. George Eliot on the 20th of November, retained the command of the blockading force. On the 7th of January, 1841, while in command of the advanced squadron off the Boca Tigris, he conducted the attack made on the enemy's forts at Chuenpee, where were destroyed 11 powerful junks, the flower of the Chinese fleet; and on the 23rd of February, being at the time on board the *Nemesis*, he effected the destruction of a 20-gun battery at the back of the island of Anunghoy. Three days afterwards, while in the *Calliope*, he headed the operations against the celebrated Bogue Forts; and on the 27th attacked the enemy's camp, fort, and ship *Cambridge*, bearing the Chinese Admiral's flag, at their position near Whampoa, where 98 guns were destroyed. On the 13th of March, after capturing the last fort protective of the approaches to Canton, Capt. Herbert's squadron advanced towards that city, and on the 18th attacked all the batteries and flotilla in its vicinity, and after a severe conflict was enabled to plant the British flag on the walls of the Factory, thus placing totally in their power the capital of Kwang-tung. In the month of June Capt. Herbert succeeded, owing to the death of Sir H. F. Senhouse, to the command of the whole force in that river, and on the arrival shortly afterwards of Rear-Admiral Sir W. Parker as commander-in-chief was removed to the *Blenheim*, 72, in which ship, in the course of the following months, he assisted with great distinction at the capture of Amoy, Shanghai, and the retaking of Chusan. After being present at the surrender of Ningpo, he returned to Hong Kong in February, 1842, and resumed the command of the squadron in the Canton river. Sir Thomas for his gallantry and meritorious services was rewarded with the title of Knight Commander of the Bath, and returned home in the *Blenheim* in March, 1843. In January, 1847, he was appointed Commodore on the south-east coast of America; from February until December, 1852, he was one of the Junior Lords of the Admiralty. He represented Dartmouth in the House of Commons from July, 1852, to April, 1857, but contested that borough unsuccessfully in 1859.

MISSIONS TO INDIA AND CHINA.

The Church Missionary Society have engaged the following gentlemen or missionary work, and they will forthwith proceed to the stations for which they are respectively designated:—The Rev. Townsend Storrs, B.A., of St. Catherine College, Cambridge, to Lucknow; the Rev. William Hooper, B.A., of Wadham College, Oxford, to Benares; the Rev. William Edward Rowlands, B.A., of Wadham College, Oxford, to Colombo, Ceylon; the Rev. Thomas Stringer, M.A., of Brasenose College, Oxford, late Curate of Compton Bishop, Somerset, to Hong Kong; the Rev. J. Wolfe, to Foo-Chow-Foo; the Rev. John Sharp, B.A., of Queen's College, Oxford, to the Teluga Mission, South India; and the Rev. J. Whitchurch, to Tinnevelly.

A BANQUET TO THE SIAMESE AMBASSADORS.

The Bordeaux journals state that, on the 3rd inst. the prefect of the Gironde and Mdme. de Mentque gave a grand party in honour of the Second Siamese Ambassador, to which all the *beau monde* of the city were invited. The illustrious visitors seemed greatly to enjoy the gay scene before them. One of the Siamese, who spoke English well, conversed with many of the guests, and expressed himself highly delighted with the reception given to him and his countrymen.]

Post-office orders should be made payable at the Lombard-street Office, to MORTIMER WRIGHT.

The London & China Telegraph.

LONDON, THURSDAY, AUGUST 15, 1861.

THE NEW GOVERNOR-GENERAL OF INDIA.

The announcement that Lord Elgin has been appointed to succeed Lord Canning, in one of the highest posts that can be occupied by a British subject, has created general satisfaction. Men of divers politics—men pledged to party and men who care more for the true interests of England than for any mere party triumph, are alike ready to own that Lord Elgin's intellectual vigour, his accumulated experience, his large knowledge of men and things, his tact when tact is requisite, his manly, straightforward bearing when the situation of affairs calls for an open and public avowal of his policy, his administrative capacity which has been so fully tested in Canada, and his wonderful successes in China, all prove his fitness for the position to which he is now called. There is, indeed, but one other living man whose claim on his country appears to be equal, and who, had the post been awarded him, might have occupied it as worthily. We need scarcely say that we allude to Sir John Lawrence. That great and good man may be said to have saved the British power in India at the time of its direst extremity. Among the noble men who in that frightful emergency sustained the glory of our country there can be no question that Sir John Lawrence occupies the foremost place. Neither do we think there can be any doubt of his ability to sustain the weighty cares and perplexities of a Governor-General. We render this tribute all the more readily to the ruler of the Punjaub, since at the same time we consider the appointment of Lord Elgin in every respect a suitable one, and one which will be ratified by the general voice.

The question whether it be better to select a man for this honourable office who is a stranger to India, or one who is familiar with the intricate politics and precedents of that caste-ridden country, has been once more raised by the announcement of Lord Elgin's appointment. Singularly enough the Dutch are at this very time about to send out a new Governor-general to Netherlands India, and in Holland as well as in England men are asking whether it is better that a ruler should be selected who is unfamiliar with the country he is appointed to govern. Baron Stoet van de Beele has never visited the East, and Lord Elgin has never held any office in India. On the one side it is argued that the lack of specific knowledge is an insuperable obstacle; on the other it is affirmed, as we believe with greater truth, that a man will have more power of independent action, will be more impartial, and more far-sighted, if he comes freshly upon the scene of action, and is ignorant of the jealousies, the intrigues, and the technical obstructions, which are familiar to the official resident in a country.

But, after all, this is not a vital point for consideration. The real object is to secure a ruler who has been well versed in affairs, who has a large acquaintance with men, whose administrative capacities have been well tested, and who is fully alive to the responsibility he incurs in assuming the reins of government. Let a governor, whether in India or elsewhere, have these qualifications for his post, and he will find no difficulty in acquiring and turning to account, the special knowledge demanded. Lord Elgin, we believe, possesses all these advantages, and will know how to use them wisely when ruling over a hundred millions of British subjects in India. Like all mortal men, indeed, he has his faults; and *The Times* the other day justly warned him to beware of the unpardonable weakness in a great man of praising himself; but, on the whole, we believe that, as Governor-General of India, Lord Elgin is emphatically the right man in the right place, and that the vast interests of our Indian empire may be safely entrusted to his hands.

CONTINUATION OF THE SEMI-MONTHLY MAIL.

We are glad to announce that the efforts which have been made to induce the Government to alter its decision with reference to the stoppage of the mail of the 20th–26th of each month, have at length proved successful. The announcement of this decision was first communicated to the public in the *London and China Telegraph* of the 17th July, and in a supplement to that journal issued on the 1st August the final arrangement was thus announced:—

"We have authority for stating that the negotiations for the continuation of the semi-monthly mail to China have been finally concluded with the Peninsular and Oriental Steam Navigation Company, and that instructions will be forwarded by the mail of the 3rd instant to Bombay to despatch the necessary steamer to Galle to convey the mails leaving this on the 20-26th instant. The rate of postage, as already stated, will be increased from 6d. to 1s. per half-ounce, and this rate will also apply between China and Australia."

Our readers have been supplied with the memorial signed at our office, and with the details of the negotiation between those interested and the Government, in the person of the Chancellor of the Exchequer, and it is probable that, judging from those details alone, the opinion of most of our readers will have been adverse to that which we have expressed from the first — that the mails would not be discontinued by Government. Unlike our contemporary *Punch*, who adroitly claims a victory from either a winning or losing prophecy, we can claim a victory in its full and legitimate sense, gained in the same manner as the successful establishment of this journal, viz., by energy, hard work, and a determination to overcome all difficulties. We do not for a moment throw into the scale the Government *quid pro quo* in the increased rate of postage adopted, for we have not been able to elicit from any one the slightest possible objection on this score. The point at issue was 'to get the mail,' not the price it would cost; and, indeed, some of the merchants with whom we communicated on the subject went so far as to say that if the Government, or, to speak more definitely, the Chancellor of the Exchequer, was so parsimonious and short-sighted as to stop the most vital requisite for promoting our newly acquired rights in China, the merchants should continue the mail at their own expense.

It may prove interesting to our readers to learn the course which has been adopted from the first notification that the fortnightly mail would be suspended, until the recent successful termination of our efforts for its retention. The first step taken was to frame a remonstrance to the Treasury from the East India and China Association. This was signed and forwarded by Mr. Gregson, M.P., the Chairman of the Association, and elicited a reply of a very decisive and nugatory character.

This, of course, ended the matter at that stage. When the Chancellor was informed that the matter would not rest here, and that a memorial was in course of signature, and when he was requested to name a time for the reception of a deputation, he, in his usual astute and indefatigable manner, applied himself to the subject, and cast about for material to discomfort the enemy, and, fortunately for us, he "wrote a letter," of which the following is a copy:—

My Dear Sir,—I can readily appoint, if you think fit, an early day for the reception of the memorial to which your letter of the 19th refers. But if, as is probable, the deputation is proposed with a view to the discussion of it, then it would be desirable that I should be put in possession, whether by the memorial itself or otherwise, of the main facts and arguments on which it is intended to rely. I consider this as practically an application for a *new* postal subsidy. The Government have never paid except under the exceptional circumstances of the war and occupation, for the fortnightly mail to China. When the P. and O. Company applied for payment at the close of last year, military considerations left us no choice. The postal yield of the fortnightly mail is very trifling, and recent events have all tended to show how dangerous it is for a Government to make postal contracts with a view to purposes of general utility. I do not doubt that all multiplications of opportunities for correspondence are beneficial, but this is of course a question of degree, nor is it unimportant to consider the bearing which our giving way in this case would possibly have on other demands in the Eastern seas.

I remain, &c.,

(Signed) W. E. Gladstone.

June 21, 1861.

S. Gregson, Esq., M.P.

Digitized by Google

As Secretary to the memorialists this was at once placed in our hands. We had an inward exultation that as the battle was to be fought on paper, and we had not to cope with the formidable rhetoric of Mr. GLADSTONE, the advantage was ours, and we entered the ranks with a right good will.

On reading the passage which very unequivocally avers "that Government had never paid for a fortnightly mail to "China," save under exceptional circumstances, it struck us that this was opposed to the facts of the case, and to this point we at once applied ourselves, feeling that if we could but put Mr. GLADSTONE distinctly in the wrong on any cardinal point, our labour would be well nigh ended. To procure a copy of the Admiralty notice for tenders was but the work of a moment, and in that document we found the following clauses in reference to the mail service to Singapore, China, &c., which fully confirmed our belief :—

"A line from Suez to Calcutta and Hong Kong and back monthly. This line will take the mails which have left England in the beginning of each month, and will touch at Aden and Point de Galle, whence one steamer will proceed by Madras to Calcutta, and another by Penang to Singapore and Hong Kong.

"A similar line from Suez to Calcutta and Hong Kong and back monthly, conveying the mails which have left England in the middle of the month, and proceeding in like manner to Point de Galle, and thence by Madras to Calcutta, and by Penang to Singapore and Hong Kong."

Having become strong on a great point, we at once proceeded to answer the CHANCELLOR'S letter, as follows :—

REPLY TO THE LETTER TO MR. GREGSON FROM THE CHANCELLOR OF THE EXCHEQUER, DATED 21ST JUNE, 1861.

"The following facts will show that Government have paid for a fortnightly service :—

"Pursuant to the report and recommendation of the Parliamentary Committee of 1851, the Admiralty issued tenders for a full fortnightly communication between England and India and China, the tender of the Peninsular and Oriental Company for all the services was accepted, and the Government paid for a *fortnightly* mail to China for two years or more.

"It appears that the sudden outbreak of the Russian war leading to the impressment of a large number of the Peninsular and Oriental Company's ships, compelled the Company to seek some temporary relief on the China line, and the Government agreed to reduce the service between Galle and China to a monthly instead of a fortnightly line, and to accept in lieu thereof an extension of the monthly line from Hong Kong to Shanghai.

"In 1857 the Company reduced the second line between Galle, or rather between Bombay and Hong Kong, thus re-establishing the fortnightly line, and they likewise extended this line to Shanghai.

"They subsequently (namely, in 1859,) urged upon the Government a claim for a subsidy for the service so performed, as the Government enjoyed all the privileges of the mail contract in respect thereof.

"The justice of this claim was at length admitted, and at the close of 1860 the Government awarded the Company £12,000 for the extra or fortnightly line for that year, and at the same time agreed to pay the Company £2,000 for each round voyage, or at the rate of £24,000 per annum for the fortnightly line for the first six months of 1861, say to the 1st of July, and then after, unless discontinued, upon two months' notice.

"Although the junction of the China with the Indian mail service is effected at Galle, the Peninsular and Oriental Company make Bombay their terminus, and the communities of Western India and China rely on the postal communication so kept up.

"The circumstance that the fortnightly China line is connected directly with the Australian line at Galle must also tend to increase the postal receipts of the branch, and it must be remembered that neither these nor the receipts for letters passing between Bombay and intermediate places and China are included in the amount of £12,000 referred to above.

"It is necessary to throw light on one more point. The memorialists have reason to believe that it will not suit the Peninsular and Oriental Company to continue the service without a subsidy, and the reason is, fortunately, a very clear one. For the past seven years the merchants in the China trade have complained of the small boats on the Bombay and China line ; and the Company, in order to meet the growing trade, put on only a few months since vessels of double the size, and, consequently, they would be able, with occasional exceptions, to convey the cargo offered by a boat once a month, but with the present small subsidy they are, we believe, willing to run the risk of despatching two in the month, and thus preserve the *statu quo* so urgently needed by the memorialists.

"It is also urged by the Australian merchants that when the Colonists agreed to pay £67,000 per annum towards the postal subsidy, they expected, among other advantages, that the existing arrangements for the mails to China would continue, whereas, as explained in the memorial, their correspondence with China, Singapore, Java, Manila, &c., will be vexatiously delayed."

To this statement the following reply (also addressed to Mr. Gregson), was received from the Lords Commissioners of Her Majesty's Treasury :—

"Treasury Chambers, 31st July, 1861.

"Sir,—The Lords Commissioners of Her Majesty's Treasury have had under their consideration the memorials on the subject of the continuance of the second monthly mail with China, submitted by a deputation comprising many persons of weight, which recently waited on the Chancellor of the Exchequer, and I am desired by their lordships to state to you that, on a full consideration of the statements contained in those memorials, as well as of the arguments advanced by the gentlemen comprising the deputation, they have determined on the re-establishment of this service.

"As, however, their lordships could not have acceded to the wishes of the memorialists without taking measures to relieve the public revenue of the cost of this additional accommodation, they propose to authorise a postage of one shilling being charged on all letters up to half an ounce, conveyed henceforth, between the United Kingdom and China, and also between China and the Australian Colonies, in lieu of the present rate of sixpence.

"I am to add that their lordships have taken this step in the anticipation that the proceeds of the additional rate will in a great degree, if not wholly, meet the charge.—I am, sir, your obedient servant,

(Signed) "GEO. A. HAMILTON.

"S. Gregson, Esq., M.P.,

Our readers will *now* understand, what we perfectly understood at the time, why the CHANCELLOR took such pains to impress on the deputation that this application was virtually one for a new subsidy ; and they will also perceive the very ingenious manner in which he introduced the *saving medium*. We will repeat a paragraph of his speech, which we take from the report of the deputation which waited on him, and which has already been given in full in a previous number :—

"It had been said that an increase in the rate of postage might obviate the difficulty, *but he was not prepared to give an opinion on it.* He should like the deputation to consider the question themselves."

How beautifully innocent and yet how consummately clever ! We saw at once that the victory was ours. No man of Gladstonian *calibre* ever temporises with what he does not intend to yield. The conclusion with him was a foregone one, and no doubt was this :—"I must yield to the reasonable and "sensible protest of the City merchants against a stoppage "of any part of the facilities to which they were accustomed "previous to the extension of our trade by the new Treaty. "This protest is so vexatiously logical, and so in accordance "with common sense, that it cannot be confuted. And yet, "if I give in to this addition to the national expenditure, the "WILLIAMSES of the House will make a terrible handle of it." However, a difficulty with the CHANCELLOR means only a thing to be overcome, and the following idea no doubt soon occurred to his fertile brain :—"The China merchants are rich and "liberal, and will not object to pay an increased postage. I "will suggest it. This will be an admirable and conclusive "answer to all the WILLIAMSES in the House,—the China "merchants *pay* for their second monthly mail."

The quiet way in which he offers his good offices with the POSTMASTER-GENERAL is truly amusing :—

"If they liked he would write to the Postmaster-General and ask him in what shape a practicable proposition could be made to him, and he would then write them on the subject."

Oh ! for the genius of a GLADSTONE. Here he was on the horns of an uncomfortable dilemma, and with what grace and dignity does he escape. We will venture to say that the public were not prepared for the next stage of the proceedings as communicated to us on the 17th ult., and given in *The London and China Telegraph* of that date, as noted above. After this decision, arrived at, be it understood, without any further pressure or efforts on the part of the memorialists, our readers will understand who originated the *saving medium*, and we cannot but admire the very statesmanlike manner in which Mr. GLADSTONE brought about this, to us, very happy result; for, as we have before said, we discard any consideration of the increased rate of postage, and we do this mainly because the public, or, rather, those interested, do not make the slightest demur on that score. After a time, however, we shall feel it our duty to examine into this part of the matter, but we believe that for the present it is expedient to let "well alone." We have been induced to extend our remarks in order to show the reasons which actuated us in withholding the various documents to which we have now alluded. When a great act is to be achieved it is not well to expose all the machinery by means of which it is accomplished. We also wish to explain that the gentlemen who formed the deputation did not deem it advisable to oppose many arguments to the assertions of the CHANCELLOR after he alluded to the possibility of an increased rate of postage meeting the difficulty. They could perceive in this the olive branch, and they evidently caught at it as a safer means, by far, of gaining their point than arguing with such a man as the CHANCELLOR on the merits of the case, and hence their comparative silence.

In conclusion, we must say a word to the small minority who consider two mails a month unnecessary, and, in fact, a "bore,"

Digitized by Google

to use their own term. Fortunately, they did not impede the negotiations of the memorialists by word or deed, and, consequently, we are the more able to respect their opinions. It is argued by this body that a semi-monthly mail is useless, since it creates no more business, but merely involves more correspondence and general office labour, inasmuch as their constituents expect advices by each mail of the state of the markets, &c., &c. Now this looks very feasible, but, in the first place, the non-extension of commerce with an increase of communication is against all experience. Those engaged in the trade are aware that Hong Kong is the depôt for the postal communication with all China and Japan. We will suppose what is a very likely occurrence, that the steamer with the mails from Japan, Shanghai, Foo-chow, &c., meets with an accident and does not reach Hong Kong in time for the steamer leaving with the mails for England, &c., or. as in the case of the *Douro*, the steamer after leaving Hong Kong meets with a typhoon and becomes a wreck. The mails, in either case, are thrown over a whole month. To make a retrograde movement in these days in such an important particular would be stepping back into the days of the East India Company, and would open the door to the would-be monopolists. Even those whose means enable them to maintain their own steamers will be ready to acknowledge that on public grounds they should oppose any retrograde movement in the means of communication, since the proposed alteration would enable a few merchants in China to forestall their neighbours by gaining an earlier knowledge of the state of the home market.

SECOND MONTHLY MAIL TO PENANG, SINGAPORE, AND CHINA.

The following is the notification issued from the Post-office with regard to the renewal of the fortnightly mail. The Treasury Warrant to the same effect will be found elsewhere:—

"In consequence of the urgent applications made to Her Majesty's Government for the restoration of the second monthly service between this country and China, which was discontinued last month, it has been determined to re-establish this service.

"Mails for Penang, Singapore, and China, will accordingly be made up in London on the morning of the 20th inst., for despatch, *via* Southampton, and on the evening of the 26th inst. for despatch *via* Marseilles, and thenceforward the mails will be despatched twice a month, as formerly, namely :— On the mornings of the 4th and 20th *via* Southampton. On the evenings of the 10th and 26th *via* Marseilles.

"As the revenue derived from the correspondence conveyed by the line of packets between Point de Galle and Shanghai is insufficient to cover the cost of this double service, the Lords Commissioners of the Treasury have, by warrant, directed that the postage upon such correspondence shall be increased.

"All letters, therefore, for Penang, Singapore, Hong Kong, and all other parts of China, Japan, Java, the Philippine Islands, Labuan, Borneo, Siam, Sumatra, and the Moluccas, will in future be charged with the following rates of postage viz. :—

VIA SOUTHAMPTON.

"For a letter not exceeding ½ oz., 1s. ; above ½ oz., and not exceeding 1 oz., 2s. ; above 1 oz., and not exceeding 2 oz., 4s. ; above 2 oz. and not exceeding 3 oz., 6s.

VIA MARSEILLES.

"For a letter not exceeding ¼ oz., 1s. 3d. ; above ¼ oz., and not exceeding ½ oz., 1s. 6d. ; above ½ oz., and not exceeding ¾ oz., 2s. 9d. ; above ¾ oz., and not exceeding1 oz., 3s.

"By command of the Postmaster-General,

"Rowland Hill, Secretary.

"General Post-office, August 3, 1861."

LAND COMMUNICATION BETWEEN INDIA AND CHINA.

On the 25th July Sir Charles Wood called attention in the House of Commons to the fact that a treaty had been made with the Rajah of Sikhim. This treaty would, he affirmed, give us a land communication between India and China, not considering that this route would involve a mountainous journey of 1,735 miles from our frontier, and of more than 2,100 miles from Calcutta. The following letter from Mr. Sprye, inserted in *The Times* of August 6, presents the matter in a clear light. Truly it would be passing strange if, when Western China is as it were within our reach through our own Pegu territory, we should attempt to gain commercial access to it across the Himalayas and Thibet :—

"Sir,—In a recent speech, describing the improved system of governing India, and its expected good results, in commerce and finance especially, the Secretary of State for India observed, in relation to the recently-made treaty with the Himalayan Rajah of Sikhim, 'that the terms come to with him included a road to be opened from our territory across Sikhim into Thibet, and the transit of goods into Sikhim and Thibet either at no duty at all or a very low one, by which would be attained what had long been a great desideratum—a land communication between India and China.'

"As you have on more than one occasion noticed the proposal for commercially opening Western China by the natural, short, and easy route across Eastern Pegu from our port of Rangoon, and commented on the irrelevant reasons which the Foreign Secretary of State assigned last year to the Chambers of Commerce of Yorkshire, Lancashire, and Cheshire, for the Government's taking no action therein, you will perhaps permit me to offer a few facts respecting this boasted Government route for such a trade across Sikhim. In doing so I should state, perhaps, that before publicly recommending to our merchants in 1857 the Eastern Pegu route to the West of China, my father and myself had devoted several years to collecting and studying all attainable information of each route by which inland China Proper can be approached by traders from the west—native, British, or Russian. The lines of road and passes from India, over the Himalaya mountain ranges and across Thibet, from the Hindoo Coosh, in the extreme north-west of our territory, to Burmah, on its extreme east, we more particularly studied; including the routes of Nepaul, Sikhim. Bhootan, and Assam, in which we were assisted by the travels and reports, among others, of Turner, Griffiths, Pemberton, Hannay, Wilcox, M'Culloch, Hodgson, and Hooker.

"Mr. Hodgson, many years the Governor-General's Resident at the Nepaulese Court, long since urged the native merchants of Calcutta to establish active trade with Thibet, &c. He addressed to the Government of India several instructive papers on the then state of trade between Bengal and Nepaul; and some writings of his, containing very valuable geographical additions to what is in the works of Turner and other travellers in that part of the world, were printed at Calcutta in "Selections from the Records of Bengal." They clearly show that a respectable traffic may be created, by patient native merchants, between Bengal and Thibet, and that we may thus commercially preoccupy ground in that part of Central Asia into which Russian merchants will otherwise advance from Kashgar, Ili, and Ta-bagati. As assisting such a trade with Thibet, the improved commercial relations with the Sikhim Rajah are therefore valuable. But whether the western half of China Proper can be reached by British merchants, with British goods in commercial quantities, across Sikhim, or by any other Himalayan route, the following facts may assist you to judge :—

"The little State of Sikhim intervenes between Nepaul and Bhootan, and is crossed from west to east in its north and south regions by the same Himalayan ranges, with their numerous irregular and lofty spurs. It is the basin of the River Tishta; the Lachen and other feeders of which rise within its narrow limits right and left of that stream, which flows due south down the centre of Sikhim, and is the dividing line between the central and eastern portions of the Himalaya. The trading route up across its southern, middle, and northern regions, I have not the necessary papers and maps with me to detail; but a tolerably correct opinion of it may be formed from a description of the land portion of the adjacent route between our territory and Thibet across Nepaul, some of my notes on which are at hand.

"By the Ganges and its tributary, the Ganduck, there is water carriage from Calcutta to Govindgunge, or the Ghaut of Ganduck, at the foot of the Southern region of the Himalayas. But at that point land carriage must commence, and be continued the entire way through Thibet to Western China on the backs of bullocks, mules, or hill coolies, by daily stages, according to the steepness and nature of the roads.

"At Govindgunge the merchandise has to be prepared for bullock carriage. It can be so conveyed to Hitvunda, about 105 miles, in nine or ten days. At Hitvunda the goods have to be re-arranged for carriage by hill coolies to Katmandoo, a distance of about 47 miles, which is accomplished in six or seven days. From Katmandoo the Pass of Konti, on the frontier of Thibet, is about 84 miles. Over this the merchandise has also to be carried by coolies, which occupies from eight to ten days. Thus from our frontier, at the foot of the Southern region of the Himalayas, to the Thibetan frontier, by Katmandoo, is about 236 miles transit across which, by bullocks and coolies, occupies twenty-four days, exclusive of halts.

"From the Nepaulese frontier pass to Lhassa merchandise is carried on mules and ponies. The route is through the Thibetan town of Shigatze, on the River Tsanpon or Yaru, where the Painom falls into it. Its distance from the pass is about 221 miles, which is traversed in 18 to 20 days. From Shigatze to Lhassa is about 178 miles, and this occupies at least 12 days more. This gives a distance from the Konti Pass to Lhassa of 399 miles, capable of being traversed with merchandise in 30 days; and from leaving water carriage in India to the same city, a total distance of 635 miles, requiring 54 days for the conveyance of goods.

"As Sikhim lies to the east of Nepaul, it is certainly so much nearer to Lhassa. The difficulties of transporting merchandise across it are, however, the same, if not greater. The narrow strip of mountain territory has on its north-east frontier the Chumulhari Peak, rising 24,000 feet above the sea; and on its north-west frontier the more lofty Kangchun,

Digitized by Google

which rises up fully 28,000 feet above the sea level. The Pass from Sikhim into Thibet is by the ravine of the Lachen stream, under the latter peak. From that pass the route to Lhassa is also via Shigatze, which is distant from the pass about 95 miles.

"Merchandise thus conveyed to the Thibetan capital has to be carried orward thence to Western China also on mules, ponies, and bullocks. The Abbé Huc, who travelled it in the best season of the year, and with every facility for good progress provided for him by the authorities at Lhassa, occupied three months from that capital to Ta-Tsien-Leu, on the western frontier of China Proper. And his general description of the difficulties and perils of the route, after the first few days from Lhassa, makes it a wonder indeed how any traffic carried on across it can be made to pay, without even Chinese traders having to undergo for minimum profits the maximum of labour and fatigue. Thanks, however, to the Mr. Hodgson before referred to, we have a more detailed account of the road from Lhassa to the West of China in his translation of the Itinerary of Káji-Dalbanjan-Pándé, who was sent, in 1822, by the Maharajah of Nepaul as Ambassador to the Court of Peking. This Itinerary, which is supported by another kept differently and much more briefly by an ambassador sent from Katmandoo to Peking in 1817, shows the distance from Lhassa to the Chinese frontier town of Ta-Tsien-Leu to be 468 Nepaulese coss, or 1,100 English miles. It took the well-mounted embassy in the best season of the year 64 days to traverse it, during which 62 mountain ranges and 149 rivers were crossed.

"Thus, then, the total distance from the water carriage point in India to the western frontier of China, across the Himalayas and Thibet, is shown to be fully 1,735 miles, and to require in the fine season, without counting halts, 138 days for the carriage of goods across it, which is at the average rate of 12½ miles a-day. What extent of 'commerce,' as British merchants understand the term, can be so carried on 'between India and China,' what length of time must pass before the returns can reach Calcutta, and what commensurate profit may be realised, your readers will be able to judge better, perhaps, than can Sir Charles Wood. As a commercial opening to Thibet at a point that may enable native Indian merchants to compete with those of Russia in that field, the treaty with the Sikhim Rajah may in time become of some value to our manufacturers; but never, I think, as opening a gate and way by which their goods may reach rich and populous Western China.

R. H. F. Spry.

Mr. Spry's letter has drawn a reply from Mr. J. D. Hooker of Kew, also addressed to *The Times*, and entitled "Trade with Thibet." After observing that Mr. Spry has proved the unpracticability of the proposed route through Sikkim and Thibet as a means of communicating with China, Mr. J. D. Hooker adds :—

"India, it is believed, will eventually become the greatest tea-producing country in the world. Central Asia, from Thibet to Siberia inclusive, is the largest tea-consuming area in the world, but it does not produce a leaf of tea. Sixty miles only intervene between Thibet and the British tea plantations in Sikkim, but all the tea consumed in Thibet comes from China, 1 000 miles to the eastward, and over numerous chains of lofty mountains.

The Russians are as great tea consumers as the Asiatics, and they are rapidly pushing their outposts southward and eastward, towards the Himalaya; but neither does Russia contain in all her vast dominions one acre of tea-producing land.

"I have spent many months among the Thibetan people in North Sikkim and Nepaul, and can testify to the eagerness of the natives to procure good tea, and even bad tea, for I could offer them no more acceptable present than a few spoonfuls of leaves from my mouldy stock of Assam congou; this was because the only tea they have is what was the sweepings of the manufactories of China, softened with bullocks' blood, and pressed into moulds with all sorts of impurities, which composition, as 'brick tea,' is their most dearly-prized article of diet, affording meat and drink, and serving as the current coin of the country. The Thibetans, are, further, most eager to procure broadcloths, cutlery, and a great variety of English wares and Bengal produce, for which they barter shawl wool, salt, borax, musk, flour, gold dust, amber, turquoises, copper, sheep, and ponies of a breed which is invaluable both in the plains and hills of India.

"With regard to the alleged difficulties of the passes, it is enough to state that every bit of wood used in house building in Thibet goes across the Himalaya, and that in one day I have counted several hundreds of yaks, mules, ponies, sheep, goats, dogs, men, women, and children crossing a pass upwards of 18,300 feet high; every biped and quadruped loaded, according to its powers, with planks of wood, rice, millet, Indian corn, sugar, tobacco, spices, bamboos, rattans, cotton and silk stuffs, and numberless other products of the Himalaya valleys, to be bartered for brick tea, Chinese crockery, and the articles I have enumerated above.

"Again, no circumstance that came under my observation in India so surprised me as the fact that upwards of 1,000 continuous miles of British frontier were closed to British trade and enterprise; a frontier, too, that divided countries more diverse as to their physical characters, their natural products, and consequently as to their several wants, than any other two on the face of the globe. I have never ceased to urge, when opportunity offered, both in India and England, the importance of opening up this frontier by a route through Sikkim, believing as I do that the trade in tea between India and Thibet will eventually do more to benefit the latter country than, perhaps, any other whatever."

Vice-Admiral Sir James Hope, K.C.B., has just sent to the National Life-Boat Institution the liberal donation of £50.

The freedom of the ancient city of St. Andrews has been presented to General Sir Hope Grant.

Down to the close of last year the number of European gold miners in Victoria was 87,394, and of Chinese 20,128.

LIFE IN JAPAN.

The artist and correspondent of the *Illustrated News* in Japan is furnishing that journal with some interesting illustrations, accompanied with notes. A letter from this writer appeared in the last number of the journal, descriptive of "Life in Japan," from which we extract the following paragraphs. His first sight of Nagasaki is thus described :—

"At night we went ashore to get our first impressions. Rather an odd time to choose, but it had the charm of novelty, and gave one a dream-like feeling in harmony with the occasion; we jumped into a boat and went on shore. A musical native party on the water were singing, accompanying themselves on a guitar of the period. After stumbling about over a lot of stones we arrived in a street paved with flags, and wooden cottages on each side; all of a dingy brown, and missed the brilliant shop-signs of China. A curious shuffling of straw sandals and clacking of wooden pattens are sounds peculiarly characteristic of the country, and never to be forgotten; the streets were crowded with young and old men, women, girls, and children; every second party was singing the last favourite Japanese song, giving a grunt at the end of each verse most curious to hear a regular ugh! Every one looked slovenly in the extreme in their dressing-gowns. The girls had great sashes round their waists, tied up squarely behind. All turned in their toes, and nobody walked properly. Pastrycooks' stalls, beautifully neat, appeared now and then, and the venders, with nothing on but a bit of linen round their loins, were cutting away at the almond cakes most dexterously. The shops were mostly open, and the men kneeling down on the mats were selling their goods. The floors were raised about a foot from the ground. A square wooden box, lined with metal, containing a charcoal fire for boiling tea and lighting pipes, was in every house. At night almost everybody carries a lantern. The woodwork of the houses is remarkably neat, and the interiors wonderfully clean. Having finished our stroll we returned to bed, much gratified with what we had seen."

Here is a glimpse of Nagasaki by daylight :—

"We went into a house where some Japanese men were enjoying themselves, eating and drinking saki, whilst some singing girls were playing the banjo. They invited us to join them, which we did. In front of us was a beautiful garden, and rocks, trees, and flowers, an arbour, with a beautiful kind of laburnum hung in clusters. Numbers of priests, with two swords, walked about the town. We saw a number of girls in mourning (white dresses over red ones), and white handkerchiefs on their heads, and black scarfs round their waists; also an advertisement of a Japanese circus that is to come here at the bridge. The streets are remarkably clean, but there is not the brilliant colouring of China in them. The walks about here are exquisitely beautiful. I had breakfast one morning at a tea-house—fish, rice, and fowls. Everything almost is lacquered; they even put rice in black, lacquered boxes to carry about. A fireplace is sunk in the floor in the middle of the room. The joss-places in the houses have white paper before them instead of red, as in China, and white lanterns. A curious thing here is to see the men with their blue and white towels tied round their heads, some of them being perfectly disguised, as nothing but the eyes are visible."

The writer, who, artist-like, has a keen eye for the picturesque, describes in very pleasant fashion the voyage to Kanagawa, and some of the attractions of that place and of Yokuhama.

"On the 1st of May we started for Kanagawa through the inland sea. We were five days going, during which we passed the most exquisite scenery conceivable. Sometimes we passed through narrow passages wooded to the water's edge; at others the hills surrounded us, giving the sea the appearance of a lovely lake. We anchored at night two or three times. The weather was magnificent. Now and then we met junks and fishing-boats. The sailors held up their hands above their heads and uttered a peculiar cry by way of salutation. We passed several forts in course of construction, built in the European style—with stone masonry, and grass on the top. One day we caught a glimpse of the high road to Yedo, with trees planted on both sides. On the 6th we arrived at Kanagawa. The country was more open than at Nagasaki, but beautiful. Two Japanese war steamers lay in the harbour, and a fine European-looking fort defended Kanagawa. Yokuhama is on the left of the bay as you look inland. It is the place where the Europeans live. The streets are wide, and the houses are built of wood, something in the Swiss chalet style, with grey roofs relieved by white, so beautifully neat and finished that it is a pleasure to look at them. The shops have a most tempting display of lacquered ware and china. Now and then is a fireproof house built of mud that hardens; even the doors and windows are of mud and fine chipped straw. Then they are chunamed, and have a very nice appearance. We went to the Yokuhama Hotel. Most people here live on the ground floor, and some of the rooms of the Europeans are furnished quite in English style.

"I was delighted with the foreign look of the place; nothing European about it. The houses are all of wood on account of the earthquakes. But the strangest thing of all is to see the Japanese remove an entire house to a great distance on bamboo rollers and beams. Every few yards there are fire-buckets piled into a pyramidal shape, and look-outs with a big bell. Then there are the guardhouses and stands of European muskets. All the soldiers here are armed with them and pouch-belts. They look picturesque when out for exercise with the curious hats, some like the top of an egg cut off, and others with lacquered Chinese-shaped ones. There are a good many Chinamen here.

"We visited a Japanese merchant's house. I never saw such a pattern of cleanliness and finish as the interior of his apartments afforded. His wife handed us tea and cakes in a perfectly lady-like manner. In the room was a Japanese thermometer. We bade them adieu, and went over to Kanagawa, a nice little town. At the road-side tea-houses girls asked us in to take a cup of tea. One of them was so pretty and engaging that I gave her my pocket handkerchief. Here we saw a funeral. The fol-

Digitized by Google

lowers' sword handles were done up in white paper. Having seen the holy mountain Fusiyama, we walked back to Yokuhama through pretty lanes. The thatched cottages and a certain something in the women and their sociable smiling faces reminded me greatly of Manila. Story-tellers every afternoon stand at the corners of streets. The town boasts a theatre, and there are large bathing-rooms—the men's department being on one side, and the women's on the other; a ticket-taker is placed at the door; and there are pigeon-holes for the clothes with tickets and number attached. The police walk about at night with their rings on an iron rod. The Japanese are much afflicted with skin diseases and the itch."

The finality clause is rather a damper after all the pretty things the writer has been telling us, but unfortunately it is only one fault among many which may be placed to the discredit of the Japanese.

VISIT OF THE SIAMESE AMBASSADOR.

The following paragraph appeared in *The Times* of the 14th inst.:—"The steam frigate *Asmodee*, having taken in her coal, is waiting in the roads of Toulon to receive the Siamese Ambassadors." For the information of our readers, we beg to state that the Ambassadors will, previous to their embarkation at Toulon, visit this country, and we understand that Mr. Knox, interpreter at Bankok, will form one of the deputation to receive them on their arrival here.

We understand that the Bishop of Victoria has not yet made the selection for the post of Head Master of the Government School which the Government of Hong Kong propose to found for the education of Chinese youths.

THE VICTORIA CROSS TO THE HEROES OF TAKU.

The Queen has been graciously pleased to signify her intention to confer the decoration of the Victoria Cross on the undermentioned officers and soldiers, whose claims to the same have been submitted for Her Majesty's approval, on account of acts of bravery performed by them in China on the occasion of the assault and capture of the North Taku Fort, on the 21st of August, 1860, as recorded against their several names—viz.:—

Lieutenant (now Captain) Robert Montresor Rogers, 44th Regiment (now of the 90th Regiment); Private John M'Dougall (No. 220), 44th Regiment, and Lieutenant Edmund Henry Lenon, 67th Regiment, for distinguished gallantry in swimming the ditches and entering the North Taku Fort by an embrasure during the assault. They were the first of the English established on the walls of the fort, which they entered in the order in which their names are here recorded, each one being assisted by the others to mount the embrasure.

Lieutenant (now Captain) Nathaniel Burslem, 67th Regiment (now of the 60th Regiment), and Private Thomas Lane (No. 612), 67th Regiment, for distinguished gallantry in swimming the ditches of the North Taku Fort, and persevering in attempting during the assault, and before the entrance of the fort had been effected by any one, to enlarge an opening in the wall, through which they eventually entered, and in doing so, were both severely wounded.

Ensign (now Lieutenant) John Worthy Chaplin, 67th Regiment (now of the 100th Regiment), for distinguished gallantry at the North Taku Fort. This officer was carrying the Queen's colour of the regiment, and first planted the colours on the breach made by the storming party, assisted by Private Lane, of the 67th Regiment, and subsequently on the cavalier of the fort, which he was the first to mount. In doing this he was severely wounded.

Hospital Apprentice Arthur Fitzgibbon, Indian Medical Establishment, for having behaved with great coolness and courage at the capture of the North Taku Fort on the 21st of August, 1860. On the morning of that day he accompanied a wing of the 67th Regiment, when it took up a position within 500 yards of the fort. Having quitted cover, he proceeded, under a very heavy fire, to attend to a dhoolie-bearer, whose wound he had been directed to bind up; and, while the regiment was advancing under the enemy's fire, he ran across the open to attend to another wounded man, in doing which he was himself severely wounded.

Naval and Military.

THE "WARRIOR."—On the 8th inst. the *Warrior* hoisted her pennant at last, and made her first brief voyage from Blackwall to Greenhithe. Beyond the mere fact of its being the first voyage there was not much of interest in the proceeding. She had the assistance of many powerful tugs, was under steam herself, and answered her helm so readily as to be always completely in hand. With such aids, notwithstanding the very strong wind and sharp turns in the river, she proved as manageable as a penny steamboat, and within two hours of the time of her leaving the Victoria Dock was quietly swinging to her anchor a little above Gravesend. There was an almost total absence of curiosity to witness her departure from the docks, and, in fact, very few at all ventured to brave the gusts of wind and torrents of rain that swept across the river like banks of mist throughout all the early parts of the day. This lack of interest, however, was evidently due solely to the wretched weather. Precisely at half-past one, the tide in the river having risen to the level of the water in the docks, a regular team of steam tugs made fast to the *Warrior's* stern, and, the gates being opened, went blustering and splashing out into the Thames, towing the massive, black, and ominous-looking ship stern foremost after them. As she cleared the dock gates the ensigns and pennant were run up, the band of the Marines playing "Rule Britannia." No cheering was attempted, for there was plenty to be done at once, as the force of the tide and wind came full on her broadside, and in spite of all the sturdy efforts of the tugs began to drift her up the stream. The tugs made a gallant struggle for it, but in vain, and if the *Warrior* herself had not been in working order with her engines, she might have gone much further up the river than would have been either safe or convenient. As it was, a very few turns of her gigantic screw, which seemed to stir up the very bottom of the Thames, soon checked her progress, and sent her into the middle of the river, facing fair down the stream. Once in this position, no further difficulty was experienced. The engines worked with an ease which, considering their immense size and newness, was almost marvellous. Not a single part required alteration, easing, or even adjustment of any kind whatever. The greatest pressure of steam in the boilers at any time was 21 pounds, but as a rule it was kept below this. The greatest number of revolutions obtained, or, more properly speaking, allowed per minute yesterday was fifty-eight, and at this all worked as smoothly and quietly as when the screw was scarcely turning. This number of revolutions was required only once, and that merely for a minute or two, to turn the *Warrior* astern. At full speed at sea the engines will make sixty-two revolutions per minute, which will give her a speed of screw of eighteen knots. Allowing as much as one-sixth of this for "slip" (in the case of the *Warrior* the slip is not expected to exceed one-eighth), we shall have a speed of fifteen knots—a speed which no man-of-war in the world comes within a knot an hour of. As far as can be judged at present there is every prospect of the *Warrior* making even more than this great velocity in her trial trip next month. All that now remains to be done to the *Warrior* is in the way of internal fittings, her rigging and hull are complete. The outside as it shows now, is the very perfection of workmanship, the plates fitting in with the smoothness of a coat of varnish. It is impossible to detect with the eye where any join is made.

Her Majesty has been pleased to confer the Knighthood of the new Indian Order upon Lord Combermere and Sir George Pollock—two veterans whose services in India, as those of men now living, seem scarcely credible. Lord Combermere, before he entered upon the theatre of his principal exploits in the Peninsula, served with Wellington, then Colonel Wellesley, against Tippoo Sultan, and was "especially distinguished" at the battle of Mallavelly, fought in 1799. After a long career of success in Europe he returned to India, and gained fresh honours by the siege and storm of Bhurtpore in 1826. Sir George Pollock did not, indeed, earn his first distinction in the last century, but he served under Lord Lake at the battle of Deig and the capture of Bhurtpore in 1805, in the first war in Nepaul, in the first war in Burmah, and in command of the army which relieved Sir R. Sale and avenged the disasters of Cabul in 1841.

The new regulations for the better guidance and management of the military hospitals came into operation this week. The organisation of all general hospitals will in future include a governor or commandant, a principal medical officer, an apothecary, a purveyor, a paymaster, a captain of orderlies, and a superintendent of nurses, where nurses are employed. The appointment of governor or commandant of the hospital at Woolwich has been conferred on Colonel R. Wilbraham, C.B., the Assistant Adjutant-General at Manchester; Deputy Inspector-General A. Stewart has been appointed the principal medical officer; Mr. C. J. Minney, principla purveyor; and Captain Hawtree, from the Medical Hospital at Fort Pitt, Chatham, the captain of orderlies.

A medical officer serving in China writes to the *Army and Navy Gazette*—"I complain that, so far as the pay of medical staff-officers is concerned, the Queen's Warrant of October, 1858, has been declared null and void, or rather, having been received and acted on, has been abrogated by a local board, and that in consequence staff-surgeon-majors, staff-surgeons, and assistant-surgeons, over six years' service, have received less, and sometimes less by one-half, than any other officers in China, both during and after the past campaign; and that some among my seniors in the department have received less, and sometimes less by one-half than juniors serving under them, or even than juniors of the rank beneath them."

Captain M. S. Nolloth (1856) has been appointed to the *Princess Charlotte*, and naval officer in charge of naval establishments at Hong Kong.

The screw steam troopship *Himalaya*, Capt. John Seccombe, has been thoroughly repaired at Keyham steamyard.

We have to announce the death of Admiral Sir Barrington Reynolds, K.C.B., who expired at Penair, his residence, near Truro. The gallant admiral was the son of Rear-Admiral Robert C. Reynolds, who was lost in the *St. George*, 98, on returning home from the Baltic in December, 1811, and was born in 1785.

In consequence of the amalgamation of the Royal and Indian services we have already noticed the appointment of a number of Indian artillery officers to do duty at Warley and at Woolwich, and we have now to mention that Lieut.-Colonel Streatley, of the Bengal Engineers, has been appointed to do duty at Gosport under Colonel Gordon, Royal Engineers, and has joined to commence the duties of his appointment.

On Thursday last notices were sent round from the Admiralty to the Thames Iron Works, Messrs. Samuda, Mr. Mare, Mr. Wigram, Mr. Laird, Messrs. Palmer, Mr. Napier, and Messrs. Westwood and Bailie, asking tenders for building three more iron frigates. These vessels are to be 20 feet longer and 15½ inches broader than the *Warrior* class, viz., 400 feet long by 59 feet 3½ inches beam. Their depth is to be the same as the *Warrior's*; their tonnage 6,620, with engines of 1,250 horse-power, nominal.

Owing to the death of Admiral the Hon. Sir F. B. R. Pellew the following changes will take place on the Flag List:—Vice-Admiral of the Red Robert Wauchope becomes Admiral of the Blue; Vice-Admiral of the White Sir Provo. W. P. Wallis, K.C.B., Vice-Admiral of the Red; Vice-Admiral of the Blue Sir Henry Ducie Chads, K.C.B., Vice-Admiral of the White; Rear-Admiral of the Red G. W. C. Courtenay, Vice-Admiral of the Blue; Rear-Admiral of the White H. W. Bayfield, Rear-Admiral of the Red; and Rear-Admiral of the Blue William Ramsay, C.B., Rear-Admiral of the White. Captain Augustus Leopold Kuper,

Digitized by Google

C.B. (1841), becomes Rear-Admiral of the Blue on the active list; and Captains John Venour Fletcher and Talavera Vernon Anson are advanced to the same rank, but on the reserved list. Captain Charles Eden, C.B., one of the Lords of the Admiralty, is now the senior captain for promotion.

We regret to learn the death of Colonel George F. Mylius, at the Royal Hibernian Military School. Colonel Mylius acquired the respect and esteem of all who knew him, and by his death the institution of which he was the governor will sustain a severe loss. He entered the army in 1824, and served with the 26th in the operations in China in 1841.

Rear-Admiral Sir Henry Keppel, K.C.B., has arrived from the Cape. It is reported in naval circles that the gallant officer denies that he tendered his resignation to the Lords of the Admiralty, but states that he was ordered home from his command. The popularity of Rear-Admiral Sir Henry Keppel and his late Flag-Captain in the navy is generally admitted, and it is, therefore, to be regretted that the Admiralty did not sanction their return to England in the *Forte*, instead of handing her over to strange officers. The consequences, as might easily have been foreseen, have been of a most untoward character. By last accounts from the station we hear that no less than eighty seamen had run from the ship. The petty officers were also dissatisfied, and we hear that, prior to the arrival of the *Emerald* with the new Admiral, they prepared Sir Henry for the events which have since occurred, although, as might have been anticipated, Sir Henry used his best endeavours to induce them to maintain the discipline of the ship.

Several soldiers, wearing the Chinese medal, with a sort of tea-chest cypher on it, have been seen about Paris. They seem in good health, but state that no matter what they suffered from the climate in China, it was as nothing compared to what they endured on board of the transports bringing them home.

The Cirque Imperial, which is the Astley's of Paris, is at present representing the taking of Peking. Some of the scenes are most gorgeous, especially the Summer Palace and the dream of the opium-eater. The late correspondent of *The Times*, poor Bowlby, with very questionable taste, plays a prominent part. Everywhere where the fire is hottest he is taking his notes. The piece itself is great rubbish, but the Cirque only aims at scenic effect.

The following vessels have been chartered by the War Department for the conveyance of Government stores to India and China:—The *Barham*, 220 tons, for Madras; the *Lord Macaulay*, 846 tons, for Hong Kong; and the *Teviot*, 430 tons, for Ceylon. The *Lincelles*, 904 tons, belonging to Duncan Dunbar, London, has also been chartered by the Government for the conveyance of convicts to Fremantle, Australia.

CHANGES AND PROMOTIONS IN HER MAJESTY'S ARMY AND NAVY.

WAR-OFFICE, August 6.

4th Regiment of Dragoon Guards—Lieut. Henry Ponsford to be capt., by purchase, vice John Edward Brodhurst, who retires; Cornet Randolph R. Luscombe to be lieut., by purchase, vice Ponsford.

5th Light Dragoons—Lieut. Edward Henry Saunders, on appointment to a cornetcy in the *Gazette* of the 2nd of July, 1861, should have been described as from the 3rd West York Regiment of Militia.

8th Light Dragoons—Capt. Richard Newsham Pedder, from the 10th Light Dragoons, to be capt., vice Gurney Hanbury, who exchanges.

10th Light Dragoons—Capt. Gurney Hanbury, from the 8th Light Dragoons, to be capt., vice Richard Newsham Pedder, who exchanges; Cornet Charles Edward Frederick, from the 2nd Dragoon Guards, to be cornet, vice Brougham, promoted.

15th Light Dragoons—Staff Assist.-surgeon Charles Alexander Innes, M.D., to be assist.-surgeon, vice Andrew Knox Rickards, appointed to the staff.

Coast Brigade of Artillery—Second Capt. James MacGillivray to be capt., vice McGorrery, placed on half-pay; Lieut. James Scott to be second capt., vice MacGillivray; Sergt.-Major William Lee to be lieut., vice Scott.

7th Regiment of Foot—Ensign George William Henry Holyoake to be lieut., without purchase, vice Hardinge Giffard Follett, deceased; Ensign Charles Tayleur, from the 8th Foot, to be ensign, vice Holyoake.

8th Foot—John James Hamilton, gent., to be ensign, without purchase, vice Creek, appointed to the 23rd Foot; Bennett Fleming Handy, gent., to be ensign, without purchase, vice Charles Tayleur, appointed to the 7th Foot.

10th Foot—Gentleman Cadet Arthur Henry Handley, from the Royal Military College, to be ensign, without purchase, vice Malcolm, promoted.

17th Foot—Robert Kiero Watson, gent., to be ensign, by purchase, vice Ravenhill, promoted; William Mogg Rolph, gent., to be ensign, by purchase, vice West Stewart Awdry, whose appointment, as stated in the *Gazette* of the 24th of May, 1861, has been cancelled.

83rd Foot—Ensign Reginald Kennett Gibb to be lieut., by purchase, vice George William Henry Wardell, who retires; Ensign George Ernest Ewes Blunt, from the Royal Sussex Light Infantry Militia, to be ensign, by purchase, vice Gibb.

87th Foot—Capt. James Warren Hastings Anderson, from the 69th Foot, to be capt., vice Patrick Cahill, who exchanges.

90th Foot—Major and Brevet Lieut.-Col. Garnet Joseph Wolseley, from half-pay, late 90th Foot, to be major, vice Brevet Lieut.-Col. Henry Hope Crealock, promoted, without purchase, to an unattached lieut.-colonelcy.

93rd Foot—Ensign Thomas Prince Lloyd, from the 15th Foot, to be ensign, vice Hay, promoted.

99th Foot—The third Christian name of Ensign Tosswill is Davis.

The following promotions and alterations of date to take place in Her Majesty's Indian Forces consequent on the death of Lieut.-General Sir Mark Cubbon, K.C.B., on the 23rd of April, 1861, viz.:—Lieut.-Gen. James Eckford, C.B., to date the 24th of April, 1861, instead of the 29th of April. Major-Gen. Matthew Soppit, Bombay Infantry, to be lieut.-gen. Major-Gen. Arthur Mitford Becher, C.B., to date the 24th of April, 1861, instead of the 29th of April. Col. John Fordyce, Bengal Artillery, to be major-gen.

THE NAVY.

APPOINTMENTS.

Commanders.—M. G. H. W. Ross to be Inspecting-Commander of Coastguard, vice Palmer, whose period of service has expired; J. B. Field to the Hawk (additional), for Coastguard service; S. S. Skipwith to the Ajax, for Coastguard service; W. G. Hope Johnstone to the Virago; W. S. Brown to the Orion; Richard C. Mayne to the Hecate (additional), for surveying service; M. G. H. W. Ross to be Inspecting-Commander, Sunderland; J. B. Field to be Inspecting-Commander, Dingle, co. Kerry; S. S. Skipwith to be Inspecting-Commander, Carne, co. Donegal.

Captains.—T. Harvey to the Hawke, vice Crispen.

Lieutenants.—G. T. Morrell to the Wellesley; Constantine O'Dallingham to the Antelope; W. Clarke to the Neptune; P. R. Sharpe to the Excellent; H. B. Phillimore, H. L. Percival, J. E. M. Wilson, and G. F. H. Parker, to the Warrior; G. D. Clayhills to the Sanspareil; R. S. Bateman and H. St. V. Jenkings, to the Marlborough (additional), for disposal.

Masters.—W. Haydon (additional) to the Imperieuse; G. H. Blakey to the Warrior; E. J. H. Tucker to the Chief Officer, Bray, near Dublin.

Chaplains.—Rev. R. N. Jackson to the Warrior; Rev. J. W. Bussell to the Hawke.

Naval Instructor.—R. A. Fowler to the Cadmus.

Surgeons.—J. Thomson to the Excellent; W. H. Woods to the Virago; J. Faughan to the Hero; L. J. Monteith to the London; S. J. D. Wells to the Warrior; Dr. A. Muirhead to be deputy inspector-general of hospitals and fleets, on the retired lists; Dr. J. Cotton to the Narcissus.

Paymasters.—R. D. Hire (additional), to the Cornwallis; W. T. Richards to the Cadmus; J. M. de Vries to the Warrior; G. A. Welch to the Virago; W. H. Clyma to the Spiteful.

Sub-lieutenants.—G. G. Brodie to the Revenge; A. A. Watts to the Donegal.

Assistant-Surgeons.—J. Austen and E. W. Coleman (acting) to the Warrior; A. Cooper to the Cumberland; D. Duncan to the Indus; J. Thomson to the Cæsar; H. Maxwell to the Pembroke; H. Macdonnell to the Virago; B. Ninnis to the Impregnable, for Plymouth Hospital; J. T. Moore to the Victory, for Haslar Hospital; J. Hunter to the Curacoa; M. A. Mayrath to the Wellesley for Melville Hospital; G. W. Locke to the Aboukir; and R. E. Fisher (acting) to the Antelope.

Second Master.—J. Phillips to the Warrior, and J. E. Gage to the Cumberland for service in the Lee.

Assistant-Paymasters.—J. G. W. Hoares and T. W. Moore to the Warrior.

Chief Engineer.—A. M'Innes to the Virago.

Engineer.—H. T. Somes (acting) to the Virago.

Second-Class Assistant-Engineers.—H. Rumble and J. W. Sievewright (acting) to the Fisgard, as supernumeraries; P. M'Cormack, G. Nicholls, J. W. Compton, B. F. Lewarn, and G. Fabian (acting) to the Asia, as supernumeraries; W. C. Amos and D. Dixon (acting) to the Cumberland, as supernumeraries; J. Dows and J. Frazer (acting) to the Virago.

FRENCH TROOPS FOR COCHIN CHINA.

Accounts from Toulon state that nine hundred marines arrived there on the 9th inst. from the northern ports, to be embarked for Cochin China with the least possible delay. The staff officers of the steam frigates *Vauban* and *Descartes* have been likewise ordered to embark for the same service, together with a fourth lieutenant. The steam frigates are, consequently, to be laid up in ordinary. One hundred and forty apprentice artillerymen are to be embarked at Toulon for Alexandria, and are to be exchanged there for an equal number of artillerymen serving on board the French fleet on the coast of Syria, who are to be brought from Beyrout by the steam corvette *Caton*. The artillerymen will then proceed to Cochin China.

A novel punkah, intended for the Governor-General of India has been constructed by Mr. Bruce, late 33rd Regiment. It consists of a large gilt eagle, having the natural wings of this bird attached to it. It is suspended from the ceiling, and, being wound up like an ordinary clock, the wings are kept fanning for twenty-four hours.

Mr. Laing, who, in consequence of a severe attack of illness, was compelled to vacate his post of Financial Minister in India, has returned home with his health much improved.

Monetary and Commercial.

It is reported by the present mail that the French Birman Company of Marseilles have proposed to the Government of India to run a line of steamers from Rangoon to our frontier station of Meeaday, on the Irrawaddy, for an annual subsidy of two lacs of rupees (£20,000) which is very much under the present cost to the Government. What can the distressed British ship owners be about!

Messrs. Laird, Sons, and Co., of Birkenhead, have fixed the 20th inst. as the day for launching the new steamer intended

Digitized by Google

for the service of Messrs. Jardine, Matheson, and Co., on the Coast of China. The launch will take placd at nine A.M. The launch of the steamer building on the Clyde for Messrs. Douglas Lapraik, Captain Bell, and others, will, we understand, also be launched in a few days.

The certificates for shares in the China and Japan Steam Navigation Company are now ready for delivery in exchange for the bankers' receipts. The Stock Exchange appointed the 5th inst for a settlement, which was duly executed. A call of £1 .0s. per share is to be paid on the shares by the 10th Sept Contracts have been made with Messrs. Laird and Sons, to build six steamers.

At the meeting on the 7th inst. of the Mediterranean Extension Telegraph Company the directors' report was agreed to. It refers to the improved position of the undertaking, and to the likelihood of a further augmentation of its business, owing to the approaching completion of the Malta and Alexandria line. The dividends on the preference shares will be paid as usual, but the directors cannot at present recommend any payment on the original shares. The explanations given appeared to afford satisfaction. The cables between Corfu and Otranto, and between Malta and Sicily, continue in excellent working order. Any further attempt to restore the original line to Cagliari is abandoned for the present. Greater speed and regularity will shortly be attained in the transmission of messages to England, by the completion of a new wire for the special use of the company and the establishment of two new translating stations.

The Union Bank of Australia has declared a dividend at the rate of 12 per cent. per annum. The National Bank (London) 8 per cent. and a bonus of 5s., together being equal to 14 per cent. per annum. The East and West India Dock Company 3 per cent. The St. Katharine Dock Company 3½ per cent. per annum. The National Discount Company at the rate of 5 per cent. per annum. The Scottish Australian Investment Company at the rate of 10 per cent. per annum. The London Joint-Stock Bank at the rate of 12½ per cent. and a bonus of 12s. 6d. per share, together, equal to 25 per cent. per annum. The Bank of London at the rate of 5 per cent. per annum. The London and Westminster Bank at the rate of 6 per cent. per annum, and a bonus of 7 per cent.; the deposits of this company have now reached £14,800,000, being more than the private deposits of the Bank of England.

The Board of Trade intimate that they have received a copy of a despatch from Her Majesty's Minister at the Hague, reporting that a Bill has passed the Second Chambers of the States-General authorising the free importation of rice and paddy into Java and Madeira.

The London Fire Insurance Companies have issued a fresh scale of charges as the result of their deliberations in consequence of the opposition to the scale put forth on the 6th of July. The new rates involve an average reduction of about 30 per cent. from the high tariff proposed at that date. Before this announcement was made a new company was started, called the "Mercantile," the shares in which were at once quoted at 1 to 1½ prem. Two others are following.

The dollars by the Mexican steamer, as well as some amount by previous arrivals, have been disposed of at 58⅜d. per ounce, showing an advance of ⅜d. on the price realised by the packet of the beginning of last month. Dollars have, however, been very scarce in the interval, and 59¼d. was obtained for several small parcels.

Imperial decrees grant the privilege of conveying mails to the Compagnie Générale Maritime by the steamers it is about to establish between France, the United States, and the West Indies; also to the Company of the Services Maritimes des Messageries Imperiales on its lines from Suez to China, Reunion, the French possessions in the East Indies, and the Dutch and Spanish colonies. The latter company has obtained from the Viceroy of Egypt a concession of land at Suez for constructing docks.

The shareholders of the Comptoir d'Escompte have held their annual meeting. A report giving a favourable account of the operations of the establishment was read, and a dividend of 22f. for the half-year ending the 30th of June was declared. This makes the total dividend for the year 44f. The report drew special attention to the fact, that the dividend was obtained notwithstanding the number of shares has been doubled since the 1st of January, and that the profits realised by the branches established at Calcutta and Shanghai are not counted.

The following vessels have arrived from China, with Chinese emigrants:—At Demerara, on the 27th of June, the *Montmorency*, 666 tons, Captain Lowerby, from Hong Kong, March 13—283 souls landed, 7 deaths; also at Demerara, on the 30th, the *Forerunner*, 558 tons, Captain Fletcher, from Hong Kong, February 20—283 souls landed, deaths 10.

A return of the tonnage entered inwards and cleared outwards, in London and Liverpool, from and to the Eastern and Pacific seas during the first six months of the present year, contrasts somewhat unfavourably with the corresponding period of 1860:—

From Calcutta 103,495 tons, being an increase of 4,643 tons; Madras, 15,096 tons, being an increase of 4,931 tons; Bombay, 37,768 tons, being an increase of 2,920 tons; China, 42,775 tons, being a decrease of 3,419 tons; Ceylon, 13,235 tons, being a decrease of 2,287 tons; Singapore and Penang, 10,614 tons, being a decrease of 3,587 tons; the Philippine Islands, 6,227 tons, being an increase of 1,674 tons; Java and Sumatra, 1,092 tons, being a decrease of 1,047 tons; New South Wales, New Zealand, &c., 45,782 tons, being a decrease of 19,733 tons; the Mauritius, 25,240 tons, being an increase of 2,980 tons; and the Cape of Good Hope, 8,682 tons, being a decrease of 7,967 tons; showing a total of 311,006 tons, being a decrease of 20,892 tons. At Liverpool the entrances were—From Calcutta, 40,315 tons, being an increase of 12,438 tons; Madras, 1,067 tons, being a decrease of 91 tons; Bombay, 66,507 tons, being an increase of 6,165 tons; China, 3,113 tons, being an increase of 1,034 tons; Ceylon, 815 tons, being a decrease of 369 tons; Singapore and Penang, 3,624 tons, being a decrease of 2,002 tons; the Philippine Islands, 9,018 tons, being an increase of 2,492 tons; Java and Sumatra, *nil*, being a decrease of 458 tons; New South Wales, New Zealand, &c., 4,574 tons, being a decrease of 12,323 tons; the Mauritius, *nil*, being a decrease of 5,779 tons; and the Cape of Good Hope, 222 tons, being an increase of 33 tons; showing a total of 129,255 tons, being an increase of 2,139 tons. The clearances outwards at London were:—To Calcutta, 44,818 tons, being a decrease of 4,797 tons; Madras, 17,154 tons, being an increase of 36 tons; Bombay, 27,273 tons, being a decrease of 14,531 tons; China, 22,932 tons, being a decrease of 6,168 tons; Ceylon, 2,574 tons, being a decrease of 1,014 tons; Singapore and Penang, 3,131 tons, being a decrease of 567 tons; the Philippine Islands, 364 tons, being a decrease of 980 tons; Java and Sumatra, 1,359 tons, being a decrease of 251 tons; Arabia, *nil*, being a decrease of 392 tons; New South Wales, New Zealand, &c., 91,388 tons, being an increase of 61 tons; the Mauritius, 6,823 tons, being an increase of 886 tons; and the Cape of Good Hope, 26,182 tons, being an increase of 5,425 tons; showing a total of 243,998 tons, being a decrease of 22,192 tons. At Liverpool the clearances outwards were:—To Calcutta, 103,415 tons, being an increase of 22,688 tons; Madras, 2,982 tons, being an increase of 561 tons; Bombay, 52,321 tons, being a decrease of 2,032 tons; China, 12 263 tons, being a decrease of 31,203 tons; Ceylon, 2,831 tons, being a decrease of 3,798 tons; Singapore and Penang, 5,003 tons, being a decrease of 2,286 tons; the Philippine Islands, 3,357 tons, being an increase of 1,350 tons; Java and Sumatra, 4,332 tons, being an increase to the whole of that amount; Arabia, 6,214 tons, being a decrease of 18,055 tons; New South Wales, New Zealand, &c., 34,494 tons, being a decrease of 16,927 tons; the Mauritius, 837 tons, being a decrease of 2,361 tons; and the Cape of Good Hope, 1,832 tons, being a decrease of 2,973 tons; showing a total of 229,881 tons, being a rather serious decrease of 50,704 tons. The general result of these figures, it will be observed, is a falling off of 18,753 tons in the entrances inwards, and of 72,896 tons in the clearances outwards.

The amount of bullion by the steamer *Indus*, of the 4th inst. was—In gold: To Alexandria, £3,000; Madras, £1,000; Calcutta, £1,410; Singapore, £5,000. In silver: To Calcutta, £13,200; Penang, £400; Singapore, £2,600; Hong Kong, £29,762; Foo-chow-Foo, £5,000; Shanghai, £33,116

ARTICLES OF IMPORT.

Tea.—Transactions by private sales have been very limited, and mostly confined to the better sorts of Congou, the trade being supplied with most other sorts from the public sales without reserve. The prospect of a fair harvest, and the reduction of the Bank rate of interest to five per cent., are favourable for a general improvement in business, though the unfortunate state of matters in America operates in a contrary direction. For low and dusty kinds of Congou prices remain as before. Good common, for shipping, we still quote at 11d. to 11½d. per lb.; fair flavoury kinds have

Digitized by Google

been sold at the sales without reserve at very irregular prices, though the general result is in favour of the buyer; good and fine Monings and Wopaks have been offered rather freely and sold at moderate rates—good and fine Kaisow is scarce, and extreme prices are paid. Taishan kinds are neglected at previous low rates. Souchong as before. Flowery Pekoe has been taken at very low prices. Scented Teas: The commoner sorts are neglected; the finer sorts are inquired for. Oolongs without alteration. The stocks of Green Tea being now reduced to a few months' consumption, and but little to arrive, very full prices are being obtained, especially for the commoner sorts, the finer kinds being comparatively cheap. An export demand has helped to reduce the stock of Young Hysons, whilst the home demand has equally reduced that of Gunpowder, and the lower qualities of both may be quoted fully 1d. per lb. higher. Hyson is without alteration. Three public sales have taken place since our last, at which 50,246 packages were offered, and 27,550 were sold, 22,086 being without reserve. Further sales are advertised of 20,529 packages, of which 12,865 are without reserve. The stock on the 1st of August of all descriptions of Black was, in London, 53c700,000 lbs., and of Green, 3,492,000 lbs. The total delivery was, of Black 43,012,000 lbs., and of Green, 5,703,000 lbs. The stock at Liverpool was, of Black, 4,039.000 lbs., and of Green, 95,000 lbs.; the total delivery of Black was 4,437,000 lbs., and of Green, 343,000 lbs. The imports in London to the 1st of August have been, of Black, 60,317,000 lbs., and of Green 3 336,000 lbs. At Liverpool, of Black, 5,365,000 lbs., and of Green, 407.000 lbs. According to the circular of Messrs. Mitchell, Aspinall, and Skipper, the amount of tea afloat at the present time is 10,353,980 lbs., against 10,757,531 lbs., at the same period in 1860.

SILK.—We have still nothing favourable to report as to silk. The market remained in the same quiet state as reported in our last throughout the entire month. Some little symptom of business was manifested in the first three days of this month, but the American news on the morning of the 5th seemed to check the incipient disposition to purchase, and we are now nearly as quiet as ever, although the requirements of consumers, reduced as they are to nearly the smallest possible scale, oblige them to appear occasionally as buyers. The deliveries are still very small. In Bengal silk we have nothing to notice—still the same disinclination to purchase. Of the European crop we hear very little, but samples are sent forward in the attempt to elicit offers, and prices are talked of which sound very different to those of late years; still they fail to make business, and are indeed much beyond the parity of China silk. In Brutia, and Persian silk, nothing.

Chinese thrown	1,017	1,379	2,635	3,560	967	2,306

SUGAR.—The market has continued to present a dull appearance, and in some instances rates have been rather easier. 1,433 bags Penang sold at 31s. 6d. for good brown, 35s. to 37s. 6d. for fine brown to middling yellow, and 38s 6d. to 41s. for good to fine yellow; and 2,923 bags from New York were chiefly realised, good brown to low yellow, 32s. to 36s.; middling to fine yellow, 38s. to 41s. 6d.

COFFEE.—Colonial has been in steady demand, and the increased supply has mostly been taken off at previous rates. 400 bags mixed Singapore have been placed by private contract at 55s. 6d. to 56s.

RICE.—Market quiet, and no change in prices. 8,000 bags new Bassein have been sold privately at 9s. 3d. Some common Necranzie at 9s.

PEPPER.—No demand of importance, and only small parcels by private contract have been placed. 1,896 bags Singapore were withdrawn at 3⅝d. to 4d., and only a small part has since been taken. Penang, 3⅜d. to 3½d.

SAGO.—For some time subsequent to our last the market continued quiet, and 1,500 boxes at auction were only partially sold on rather easier terms, 18s. 6d. to 19s. per cwt. for fair small, and 19s. medium. Latterly, however, a better demand has sprung up, and the market closes 6d. to 1s. per cwt. dearer. Very fine small has brought 22s. 6d. FLOUR is again the turn dearer, moderate sales having been effected within our quotations.

SPICES.—Cinnamon: The quarterly sales went off with some degree of irregularity. There was but little animation, and of 2,514 bales offered, only about two-thirds sold, 1sts, middling to good, 1s. 5d. to 2s. 2d. per lb., with superior at 2s. 4d. to 2s. 5d.; 2nds, 1s. 1d. to 1s. 6d.; superior, 1s. 7d. to 1s. 10d.; 3rds, 11d. to 1s. 3d.; and 4ths, 8d. to 10d. Cassia Lignea: 313 cases at auction, about one-half sold at 79s. to 89s. for third to first quality. Cassia Buds: Scarce, 2157 has been realised in retail transactions. Cloves: Flat, of 159 bags Zanzibar one-third sold at 3½d. to 3⅝d. per lb. for damaged. Mace: Flat, no sales of importance. Nutmegs: No demand.

HEMP.—Manila: Quiet, but steady. Of 749 bales at auction chiefly sold at £20. 2s. 6d. to £20. 7s. 6d. per ton, for good ordinary roping, £33 Quillet, and £37 Lupez. Privately, some business has been done in ordinary roping at £19. 10s.

COTTON.—Held very firmly, with but little offering; prices have advanced ⅛d. to ¼d. per lb., but latterly the market has become rather quiet. Transactions have included fair old to good new Broach, 6d. to 6⅜d.; middling to fair old Dhollera, 5¼d. to 6d., and middling to fair Compta, 5¼d. to 5½d. Good business also concluded for arrival.

JAPAN WAX.—About 100 cases sold at auction at 56s. to 59s. per cwt. for middling to good block.

TOBACCO.—Good descriptions of Java are scarce, and any imports would meet ready sales.

TIN.—This market continued very flat for some time after the date of our last, and sales of Straits were effected at £110 per ton; a slight reaction has lately taken place, and moderate business concluded at £110 10s. to £111.

MISCELLANEOUS.—Indiarubber: Firm. 185 packages at auction all retired. Camphor: 45 tubs Japan sold at £11. 10s. Sapanwood: Firm. Fifteen tons Siam description, from Bombay, sold at £9 to £9. 2s. 6d. Soy: Cheaper, 44 cases Japan sold at 23s. to 23s. 6d. per case. Mother-o'-pearl Shells: Manila, quiet, but held firmly. Singapore: Very scarce. Star Anniseed: Very quiet. Sticklac: Scarce, 104 cases Siam sold at 92s. for good, slightly woody, and 64s. 6d. to 68s. block. Gum Benjamin: Steady. Damar: No business doing. Gamboge: Flat, 12 cases at auction all retired. Rattans: Steady, 5,000 bundles Bombay sold at 5s. 3d. to 5s. 4d. per 100. Gutta Percha: Steady, a small parcel sold at 10d. to 1s. 2d. per lb. for middling to fair. Rape Seed: The advance is still maintained. Elephants' Teeth: No demand. Vermilion: No inquiry. Galangal-root: 50 bales at auction sold at 21s. to 21s 6d. for fair. Cubebs: steady, 162 bags all retired. Dragon's Blood: Small demand. Galls: Steady, but no sales. Rum: Rates easier; 700 casks Mauritius and Penang sold at 1s. 6½d., and 60 puncheons at 1s. 6d. to 1s. 6½d.

ARTICLES OF EXPORT.

IRON.—The quotations in London are for Welsh bars, £6. 0s. 0d. nail rods, £7 to £7. 10s.; hoops, £8. 10s. to £9; sheets, single, £9 to £9. 10s.; Staffordshire bars, £7. 10s. to £8; rails, £5 to £5. 10s.

STEEL.—Swedish keg, £16.

COPPER.—Sheet and sheathing, 10½d.; yellow metal, 9d.

TIN.—114s. for block; 115s. for bar. Tin plates, best charcoal, I. C., 29s. per box.

LEAD.—English pig, £19. 5s. to £21. 10s.; shot, patent, £23. 5s.; sheet, £20. 5s. to £21. 10s.; spelter, £16. 10s.; zinc, English sheet, £21. 10s. to £22; quicksilver, £7 per bottle.

EXPORT OF BULLION TO CHINA, &c.

The following return shows the shipments of bullion from Southampton during the present year by the P. and O. Company's mail steamers:—

	Gold.	Silver.
Shanghai	—	£363,065
Foo-Chow-Foo	—	29,992
Hong Kong	—	248,869
Manila	—	—

On Hong Kong, ditto	4s. 9d.	Do.	4s. 3d.

COMMERCIAL POSTSCRIPT.

THURSDAY AFTERNOON.

The steamer *Rangoon* will be despatched this day by Messrs. Glass, Elliot, and Co., the contractors, with a further instalment of cable for the Malta and Alexandria cable, and will be followed shortly by the *Malacca*.

The circular of Mr. Mendel, of Manchester, states:—

"A very decided change has taken place in our market since last Tuesday. Sales, more especially goods, have become very difficult to effect; prices compared with the recent extreme rates have given way 3d. per piece for India and China shirtings; other sorts feel the effect of this check, but in a less marked degree. Yarns are also more difficult of sale, and occasionally ⅛d. to ¼d. per lb. reduction is obtainable where contracts are about completion."

ARRIVALS NOT INCLUDED IN THE TABLE.—Aug. 10, at London from Padang: Luciana Marrara; 8, at Helvoet from Batavia, Stella Maris; July 20, at Havana from Macao, Fides; August 13, off Queenstown, from Bassein and Mauritius, Kennington; 8, at Bremen from Rangoon, Sirius; 11, at Helvoet from Batavia, Cleopatra; at Schelde from Akyab, Prins Oscar; 14, at Falmouth from Bassein, Leibniz; from Rangoon, Renown.

DEPARTURES.—August 8, from Deal for Batavia, Resident v. Son; 7, from Cardiff for Hong Kong, E. von Beaulieu; 7, from Liverpool for Hong Kong, Cordelia; 7, from Sunderland for Hong Kong, Edwin Flye; 10, from Glasgow for Batavia and Sourabaya, Patriarch Samhiri; 10, from Deal for Singapore, Choice; 7, off St. Alban's Head, for Batavia, Grootmeester Nationaal; from Hambro' for Singapore, Alma; 12, from London for Shanghai, Fairlight; from Deal for Batavia, Petronella Catharina; 9, Korteenar from Liverpool for Singapore, Ranee; 12, from Sunderland for Shanghai, Neptune.

SPOKEN.—Kosmopoliet, Rotterdam to Batavia, July 12, 2 S., 30 W.

LAID ON AT LONDON FOR HONG KONG AND CANTON.—Athelston at Glasgow; for Hong Kong, Sea Flower.

HAVRE, AUG. 12.—The Chateau du Gol Francois, from Java, for Bordeaux, which put into Mauritius April 27 with damage, has been condemned there, and was to be sold July 10.

FREIGHTS AND CHARTERS.

There is a still a fair demand here for ships from the Rice Ports for the Continent, to load next season, at 75s. per ton; also from China, for tea, &c., at 60s. to 65s.; and sugar, from Manila to United Kingdom, at 65s. to 70s.

The tonnage loading on the berth for India, China, and the Cape of Good Hope is 45,000 tons. £2 per register ton to India, £2. 5s. to the Cape of Good Hope, £3 to £3. 5s. to Hong Kong, and £3. 10s. to Shanghai, are the full rates. The contractors with the Peninsular and Oriental Steam Navigation Company for coals to Hong Kong offer 34s. per ton freight from Birkenhead, and £40 per keel from the North of England. 37s. 6d. per ton has been paid from Wales to Manila, and 40s. to Hong Kong.

Current freights to Shanghai for vessels on the berth, 40s. to 50s. per ton weight and meas.; to Hong Kong, 35s. to 40s.; Singapore and Penang, 30s. to 45s.; to Manila, 35s. to 40s.; to Batavia, 45s. weight, 40s. meas.; to Japan, 65s. weight, and 60s. meas.

INSURANCE.

The following are the current rates of premium at Lloyd's, according to the class of vessels, &c.:—To Hong Kong, 40s. to 50s.; Shanghai, 50s. to 60s.; Singapore, 30s. to 45s.; Batavia, 30s. to 40s.; Manila, 50s. to 60s.; Japan, 50s. to 60s.

At Hamburg, for Batavia and Singapore, 40s.; China and Manila, 50s.

CASUALTIES.

The Maria Agnes, van Deursen, from Banjoewangie, for Amsterdam, with mainmast sprung, was spoken June 25 in lat. 6 N., lon. 20 W.; arrived at Texel August 6.

The Joachim, Christian Holm, from Pasarveang for orders, and Helsingfors, which arrived at Falmouth, August 3, was leaky; she has been surveyed, and will have to discharge part of her cargo.

The Annie Bucknam, Millett, which sailed from Cardiff, July 26, for Shanghai, put into Queenstown August 4, leaky.

Cuxhaven, August 6.—The J. H. Becker (Oldenburg schooner), Wachtendorff, from Singapore, arrived here this morning. She had been in contact, off Heligoland, the previous night, with a Bremen vessel (said to be the Elise and Mathilde), and had lost her bowsprit; the damage to the latter vessel is unknown.

At Santa Cruz, Teneriffe, July 1, Curacao, Wilkin, from Amsterdam, and sailed, 5th, for Batavia.

At St. Helena, June 8, Sea Park, Stewart, from Canton; 11, Fides Arfman, from Macao, and sailed, 12th, for Havana; 14, Avik, Ahlborg, from Sourabaya, and sailed, 15th, for Finland; 15, Reyna de los Angelos, from Manila, and sailed, 17th, for Cadiz; 16, Stella Maris, Leflang, from Batavia, and sailed, 17th, for Rotterdam; Kaaf Hom, Dix, from Java, and sailed, 17th, for Rotterdam; Cleopatra, Danberg, from Batavia, for Rotterdam; 18, Monterey, Parsons, from Sumatra; Pauline, Hathagen, from Siam; 19, Dorothea Henrietta, Smit, from Java, and sailed, 20th, for Rotterdam.

At Table Bay, May 25, for Batavia, Canton; June 20, from Hong Kong, Lancashire Witch, Mollison.

TESTIMONIAL RECEIVED BY

TUCKER AND SON,

MANUFACTURER OF IMPROVED INDIAN LAMPS.

"Messrs. TUCKER & SON. "Edinburgh, Sept. 11, 1856.

"Sirs,—I have much pleasure in bearing my testimony to the excellence of the Lamps supplied by you to me when in India last year. They give a brilliant light, are not affected by the punkah, and are in every way suited to the Indian climate. In short, they are the best lamps I have seen in the country.

(Signed) "A. Ross, Bengal Civil Service."

MANUFACTORY, 190, STRAND, LONDON.

PETER ROBINSON,

103, 104, 105, 106, 107, and 108, OXFORD-STREET, AND

GREAT PORTLAND-STREET, LONDON.

HOLLOWAY'S PILLS AND OINTMENT.—HEALTH IMPARTING MEDICINES.—In hot climates, and our own hot summers, the greatest benefit has been conferred upon mankind by the discovery of these valuable preparations, the excellence of which is universally testified. They stand unrivalled, and may safely be recommended to people of all degrees when suffering from over-heated blood, disordered stomach, or biliousness. They act as the gentlest aperients and most reliable alteratives, and have for the last thirty years been noted for these virtues which they healthily exercise over either sex. For heat spots, freckles, rough skin, and similar disfigurements Holloway's Ointment has long been successfully used. His medicaments brace, invigorate, purify, and give the heart cheerfulness and the frame vigour.

WEDDING CARDS—For Lady & Gentleman—5s. each. 50 Embossed Envelopes, with Maid a Name printed inside, 13s. Visiting Cards—A Copper Plate engraved in any style, with name and 50 Cards, printed for 2s., post free. N.B.—All orders executed by return of post, for stamps or cash. T. CULLETON, Seal Engraver and Die Sinker, 25, Cranbourn-street, corner of St. Martin's-lane, London, W.C.

THE PEN SUPERSEDED.—Mark your Linen. The best and only method of Marking Linen, Silk, Stockings, Coarse Towels, or Books, so as to prevent the Ink washing out, is with CULLETON'S PATENT ELECTRO-SILVER PLATES. By means of this novel invention a thousand pieces of linen can be marked in a few hours. Initials, 1s. each; Name, 2s. 6d. Set of Moveable Numbers, 2s. 6d.; Crest Plate, 5s., with the necessary directions for use. Post free. Certificate from the eminent Dr. Sheridan Muspratt, F.R.S., Professor of Chemistry, &c.

"Several trials with Mr. Culleton's Patent Electro-Silver Plates, for marking linen, induce me to pronounce them excellent; the letters are beautifully marked in a deep black colour, without blotting, and after a long boiling, with either potass or soda, they remain unaltered. Other plates which I tried decomposed the ink, and in many cases burned holes in the linen. I can testify Mr. Culleton's Plates are incorrodible, and will not hurt the finest fabric.—(Signed) "SHERIDAN MUSPRATT.

"College of Chemistry, Liverpool.

"May, 15, 1854."

All orders to be sent to the Patentee and Sole Maker.

T. CULLETON, 25, Cranbourn-street, corner of St. Martin's-lane, London, W.C.

All Orders executed by Return of Post.

DR. CURTIS'S MEDICAL WORK, "MANHOOD."

An Essay on Nervous and Generative Diseases.

The 140th Thousand, with numerous plates in a sealed envelope, price Half-a-Dollar,

MANHOOD: the CAUSE and CURE of PREMATURE DECLINE IN MAN, with plain directions for perfect restoration to health and vigour, being a Medical Essay on Nervous and Generative Diseases, their Prevention and Cure, with the Author's experience in the Treatment of the various Disqualifications of Marriage—whether resulting from Youthful Abuse, the Follies of Maturity, the Effects of Climate or Infection. The result of Twenty-five Years' successful practice. By Dr. J. L. CURTIS, 15, Albemarle-street, Piccadilly, London.

Consultations, Ten till Three and Six till Eight.

REVIEWS OF THE WORK.

"We feel no hesitation in saying, that there is no member of society by whom the book will not be found useful—whether such person hold the relation of a Parent-Preceptor, or Clergyman."—Sun, Evening Paper.

"Dr. Curtis has conferred a great boon by publishing this little work, in which is described the sources of those diseases which produce decline in youth, or more frequently premature old age."—Daily Telegraph, March 27, 1855.

The Book concludes with numerous varied and interesting cases, to which is added the Author's Receipt of a Preventive Lotion.

Dr. CURTIS may be consulted, as usual, either by letter or personally, at his residence, as above. Patients in INDIA, CHINA, and the COLONIES can be cured by correspondence only, and have their medicines sent with secrecy and despatch. The efficacy and harmless nature of the remedies employed by Dr. CURTIS, having been demonstrated by the most complete success during a practice extending over a period of Twenty-five Years, nervous sufferers of every class have a perfect guarantee that the utmost skill and experience will be made available in the treatment of their cases.

THE WORK SOLD BY HINNAM, QUEEN'S ROAD HONG KONG.

TEA LEAD FOR INDIA AND CHINA.

WIMSHURSTS PATENT METAL, FOIL, AND SHEET METAL COMPANY (Limited) are now prepared to supply in any quantity, and of suitable lengths and widths, to meet the requirements of the trade, their PATENT CUT LEAD for packing Teas, of which they invite an examination and trial. The Lead will be found not only more economical as to price, but in all respects superior in point of quality to that at present used for the packing of Teas. The Committee of Lloyds have reported most favourably as to its perfect adaptation for preserving Teas from sea and other damage, and strongly recommend its general adoption.

The Company's Lead is exclusively used by the Assam Company, to whom it has given the utmost satisfaction.

Samples of the Lead, Price Lists, and every information, had on application to the Company's Works, Old Ford Road, Bow, or to the Secretary, 16, Bishopsgate-street Within, London, E.C.

Per str. 20th Nov., from Southampton to Shanghai: Mr. Gore Booth.

Summary of News from the Far East.

JAPAN.

The news by this mail indicates that our relations with Japan are still of a very unsatisfactory character. A merchant residing in Yokuhama has been attacked in his office by seven two-sworded officials, who were accompanied by a number of coolies. This attack is said to have arisen from an attempt to circumvent a refractory Japanese debtor by obtaining payment in kind through the medium of a third party who bought silk from the native debtor, referring him for payment to his foreign creditor, into whose godown the silk was conveyed. In a few hours the native's friends and coolies attacked the foreigner, pinioned him, and took back the silk. Another merchant's godown was entered in open day, and some copper, about which there was a dispute as to price, was forcibly taken away. That acts like these are performed without the connivance of the authorities, no one will believe who is at all conversant with the system of Government espionage current in Japan.

At the same time we learn that the Governor of Kanagawa has endeavoured to dissuade Mr. Alcock from taking his proposed journey overland from Nagasaki to Yedo. Evidently the old plan of endeavouring to intimidate the foreigners, and thus eventually inducing them to leave the country, is being tried once more. If, at this critical juncture, our Consul or our merchants show any signs of wavering or fear, British commerce in Japan will suffer a shock from which it may take years to recover. It will be seen that these accounts do not warrant the startling telegram which was received by way of Malta a few days since.

We have before us the first number of *The Nagasaki Shipping List and Advertiser*, which appeared on June 22, and is to be "the official organ of all notifications proceeding from Her Britannic Majesty's Legation, Consulate-General, and Consulates in Japan." We are heartily glad that a want which has for some time been felt, is now to be supplied, and, judging from the first issue, we have every reason to believe that the paper will be ably conducted. The editor states that in the management of the journal he shall aim at something more than his unassuming title would lead us to expect, and shall endeavour, while giving information respecting shipping and foreign trade, to afford interesting and original information with regard to the marvellous country so lately opened to our enterprise. If such information be accurate, we believe that this *Nagasaki Advertiser* will find a number of readers in England as well as in Japan.* With reference to a proposed Chamber of Commerce, the journal has the following:—

"We have much pleasure in noticing that on the 8th inst., at a meeting held at the offices of Messrs. Arnold and Co., many of the principal merchants and commission agents constituted themselves into a Chamber for the regulation of the practice and the protection of the interests of the commerce of this port. We regret that we have not space for a full report of the proceedings, and can only now notice that, after a resolution declaratory of the formation of the Chamber, Messrs. Alt, Arnold

* Copies of *The Nagasaki Shipping List and Advertiser* can be at our office.

Digitized by Google

(chairman), and Glover were appointed a committee of general management for the first year. We are informed at a subsequent meeting the committee were instructed to notify the formation of the Chamber to the Consuls of the Treaty Powers, with a view to obtaining their recognition of it; and also that they should communicate to the Governor of Nagasaki, explaining to him its objects; amongst the most important of which would be co-operation with the native authorities in the suppression of illegal traffic and abuse of Treaty privileges."

The paper also informs us that a club, to consist of twenty members, has been established at Nagasaki under the presidency of J. Loureiro, Esq. There can be no doubt that such an institution is much needed at the port, and will tend to remove, in a great measure, the isolation of our merchants there.

The subjoined intelligence, with reference to the launch of a European vessel, will also interest our readers:—

"In a few days we expect to witness the launch of the first European vessel built in Japan. Mr. J. Mitchell, of the Aberdeen yards, has now nearly completed the building of a schooner-yacht, of about twenty tons measurement, to the order of W. J. Alt, Esq., with which we have heard many of the cognoscenti in such matters express their high approval. Mr. Mitchell, who has only commenced business within the last three months, has already upon the stocks (besides the little vessel above alluded to) two of a much larger measurement. We hope they will prove to be the first of a long line of successors."

CHINA.

PEKING.

There are no signs of the Emperor's return to the capital, and it is reported that he is building at Zehol. There seems to be but little doubt of his being in very bad health, and but a short time since it was even whispered among the Chinese that he was dead, but this was subsequently contradicted.

Foreigners are yet unable to enter Peking, except in the case of those who have been fortunate enough to secure the friendly services of some great man at Court. It is to be hoped this state of things will not long continue, but will speedily alter for the better; for the freer and more constant our intercourse with the Celestials, the sooner will our political and commercial relations with them be placed on a firm and secure footing—but it may have been wise in Mr. Bruce to show some conciliation at first to the Chinese.

TIEN-TSIN.

The latest news from this port is to the 24th June. In a commercial point of view, reports are unfavourable, but there is every prospect of a brisk trade springing up. The traders had departed for the interior, and were not expected to return till August.

The Imperial forces, under Shing-pao, are said to have inflicted a severe defeat upon the Rebels, and to have checked their advance northwards. Great anxiety is expressed by the Imperialists that the foreign troops should remain at Tien-tsin.

The vessels in port are:—At Tien-tsin: Nankin, Crystal, Rouma. At Taku and Roads: Fawn, Wilhelm, Cordouan, Imogen, Theodore, Julie, C. E. Tilton, Harriet Armitage, Gemini, Borderer, Alma, Wanderer, Tien-tsin, Argus, Felix, Miranda, Lanrick, Ballarat, Chusan, Egean. These latter lie about ten miles from the Forts, and find considerable difficulty in landing their cargoes, the boats not being willing to come out. The charge for lighterage is also very high, as much as 480 cash per picul being paid.

In some instances the owners and captains of ships have had to bear heavy losses, in consequence of having signed bills of lading at Shanghai for goods to be delivered at Tien-tsin, and on the arrival of the vessel at the bar, even sometimes if only fifteen or twenty tons, it has been impossible to pass it, as there are times when they cannot be communicated with for three or four days, and they have in such cases to pay $2 to $2½ per ton to boat the cargo up the river.

The heat is described as excessive. The thermometer stands one hundred and forty in the sun and one hundred and two in the shade. When the weather is wet all is mud—when dry, all is dust. Fires were very frequent, and foreign residents were much alarmed for the safety of their stores. The people continued civil, but the feeling was that upon the withdrawal of the troops the mandarins would be troublesome.

We observe that Mr. Mongan has issued a notification, under date June 10, that he has arranged with his Excellency the Superintendent of Trade for the three Northern ports, with a view to the convenience of merchants, that such vessels as remain at Taku for the unlading and lading of cargo may hand in their papers and manifests to the Customs officers here stationed, whereupon they will receive the "Discharge Permit."

The Prussian embassy was still at Tien-tsin, at the date of our advices, but it was expected to make a move towards Peking in a few days.

THE YANG-TSE KIANG.

Dates from Hankow are to the 25th June. It is said that the Rebels are approaching nearer to the city. The siege of Chinkiang has at last been raised, and the insurgents (about 15,000 strong) are nowhere to be seen in the neighbourhood. They began to relinquish their operations about the 5th June, and for a few days after that, a few straggling bands could be seen about the country making their usual display of gaudy banners, occasionally advancing towards the place, and again retiring, probably with a view of deceiving the Imperialists while the main body of them got off clear. They kept up this kind of diversion for a few days and then entirely disappeared, and all alarm on their account has now ceased. It is said the Imperialists mustered 18,000 or 20,000 men, of whom 6,000 were Tartars, and could easily, had they exhibited but ordinary courage, have dispersed their besiegers.

The following letter has been addressed by Mr. Roberts, the American Baptist Missionary, who resides with the Rebels, to the Editor of the *China Mail*:—

Nanking, May 23, 1861.

Sir,—I have just learned that one of your local neighbouring papers has been slandering, as usual, the only missionary in Nanking; stating that he keeps a parcel of girl servants to wait on him, insinuating that more than likely he uses them in more ways than for mere ordinary servants. If the information be correctly reported, it is an unmitigated slander, without the shadow of foundation, as can be proved by various missionaries who have called on him at various times, and one continued with him for more than a month. Excepting that portion of the mansion occupied by Teen Wang and his family, all females are strictly prohibited the premises. One was brought in by a native teacher—his own little daughter, ten or twelve years old; and as soon as the information got out the head manager of the premises came and hurried her off, not allowing her time to eat her breakfast. It is true that Teen Wang uses girls as personal servants, but with five wives of his own there is not much occasion, notwithstanding, to insinuate any uncleanness in his case other than that of polygamy. But as to prostitution or concubinage, I presume that such is not allowed in this city; I have never heard of anything of the kind here, and suppose that such a practice openly known would be the most direct road to decapitation. In this respect, and its cognates, *i.e.* gambling, opium-smoking, fortune telling, and priestcraft, including idolatry, this city may justly be esteemed the wonder of the world, having excluded and purged out the whole. There may be secret exceptions, but the public and general course of things runs in this uncommonly pure and extraordinary channel, for which Teen Wang should have due credit, whatever else may be his faults and failings. And however objectionable polygamy may be, it is certainly less objectionable than the other course of uncleanness, prostitution, and concubinage, practised by some of the citizens of more enlightened nations, who would feign take many exceptions at the polygamy of Teen Wang and his people. While we make no apology for this, we deeply deplore that, and must conclude that polygamy is the lesser evil of the two. The one *may* land the transgressor in hell, if he perseveres in it; the other will *certainly* do so! And what an *eternity!* for "one morsel of meat" to sell one's hope of heaven.

I see from the local papers the current has turned against the revolutionists—nor am I going to become their apologist. Suffice it to say, few subjects have but one phase, and hence I propose turning this over a little and looking at another side. We mortals, and editors, too, are quite liable to extremes. One day commending above measure, and again censuring below demerit. But for a solution of this subject we must analyse its parts a little, and look higher than to broken heads and burning cities for our explanation on the other tack. A revolution, and especially civil war, is and must be always unpleasant to the common people. But do not editors admit, as well as missionaries, that there is a higher power that rules among the nations? and, if so, the one who wrote this article before me must admit that God has not been an idle spectator of the Teen Wang movement, that it has not all happened so; for he has said, "the nation and kingdom that will not serve me shall perish." Has not China been tested long enough, and proved by their practice for thousands of years that they "will not serve" Christ, the Lord? Did not the Canaanites, when they had filled up their iniquity, perish by Joshua, as effectually as these are now perishing, and more so? And what a hue and cry the editors of that day might have raised against Joshua, about the cruelty of his course, his injury to commerce, and a thousand other faults. But we excuse the matter, because it was the appointment of Jehovah that he should exterminate the nations of that land—men, women, and children, and destroy their idols, and introduce a new religion. And how do we know but what the appointment is from the same high authority in this case? It is claimed to be, and the above text seems to favour the idea. And in fact would it not be better in the highest sense of the word for half the nation to be exterminated, than to go on as they have been doing, if the other half would thereby learn righteousness? But the editor says their religion is worse than none. Whatever their religion is in itself, there is one stubborn fact, that the missionary here preaches, sings, and prays publicly and daily to large congregations in the streets, in the city and outside of the city, wherever he pleases, no man forbidding him. Mr. Editor, could this have been done ten years ago? You know it could not. Then is not this one of the triumphs of this religion, that the people may have the gospel, the means of grace, and attain to the hope of glory? Again, perhaps there are few cities in the world—none I presume—so uniformly moral as this. And is not this to be credited to their religion, if not to what other account? And there are fewer obstacles in the way of the whole community (excepting the case of polygamy) becoming truly religious, converted, and saved, than in any city or community I ever lived in or read of, considering the size of the place. All the stubborn difficulties in Canton to making and maintaining a pure church, such as are bred in the bones and interwoven in the very souls of the people, like

Digitized by Google

fornication, opium-smoking, idolatry, gambling, and fortune-telling, are here effectually excluded, so far as publicly known; leaving the people apparently ready prepared for the Lord. And is not this a triumph above human nature, justly to be attributed to their religion? Ay, and exceeding the effects of our own religion on the foreign community generally in the place where this paper was printed!

With these data on which to predicate an opinion, I must conclude that their religion places them far in advance of the Imperialists, and, in fact, rather in advance, in a moral sense, of that part of our foreign community who walk after the flesh, fulfilling its lusts, without any conscientious scruples or God-fearing restraints.

But as to talking about manufactories, commerce, and the like, before they have any treaties, and while they are fighting for their very existence, it is simply talking nonsense; nothing of the like could be expected for some time yet. And as to their devastation and cruelty, you will find it little better in any city where the commander allows it sacked, however religious he may be himself. And as to calling Teen Wang and Chung Wang by ugly names, such as "one is a powerless dreamer," and the other "a sensual, ruthless brigand," this amounts to no argument at all, but rather shows spitefulness than otherwise. "Give a dog (a king) a bad name and hang him." These are revolutionists, and do what other revolutionists would most likely do under like circumstances. They are both kings, and shrewd, intelligent men, at the top of their class. I know them well, for I have lived in both their mansions, and can testify that they may be justly esteemed gentlemen.

As writing does but little good in this case *pro* or *con*, I would recommend that the method of prayer be tried, which "moves the hand that moves the world," by editors and all others who feel an interest in the welfare of this nation.

I have not criticised this paper before me quite enough yet. The editor says, "All despotisms are bad enough, but the present insurgent movement, should it prove successful, will be not only an ordinary, but a religious despotism." Sad—sad, but not so bad but it might be worse! But this reads mightily like special pleading against the revolutionists. His meaning is not clear, but if he means anything like just censure, he means that religious toleration will not be allowed. And, if so, he is surely begging the question, and anticipating a woful condition, for which he has not the shadow of foundation. The fact is that, when his religious instructor from Canton arrived last October, Teen Wang immediately sent him word, by the Prime Minister, Kow Wang, that he was not only at liberty to preach and invite his own brethren, thebaptists, to come and help him, but that he appointed him No. 1, to take the superintendence and management of this "religious despotism;" to which he readily consented, and united with Chung Wang in availing himself of so favourable an opportunity to extend as wide a religious toleration to all nations and denominations as the newspapers would circulate. Afterwards, at his solicitation (with others), a written document was issued from the throne, by the young prince with his father's seal, giving free religious toleration to all, both Protestants and Catholics; a translation of which the paper before me published. Then why does he talk about a "religious despotism?" He must mean a despotism in religious matters, or else he does the revolutionists an exceeding injustice. And on what grounds does he charge them with religious depotism? Has Teen Wang committed any overt act interdicting the free toleration granted by his son, the young Prince? He can point to none—none has been committed, nor likely to be. For the editor knows very well that the English and French would not allow such after having whipped it out of the imperialists, were these to attempt "religious despotism," at which all christendom would say—Amen; but not to an interference with their revolutionary movements, while in the ordinary course of such affairs it would only make bad worse. Let neutrality prevail among foreign nations with regard to this, and He who rules over all will ultimately manage this matter according to his own judgment.

SHANGHAI.

From Shanghai we learn that several valuable silk cargoes have been plundered by people supposed to belong to the insurgent party. Gunboats have been sent to obtain restitution, and to enforce respect to all merchandise for the future. The endeavour is stated to have proved successful.

Kin-hwa, a city two or three days journey from Ningpo, has fallen into the hands of the Rebels; and another city, La-kee, close to Kin-hwa, is reported also to have fallen.

The Americans at Shanghai have established a private police, since the peace of their quarter has been much broken of late by quarrels, the very refuse of the foreign population drifting in that direction.

From the *China Mail* of the 12th ult., we extract the following:—

"Chapoo was visited by H.B.M.'s Consul on the 7th of last month; he called there with the *Encounter* on his way from Shanghai. Reports state that the desolation and misery of the place defy all description of belief; the suburbs are a mass of ruins, not a soul to be seen. The city is like a city of the dead, with a few ruffianly scoundrels, calling themselves Rebels, prowling about and ruling over the few wretches who were unable to flee at their approach. Altogether, the scene is described as one not easily forgotten when once seen. The party in the *Encounter* are said to have had a long interview with the Rebel chief, to whom the Admiral's letter was delivered. In that letter the Rebels were informed that they would not be allowed to take Ningpo, or even to approach within two days' march of the city. The fact is that Ningpo, like Shanghai, is so mixed up with our own interest, that we should suffer materially if we allowed the city to fall and to be the scene of anarchy, confusion, and bloodshed."

The Rebels who plundered the silk *en route* from the silk districts, as stated in the last advices, have been brought to their senses. Roderic Dhu paid them a visit in the gunboat *Flamer*, and made them return the whole of the plunder. At first they were slightly inclined to "bounce," but the sight of the big gun and the exhibition of a bold front, soon brought them on their knees. The most important feature in this intelligence is the fact, that gunboats are enabled to approach the very confines of the silk districts, and it is confidently hoped that the passage will in future be kept clear by their instrumentality.

The *Fire Dart* and *Governor-General* had both arrived back from Hankow. It is reported that a very large quantity of native produce is waiting shipment at Hankow. Both the abovenamed steamers were being hurried back; the *Chusan* and the *Fernandes* being also laid on. The country below Hankow was still flooded, and the current ran down the Yang-tsze as strong as ever. On the last trip the *Governor-General* lost three anchors, and broke her hawse pipes.

The will of Tienwang was found at Ningpo during the late visit of H.M.S *Encounter*, and a strange document it is. We can only find space to transcribe a portion of it. After the opening paragraphs, stating to whom the will is addressed, it runs on as follows:—

The Dynasty of Taiping shall endure for myriads of myriads of years. Foreign affairs shall be regulated by the Director, and the Consuls of the Dependant States shall deal justly with him. The Title of the Consuls shall vary with their State. All States are under the Father and Elder Brother, obeying the dictates of the Three Treaties.

Walking in the way of our Three Treaties. The First Treaty is the Reverence of God and Mutual Love. The Second is the Worship of God and Mutual Intercourse. The Third is the Reverence of God and giving no aid to the "Imps." The Offices of the Capital and elsewhere are hereditary.

Also we give notice that the Title of the Consuls will vary as the name of their States, thus:—The seal of the English Consul will run "*M* or *N*, English Consul, Foreign Director, Chamberlain of the Court of the Divine Kingdom of Universal Peace." The seal of the American Consul—"*M* or *N*, American Consul, Foreign Director and Chamberlain of the Court of the Divine Kingdon of Universal Peace." Of the French Consul—"*M* or *N*, French Consul, Foreign Director and Chamberlain of the Court of the Divine Kingdom of Universal Peace." Of the Russian Consul—"*M* or *N*, Russian Consul, Foreign Director and Chamberlain of the Court of the Divine Kingdom of Universal Peace;" of the Turkish Consul [the same]; of the Austrian Consul [the same]; of the Prussian Consul [the same]; of the Japanese Consul [the same]; of the Swedish Consul [the same]; and the seals of all the other Consuls of the various States will run the same way. Thus the whole world will be at peace. Harmony and benevolence will prevail among men, all forming one family with the elder brother and us. Putting off their innate sin. Obtaining eternal life. Attaining to Heaven.

SWATOW.

Mr. Consul Caine has returned from his tour up the river, without however accomplishing the object of his visit. The gunboat went up within seven miles of Chau-chau-fu, and could ascend no higher, though up to that point it was found that even much larger vessels than the gunboat could go easily and safely, and by the destruction of a stone bridge the gunboat could approach much nearer to the city. Mr. Caine and a small party walked four or five miles till they arrived within sight of the city, but they were prevented from advancing further in that direction. The excitement and rage that prevailed in the city were terrific, when it was found that foreigners were actually about to enter it. The Taou-tai was indeed favourably inclined towards them, and not only provided a house for the entertainment of the visitors, but sent chairs out of the gates of the town to bring them to their destination. But the chairs were seized by the enraged populace and torn into fragments, and the house which had been provided for their entertainment was levelled to the ground. The people rose *en masse* to prevent the Taou-tai's good purpose being carried into effect. The latter official was powerless, and informed the Consul that he could not protect him if he came to the city. The Consul, being without any sufficient force at hand to proceed on his journey with prudence, had no other course before him than to retire in season. We see what disposition there is in Chau-chau-fu to observe the Treaty stipulation. The Admiral will need to make more effectual provision for putting Mr. Cairne into the city: people need to feel an irresistible force. The party that proceeded up the river on this expedition, found a beautiful and fertile country inhabited by a dense population.

HONG KONG.

An ordinance has been framed for the estimated expenditure of 1862, amounting to £68,100, which is to be disbursed as follows:—Civil Establishments: The Governor, £50; Colonial Secretary, £337. 10s.; Colonial Treasurer, £383; Auditor-General, £1,330; Clerk of Councils, £15; Surveyor-General, £1,640. 15s.; Postmaster-General, £1,872. 10s.; Registrar-General, £739. 10s.; Harbour Master and Emigration Officer, £1,280; Police and Lighting Rate Collector, £712. 10s.

Digitized by Google

Judicial establishment, £765; ecclesiastical establishment, £145. 17s.; educational establishment, £1,520; medical establishment, £2,740; Chief Magistrate, £1,096; police, £15,886; gaols, £4,635; pensions, retired allowances, and gratuities, £2,500; charitable allowances, £100; works and buildings, £13,500; roads, streets, and bridges, £16,500; miscellaneous services, £50; special expenses, &c., £300—total, £68,098. 12s.

The following is the reply of Mr. Bruce to the merchants in China on the subject of the Canton claims. In another column it will be seen that these claims have been admitted by Her Majesty's Government:—

PEKING, June 14, 1861.

GENTLEMEN,—I have the honour to acknowledge receipt of your memorial, urging a speedy settlement of the claims arising out of the losses suffered by H.M.'s subjects at Canton. I have already brought under the notice of H.M.'s Government the very complicated subject, and to obviate delay I have proposed a scheme for paying off in the first instance the claims arising out of actual loss in property and goods on the basis of the investigation made by Mr. Alcock. But I am unable to proceed to any distribution of the funds received until H.M.'s Government decides whether the whole or a fixed proportion of the accruing receipts on account of indemnity are to be applied in satisfaction of the Canton claims. Admitting the interest will be given so far as the fund of 2,000,000 (two millions) of taels extend, it will be evident to you that the amount of money disposable under this head will depend on the decision come to with reference to the large class of claims which may be designated as consequential and speculative damages in contradistinction to actual loss. It may be of use to you to know, that, as far as I am informed, H.M.'s Government consider that the receipts on account of indemnity should be applied as they come in—partly in satisfaction of the Canton claim, and partly in payment of war expenses.

With reference to the last paragraph of your letter, I am happy to state that I see reasonable ground for anticipating that our intercourse with the high officials of China will lead to a better understanding between the two nations than has hitherto existed.—I have the honour to be your most obedient, humble servant, (Signed) FREDERICK W. A. BRUCE.

To Messrs. Jardine, Matheson and Co., and others.

Mr. Robert Swinhoe, of the Consulate at Amoy, has writ te to the Zoological Society, stating that he is doing his utmost to procure for the gardens several Japanese and Formosan deer, and says:—"If the Zoological Society will remunerate the masters of the vessels for the conveyance of live deer, I dare say I can manage to defray all expenses here in procuring the animals."

At Pok-foo-lum, about three miles from Hong Kong, the ground is being prepared for building. Consequent, it is supposed, upon the necessary excavations, the health of the native labourers has suffered severely, and the proportion of deaths among those employed has been astonishing. It is supposed that the ground has never before been broken, and that, as in the case of the early days of Hong Kong, the first disturbance of soil has been attended by noxious exhalations.

The sales of Government land at Hong Kong during four days have realised by premiums the sum of $180,000, and they add to the revenue of the colony a permanent rental of $17,000. The *China Mail* speaks in strong language against the impolicy of some of these sales, as blocking up spots of ground which were invaluable in the most crowded parts of the Chinese town as breathing spaces, and points of advantage in cases of fire.

The *Acorn* will proceed to Shanghai shortly, to be there used for a variety of purposes—one especially, namely a Post-office. Quarters are now being prepared in the after part of the vessel for the Clerks, &c.

CANTON.

We are constantly observing complaints in the China papers of the annoyances and expenses entailed upon merchants in consequence of the new Customs regulations, but we have hitherto refrained from giving any opinion on the subject, from the extreme difficulty we have felt in arriving at the truth, since no counter statements have been put forth by the Custom-house officials. One case, however, has come to our knowledge so obviously unjust, that it inclines us to believe that there is some truth in the reiterated complaints of the writers to whom we have referred.

Two hundred bales of silk were some time since forwarded to England from Canton, and on being found in some respects defective, they were re-shipped for China. On arriving there, the Custom House official at Canton not only refused to allow the drawback, but actually insisted on an *import* duty. An act so unreasonable, vexatious, and injurious to commerce requires to be explained, and, if possible, justified. The Merchants of China have a right to expect that, since they have to put up with vexatious delays not customary under the old system, they should be at least protected from such ignorance as here displayed. We have always been of opinion that the Foreign Inspectorate should be productive of much good, and an improved *regime*, if properly administered.

THE PHILIPPINES.

MANILA.

The *Burdeos y Havana*, from Liverpool, arrived 29th June. The actual sales of goods have been very small, nearly the whole of those now reported having been made some time ago "to arrive." As further receipts of goods are not expected for upwards of a month, both importers and dealers may have time to clear off a portion of their heavy stocks, though the present time, being the wet season, is by no means the most favourable for effecting sales. The *Philippine*, from Grangemouth, brought coals and machinery for Government, and the Swedish brig *Hilda Charlotte*, from Boston, takes the greater part of her cargo to Hong Kong. The quotations for produce continue much as before, though the sterling cost is considerably lessened by a further decline in the rate of exchange and also of freights, which are likely to be still lower. The exports of the last six months show a considerable increase in most of the principal articles of produce, but unless the advices prove much more favourable than can at present be reasonably expected, shipments should materially fall off during the remainder of the year.

BORNEO.

SARAWAK.

The *Singapore Free Press* gives the following account of Sir James Brooke. This intelligence reached us after our leading article on Borneo was written:—

The Sarawak flotilla arrived off the Muka river on the 20th June, and Pangeran Dipah and Seriff Masahore immediately surrendered. The latter had held a final council, the evening before, with his chief adherents, Talip and Sawing (the murderers of Messrs. Fox and Steele), who forthwith made their escape up country and have not since been heard of. The people were starved and worn out, and the majority were looking to the arrival of the Sarawak forces as the means of delivering them from the very wretched life they had been leading for a long time past. Some of the more desperate men, headed by Pangeran Kahar, talked loudly of resistance, but pride yielded to necessity, and they accepted the terms offered—life and property at a distance.

A few days afterwards the Sarawak forces took possession of the fort, which will be held until matters are finally adjusted between the Sultan of Brunei and the Rajah of Sarawak, respecting the future government of that part of the country. Sir James Brooke will remain for the present at Muka, to introduce order and good government, a task that will be by no means an easy one, if we may judge from the description given in a letter from the scene:—"This place is an Augean stable of slavery and corruption, and some river or other of sweet waters must be turned through it."

As soon as order was re-established the people began collecting sago, and there was every prospect of a brisk and increasing trade. At Sarawak, on receipt of the news of the bloodless victory, a salute was fired; within forty-eight hours one prahu had cleared for Muka, and numbers were preparing to follow. The greatest activity prevailed, so that in a short time it is to be hoped the past may be in a manner retrieved, and the prosperity of the coasting trade ensured.

JAVA.

BATAVIA.

REPAIR OF THE SINGAPORE AND BATAVIA CABLE.

The Dutch screw steamer *Draak* started with six and three-quarter miles of new deep sea cable on board, intended to repair the cable in the Straits of Banka. The examination of the cable was commenced with that part between one hundred and seventy-six to one hundred and seventy-nine miles from Batavia, lying to the south of Lucipara, and which was laid in a W.N.W. direction, it being proposed to splice on the new six and three-quarter mile cable, and to lay it further to the N.W. in a depth of two fathoms. On taking up this three and a quarter miles of cable it was found that where it lay the bottom consisted of blue and soft mud, like that on the east coast of Sumatra, and that the cable in this mud was not encrusted with shells, but remained clean and undamaged and as good as new.

After this examination the *Draak* returned to Batavia in order to repair the ruptures in the cable near that place. From the mouth of Muara baru, where the shore end of the cable is situated, to a distance of about forty miles from Batavia, W.S.W. of Pulo Katok, the number of breaks were not less than twenty, the repairs of which occupied a long time. It is noticeable that all these breaks were found in the deep sea cable, while the whole line from the south of the Agnita islands to the south of Middleburg and Amsterdam, where the shore end cable lies, was not damaged in a single place. Of the deep sea cable, which was under-run for a length of forty miles, it was found in some places that the iron wire

Digitized by Google

covering had wholly disappeared, while in others it had become very thin. It is reported that the line will be again in working order.

MALACCA STRAITS.

SINGAPORE.

An interesting account of Bankok has reached us, of which we shall avail ourselves in our next number.

The *Prince Charlie*, which had just commenced loading at Penang for London, was burnt and sunk at her anchorage. She had on board a small quantity of cargo.

Her Majesty's steamer *Charybdis*, Captain Keane, proceeded to Labuan on the 16th July, having on board Mr. Callaghan, who has been appointed to administer the government of that colony during the absence of the Hon. Mr. Edwardes. In noticing the appointment of this gentleman, the Hong Kong *Daily Press* writes :—

Our readers will please bear in mind that when Mr. Callaghan was appointed Chief Magistrate of this colony, the situation had been vacant for nearly two years. When the Duke of Newcastle was absent in America with the Prince of Wales, Mr. Callaghan received an intimation from Mr. Fortescue, one of the Secretaries at the Colonial office, to the effect that the Secretaryship of this colony was at his disposal. As Louis Napoleon consented to accept of Savoy and Nice, so did Mr. Callaghan accept this appointment. In the course of a week or two, however, Mr. Fortescue again sent for Mr. Callaghan, and stated that he had made a mistake—it being the appointment of Chief Magistrate, not of Secretary that was vacant. Mr. Callaghan felt aggrieved—he had to be mollified. All sorts of promises were made to him in case the situation did not suit him, and the sequel will show that these promises have been performed. . . . We really do not think he did a fortnight's work all the time he was here. The injury he did from neglect of duty is incalculable. He clearly wrote Sergeant Deasy to say the work was too hard "intirely," for out came on appointment to the Governorship of Labuan. The pay was, however, mall—say £800 per annum. An attempt was made to obtain for him he Consul-Generalship of Borneo, and the Consulate of Sarawak, but those situations being in the gift of the Foreign-office, the scheme failed.

What was to be done for Sergeant Deasy's pet? A lucky thought—let him go to Labuan on leave, and draw half his Hong Kong salary. And although he had been "on leave" almost ever since he came here, insomuch that the Governor very reluctantly granted him permission to go to Japan, still his leave has been extended, and he draws half-pay.

As far as the pecuniary part of the transaction is concerned we would say nothing, except for the principle of the thing,—for we declare £600 per annum is cheap to be rid of such a perfectly useless officer.

The *Daily Press* adds that Mr. Callaghan's commission is certainly signed by the Queen, but the writer asks, and his query demands a reply, how it comes to pass that the Governor of Labuan can draw half the pay of Chief Magistrate at Hong Kong?

Births, Marriages, and Deaths.

BIRTHS.

BOWKER—On the 18th inst., at Ash Lawn, Hope, Eccles, near Manchester, the wife of C. H. Bowker, of a son.

CHITTY—On the 22nd inst., the wife of Thompson Chitty, Esq., barrister-at-law, of a daughter.

DANVERS—On the 21st inst, at 29, St. Stephens-road, Westbourne-park, the wife of Frederick Charles Danvers, Esq., of a son.

DAVIDSON—At Thomson's Road, Singapore, on the 17th July, the wife of James David son, Esq., of a daughter.

FELLOWES—On the 16th inst., at 7, Atholl-crescent, Edinburgh, the wife of C. William A. Fellowes, R.N., of a daughter.

FRASER—On the 15th inst., at 23, Oxford-square, Hyde-park, the wife of Lewis Fraser, Esq., of a daughter.

GITTINS—On the 9th inst., at East Moulsey, Surrey, the wife of Thomas Gittins, Esq., of a son.

HAZELAND—On the 25th June, at Hong Kong, the wife of F. J. Hazeland, Esq., Crown Solicitor, of a son.

MILTON—On the 22nd inst., at 61, Ashburnham-grove, Greenwich, Charlotte, the wife of Capt. J. Grigg Milton, of a daughter.

RANGEL—On the 15th inst., at 13, Lansdown-crescent, Notting-hill, the wife of F. A. Rangel, Esq., of a daughter.

MARRIAGES.

CONSTABLE—HELDER.—On the 13th inst., at Christ Church, St. Marylebone, by the Rev. Francis Helder, Commander Charles Golding Constable, H.M.I.N., son of the late John Constable, Esq., R.A., to Caroline Susanna, daughter of William Helder, Esq., of Howley-place, Maida-hill.

GOOCH—BRODIE.—On the 15th inst., at St. John's Church, Angel-town, Brixton, by the Rev. H. Thompson, Captain Edwin Gooch, to Mary, daughter of the late David Brodie, Esq.

MONTIGNY—MONTIGNY.—On the 18th July, at the Church of Notre Dame de Chaillot, Paris, Remi de Montigny, Esq., of London, to Nina Helène Caroline, elder daughter of Monsieur C. de Montigny, Consul-General for France in China.

RIDLEY—KENT.—On the 13th inst., at Hampton, Middlesex, by the Rev. Edward Johnstone, vicar, Samuel Edwin, only son of Samuel William Ridley, Esq., of Barossa Lodge, Islington, to Nona Jackson, daughter of Francis J. Kent, Esq., of Castle House, Hampton.

SCHMIDT—MONTIGNY.—On the 18th July, at the Church of Notre Dame de Chaillot, Paris, Edward Schmidt, Esq., of Shanghai, to Blanche Marie Victorine, younger daughter of Monsieur C. de Montigny, Consul-General for France in China.

DEATHS.

ATCHISON.—At Singapore, on the 18th July, Frederick Selwyn, the infant son of John S. Atchison, Esq.

FARBRIDGE—On the 15th inst., in the Albany-road, Camberwell, Robert Farbridge, Esq., aged 89.

GARDNER—On the 20th inst., at his residence, 20, Notting-hill-square, Henry Thomas Gardner, Esq., of 453, Strand, aged 44.

HAVELOCK—On the 15th inst., at Edmonston, Biggar, N.B., of acute diphtheria, Honoria, youngest daughter of the late Major-General Sir Henry Havelock, aged 20.

MONTLEART—On the 7th inst., at Paris, Louisa Catherine Princess de Montleart, daughter of the late Gen. Sir William Keir Grant.

SANTOS—On the 16th June, at Macao, Mrs. Maria dos Santos, aged 71. R.I.P.

WILSON—On the 24th July, at Brighton, Mrs. Elizabeth Dent, daughter of the late Henry Wilson, of Gilling, near Richmond, Yorkshire, aged 86.

COMMERCIAL REPORT.

CHINA—EXPORTS.

SHANGHAI.—TEA.—Black: The only settlements during the fortnight have been 900 chests of common descriptions of Congou at Tls. 18 to 23 and 300 chests of low Flowery Pekoe at Tls. 22½. Settlements to date amount to 80,350 chests, against 276,100 chests at the same period last season. Stock about 4,000 chests of common and spurious Congous and 1,000 chests Flowery Pekoes. Small settlements of the new season's Oopacks have been made at Hankow at Tls. 20 to 24 short price, costing probably 1s. 9d. to 2s. laid down in England. These rates must be considered high, and it is a matter for regret that buyers have consented to pay such prices. The really first-class teas of the district are said to have been sent to Canton, but it is believed that an ample proportion of the second and third crop will go to Hankow. Greens: There is little to report, no settlements of quotable extent have been made here, and the Ningpo market is still in the hands of a few buyers for America, who continue to pay extreme rates. Settlements for the fortnight: China tea, 8,400 half-chests—Japan tea, 1,000 half-chests; to date, 150,000 half-chests and 61,400 packages respectively, against a total of 443,000 packages at the close of last season.

FOO-CHOW-FOO.—Supplies have continued to come forward steadily. The unsatisfactory nature of the London advices of the 10th May, and the alarming intelligence from the United States, have combined to make buyers more chary lately, and rates tend downwards. Two vessels to London and one to Australia form all the exports for the fortnight. The settlements during the same period are reported as under:—Congous, 17,000 chests and 15,000 half-chests at 9 to 13 taels for dusty to ordinary; 14 to 18 taels mixed leaf; 19 to 22 taels for best middling to middling; 23 to 27 taels for medium to second-class Kaisow; and 28 to 31½ taels for first-class ditto. Souchongs—2,300 chests at 21 to 34 taels for medium to fine.

AMOY.—The market continued closed until the 4th inst., when 1,730 half-chests of Contract Plain Orange Pekoe were settled at $13.25 to $15.00, short price for common to good common quality. But little has been done since, and settlements amount to only 1,890 half-chests at the above-mentioned prices.

CANTON.—About sixty chops of the new Oonams and Oopacks have arrived down. The former are a little inferior to last season, whilst the latter are deemed superior. Foreigners evinced much anxiety to purchase these teas, and although a concerted movement was attempted, still it soon yielded to the usual combined action of the teamen. The settlements of the fortnight are reported as follows:—Congous, 23 chops fine Oonams and Oopacks at 28½ to 35½ taels (being about one tael all round less than last year's rates) 2,500 half-chests. Canton made at 18 to 20 taels. Scented, Teas, 15,000 boxes Orange Pekoe at 24½ to 31 taels, and 2,000 boxes Caper at 25 to 30 taels.

RAW SILK.—Shanghai.—There have been large arrivals of new silk, purchased at high prices in the interior, and the demands of the dealers were consequently too high to lead to much business in this market in face of the unfavourable news from America. The actual sales which have taken place may be estimated at about 150 bales of new silk, and the arrivals on foreigners' account at nearly 750 bales, in addition to which some 600 bales old silk have found buyers, making a total settlement for the fortnight of 1,500 bales. The quality of the new crop has been injured by too hasty gathering and damp weather, and is inferior in colour and more or less foul and mixed. The prices given below must be considered nominal, the actual settlements of new silk being so trifling:—Tsatlees, No. 3, Tls. 400 to 420 per picul; 4, Tls. 375 to 395 per picul; 5 and com., Tls. 350 to 370 per picul. Yuenfa, No. 1, Tls. 380 to 400 per picul; 2, Tls. 350 to 370 per picul; 3, Tls. 310 to 330 per picul; 4 and com., Tls. 280 to 300 per picul. Taysaams, No. 1, Tls. 360 to 370 per picul; 2, Tls. 320 to 340 per picul; 3, Tls. 290 to 300 per picul; 4, 5, and com., Tls. 250 to 270 per picul; Hongchow Tsatlee, Tls. 350 to 370 per picul; Sewhings, Tls. 260 to 320 per picul; Laeyongs, Tls. 240 to 260 per picul; Throwns, Tls, 300 to 360 per picul.

CANTON.—Settlements for India have been made to a considerable extent, and little remains of the first crop upon the market. The quotations are:—Loonkong, $410 to $420; Gowkong, $375 to $385; re-reeled Cumchook, $450 to $460. The second crop is coming to market, but proves inferior owing to heavy rains. Drugs, &c.: The following is the report upon that market:—Cassia lignea, $14 80c., stocks 2,000 pls; cassia oil, $225; stocks 100 pls.; cassia buds, $40, scarce and wanted; star anniseed, $14 50c., scarce; anniseed oil, $140, stock 200 pls. There is nothing doing in vermillion nor galls.

CHINA—IMPORTS.

SHANGHAI.—Since the 27th June the only arrival from Great Britain has been the *Leichardt*. The following are the deliveries reported for the fortnight, inclusive of sales made for reshipment to the new ports. Shirtings, 48,920 pieces grey and 8,500 pieces white, slightly lower and dull; T-cloths, 11,190 pieces; Am. goods, 1,500 pieces; drills, 320 pieces Jeans, and 1,060 pieces sheetings, heavy stocks, and difficult of sale; long ells, 160 pieces; Spanish stripes, 96 pieces; camlets, 120 pieces, prices nominal, and little demand; Mangrove bark is much wanted, and the price has risen almost unprecedentedly high. Metals are in but little demand; the deliveries are, lead, 502 piculs, and iron, 1,334 piculs without change in prices.

CANTON.—The sales of the fortnight have been quite insignificant being reported as under:—Cotton yarn, 740 bales; grey shirtings 2,850 pieces; white shirtings, 250 pieces; Am. drills, 2,500 pieces; T-cloths, 500 pieces; lead, 700 piculs; quicksilver, 350 flasks; sapanwood, 769 piculs.

HONG KONG.—Since last mail arrivals have been the *Velocidade*—*Southern Cross Niphon*—and *Chaa Sze* bringing further supplies of manufactures to the already over-stocked market. The following are the sales reported:—Cotton yarn, 125 bales; no inquiry, very low prices. Shirtings grey, 6,750 pieces; rather more done, but at a reduction. White, 2,540 pieces, very limited demand. T-cloths, 9,000 pieces, sales effected with much difficulty. White and dyed fancy cottons are only saleable at very low rates. Woollens are almost totally uninquired for, and only saleable at a reduction. Metals very little in demand for any description

Digitized by Google

PROVISIONS, &c.—The stock of articles under this heading is excessive. Good American Beef can be had in quantity at $6. Prime Pork, being in more moderate supply, is saleable at $13 to $14. Flour: Gallego and Haxall will command $9.50 for fresh, other articles are only saleable at auction, and cannot be quoted. Coals.—There is a great difference between the buying and the selling rates, and therefore there is much difficulty in giving quotations. Stocks are much reduced, and there is a fair demand. English steam afloat may be quoted $10 to $11, and Sydney $7½ to $8.

TIEN-TSIN.—Business is completely at a stand, in consequence of the notice from the Chinese Commissioner, requiring native traders to report their purchases of foreign goods to his office, in order that they may be examined and charged with a duty of 2½ per cent. before obtaining a permit to pass into the interior. The traders complain that in addition to this tax they are subject to loss in the difference of weights, to fees to obtain exemption from petty annoyances, and many other vexations. No transactions have taken place in the present states of affairs.

HANKOW.

IMPORTS.—The import market has not began to show any sign of life since the Rebels threatened the place in March last. The small shopkeepers have supplied themselves from a few native holders of old stock at the following prices for stable goods:—Grey shirtings, 5½ catty, 2 taels 6½ catty, 2.1.0. taels, 7 catty, 2.3. taels; white, 66 reed, 2.2.0. taels. T-cloth, 1.6.0. taels to 1.7.0. taels. Brocades, assorted 2.8.0. taels; white, 2.1.0. taels. Spots, assorted, 2.8.0. taels; white, 2.1.0. taels. Seaweed cut, 6 taels; long, 5 taels. Cuttlefish, 8 taels; and isinglass 32 taels per picul. The season for woollens has not commenced.

EXPORTS.—Teas have been somewhat retarded lately, owing to the presence of Rebels in the tea districts. About thirty-five chops have been seen, only six or eight of which have been offered for sale in the market. The quality is good, but the leaf has been hastily prepared; both condition and packing are excellent. Prices for first class Oopack may be quoted at 25 taels in Hankow, none offering; good second class, 23 to 24; inferior and broken leaf, 20 to 22 taels. There is nothing now on the market ready for shipment. Oil, 3 taels per tub of 75 catty; wax, 31 taels per picul; vegetable tallow, 4 taels per picul.

JAPAN.—KANAGAWA.

IMPORTS.—During the past month cash transactions in imports have been entirely confined to camlets, for which there has been a good demand but at low rates, and one sale of 6½-catty grey shirtings at $2.15. In barter we have heard of a few operations in 5½-catty grey shirtings at $2.50, in 6½-catty to $2.30, and scarlet chintz at $2.50: excepting these, all quotations are nominal.

EXPORTS.—TEA.—Recent advices from the home market having tended to curtail operations for direct shipment to England, the business of the past month has been confined to a few cash transactions in new leaf at a decline of from $2 to $3 per picul on previous rates, to fair barter business in the fine grades of the old crop. The new crop promises to be abundant, but appears to be faulty in the manipulation and insufficiently fired. Settlements for the month about 1,500 piculs. Stocks in Yokuhama about 1,000 piculs.

SILK.—During the past month our market has shown great activity, and settlements are estimated at from 1,100 to 1,200 bales; rates have still further declined, but a large portion of the business done having been in barter against imports correct quotations are not easily obtained. Quotations—Ida, Nos. 1 and 2, none; Nos. 2 and 3, $400 to $500. Mybash, Nos. 1 and 2, $460 to $480; Nos. 2 and 3, $400 to $430. Sodai, Nos. 1 and 2, none; Nos. 2 and 3, $360 to $400. Re-reeled, Nos, 1 and 2, $360 to $380; Nos. 2 and 3, $220 to $320. Cotea, $290 to $320. The total exgort of silk from 1st July, 1860, to 18th May, 1861, is as follows:—England, 1,997 bales; Shanghai, 7,982 bales; Hong Kong, 191 bales: total, 10,150 bales.

NAGASAKI.

IMPORTS.—Few cash sales have taken place during the last fortnight, but numerous barter transactions have been effected. Low cash offers made for 6½ catty grey shirtings and dyed brocades, and the former can be readily moved against various descriptions of produce.

EXPORTS.—TEA.—A few small parcels have been taken at very fair rates against imports, but for large lots of new seasons the Japanese are demanding full prices, and until these are reduced no large settlements are likely to be effected. Freights to London, £4. 10s.

SINGAPORE.—The demand for European imports generally continued very dull from the date of the last mail until recently. The improved inquiry has been principally for cotton goods suitable for Siam and Cochin China, and considerable clearances have taken place in grey shirtings, T-cloths, and yarns, at prices previously ruling. In exports transactions have been on a limited scale and generally at a slight reduction in prices.

The picul is 133⅓ lbs. weight; the tael at Shanghai is equal to 1 dollar and 40 cents. and is divided into decimal parts of ten.

EXCHANGES ON LONDON.

[For dates, see first page.]

		Bank.	Private.
At Shanghai (per Tael)	6 months sight.	6s. 2d.	6s. 2¼d. to 6s. 3d.

EXPORTS FROM CHINA.

Per Sarah H. Snow, from Shanghai, June 22, to New York: Tea, 522,700 lbs.; raw silk, 2½ piculs; cassia, 80; wool, 57.

Per Beemah, from Foo-chow-Foo, June 24, to London: Tea, 1,012,600 lbs.

Per Veronica, from Foo-chow-Foo, June 26, to London: Tea, 369,200 lbs.

Per Fairy Queen, from Foo chow-Foo, July 2, to Australia: Tea, 416,000 lbs.

Per Hafis, from Macao, June 30, to Falmouth: Cassia, 1,887 piculs; anniseed oil, 158; sugar, 2,000; sweetmeats, 67 boxes; camphor, 400; Japan cassia, 308; canes, 60 mil; sundries, 249 packages.

Per Heroine, from Canton, June 27, to New York: Tea, 396,300lbs.; pongees, 1,000 pieces; raw silk, 22 piculs; vermillion, 10 boxes; fire crackers, 2,500.

Per Leontine, from Hong Kong, June 25, to Sydney: Tea, 15,000 lbs.; sugar, 3,500 piculs; China goods, 1,234 packages.

EXPORTS FROM MANILA.

Per Zealandia, to London, July 1: Hemp, 8,100 piculs; sugar, 8,550; sapanwood, 200; coffee, 1,100; gum mastic, 654; cigars, 3,500 mil.; tortoise shells, 374 catties; indigo, 53 qqls.

Per Ashmore, to Liverpool, June 29: Hemp, 1,120 piculs; sugar, 8,000; sapanwood, 200.

Per Nueva Engracia, to Falmouth, June 26: Sugar, 9,020 piculs.

Per Marchioness of Londonderry, to Cork, June 22: Hemp, 3,550 piculs; sugar, 11,445; sapanwood, 300.

Per Ary Scheffa, to Melbourne, June 28: Sugar, 14,122 piculs; coffee, 145.

EXPORTS FROM PENANG.

Per Norwood, to London, July 10:—Tin, 2,146 piculs; sugar, 6,248; black pepper, 4,886; white, 358; cutch, 621; tapioca, 301; gutta percha, 177; rattans, 394; buffalo hides, 294; cow do., 57; buffalo horns, 54; nutmegs, 52; mace 5; mace paste, 1; nutmeg and cassia oil, 232 bottles; green snail shells, 6,760; rum, 12,500 gallons.

EXPORTS FROM SINGAPORE.

Per Tigris, to Liverpool, July 10:—White pepper, 150 piculs; sago flour, 7,498; tin, 196; sapanwood, 84; rattans, 159; buffalo hides, 38; black pepper, 963; gutta percha, 291.

Per Canadian, to Liverpool, July 17:—Sago flour, 6,313 piculs; pearl sago, 622; gambier, 4,463; tin, 1,044; gutta percha, 108; india-rubber, 42; black pepper, 2,580; white, 359; buffalo hides, 497; rattans, 213; cotton, 180 bales.

Per Re-union, to Bordeaux, July 17:—Gambier, 4,034 piculs; Rhio gambier, 265; indiarubber, 194; gutta percha, 31; cubebs, 129; white pepper, 297; pearl sago, 156; rattans, 307; black pepper, 3,658.

Per Lettice Catherine, to Bremen, July 18:—Tin, 82 piculs; gambier, 4,002; pepper, 2,788; white pepper, 103; cubebs, 34; rattans, 88; sapanwood, 101; cigars, 2 cases; shells, 1; sundries, 16 packages.

SHIPPING INTELLIGENCE.

ARRIVED.

At Shanghai.—From Liverpool: June 25, Leichardt.

At Amoy.—From Boston: June 2, Arab.

At Hong Kong, Macao, and Canton.—From London: June 28, Southern Cross; July 2, Chaa Sze. From Liverpool: June 28, Velocidale, Niphon. From Cardiff: 28, Jacoba Helena. From Newcastle: 29, Psyche. From Toulon: July 8, Talisman. From New York: June 30, Heroine; July 10, N. B. Palmer. From San Francisco: 9, Rapid.

At Manila.—From Liverpool: June 29, Burdeous. From Cadiz: 28, Concepcion. From Boston: July 2, Hilda Charlotte.

At Singapore.—From Hamburg: July 20, Saturnus.

Errata.—The Prince Alfred, reported in our last as arriving at Hong Kong from London, was in error, she should have been reported as from Bombay.

SAILED.

From Shanghai.—For New York: June 22, Sarah H. Snow.

From Foo-chow-Foo.—For London: June 22, Beemah; 26, Veronica; July 5, Banian. For Melbourne: 2, Fairy Queen.

From Hong Kong, Macao, and Canton.—For London: June 29, C. S. Lemon. For Falmouth: 21, Hafis. For New York: July 5, Heroine; 6, U. S. S. John Adams.

From Manila.—For London: July 1, Zealandia. For Liverpool: June 29, Ashmore. For Cork: 22, Marchioness of Londonderry. For Falmouth: 26, Nueva Engracia.

From Singapore.—For Liverpool: July 10, Tigris; 16, Canadian. For Bordeaux: 17, Reunion.

From Penang.—For London, July 12, Norwood.

LOADING.

At Nagasaki.—For London: Antagonist.

At Shanghai.—For London: Challenger, Charlotte Ann, Jubilee, Polmaise, Sharpshooter. For New York: Union.

At Foo-chow-Foo.—For London: Georgiana, Invincible, Shakespeare, Sir W. F. Williams. For Europe: Victor Emmanuel.

At Hong Kong, Macao, and Canton.—For London: Chaa Sze, Niphon, Star of the North, Primula, Caduceus, Coleroon, Maiden Queen, Northfleet, Unrivalled, West Australian. For New York: Canvass Back. For Melbourne: Laughing Water, Seaman's Bride. For Australia: Kosmos. For San Francisco: Lotus, Sardinian.

At Manila.—For London; Ethereal. For Liverpool: Joaquina Victoria. For Falmouth: Bahia, Yarra. For Cork: Chatham. For Havre: Souvenance. For Cadiz: Concepcion. For New York: Merrimac. For Boston: Shirley. For Melbourne: Antagonist, Canton, Martaban, Sweepstakes.

At Singapore.—For London: Caroline Elizabeth. For Glasgow: Burnside. For Boston: Rocket.

At Penang.—For London: Prince Charlie, Pilgrim. For Liverpool: Troy.

FREIGHTS AND CHARTERS.

At Shanghai.—To London: Tea, £4; Silk, £5. To New York: Tea, $15; Silk, $25. The business of the past fortnight has not been so active, owing to the ports of Tien-tsin and Cheefoo being fully supplied with import goods, the small demand for Japan, Amoy, and Hong Kong and the Hankow and Chinkiang trade being done by the steamers on the Yang-tsze-Kiang. Amongst the charters reported are;—Elouise, from Kanagawa to London with rags, silk, and wax at £3. 10s., with 50 lay days. The Geo. Washington and Naval Brigade also load at Kanagawa, for London, at £5. Chrysolite from here to London, at current rates.

At Foo-chow-Foo.—To London: £4 to £4 10. The Banian filled at £5, but the above may now be considered the rate.

At Amoy.—A considerable falling off in rates has been experienced during the past month. Small and moderate sized vessels are, however, still wanted at the lower rates current.

At Hong Kong, Macao, and Canton.—To London: £3. 3s. to £3. 10s. To Great Britain a fair amount of business is being done, but to the United States shipments may probably nearly cease. Rice charters are again in the market, but as the crop is expected to turn out short, not so much shipping will be required. The coast trade is also smaller than was hoped for. To Tien-tsin and Shanghai the sugar trade has been seriously injured by the exactions of the Mandarins. The Chaa Sze, Unrivalled, Coleroon, Niphon, and Primula load for London at the above rates. Mischief to Continent at £3. 5s. Five vessels load for Bangkok and back at 42½c. to 50c. per picul. Bailly de Suffren and Colbert to Saigon and back at 50c. per picul. Frisia Westphalia to Shanghai $2,950 in full.

At Manila.—To London: £3 to £4. To New York: $6½ to $8. The Wild Gazelle and Gertrudis load for Liverpool. Chatham for Continent, and Ocean Pearl and Merrimac for United States at the above rates.

At Batavia.—For Continent £3. 5s. to £4. Ready employment has been found by the vessels arriving, as the number of seeking ships are very few.

At Singapore.—To London £3 to £4. A good demand is still kept up for vessels for various quarters, and all disengaged ships are soon taken up. The Caroline Elizabeth loads for London at above rates. Burnside for Glasgow at £3. 10s. dead, and £4 light freight. Amelia, to Shanghai, for $3,000, 28 lay days. The Smallwood has been sold for $12,900.

CASUALTIES.

The Marmora, Captain Lyell, which left Nagasaki for Kanagawa on he 17th June, returned into port on the afternoon of the next day, damaged. It seems that at 1 A.M. on the 18th, in consequence of a strong N.W. current, the inaccuracy of the chart, and the density of a fog. she struck on one of the small islands to the N.E. of the Grotto Group. Not being able to judge of the extent of the damage, and finding that ome of the copper at least was gone, Captain Lyell returned to harbour, where she will be immediately hove down for examination. The survey not having been yet held, the particulars of damage cannot be learnt, nor is it yet determined if she will proceed to Kanagawa as originally intended; if not the Teresa will take her place.

The Ocean Mail, from London to Hong Kong, reports having had very heavy weather near the Straits of Sunda, and that the captain had been washed overboard.

The Norno, from Newcastle N. S. W., was wrecked on the St. Augustine reef, on the 31st of March, and on the second day broke in the middle. The captain, his wife, and crew, all succeeded in reaching a small island, from whence a part of them proceeded in the long boat to Guam, which they reached on the 23rd April, and were forwarded by the Governor to Manila. His Excellency offered a high remuneration to two vessels to go for the remainder of the crew, but they would not, and it is not known what has become of them.

The Bommeleward, from Swatow to Shanghai, struck on a rock on the 30th June, about three miles from the former place. Captain Tucker has bought the wreck for $500, and as the deck can be seen at low-water will most likely succeed in lifting her.

The Danish brig Thor, while discharging her cargo in the harbour of Tanti, was capsized, and three ballast-boats which were alongside. The Sarah Lucy and a Chinese junk succeeded in raising her, after being under water three days. Everything was spoilt in the ship, and her rigging, &c., much damaged.

PASSED STRAITS OF SUNDA.

From Swansea to Hong Kong: July 10, Judge Shaw. From New York: Hotspur. From Kanagawa to London: June 29, James Lemon. From Shanghai: 20, Ziba. From Hong Kong to Melbourne: 20, Conflict. From Manila to London; July 5, Regina Maris. From Singapore, 6, Granville. From Continent to Batavia: July 12, Comin des Konings v.d. Hein, Hercules, Pegasus, Noach, Nederland. From Batavia to Continent: June 28, Jacobus Martinus, Alexander; July 2, Scheme; Joh. Hend. Ferdinand; 3, Cortgene. From Manila to Sydney, June 30, George Lee.

POSTAL REGULATIONS.

Letters and Newspapers are despatched to China, Singapore, &c., by two routes, viz. via Southampton, on the 4th and 20th of each month; and via Marseilles, on the 10th and 26th. They reach their destination at the same time.

Books are forwarded through the Post-office to China (Hong Kong only). Books must be packed in covers open at each end. Each packet may contain any number of Books or Pamphlets; but it must not exceed 3 lbs. in weight. The Postage on Books is payable in advance by stamps.

RATES OF POSTAGE.

Via Southampton.	s.	d
Not exceeding ½ oz.	1	0
„ „ 1 oz.	2	0
„ „ 2 oz.	4	0
Every oz. or fraction of an oz. after the first	2	0

Book Postage.		
1oz.	0	4

Newspapers	0	3

The following shows the intended departures of mails, by the P. and O. Co.'s steamer, &c. From Shanghai, Foo-chow-foo, Amoy, and Manila, the mails are despatched from four to seven days before the date of departure from Hong Kong. The mails from Java, Siam, and Borneo are despatched *via* Singapore, and the mails from the latter place leave from six to eight days later than Hong Kong. Arriving in London, *via* Marseilles on the 12th to 15th, and 26th to 29th of each month, and *via* Southampton five days later.

Continental Intelligence.

FRANCE.

Letters from Saigon, Cochin-China, present no very tempting picture of the place as a residence for Europeans. A correspondent writes from thence on the 29th June :—

Our town is most monotonous, and we really do not know what is going to be done with us. Militarily speaking, our work is at an end, and if colonisation is to be attempted that does not concern us. We hope that our general, on his arrival in Paris, will induce the Government to order our return to France—an event which we look for with the greatest impatience. The climate of Saigon is not suited for Europeans; we are obliged to conceal ourselves from the sun, to fly from it as though it were the plague, and keep ourselves hermetically shut up. Our huts, moreover, are not pleasant residences. Reptiles of all kinds—enormous scorpions, snakes three yards long, lizards, frogs, toads, &c.—favour us with their company, and, at night, in spite of musquito curtains, we are tortured by those fearful insects. When the weather is a little cloudy, I take a ride on horseback,. This is the only amusement we can procure, but the animals are such brutes that there is not much pleasure in mounting them. Bathing is a thing not to be indulged in, on account of the crocodiles, added to which fever is frequently the result of such a recreation. I have completely abandoned drawing and painting, for, with the heat which devours us, I have not the strength or the inclination to handle a pencil or a brush."

HOLLAND.

(FROM OUR OWN CORRESPONDENT.)

AMSTERDAM, August 23.

The First Chamber of the States-General was opened on the 8th inst., and immediately proceeded to the business of the Session. Several bills that lately passed the Second Chamber were brought up for confirmation. On the introduction of the Bill for Confirming the Decree of the Governor-General of Netherlands India for the free importation of rice and paddy into Java and Madura, no opposition was offered in committee, though some members expressed their opinion that the measure, which was good in itself, should be general and extended equally to all the colonies in the Indian Archipelago. When the general debate came on, the Colonial Minister confessed that the Bill was not one of any practical importance, inasmuch as the islands in question exported the article largely, whilst the imports were quite nominal, for the whole quantity amounted last year to only two tons and a-half; the exports, on the other hand, during the same period, being of the value of more than a million and a-half of florins. He stated at the same time that it was his intention to bring in a Bill next session to modify generally the colonial tariff, and, among other things, to extend the free importation of paddy and rice to all the Dutch possessions in the East. The Bill finally passed without a division.

From the estimates which have been printed for distribution to the members of the two Chambers of the States-General, the cost of the ten proposed railroads with a single line of rail, will amount to 80,053,181fl.; and for bridges over canals, arms of the sea, &c., 27,137,819fl.; making a total of 107,191,000fl.

It is stated on good authority that on the proposal of the Colonial Department the King has granted a concession for the construction of a railway between Voorstenlanden and Samarang.

As a reward for the important services performed by H.N.M. steamers *Reinier Claessen* and *Gedeh* against the pirates of Salloos Island in December, January, and February last, the King has knighted Captain-Lieutenant A. F. Siedenburg with the Order of the Netherlands Lion, and conferred the insignia of the Fourth Class of the Military Order of Willem upon the following :—Lieutenants of the First-Class C. J. van Mühlen, and J. P. Willink (the latter acting commander of the *Reinier Claessen*); Second-Class Lieuts. A. C. Raven and C. A. Niesen; Mr. C. van Berkel, paymaster and purser, and ten non-commissioned officers and privates of the above-named vessels. In addition to this, honourable mention is made in an official order of the day to be read to the fleet, of Second-Class Lieuts. J. van Tromp, J. J. Engelvaart, and K. A. Stakman-Bosse, as well as seven non-commissioned officers and seamen.

The launch of a new clipper full-rigged ship, called the *Orange Nassau*, which was successfully accomplished last week at Dordrecht, is much talked of, as the first of a new class of vessels and a magnificent specimen of Dutch first-rate naval architecture. She is built for the house of Messrs. De Groot, Roelands and Co., of Schiedam, and will be commanded by Capt. G. Strang van Hees. She is to be exclusively employed in the East India trade.

Accounts have been received by the last Overland Mail that it is the intention of the ex-Governor-General Mynheer Pahud to leave Java on the 1st of September next, on his return to this country.

King Maximilian of Bavaria, under the incognito of a Count von Werdenfels, is now staying at Scheveningen, on the coast near the Hague, for the benefit of sea-bathing. He is accompanied by only a small retinue, amongst whom is His Majesty's favourite aide-de camp General von der Tann, who, in 1848, raised and commanded the celebrated free corps that did such signal service against the Danes in the campaign of Schleswig-Holstein in the war between Denmark and Germany. Although residing in strict privacy, he has been to the Hague to visit the King and Royal family, and received their counter-visit. The two monarchs have also exchanged the usual courtesies in the shape of their highest orders of knighthood, the King of Bavaria having presented the King of the Netherlands with the decoration of the Bavarian House-Order of St. Hubert the Hunter, and received in excnange the Grand Cross of the Order of the Netherlands Lion.

The following vessels have been chartered since my last letter, by the Netherlands Trading Company, for return voyages from India to the undermentioned ports :—

For Amsterdam	... *Louise*	...	Capt. P. Buys.
Ditto	... *Ystroom*	...	„ A. Hansen.
Ditto	... *Batavian*	...	„ J. Prange.
For Rotterdam .	... *Watergeus*	...	„ W. H. Kramer.
For Schiedam .	... *Nederwaard*	...	„ D. Kwakkelstein.

Accounts have been received at the Naval Department of the arrival of the Government steamer *Amsterdam*, Capt. Lieut. J. P. Mueller, on the 13th of June, at Simon's Bay, from the East India station. During the voyage she experienced a heavy gale, which carried away her mainmast and quarter-boats, but no loss of life is reported.

First-Class Lieut. L. H. de Stuers, R.N., is appointed naval aide-de-camp to H.R.H. Prince Henry of the Netherlands, vice Capt.-Lieut. J. A. Arnkenius resigned. This latter officer, it will be remembered, but lately received the above appointment in the room of Capt. May, promoted to the rank of rear-admiral, and appointed to the chief command of the naval forces in the Eastern Archipelago, in replacement of Rear-Admiral Vogelpoot, who returns to this country, his period of command on that station having expired.

It is asserted in naval circles that the sailing frigate *Vice-Admiral Evertsen* is to be again commissioned, and that her destination is the North American coast, for the protection of the Dutch interests during the civil war in that country, which is beginning to assume such a threatening character as may easily lead to hostilities with European States. The above frigate was employed last year on the coast of Syria, and only returned from the Mediterranean this spring, a large number of her crew being incapacitated from duty by an epidemic ophthalmic disease, which obliged the captain to leave more than two hundred of his best seamen in the naval hospital at Port Mahon, whence he returned short-handed to this country.

Twenty-three naval cadets having passed their examination at the Royal Naval Academy at Willemsoord are promoted to the rank of midshipmen, and distributed as such to the various vessels of the fleet.

It is now decided that the floating battery *Neptunus* is to be put out of commission on the 1st of October, when her crew will be transferred to the first-class steamer *Wassenaer*, ordered to be got ready with great despatch. On the other hand the commissioning the new steam frigate *Adolph van Nassau* is postponed till next spring.

A detachment of 150 seamen, for duty in the *Electra*, have arrived at Nieuwe Deep from Harderwyk.

The King has appointed a commission for the establishment of a Zoological and Botanical Garden here. The President is Baron van Brienen van de Grootelindt, Chamberlain of the Royal Household, and five other members, amongst whom is Mr. P. van Rees, formerly Resident of Batavia, and latterly H.N.M.'s Charge d'Affaires Extraordinary with the Republic of Venezuela.

The following gentlemen connected with India have received the insignia of the Crown of Oak :—Mr. C. Kater, Assistant-Resident of Sintong in the Western Division of Borneo; Mr. J. H. Bartstein, Protestant Missionary at Banjermassing; and Mr. P. J. Dumoulin, Architect of the Department of Public Works in Netherlands India.

The King has been pleased to confirm the following appointments made by the Governor-General of Netherlands India —

Digitized by Google

Mr. R. van Goens to be President of the Court of Justice at Amboyna, Mr. A. R. Blom to be member of the Court of Justice at Batavia, Mr. W. Tadema to be member of the Court of Justice at Sourabaya, and Mr. J. R. Woesthoff to be Administrator of the Government Coal Mines of Orange Nassau, in the Island of Borneo.

The Government of this country has now formally recognised the Kingdom of Italy, and withdrawn the Exequators of the Consular Agents of Tuscany, Parma, and the Two Sicilies in the ports of Holland and the Colonies. In a few days an Ambassador Extraordinary will leave the Hague for Turin, to congratulate King Victor Emanuel on his success. This liberal policy on the part of the Dutch Government has placed our neighbours the Belgians in a dilemma, as it is felt that they are thus placed in a false position, for on one hand the existence of Belgium as a separate and independent State has a common origin with that of the new Kingdom of United Italy—the will of the people—whilst it militates sadly with the well-known principles of King Leopold to recognise Victor Emanuel as sovereign of Italy.

The Militia Bill has just passed the First Chamber after some opposition, by 30 to 6 votes. The latter were given by Messrs. van Kessenich, Beerenbroek, van Nissen van Pannerden, Hartefeld, de Villers de Pité, and van Swinderen.

Of the batch of non-commissioned officers who, after passing their examination, are promoted to be second-lieutenants in the East India army, seven are to sail on the 31st of August per *Medea*, Captain J. Lourens, from Rotterdam; four on the same day per *Zeenymph*, Captain van Roggen, from Nieuwe Deep; nine on the 4th of September per *Doelwyk*, Captain L. Hoffman, from Rotterdam; nine on the 5th of September per *Minister Pahud*, Captain F. Kievit, from Rotterdam; nine on the 10th of September, per *Aegidia and Paulina*, Captain J. S. Its, from Rotterdam; and two on the 15th of September, per *Ouderkerk aan der Amstel*, Captain H. J. Swart, from Rotterdam—all to Java.

COMMERCIAL.

Coffee.—The market for this article, both here and at Rotterdam, is firm; and, though the demand is limited to the execution of small and pressing orders for immediate consumption, yet there is no anxiety on the part of holders to sell—and as there is but a poor assortment to select from, purchasers are freely induced to pay full prices. Good ordinary clean Java, sound, and of good flavour, fetches 40c.

The Company's autumn sale is announced to take place at Rotterdam on the 18th of September, and will consist of—

124,043	bags	Java coffee, in warehouse at	Rotterdam.
170,445	„	„ „	Amsterdam.
25,165	„	Padang „ „	„
27,065	„	Java „ „	Middelburg.
14,155	„	„ „ „	Dordrecht.
28,880	„	„ „ „	Schiedam.
389,753	bags.		

The samples are not yet on show, but will probably be exhibited to-morrow. The subjoined table may be interesting to your mercantile readers:—

Comparative Table of East India Coffee in the Netherlands Trading Company's Sales, from 1856 down to the present time, with the prices paid in each for good ordinary Java:—

Year.	Spring Sale. Bags.	Cents.	Autumn Sale. Bags.	Cents.	Total quantity. Bags.
1856	393,056	31¼	656,945	32½ to 33	1,050,001
1857	443,623	36 to 36½	572,163	41	1,015,786
1858	495,809	27¼	702,957	32 to 32½	1,198,766
1859	431,978	37 to 37¼	564,013	37½	995,991
1860	331,154	38½ to 39	557,022	39½	888,176
1861	462,324	37½	389,753	———	852,007

Sugar.—The raw market is calm, as the major part of the orders on hand have been effected from the remaining stocks of last sale. A small parcel of 460 bags of Java, No. 17½, was taken at 38fl. Some offers have been made of 1¼ to 1½fl. below last sale prices for Java floating, but refused. The business done at Rotterdam included 507 kranjangs Java in warehouse, 384 ditto Sourabaya, No. 17, very weak and moist, at 37fl., and a small parcel of No. 13 at 1fl. below sale prices.

The refined market is exceedingly firm, and but little offering for sale, as the refiners are mostly busy at work to complete their contracts for delivery in September, and many are under similar engagements till the end of November. Of candy but little is brought to market, and then greedily bought up at very full prices. Some delivery contracts for crushed sugars have changed hands at an advance. For molasses there is a good demand and ready sale.

Spices of all descriptions dull, in anticipation of the Company's approaching periodical sale.

Tobacco.—In consequence of the hostilities in North America, the market for Java descriptions shows a decided improvement. 147 packages W.G.J., and 125 ditto B.K., were taken at a higher figure. Several sales by auction have been held, in which 1,226 packages A.S. Malang sold at from 28 to 91c., according to quality, 437 ditto M.S. at 24½ to 30½c., 331 ditto P.B.A.B. at 29½ to 53½c., 268 ditto P.S.B.S. at 34½ to 93½c., 246 ditto P.G.K. at 18½ to 44½c., and 1,156 ditto P.A. Malang and Tanahwangie at from 29 to 65c. The stocks on hand are 4,456 packages of Java, against 1,313 ditto last year.

In Indigo and Cochenille no alteration to report.

Tea.—Calm. A sale at Rotterdam went off as follows:—

Importation of 1861. In Bond. Duty 20fl.

				Sale Prices.
No. 252.	97	quarter-chests	finest flowery Pecco...	118 to 120 cents.
„ 253.	116	„	„	119 „ 121 „
„ 254.	132	„	„	119 „ 120 „
„ 255.	95	„	„	120 „ 121 „
„ 256.	100	„	„	118 „ 120 „
„ 257.	2	twelfth-chests	Assam Congo	100 „ 102 „

For Camphor there is a continued good inquiry, and sales have been effected at full prices, both in raw and refined.

Indiarubber is offered at 85c., but without attracting purchasers.

Rice.—The opinion for this article, owing to the reported spread of the potato disease in many parts of the country, is becoming very favourable, and the business would have been more important had not the principal holders exhibited a strong reluctance to realise at the present quotations. 1,030 bags Java and 1,400 bags Java cargo changed hands, but the prices did not transpire. At Rotterdam 1,000 bags of Necranzie sold at 6⅞fl.

Some transactions in Japan Wax are reported, at former quotations.

Banca Tin is dull, but not lower. Offers were made of 67½ and even 68fl., but refused by holders. The recent fall of 3s. in London for English tin has increased the dullness for Banca here. At Rotterdam, however, purchases might be made at 67½fl.

P.S.—The coffee market closes firm, and in some cases higher, as the quantity of Java in the Company's sale is comparatively with former sales so very small. For good ordinary Java 40½c. has been paid, and none to be had now under 41c. Bright Java is worth 41¾ to 42c. Prices are expected to improve very considerably.

HAMBURG.

(FROM AN OCCASIONAL CORRESPONDENT.)

August 23.

Great credit is due to the statistical department of the Board of Trade in this city for the wonderful accuracy, minuteness of detail, and perspicuity with which they have made up the commercial statistics of this port for the last twelve years, but with one signal omission, and that, strange to say, in one of the most important parts of the foreign trade of this city—I mean the exports. In the tables which they make up and publish annually may be found everything connected with shipping; the number of vessels arrived and sailed, their rig and tonnage, number of crew, where built, their flag, and from and to what port. In the same manner the tables of the imports go deeply into details, which would be considered superfluous in any other country, and may be considered as perfect models. There is not a single article of commerce brought to market at Hamburg, but you may by these tables find out its exact quantity, where brought from, the aggregate value, and average price. The same may be said of the important branch of Hamburg trade—the marine insurances, and also of the foreign exchanges, the fluctuations in the price of gold and silver, the rate of discount, the emigration to foreign countries, the inland navigation, the quantity and value of goods brought from the interior by the different railroads, the number of ships registered under the Hamburg flag, with their description, rig, age, tonnage, and distinguishing number; the number of bills of exchange and their value brought to the Stamp-office to be stamped before being presented for payment, and numerous other statistical details of great interest and importance for the mercantile community, as the merchant has only to turn to this set of tables for official information to guide and counsel him in his commercial speculations or financial operations.

And yet, with all this astonishing accuracy and perspicuity of detail, *not one single word is said about the exports!*

The reason ostensibly assigned for what in any other country would be considered as an unpardonable neglect or oversight is, that about five years ago an alteration took place in our commercial legislation, by which the export duty—till then quite a nominal one, being only one-eighth per cent.—was totally abolished, and no Custom-house entries, declarations, or other formalities were required to be made for the future. Previous to the alteration mentioned, the tables contained just as perfect returns, with respect to the exports, as they do now in regard to the imports, but for the above cause they have been now discontinued for five years, to the great indignation of many steady-going merchants, who were accustomed to "look before they leap," and consult the previous export lists, to make sure that they were not shipping to an overstocked market. Many attempts have since been made to obtain the needful returns from the copies of the manifests and bills of lading obtained from the shipbrokers, but they are completely frustrated by the system commonly pursued by exporters to preserve a mysterious

Digitized by Google

secrecy about their operations by filling in the generic term "Merchandise;" and it was found equally impossible to obtain even the quantity, as bales, casks, chests, bags, kegs, boxes, and bundles—large and small—are all lumped together in the bills of lading under the equally generic and vague expression of "Packages."

This is the reason why I have never been able to send you the export lists from this city to the Far East, which, of course, would not only be of interest to your readers abroad, but would convey to them useful and important information concerning the shipments of different articles to the respective ports of China, Manila, Singapore, and Netherlands India. Until some legislative measure to obviate this difficulty is enacted, this unsatisfactory state of affairs must continue. It is by no means necessary to reimpose a new export duty, but it must be made compulsory on merchants to make an entry at the Custom-house, declaring the value and contents of their shipments, on their asseveration as Hamburg citizens, in the same way they are now bound to give the particulars of the articles they import, and from which materials our experienced Statistical Board make up these almost perfect tables.

It does not require my humble pen to point out the existing want of this great desideratum to the authorities of this city, with whom I have so often argued the point to the best of my abilities *vivâ voce*, but it can do no harm to explain to your readers, unacquainted with the affairs of this city, the reason why you are unable to furnish them with the returns of the export trade, which are to be obtained either for love or money, in every other country in Europe.

In my last letter I gave you some particulars of the navigation of this port with the Far East during the past year; and in my next I propose to furnish you with some details of the imports from the same quarter.

CHINA AND THE SOCIAL SCIENCE CONGRESS.

Under the department of Trade and International Law, Dr. Macgowan, of New York, and for many years resident in China, read the following paper "On Consular Jurisdiction in China and Japan, and the necessity of a Joint Tribunal to counteract the evils of Extra-territoriality":—

In the absence of M. Chevallier, the Solicitor-General presided.

A review of the history of the hoary and colossal empire of the Far East, from the Treaty of Nanking, in 1842, to the treaty of Peking, suggests matters of grave consideration to merchants, philanthropists, and statesmen; and having resided in China during that period in the exercise of my profession, filling for a time the office of United States Consul, and publishing a newspaper in the Chinese language, I feel it incumbent on me to advocate the claims of China and adjacent countries to special consideration in view of the anomalous position in which they are placed by our greater strength. By the former Treaty China was brought for the first time into diplomatic intercourse with Christendom, when she submitted to the application of the principles which control Christian nations in their intercourse with Mahomedan Powers, she was compelled to abdicate sovereignty so far as to admit of extra-territoriality—that is to say, to concede to resident British subjects exemption from her authority. A few months later the United States, and subsequently France, claimed and obtained the same privilege. In the treaties recently negotiated with Japan and Siam our diplomatists obtained like concessions, but, as may be supposed, not without something like menace. For example, Sir John Bowring states, "The most difficult part of my negotiations was the emancipation of British subjects from subjection to Siamese authority." In accordance with their treaty stipulations, England, the United States, and France successively appointed consuls empowered to exercise judicial jurisdiction over their respective subjects. Unhappily this substitute jurisdiction has been so imperfectly exercised, that the concession has proved disastrous to China, and a great impediment to healthful intercourse—mercantile, political, and moral. This having been the case when foreigners were restricted to a few isolated districts, what may be expected now that the whole Empire has been thrown open? It must be admitted that the three "Treaty Powers" were not indifferent to the obligations which their assumption imposed. The British Government organised a consular system, fully adapted to avert from China the evils which extra-territoriality entails; and in consideration of the extent of her commerce, and the possession of Hong Kong, this much was specially incumbent on her. France, having then very few subjects in China of a character likely to injure the natives, had little need of Consulships; all that her circumstances called for she accomplished. Hitherto the United States had entrusted consular power to non-salaried officers—mercantile gentlemen, to whom the fees of the office were no object. This system, always objectionable, became impracticable when Congress, in carrying out the treaty stipulations, invested Consuls with a large degree of judicial authority. Accordingly, provision was made for salaried Consuls, whose legal powers were ample for every emergency. The new arrangement, however, proved most defective, and not only were the salaries inadequate to secure the continued services of suitable men, but means were wanting to enable them to perform the functions of their office, there being neither interpreters, constables, nor prisons properly provided; hence fraudulent and lawless Americans often transgressed with impunity. This induced British subjects frequently when detected in crime to claim American citizenship, puzzling the Mandarins and baffling the Consuls. These were minor sources of injury to the Chinese. It was from the subjects of Powers which had no treaty with the Chinese that she suffered most. A proper Consular system entails an expenditure which only an extensive commerce can maintain, yet as all mercantile Powers were admitted to the privileges wrenched from China by England, France, and the United States, the non-treaty Powers appointed Consuls also from among foreign merchants, who were powerless with regard to the detection of crime, the apprehension and punishment of offenders, even within the precincts of the port where offences were committed, and of course beyond the ports, through a vast extent of seaboard, each did that which was right in his own eyes. Before the Chinese all nationalities professed to be British, and the fear of incurring the displeasure of that dread Power, paralysed what little authority the Mandarins on the coast possessed. Hence, during the period in question China has been the prey of pirates and brigands from all parts of Cristendom. The proximity of Macao, and, truth compels me to add, the unwillingness of her local authority to restrain its subjects, caused the Portuguese to become depredators beyond all other foreigners.

One of the disastrous results of the first war with England was the discovery by the Chinese of the impotence of their rulers. Multitudes were consequently soon arrayed against the Government, particularly on the seaboard, where weakness and incapacity were most palpable. Piratical Chinese fleets became so numerous as almost to destroy the coasting trade; poor fishermen even were not exempt from spoliation. As a corrective of this evil native merchants paid liberally for foreign convoy. The junks sailing in large fleets were able to secure the presence of a foreign merchant vessel at a moderate charge to each, an arrangement which for a time was mutually advantageous. It was not long, however, before the Macao lorchas, or sloops, manned to a great extent by Manila men or Cantonese, competing with the square-rigged vessels, obtained a monopoly of the convoying trade. Abuses soon became rife, causing mariners, fishermen, and coastlanders to sigh for the times when native pirates pursued their comparatively harmless vocation. The unfortunate people were before scourged with whips, now with scorpions. Smuggling also, the never-ceasing vice of foreigners, assumed a systematic form at the non-consular ports. Lorchamen often dictated to custom-house officers the amount of duty to be paid for the whole Chinese fleet of which they had taken charge, reserving to themselves the sum abated. While intimidating the Mandarins ashore, they practised extortion on their proteges. It ceased to be optional with native craft to employ convoys—they were not at liberty to decline protection, nor were they consulted as to the amount they were to pay. From this the transition to piracy, robbery, and murder at sea was easy, and they were soon followed by like crimes on land. Whole villages were reduced to ashes, the men butchered and the women violated. Chinese officers who attempted to thwart these buccaneers were killed on the spot, or captured and held to ransom. The number of unoffending Chinamen who had been put to death, some of them tortured in a diabolical manner, would not be credited if told. Much of my surgical practice has been due to those piracies and forays. As regards property, there has been a corresponding loss on the part of the unfortunate natives. No device for raising moneys or supplies was left untried. The poor man's store of yams, his dried fish, or fuel stored up for winter's use, have not been spared—the last fowl or goat of the solitary islander has been carried off by the insatiable foreigner. The fisheries were subjected to heavy charges and a coercive protection. Adventurers who could not command a lorcha, fitted up native boats, carrying on depredations in estuaries and rivers. Others opened offices in the small towns for the sale of passes, which boats crossing from headland to headland were compelled to possess, in order to escape greater extortion when under weigh. Not a small part of the wrong perpetrated in this way were by natives under foreign protection, and in foreign habiliments. In such fear are Portuguese held that few possess courage to withstand even their effigies. About nine-tenths of these harpies were foreigners, the balance being composed of vagabonds from almost every maritime State under heaven, representing almost every class in society. In my capacity as American Consul I was often applied to for information by the mandarins as to the nationality of the parties who were oppressing the people. These functionaries are in constant dread of provoking the ire of foreign Powers, and fear to take action lest they should be found committing a mistake. Had it been possible to restrict, as was contemplated, all intercourse to the consular ports, these lawless proceedings would have been comparatively limited; but foreign commerce, which included at some places kidnapping for the coolie trade, and in all places smuggling, competes so successfully with that of the natives as to secure almost the entire coasting traffic.

It will be seen that China is exposed, throughout her entire coast of more than two thousand miles, to the evils which her helplessness invites. Being personally cognisant of this state of things, I felt bound to remonstrate, in 1857, against the contemplated opening of all China to foreigners without restrictions of any kind. On the occasion of the second war, Governments, the press, chambers of commerce—entire Christendom—aimed to secure unrestricted travel and residence in China, demanding privileges not even accorded to the children of the soil. I endeavoured to show, in a pamphlet, that if such conditions were wrung from China it would be detrimental to every foreign interest, as well as destructive to the natives; that an unconditional compliance with the demands of foreigners would cause the horrid barbarities which have devastated the coasts to be re-enacted in the interior; that adventurers who shoot down Chinamen with no more compunction than if they were a pheasant, would go farther and travel faster than consul, merchant, and missionary. That rape, robberies, and murder, would extend up her far-reaching rivers, along her interminable network of canal, on the surface of her broad lake, and through her every navigable watercourse. And, as a consequence, the assassination of the peaceful traveller, massacres, foreign intervention, blockades, and wars, would be sure to follow, to the injury of every foreign interest. To avert from China and Western nations these impending calamities, I proposed a system of passports, that irresponsible and improper persons might be debarred from privileges so easily abused. That system was subsequently adopted by the Allied Ambassadors, and has become the law of the land. These passports will prove, to some extent, a check to the extension of the evils I have described; but indifference on the part of Chinese officials, and the unscrupulous audacity that characterises

Digitized by Google

foreigners in the East, will eventually render the regulation a dead letter. I am apprehensve, therefore, that commerce and missions will find impediments from the abuse of the concessions we have obtained, which must result in new complications and disasters, unless the countries responsible for this forced abdication of authority discharge their self-imposed duties with more than wonted fidelity. The treaty-powers, however, have other obligations in China than the exercise of due restraint over the residents of their respective countries.

From the foregoing statement respecting the conduct of foreigners from other countries, it will be seen that consular authority is impotent where most required; that the substitute jurisdiction to be effective must be extended to all foreigners. How shall this be accomplished? Obviously by the establishment of a joint tribunal, composed of the consular officers, a court which shall have jurisdiction over subjects of those countries which are not officially represented in China. I cannot too earnestly plead for the establishment of such a court. If the Chinese Government possessed the strength and vigour of that of Japan, no tribunal of the kind would be necessary. The Japanese resolutely refuse to admit in their waters the vessels of non-treaty countries, and thus secure themselves against attacks from irresponsible adventurers. Let China be instructed to adopt the same prohibitory regulations respecting those of the non-treaty Powers which are defective in their consular systems, and which refuse to commit the government of their resident subjects in China to the proposed mixed tribunal. Let her be sustained in this course, and many of the inconveniences of our usurped jurisdiction will be corrected. When this is accomplished, there will yet remain abundant sources of irritation requiring the strongest repressive measures from consuls towards their countrymen. Consuls are to be regarded rather as the protectors of the Chinese than as guardians of foreign interests. This becomes the more necessary from the character of Chinese officials. But apart from the weakness of Chinese authority, the inefficiency and venality of the Mandarins, the existence of the foreign possessions on her coast—Hong Kong and Macao—renders it impossible for China, unaided, to avert the evils I have attempted to depict. A due regard for our mere commercial interests alone should impel us to counteract the mischief which our diplomacy and arms inflict on this part of the human family, whose wants and industry promise to afford a continually increasing impetus to manufactures and commerce, whose liberal tariffs indicate that the sound views of political economy enunciated by Mencius a score of centuries before Quesnay taught the economists of France in his "Physocritie," or Smith in his "Wealth of Nations" propounded his theories to the Liberals of England, still exercises influence. "Let no duties be exacted at the outposts, and all strangers under heaven will gladly travel by our roads," was the wise injunction of the great commentator of Confucius. I am not without hopes this brief representation of the wrongs inflicted on China—this imperfect vindication of her claims being presented by an American to a British International body, presided over by a French political philosopher—will secure for my clients a degree of consideration commensurate in some degree with the magnitude of the interests at stake.

Lord Brougham had expressed his intention of being present at the reading of this important paper, but was unavoidably detained elsewhere.

The Solicitor-General and Mr. Westlake commented on some of the points discussed. The former remarked that the statement respecting free-trade doctrines in such ancient times was a highly interesting fact.

LAUNCH OF THE STEAMER "REIVER" FOR CHINA.

A splendid steamer, one of the finest perhaps yet constructed, has been built for Messrs. Jardine, Matheson, and Co., and was launched on the 20th inst. from Messrs. John Laird, Sons, and Co.'s Birkenhead Iron-works. Great pains have been bestowed upon the model and building of the *Reiver*, in order that she may even surpass, if possible, the celebrated Holyhead mail-boats, launched last year by Mr. Laird, and now plying across the Channel with such marked success.

In the *Reiver* great strength and lightness are combined; the lines at each end are extremely sharp, with a good flat floor in the body of the ship, and the model of the hull is a marvel of beauty and symmetry, without an atom, at present, of that meretricious adornment which elaborate carving and heavy gilt-work is sometimes supposed to yield. Everywhere—at bow, stern, and paddle-boxes—sharp angles are carefully rounded off, and, for about 120 feet, the forward deck is covered in with a rounded top, which not only serves to present to the eye a series of gradual curves, but will serve the more practical purpose of throwing off the water which must come on board when the vessel is driven, as she will have to be driven, through the tremendous typhoons which are experienced in the China seas. The keel of the vessel gradually rises fore and aft, as in the Holyhead boats, which not only enables her to steam faster through smooth water, but makes the "spring" in a sea-way lighter, and less straining both to ship and passengers.

The *Reiver* is an iron paddle boat of about 1,500 tons builder's measurement, the dimensions being—length 300 feet, beam 31 feet, depth 21 feet. The vessel and machinery are throughout being constructed by Messrs. Laird. The engines are nominally of 400-horse power, but capable of working much higher. The cylinders will lie fore and aft of the paddle-beam, on which they will act diagonally, the piston-rods and other connections running in a frame, which gives great stability to the entire machinery, and steadiness of working in a sea-way. The boilers are tubular, and will work at about 30lb. pressure, the new mode of constructing marine boilers permitting a much higher range of pressure than was the case in former years. Surface condensing apparatus, on Hall's principle, are attached to the boilers.

All the stancheons, deckhouses, and other woodwork of the *Reiver* is of teak. The main cabin is below the deck aft—a saloon, tastefully fitted in maplewood, extending across the entire breadth of the vessel, and from this a corridor leads to the stern, with commodious state-rooms on each side for passengers. Ventilation—so important an adjunct to comfortable travelling in the China seas—has been carefully attended to. The improved machinery, with feathering paddle floats, will drive her very fast—16 to 17 knots an hour being considered a safe prediction. She will be brig rigged.

The launch itself was admirably conducted. Half-past ten o'clock was fixed for "going off," and half-an-hour before that hour a large number of gentlemen had assembled on the various points in the yard which commanded a good view of the vessel, the scene being made additionally attractive by a fine morning and a fresh breeze, which served to blow out to the best advantage the liberal array of bunting displayed by the *Reiver*, the Galway boat *Hibernia*, and the various other vessels in process of construction or under repair at the works. At a quarter past ten the final note of preparation was being "sounded" by the ship-carpenters giving the vessel what they technically term "a rally," but to the uninitiated spectator the proper term would probably appear to be "volley," for the operation appears to consist, and really does consist, in delivering a volley of blows under the vessel for the purpose of driving in wedges which gradually lift her fair on to "the ways." At this time, too, all other work in the yard was stopped—for everybody turns out, by general consent, to see "a big" launch—the din of rasping and filing, and riveting and hammering had ceased; the ponderous machines which clip, and punch, and twist the plates of iron as if so much brown paper, were really at rest, from their almost incessant work, for a little; and 2,200 men and youths had crowded out of the various workshops to see the *Reiver* take the water. Another vigorous rally or two, the last supporting shores were removed, the cord—with its elegant little contrivance for enabling a lady to do the work of a brawny mechanic—was cut, and as the hands of the large clock in the yard pointed to half-past ten, the beautiful craft began to run down the ways and took the water in a dashing style.

We may add in conclusion that the word *Reiver* is a border term, from the Saxon Reafian, implying—"to take away quickly—by stealth."

COTTON SEED FOR INDIA—THE P. AND O. COMPANY.

In their efforts to meet on as large a scale as possible the requirements of the cotton cultivator of India for a better description of cotton seed than that indigenous to the country, the Cotton Supply Association are receiving most valuable co-operation from the Peninsula and Oriental Steam Navigation Company. The directors of the company having, with distinguished liberality, signified their willingness to convey free of freight, on account of the association, one ton of cotton seed by each of their steamers to Bombay, Madras, and Calcutta, the offer was, of course, gratefully accepted. The result is that four tons of seed (Egyptian) per month are now being regularly shipped by the association to those parts from Suez. Experiments with various kinds of seed show that the Egyptian variety is admirably suited to the soil and climate of India. Samples of cotton grown from it in that country, and forwarded to the association, have been valued at a high figure, and considered stronger, finer, and more marketable than any other received specimens from the same quarter.

Death of Mr. Thomas Witlan Atkinson.—A noticeable man has passed away in our Siberian illustrator and explorer, T. W. Atkinson. His death took place at Lower Walmer, Kent, on the 13th. For about a year the great traveller had been ailing, never having quite recovered from the waste of his long and arduous journeys in the wild country of the Amoor; but no immediate danger had been feared by his physician. In the early summer he had a fall, which shook and injured him; but he bore up well, and went down to Walmer, as everyone goes down in August to the sea. At length he passed away as into a tranquil sleep. Atkinson was born in Yorkshire, on the 6th of March, 1799. He was in the truest and best sense a self-made man. Left an orphan when a child, he began life for himself at the early age of eight; from which time he gained his own living, while training himself into a good scholar and a well-mannered gentleman. He educated himself as an architect, and a church built by him in Manchester testifies to his skill as a builder; but his instrument was the pencil, and his vocation that of a traveller. Owing to an accidental remark of Alexander Humboldt, he turned his eyes to the picturesque land of Oriental Russia. His pictures, which have been much exhibited at evening parties, and have been reduced for his books, are exceedingly clever, and he wrote with as much power and freshness as he drew. In person he was the type of an artistic traveller, thin, lithe, and sinewy, with a wrist like rock, and an eye like a poet's; manner singularly gentle, and an air which mingled entreaty with command. His work on the Amoor has made the whole world familiar with his name, and with his extraordinary assemblage of qualities and accomplishments. This book, however, though charmingly written and illustrated, is not to be fully relied on as an authority. It gives us Mr. Atkinson's views in very agreeable language, but does not afford that sound knowledge of the country which can be gained only by long and careful investigation.

The Siamese Ambassadors.—A French journal, *Le Sport*, relates the following amusing anecdote of these children of nature:—"The Emperor of the French having lately commissioned a celebrated painter to make a large historical picture of the audience and reception of the Siamese Embassy at Fontainbleau for the National Gallery at Versailles, the artist grouped his subjects in a picturesque arrangement, and then proceeded to take the portrait of each member separately. When the picture was finished and the Embassy were invited to see it and give their opinion of the correctness of their own portraits, they set up a general clamour, the reason of which was at first not understood. At length the interpreter being sent for, it was ascertained that the noise was occasioned by their indignation at some of the party, who had been drawn in profile, being represented as having only one eye, having previously satisfied themselves by ocular demonstration that the missing eye was not to be found on the other side of the canvas! In vain did the artist endeavour to explain to them the rules of painting and principles of perspective, and demonstrate to them the impossibility of showing both eyes when the face was seen sideways. They only became the more clamorous, demanding justice to be done them in the picture, or else future generations would imagine the Kings of Siam had sent over a number of one-eyed men. To this alteration the painter resolutely refused to submit, and it was not till after a long dispute, warmly contested on both sides, that the question was amicably settled to the satisfaction of all parties, by the Siamese requiring an official certificate, made out both in French and the Siamese language, that all the members of the Embassy were possessed of two eyes each, and not, as some of them were represented in the picture, with only one!"

NOTICES TO CORRESPONDENTS.

No notice can be taken of anonymous correspondence. Whatever is intended for insertion must be authenticated by the name and address of the writer, not necessarily for publication, but as a guarantee of good faith.

Suggestions for the insertion of information required by our subscribers will have due attention and acknowledgment.

Any information required by Subscribers, in reference to Commercial or General matters in CHINA, JAPAN, SINGAPORE, *and other parts of the* FAR EAST, *will be supplied on application at the Office, where files may be seen of the Journals published in those countries.*

A REGISTER is kept of the addresses of all persons connected with the FAR EAST, and reference can be made to the same by personal application at the office or by letter. Passengers arriving by either Overland route or sailing vessels, in England or on the Continent, will oblige by forwarding their address for the information of inquiring friends.

Post-office orders should be made payable at the Lombard-street Office, to MORTIMER WRIGHT.

The London & China Telegraph.

LONDON, TUESDAY, AUGUST 27, 1861.

BORNEO AND THE EASTERN ARCHIPELAGO.

THE attention of our merchants and manufacturers is much directed just now to Borneo and the islands of the Archipelago, as it is confidently believed that a large trade will yet be opened up with that quarter, especially in the import of many raw materials adapted to commercial wants. If the Foreign and Colonial Offices would but be a little more zealous in the interests of trade, a considerable impetus might be given, by the early diffusion of useful information; but unfortunately the indifference and ignorance of the red-tapists greatly interferes with progress. Colonial and consular reports, fraught with much valuable information, are held back till they are almost useless when published. Not long since a most interesting report by Sir ROBERT SCHOMBURGH, our Consul-General in Siam, appeared, which touched upon many new trade products, specimens of which were eagerly inquired after, and orders have been sent out to obtain samples, to test their ~~value and ascertain their~~ economic uses here. What was, therefore, the general surprise of the mercantile world to find that specimens of nearly all these very products, animal and vegetable, had been lying neglected and spoiling in the cellars of the Foreign-office for nearly three years—and such portions as had not rotted have at last been exhumed and exposed to public view in the galleries of the South Kensington Museum. Surely, if the Government maintains Consuls and despatches scientific men on exploring expeditions to distant and unknown countries, it is of the first importance that an abstract of their reports should be given to the world without delay. These reflections are forced upon us by the knowledge of how much valuable information is withheld from the public eye by want of a new system of management in the administrative bureaus, and at a time, too, when the demands of commerce are incessant and of an investigating character.

The Netherlands Government sent to the Paris Exhibition in 1855 a very large collection of products from their Eastern colonies, although they were badly arranged and undoubtedly deficient in names and descriptive details, commercial or scientific. As the KING of HOLLAND has just appointed a Commission to represent duly the productions and industry of the Netherlands and the Colonial possessions here, next year, which includes one or two gentlemen well acquainted with the East, there is no doubt that a good collection of products from Java, Borneo, Sumatra, Celebes, &c., will be shown. Messrs. VISTAT and SONS, one of whose firm is now in Japan, intend, we know, exhibiting many new vegetable products, seeds, and grains, and grasses, &c., of China and the East, whilst Mr. Consul ALCOCK has applied for space for products from Japan. The Borneo Company will, doubtless, produce a good collection of the articles of commerce of Sarawak;—and this brings us more immediately to the subject we desired to notice, viz., the present state of affairs in Borneo and Labuan.

We have had occasion before to animadvert on the policy of Mr. EDWARDES, the Governor of Labuan, in his proceedings at Sarawak; and his recent removal by the appointment (already announced) of Mr. CALLAGHAN, the Chief Magistrate of Hong Kong, shows that his conduct has not met the approval of the Home Government. Let us hope that the new administrator will turn his attention rather to the development of trade with Brunei and other parts of Borneo, and the suppression of piracy and local wars, than to opposing the proceedings of Sir JAMES BROOKE in his laudable endeavours to preserve peace and extend legitimate trade. The Borneo Company has already inaugurated a new era in Sarawak by the introduction of improved steam machinery for various purposes, and the extension of its business transactions, and the Labuan Coal Company, by the introduction of labour, capital, and machinery, will also do much towards resuming the export and developing the production of coal, on which the interest of that colony mainly depends, and the future operations of which will have a most important bearing on the extension of the steam marine in the Eastern seas, and the enlargement of the field of commerce. The regular trips of the steamer *Rainbow* between Singapore and Sarawak have already been attended with most beneficial results to the settlement, and the official visit of H.M.'s steamer *Charybdis*, with Mr. ST. JOHN, the British Consul-General of Brunei, to Mutra, will have a good effect in quelling disorder and enforcing respect for Sir JAMES BROOKES' authority as the representative of the SULTAN. The influence which Sir JAMES has exercised in Sarawak for a quarter of a century has resulted already in great benefits, not only to the people themselves over whom he exercises jurisdiction, but to the interests of commerce in the large trade now carried on through Singapore. The security of life and property thus enforced has produced a great accession of population, consisting of Malays, Dyaks, and Chinese. The value of the foreign trade alone (exclusive of a large trade carried on coastwise), has increased fully 50 per cent. in the last five years. Various new articles of commerce are coming forward, and the trade in old ones extended. Many useful manufactures have been introduced, cultivation enlarged, and business operations systematised and respected. The British export trade to Borneo and the other islands of the Indian seas, which, in 1859, was but to the value of £11,218, rose last year to £19,033, whilst £2,583 (machinery) was sent to Labuan.

An extensive, well arranged, and well described display of the numerous products of Borneo and the Eastern Archipelago—animal, vegetable, and mineral—at the International Exhibition of 1862, will open the eyes of thousands to a knowledge of the ~~undeveloped commercial~~ wealth of that vast region to which attention was so fully drawn a few months since by Mr. P. L. SIMMONDS, in a paper read before the Society of Arts, and the re-publication of which in the newspapers of the Straits Settlements, shows how fully its statistical facts and arguments are appreciated. In recent debates before the States-General of Holland, it was shown that the establishment of free ports in the Dutch colonies had been highly beneficial, and that the imports had increased twelvefold in the last fourteen or fifteen years at some of these ports. One cause to which the vast increase in the general trade is attributed is the great facilities afforded by the annual development of steam communication generally throughout the Indian Archipelago. This is a measure which, in connection with increased postal facilities, we have always strenuously urged. The enormous trade carried on by the Dutch in those seas should read a lesson to a great commercial nation like Britain, always seeking new supplies of raw materials, and new markets for her manufactures.

NEW STEAMERS FOR CHINA.

IN another part of our impression will be found the accounts of the launch of the steamer *Reiver*, for Messrs. Jardine, Matheson and Co., built by Messrs. Laird, Sons, and Co., of Birkenhead, under the superintendence of Captain White, and intended for the China coasting trade.

The trial-trip of the *Island Queen*, also built by Messrs. Laird, for Captain Macfarlane and others, and intended as a tow-boat for the Shanghai river, took place on the 21st inst.

Messrs. Laird and Co. have also the contract for building the boats for the China and Japan Steam Company, and it is expected they will complete three early in the ensuing year. As Messrs. Laird are now building so largely for the China trade, it may be interesting to state that the first iron steam-vessel to navigate the China waters—the celebrated *Nemesis*, Captain Hall—was built by this firm, as also the *Phlegethon*, *Ariadne*, *Medusa*, &c., for the Hon. East India Company's Service.

The paddle-wheel steamer building on the Clyde, under the superintendence of Captain Castilla, for Messrs. Lyall, Still, and Co., will be ready for launching shortly.

Digitized by Google

The screw-steamer, also building on the Clyde, for Messrs. Douglas Lapraik, Lane and others, will be launched on the 7th prox., and will be called the *Undine*. She has all her machinery, &c., on board, and is announced to leave on the 14th for Singapore and Hong Kong, under the command of Captain Bell, late of the steamer *Scotia*, not *Berwickshire*, as stated in a previous number.

The paddle-wheel steamer building for Messrs. Gibb, Livingston and Co. on the Thames will be ready for launching in about a month, and will be named the *Celestial*. Her registered tonnage is about 750 tons; length, 225 feet; beam, 28 feet; and the engines, which will be of 200-horse power, are calculated to produce a speed of 14 to 15 knots. She is a very pretty model, and specially designed for a first-rate seaboat by Captain Durham, who is superintending her building. Her draft of water is at the same time light, in order to be available for navigating the Peiho or the Yang-tse-Kiang, as may be required.

The paddle-wheel boat, building at Messrs. Mare's yard for Messrs. Dadabhoy, Norojee and Co., and which is to be commanded by Captain Gibson, will, we understand, be ready for launching early next month; and the same firm have also under building two steamers intended to run on the line between Bombay and China. These boats are expected to be ready to launch in November.

The screw-steamer *Arratoon Apcar*, the launch of which on the Clyde has already been noticed, will proceed shortly to Calcutta. On her trial-trip on the 19th inst. she attained a speed of 12 knots with 58 to 60 revolutions.

A project is being promoted by Mr. Andrew Henderson for despatching boats of a peculiar build for navigating the Yang-tse-Kiang, further particulars of which will appear in our next.

THE CANTON CLAIMS.

On the 13th May last, in noticing an interview between several of our merchants and Lord John Russell on the subject of the Canton Claims, we expressed our entire dissent from the argument urged by the Chancellor of the Exchequer, that the claims should not be paid in full, but *pro rata* with the Government outlay for the war. We characterised the proposal of Mr. Gladstone in strong but assuredly just language, as both illogical and a gross breach of pledged engagements, and added that such an injustice would not be tolerated by Her Majesty's Government. We have now to announce that through the able negotiation of Mr. Gregson, M.P., the chairman of the East India and China Association, the Chancellor of the Exchequer has agreed to pay in full all the claims admitted by the commission held by Mr. Alcock in Canton, amounting to the sum of 1,700,000 taels, namely—one-half in cash and one-half by vouchers payable twelve months after date. The balance of 300,000 taels, to complete the full amount of two millions of taels to be received from the Chinese Government, will be appropriated towards the payment of claims not yet admitted, and of interest on the sum of 1,700,000 taels now acknowledged to be due. We much fear, however, that the claimants will not obtain anything more than the principal. In this respect they will have reason to envy our Transatlantic cousins, who have not only received the full amount of their claims, as well as the large interest of 12 per cent. per annum, but have *a balance in hand*, which the American Government proposes to devote to the establishment of some public institution in China. This liberal treatment may be favourably contrasted with the manner in which British merchants, whether in China, Mexico, or elsewhere, are so frequently treated or neglected by our Government.

We understand that instructions were sent out by Government by the previous mail for the prompt settlement of the claims, but the intelligence did not reach us in time for publication in our issue of the 15th.

THE UNITED STATES MINISTER TO CHINA.

It is stated that the Hon. Anson Burlingame will probably leave Paris for China by the next mail. His post, like that of our own ambassador, Mr. Bruce, will require great tact and ability. If America would secure a firm basis for commerce in the Far East she must learn what some of our own diplomatists have too often forgotten: that firmness must be tempered with courtesy, and that it is wise and right to respect the prejudices of a foreign nation, whenever it is possible to do so without losing self-respect or ignoring Christian morality.

SUBMARINE TELEGRAPHY.

MALTA AND ALEXANDRIA CABLE.

The Malta and Alexandria Telegraph is now rapidly approaching completion; and, as this is the first great work of the kind our Government has undertaken on its own responsibility—the funds being provided by special votes of the House of Commons—our readers will be interested in learning the history of the undertaking, and how it came to pass that Her Majesty's Government should have apparently so far departed from their fixed principles of leaving these kind of works to private enterprise.

In the spring of 1859, when Lord Derby's Administration were in power, war between France and England appeared imminent—so much so that the Government came to the decision that the first step towards securing our predominance in the Mediterranean was to have rapid and independent means of communication between this country and our fortified positions in that sea. This was only to be done by the aid of electricity; and at that time so much success had attended the laying and working of some 1,500 miles of cable laid in the Red Sea, from Suez to Aden, that the problem of working through long submarine cables appeared to be satisfactorily solved. But the loss attending the failure of the Atlantic line had so shaken public confidence, that the Government were "driven" to the conclusion that any work of this nature must either be accomplished through the means of an unconditional guarantee, such as was given to the Red Sea and India Telegraph Company, or that they must provide the money themselves. The latter was considered the best bargain for the British taxpayer, and was accordingly decided upon. At the same time it was arranged, that the first thing to be done was to construct a submarine telegraph from England direct to Gibraltar. This was, however, abandoned, and the cable now under notice, after being partly shipped to connect Singapore and Rangoon, was decided on. The best professional advice was sought for and obtained, and it was finally decided by the Government that Messrs. Gisborne and Forde, Civil Engineers, should be intrusted with the execution of this great undertaking. So far it is gratifying to know that success has attended the work, and it is to be hoped that the final results will prove that the Government acted wisely in placing the matter in the hands of these gentlemen.

A large amount of valuable experience had been derived, both from the Atlantic and Red Sea and Indian lines. These were then the only long submarine circuits from which suggestions might be gained; and although some may think this has been too dearly bought, yet, looking at the vast and important results to be obtained through the agency of electricity in connection with submarine cables, and the much more enormous sums that have been squandered in introducing the railway system into England, it may yet prove that the knowledge acquired has been purchased after all at a moderate price. At the time when the Atlantic Cable was designed, there were two separate and distinct schools of electrical engineers; one advocated small conductors, worked by electric currents of very high tension; the other was in favour of large conductors, and the smallest possible battery power, of the lowest tension. In the case of the Atlantic line, the small conductor and high tension electricity carried the day. It was fortunate that the Engineers for this cable succeeded in laying it, notwithstanding its well-known imperfections, as an opportunity was secured which put this theory to a severe test.

The result appears to prove that by the employment of very powerful induction currents signals could be transmitted from one end to the other with greater rapidity than by using the ordinary voltaic battery, but this was accomplished at such a frightful risk to the cable, that the inherent faults in the insulating material (gutta percha), were immediately increased and developed to such an extent that the cable very soon became worthless. It was not until the treatment had been carried too far that voltaic currents were tried, and then the resistance offered to the passage of electricity through the copper conductor was so much in excess of the resistance through the gutta percha, including the faults, that it became absolutely necessary to use a battery of very great power, viz., about 500 cells of Daniels, in order to secure a small portion of the current at the farthest end. This, indeed, which was natural to expect, proved its death-blow, as the cable was only able with its dying breath to whisper from America to England—"Daniels are up."

Digitized by Google

This indication of a dangerous theory was so far taken advantage of in the case of the Red Sea and Indian Telegraph cable, that the size of the conductor there adapted was double that of the Atlantic, although the circuits which it was intended to work through were not to exceed 500 miles, as compared with 2,000 between England and America. To some extent success appeared to attend this undertaking. The first 1,500 miles from Suez to Aden worked well for the first nine months at a fair remuneration, considering that the line was completely isolated from other telegraph lines, and had no feeders, with the exception of the mail steamers arriving at either end. Yet this cable afterwards fell out of working order from causes which even now are not satisfactorily known: it probably arose from insufficient insulation in parts, or mechanical injuries impossible to discover until the line had been a long time in use.

Having referred to some of the weak points in connection with the working of submarine telegraphs, it will be well to show, in the case of the Government line under notice, how these difficulties and dangers have been provided against. In the first place, the copper conductor employed is four times larger than that of the Atlantic, and twice the size of the Red Sea line. Its conducting power is therefore sixteen times greater than the former, and eight times greater than the latter. This is enveloped in a covering of gutta percha thicker than had hitherto been used, and of a superior quality, manipulated with the greatest care and attention, and put on in several coats or layers. This is generally called the cone of the cable, and is, in fact, the vital part. It is, therefore, gratifying to know that in deciding upon this portion of the cable, no unwise economy influenced the Government, the cone of this cable alone costing as much per mile as the finished Atlantic cable. The next point to secure was that the cone should be quite perfect when delivered over to the Government by the contractors. For this purpose the most accurate scientific tests were employed, and at the same time the cable has been constantly submerged. The advantage of this care was very obvious on laying down the cable for the first 800 miles, during which process the most delicate test could not discover anything approaching a fault in the cable. There are still more than 500 miles to lay down before the work will be complete, and should similar results be obtained and the line afterwards remain permanently at work it cannot fail to restore a considerable amount of confidence in submarine telegraphs. The portions now laid are:—

1st, Malta to Tripoli	about	230 miles
2nd, Tripoli towards Benghazi	„	290 miles.
3rd, Alexandria towards Benghazi	„	280 miles.
Total cable laid		800 miles

This line is being laid on the principle of a shallow water line, capable of being repaired at any time, and is accordingly laid in depths not exceeding 100 fathoms, except where it is impossible to avoid deep water. The only place where this occurs is in the first seventy miles from Malta, the greatest depth between that island and the Lampadusa Bank being 420 fathoms. The Malta-Tripoli section, 230 miles in length, is the only one at present complete, and the working and testing of this line leads us to look for success in the remaining portion. The practical battery power used in working it consists of three cells only, and with this twenty-five to thirty words per minute can be transmitted. In fact, the speed and regularity of transmission is only limited by the proficiency of the manipulator. This is, indeed, a great contrast to the 500 cells used on the Atlantic cable, and the amount of battery power which was originally expected would be required to work the Red Sea line, namely—one cell for every four miles; this for a section the same length as the Malta-Tripoli would amount to about sixty cells.

As the use of excessive battery power is what is most to be feared in working submarine cables, we may reasonably expect, bearing in mind the extraordinary low power with which this cable can be worked, that no injury will arise from this cause. Never before, we believe, in the history of telegraphs, has there been any instance, whether in air or water, of a line of such considerable length being worked practically with so little battery power. As an additional precaution, the line is intended to be laid in three sections, to be worked separately. This not only increases the speed of transmission, but enables lower battery power to be employed than if it were worked in one length.

It is be regretted that Mr. Lionel Gisborne did not live to see the accomplishment of this undertaking, in which he took such intense interest and so active a part. Since his death the entire arrangements and supervision on the part of the Government have been conducted by his partner, Mr. Henry C. Forde, who has just returned to Malta to meet the steamers *Rangoon* and *Malacca*. These ships carry the remaining portion of the cable, and it is confidently expected that the entire line will be completed in about a month from this time.

RUSSIA ON THE AMOOR.

We have already drawn attention to an able article under this title, which appeared in the last number of the *Quarterly Review*. We return to it again for the purpose of giving a few extracts which may prove of interest to our readers. Here is an account of the origin of the Treaty which was made last year between Russia and China:—

"At the moment when the Allied forces were present before the capital, when a popular insurrection was imminent, and the palace of the Emperor in flames, the Russian Ambassador, Count Ignatieff, presented himself to the mandarins assembled in council. The wily diplomatist tendered his good offices and pressed upon the distracted statesmen his intervention, intimating, doubtless, that a cession of territory on the right bank of the Amoor would at once be highly acceptable, and a becoming acknowledgment of the important assistance rendered to the Emperor of China. The Ministers eagerly accepted the offer, and General Ignatieff was able in a few days to transmit to this Government not only the ratification of the Treaty 1858, but a Treaty ceding a part of the Chinese empire of the highest value to Russia absolutely and without any consideration or equivalent whatever. The services rendered by the Russian envoy to the Court of Peking were purely imaginary. The Earl of Elgin and Baron Gros were not ministers to be influenced by Russian mediation. Their terms never varied, the conditions on which they made peace were those originally proposed, with the necessary addition of an increased indemnity."

The scope of the Treaty and the results it is likely to produce are thus described:—

"The latest Treaty negotiated by Count Ignatieff at Peking is the most important and comprehensive ever concluded by China with a foreign State. This Treaty was ratified at St. Petersburg on the 1st of January, 1861. After defining with much exactness the eastern boundaries of the two empires, it proceeds to establish a perfectly free-trade between the subjects of the two States, and declares that the local authorities shall afford special protection to such trade and all who exercise it. In addition to the ancient trade of which the town of Vriachta is the seat, it declares that Russian merchants shall enjoy their former privilege of going to Peking on commercial business, and be allowed to trade at certain other towns without being obliged to maintain a large commercial establishment in them. Chinese merchants are permitted to enter Russia if so inclined, and to Russian merchants is conceded the privilege of travelling in China at all times on commercial business, but they are not to congregate together in a greater number than two hundred in the same locality. An experimental trade is to be opened at Vrashgar, a town on the Chinese frontier, for which the Chinese Government undertakes to grant land for a factory and a church. Russian merchants in China and Chinese merchants in Russia are placed under the special protection of two Governments. Commercial disputes are to be settled by the merchants themselves before a Court of Arbitration, and the governors of provinces, in the event of a Russian subject seeking flight in the interior of China, are bound to take measures to capture him and hand him over to the Russian authorities."

Our next quotation describes in graphic and vigorous style the Valley of the Amoor:—

"The Valley of the Amoor appears to be extremely varied in its features, in some places opening out into wide tracts of rich meadow land, sprinkled with villages, and dotted with elm, black birch, and poplar, which give a park-like appearance to the scenery, at others contracted into narrow gorges with lofty precipices, under which the river, seventy feet deep, flows with amazing force. The upper district has hitherto attracted most attention, and presents the greatest attractions for future settlers. Russian travellers expatiate on its manifold capabilities; the grazier, they say, would look on its extensive plains with delight in anticipation of the abundant crops and herds of fat cattle which they might be made to produce. The vine grower would view its sunny hills and think of the vintage in prospect where the grape is indigenous and requires only cultivation and care to produce excellent wines; the horticulturist would be charmed by the variety and beauty of its flora; the miner would survey the mountains and form a high estimate of their mineral wealth; the sportsman could indulge his taste in the pursuit of almost every kind of game; while a lover of nature would gaze on the great stream and its surrounding scenery with delight. There are areas extending from the banks of several of the lower reaches capable of feeding thousands of cattle, and of producing the cereals of Europe to an almost unlimited extent, and very excellent vegetables have already been produced at Nicholaivsk, where, at a recent show, contributions were received from fifty-five gardens. Edible berries are numerous and abundant. The mulberry is said to thrive in Southern Manchuria. Mountain apricots, with large red fruit, grow near Ninguta; and a small white pear is so esteemed for its exquisite flavour that it is sent to Peking for the supply of the Emperor's table. The Valley of the Amoor is rich in the variety and abundance of its timber. Among the medicinal plants in which the forests of Manchuria abound must be noticed the ginseng root (Panax quinquefoluim), which the Chinese pharmacopeist call Orhota, or the first of all plants. They consider it the most costly of all the products of the earth, diamonds and some few precious stones only excepted."

Digitized by Google

Here are some statistics of population, which may prove of service:—

"The population of the territories bordering on the Amoor consist of several races which before the annexation of the territory to Russia were rather tributaries than subject of the Emperor of China. The wealthier classes are richly clad in Chinese silks, which they purchase with the furs and other productions of the country. Their summer costume is varied in a singular manner with dresses formed of fish skins. Of the native tribes now subject to Russia M. Ravenstein gives the following estimate. The Orochons of the Upper Amoor numbered, in 1856, 206 individuals of both sexes, ranging over an area of 28,000 square miles, which would give 170 square miles to each individual. The Manyargs on the right bank of the Amoor are about 2,000, one-sixth of whom are under Russian sway. The Goldi occupy 114 villages, if they may be termed such, on the Amoor, with 320 houses and 2,500 inhabitants. The Olcha possess 40 villages, with 110 houses and 1,100 inhabitants. The population along the Usuri is estimated at 1,400, of whom about 400 are on the left bank of the river. The population of the coast region is believed to be about 2,500, combining the results of all the inquiries that have yet been instituted on this subject. The native population of the Russian territories on the Amoor may be stated as about 24,000. The Russian colonists at present settled on the Amoor, including those whose emigration has not been voluntary, is estimated at about 50,000, which gives as a total result a population of 74,000 inhabitants, spread over an area of 361,000 square miles."

We cannot conclude without again recommending our readers to peruse this article with the attention it deserves. It suggests many important topics in connection with our interests in the Far East, and dilates fully upon others which are of greater importance with regard to the direct designs of the Russians. Truly does the writer say that it seems to be the policy of her Government "to keep the representatives of every other Power out of Peking." Happily her efforts in this direction have proved utterly futile.

AFFAIRS IN CHINA.

The following letter, under the above heading, has been addressed to the editor of the *Daily News*:—

Sir,—There is a dangerous indifference at present in the public mind in England regarding the proceedings of parties in China, that may involve us in a fourth China war—a war not of quite so short or easy a solution as the former wars.

The rebellion in China has been making head for ten years past; and the rebels, or Taepings, are now in possession of Nanking, the ancient capital of China, of Loochow, and other great cities, and of several rich provinces of the empire. The rebels belong to the Chinese party, as opposed to their foreign rulers, the Tartars, and they proclaim that they have a commission from heaven to extirpate the Tartars and to destroy idolatry.

The history of mankind teaches us that in civil wars, particularly when religious fanaticism is an element, man unhappily forgets his humanity; he frequently acts with the spirit of a demon, and to kill or be killed is his alternative. Such is the state of the relations at present between the contending parties in China. Human life is of no account—the rebels slaughter the Tartars, and the Tartars slaughter all rebels who fall into their hands. But this is no new feature of the Tartar character, for we are told by Martini, a Roman Catholic priest, who was in China at the time of the conquest by the Tartars, that at the capture of Canton in 1647, one hundred thousand men, women, and children were butchered; and it is calculated that Commissioner Yeh, who died in Calcutta while our prisoner, during his government of Canton beheaded 60,000 people; and human victims are now sacrificed to smear Tartar standards with their blood.

The rebels profess Christianity, and many among the common soldiers, even the illiterate, can repeat certain Christian dogmas. In their proclamations the Taepings call Christians their brethren, and invite them to atmity and to the establishment of commercial relations. How is it, then, hat these overtures are rejected—that the rebels are called bloodthirsty, desolating brigands, and that the British authorities are prompted to assist the Tartars in their extermination? The truth is, that whatever the pretext for our wars with China, the chief object was to compel the Tartar Government to legalise our opium traffic. That object was realised by the recent Treaty signed at Peking; but unexpected obstructions now arise from the rebels, which the Tartar Government has no power to remove, without the aid of British troops. An interdict to the use of opium and spirits has been made a religious ordinance by the Taepings, and the Rev. Mr. Griffith John, who was some time in Nankin, states that there was not an opium or spirit shop visible in the city. In case we pursue our former policy we shall have to go to war with the Taepings to compel them to legalise the introduction of opium into their territories; and this eventuality seems more than probable, unless there is such a strong expression of opinion by the tax-payers of England as may deter the British authorities from involving us in a new calamity. The Rev. Missionaries Griffith John, Muirhead, Edkins, Cox, Mills, Allen, Lambuth, and others, have thrown some light on the religious, civil, and social condition of the rebel movement; and on the 24th of February last the Rev. J. L. Roberts, an American Baptist missionary who has been thirty years in China, and is now permanently resident in Nankin, in reply to queries put to him, showed that the present military strength of the rebels was sufficiently formidable to induce us seriously to calculate the cost of a war with them—putting out of consideration what the Bishop of Victoria, in his letter to the Archbishop of Canterbury, dated Shanghai, the 18th October, 1858, designates "the wickedness of our interfering between the rebels and the Tartars."—I am, &c., W. H. Sykes.

August 21.

MISSION TO LABUAN.

An interesting meeting took place on the 20th inst., in the board-room of the Society for the Propagation of the Gospel, the occasion being the delivery of an address by the Right Rev. the Bishop of Labuan to six young men about to proceed as missionaries to Borneo, under the auspices of the society. The names of the missionaries going out are the Rev. E. S. Venn, Messrs. F. W. Abe, W. R. Mesney, W. Crossland, J. L. Zehnder, and J. Richardson. The society will send out, in the ensuing two months, in addition to the above, the following gentlemen:—Rev. J. S. Witley, Messrs. J. W. Loe and B. Mills, to Calcutta; Mr. R. Stephenson, to Madras; Mr. R. Temple, to Newfoundland; Rev. B. T. Craig, to Adelaide; and Mr. C. F. Patten, to Graham's Town. All these gentlemen, except the two clergymen, are candidates for holy orders, and are to be ordained in the dioceses to which they are sent.

COTTON MANUFACTURES.

The astounding development of the British cotton manufacture of late years probably surpasses the conceptions generally formed on the subject. Thus, the value of the cotton goods exported in 1843 was £16,254,000, and of the cotton yarn £7,193,971. Three years later, in 1846, the totals had risen to £17,717,778 and £7,882,048 respectively; in 1849, to £20,071,046 and £6,704,089; in 1852, to £23,223,432 and £6,654,655; in 1855, to £27,578,746 and £7,200,395; in 1858, to £33,421,843 and £9,579,479; and last year, to £42,141,505 and £9,870,875. In the first half of the eighteen years the value of the exports of cotton goods was, in round numbers, £230,000,000, and in the second half £340,000,000, showing an increase of nearly forty-eight per cent. in the latter period over the former. In the next twenty years, at this rate of increase, Lancashire will receive as much for her products as would pay off the National Debt. It is worthy of remark that, while the value of the goods exported appears to have increased during the last nine years forty-eight per cent., the quantity of the raw material imported has increased fifty-eight per cent., the difference being probably accounted for by increased domestic consumption.

The Sandwich Islands.—The Archbishop of Canterbury having consented, in compliance with the request of the King of the Sandwich Islands, to consecrate a bishop for the superintendence of a Church of England mission in his dominions, the Society for the Propagation of the Gospel in Foreign Parts, of which the Archbishop is President, have resolved to grant a sum of £300 a-year in aid of that mission, to be applied to the maintenance of three clergymen, who will be required to minister especially to the British subjects on the islands, and to British sailors frequenting the ports. The Rev. Thomas Nettleship Staley, M.A., formerly Fellow of Queen's College, Cambridge, and subsequently Tutor at St. Mark's, Chelsea, who has been nominated to the bishopric, will be consecrated as soon as all the necessary preliminary arrangements can be made. The seat of the bishopric will be at Honolulu, and the mission will be reinforced by three clergymen, who will be sent to act under the direction of the Bishop by the Episcopal Church in America.

Dr. Macgowan has been giving a course of lectures in Dublin before the Royal Society, on the Comparative Technology of India, China, and Japan.

To the Art Exhibition at Glasgow, and Lord [illegible] his magnificent collection of Oriental china.

Sir John Bowring is at Exeter in a very uncertain state of health.

Naval and Military.

Rear-Admiral Sir Henry Keppel, K.C.B., has arrived from the Cape. It is reported in naval circles that the gallant officer denies that he tendered his resignation to the Lords of the Admiralty, but states that he was ordered home from his command. The popularity of Rear-Admiral Sir Henry Keppel and his late Flag-Captain in the navy is generally admitted, and it is, therefore, to be regretted that the Admiralty did not sanction their return to England in the *Forte*, instead of handing her over to strange officers. The consequences, as might easily have been foreseen, have been of a most untoward character. By last accounts from the station we hear that no less than eighty seamen had run from the ship. The petty officers were also dissatisfied, and we hear that, prior to the arrival of the *Emerald* with the new Admiral, they prepared Sir Henry for the events which have since occurred, although, as might have been anticipated, Sir Henry used his best endeavours to induce them to maintain the discipline of the ship.

Several soldiers, wearing the Chinese medal, with a sort of tea-chest cypher on it, have been seen about Paris. They seem in good health, but state that no matter what they suffered from the climate in China, it was as nothing compared to what they endured on board of the transports bringing them home.

The *Furious*, 16, Captain O. J. Jones, arrived from China on the 20th inst. She has brought home a large number of invalided officers and men from China, the Cape of Good Hope, and the coast of Africa. She has been inspected, and will, after taking out powder and shell, go into harbour and strip, prior to her paying off.

The *President*, 50, sailing ship, has been placed in the fourth dock at Chatham, to be fitted for a training ship for the volunteers of the Naval Reserve, and stationed in the Thames, where she relieves the *Brilliant*, 20, which returns to Chatham.

The 2nd battalion of the 1st Royals, the 5th Fusileers, and the 6th Regiment, which are to be attached to the 9th and 10th depot battalions in Colchester Camp, in accordance with the wish of the Commander-in-Chief that battalions of regiments shall as much as possible be concentrated, are expected to arrive from Pembroke and Ireland towards the close of the present week. These will increase the strength of the camp about 500 men.

In consequence of the lamentable accident which occurred a few days since at Woolwich, where a private of the Royal Marines, who was acting as a marker at the targets during the firing of the Volunteers, was shot dead,

Digitized by Google

positive orders have been issued at Chatham forbidding the Royal Marines, under any circumstances, to act as markers for Volunteers at the rifle range. Similar orders will also be issued at each of the other divisions of Royal Marines.

The 7th Battery of the 9th Brigade Royal Artillery, under the command of Captain Byrne and Lieutenants Kenzie and Milner, has arrived at Canterbury from Dublin, in accordance with the recent determination of the War-office to form artillery stations at Chatham and Canterbury.

The *Egmont*, old line-of-battle ship, at Portsmouth, ordered to be fitted for a receiving ship at Rio de Janeiro, it is expected will be placed in the hands of Messrs. White, of Cowes, who have now the *Vindictive* frigate in hand for the Government, owing to the great want of dock accommodation in Portsmouth dockyard. Messrs. White's yard, from its completeness and close vicinity to Portsmouth, forms a most valuable auxiliary aid to the Government yard at times of pressure.

The *Cameleon*, 17, screw, Commander Harding, sailed from Spithead on the 20th inst., for the Pacific, *via* the Straits of Magellan, calling in at Madeira and Rio.

The *Winchester*, 50, sailing ship, having been fitted with her lower masts and rigging, left Chatham on the 12th inst., in tow of two steamers, for Liverpool, where she will be stationed, to be used as a training ship for boys at that port.

A General Order has been issued by the Adjutant-General Sir James Yorke Scarlett, dated the 5th inst., which directs that the following regiments—namely, 101st Regiment Bengal Fusiliers, 102nd Regiment Madras Fusiliers, and 103rd Regiment Bombay Fusiliers—are to have the honour of bearing the designation "Royal."

The screw steamship *Sanspareil*, 70, Captain Bowyear, left Plymouth on the 20th inst. with naval supernumeraries, stores, and ammunition, for the Mediterranean. The order for this vessel to proceed to the China station has been for the present countermanded.

The new depot barrack for recruits of the Royal Marines is now in full operation at Walmer. A library and school have just been formed. Each married man of the establishment has a plot of land allotted to him for cultivation. The present number of inmates, chiefly recruits from the three divisions of Chatham, Portsmouth, and Woolwich, is 400, and, as a proof of the advantages of removing young recruits from the temptations incident to large garrison towns, it is worthy of remark that during the three months since this depot has been opened in no case has an inmate been charged before a magistrate.

The 31st and 33rd companies of Royal Engineers, attached to headquarters, Chathan, have been filled up to their proper complement of one hundred non-commissioned officers and men each, from the companies at Brompton the men selected being all skilled mechanics. Both companies have been placed under orders for foreign service, and, according to present arrangements, will proceed to Bermuda and the Mediterranean.

The *Antelope*, recently commissioned by Lieut.-Commander Allingham, for service in the slave preventive duty on the West Coast of Africa, has shipped the whole of her officers and crew, to the number of one hundred. She has been hauled out of basin at Woolwich and berthed in the stream, for the purpose of receiving her cabin stores and sea stock, preparatory to departure.

The Archduke Maximilian of Austria, attended by Count Rudolphe Apponyi, Austrian Ambassador in London, visited the Royal Arsenal at Woolwich, under the *incognito* of Count Lacroma, on the 9th inst. The Prince having expressed his desire to see the manufacture of the Armstrong guns, was conducted through the smiths' shops, where the progress of forming the various parts of the gun is carried out under the agency of the huge Nasmyth's hammers. He visited in detail the remaining branches of the rifled ordnance department; his Imperial Highness stated his intention of being present at Shoeburyness in a few days to witness the firing of one of the guns. His Highness Halim Pasha visited the Royal gun-factories on the preceding day, by special order from Colonel Tulloh, Director-General of Ordnance in London.

The 2nd battery of the 4th Brigade of Field Artillery (12-pounder Armstrongs), under the command of Lieutenant-Colonel Turner, stationed at Hilsea, was officially inspected on the 12th inst., on Southsea-common, Portsmouth, by Major-General Lord W. Paulet, C.B., commanding the South-Western district. The battery was put through a series of manœuvres incidental to movements of attack and defence in the field in presence of an enemy, firing blank, all of which were executed with great precision and rapidity. At the close of the proceedings Lord Paulet said it was exceedingly creditable, both to officers and soldiers, to find a body of men who had but recently returned from service in China in so efficient and orderly a state.

Under the regulations which have recently come into operation for the reorganisation of the Royal Artillery, that branch of the service now consists of 11 batteries, comprising the Horse Brigade, and 16 batteries of the depot brigade. The entire force is, for administrative purposes, divided into sixteen brigades, or separate divisions, each of which is under the nominal command of a general officer, with the title of Colonel-Commandant. The 16 brigades are subdivided into 149 batteries, each battery numbering close upon 200 non-commissioned officers and gunners, the aggregate total consisting of about 28,900 men of all ranks, exclusive of officers. The following is the numerical detail of the officers belonging to the Royal Artillery on the effective list, viz., His Royal Highness the General Commander-in-Chief colonel, one deputy-adjutant-general, two assistant-adjutants-general, one inspector-general, 16 colonels-commandant, 19 general officers, exclusive of the colonels commandant, 35 colonels, 70 lieutenant-colonels, 161 captains, 169 second-captains, 431 lieutenants, 10 riding-masters, 19 paymasters, 27 quartermasters, four surgeons-major, 21 surgeons, 78 assistant-surgeons, and 27 veterinary-surgeons, giving a grand total of 29,992.

Colonel Smyth, late Deputy Quartermaster-General at the Cape of Good Hope, has just been appointed to succeed Major-General Charles Hastings Doyle, in Dublin, as Inspector-General of the Disembodied Militia in Ireland, who relieves Major-General Trollope, C.B., in command of the troops at Nova Scotia.

Her Majesty's ship *Firebrand*, which has suffered so severely from fever, has been ordered home from the West Indies.

CHANGES AND PROMOTIONS IN HER MAJESTY'S ARMY AND NAVY.

WAR-OFFICE, Aug. 16.

1st Regiment of Dragoon Guards—Lieut. Charles Levett to be capt., by purchase, vice Walter Clopton Wingfield, who retires; Cornet William Potter Stephenson to be lieut., by purchase, vice Levett.

3rd Dragoon Guards—First Lieut. Henry Langtry, from Antrim Artillery Militia, to be Cornet, by purchase, vice Dawson, promoted.

6th Dragoon Guards—Lieut. Henry Reginald Forster has been permitted to retire from the service by the sale of his commission.

8th Light Dragoons—Lieut. Walter Tuckfield Goldsworthy to be adjt., vice Michael Clarke, who resigns that appointment.

13th Light Dragoons—Capt. Fitz Roy Donald Maclean to be major, by purchase, vice Alexander George Dickson, who retires; Lieut. Walter Sydney Tucker to be capt., by purchase, vice Maclean; Cornet William Mitchell Innes to be lieut., by purchase, vice Tucker.

Royal Artillery—Surg. Thomas Connor O'Leary, M.B., from the 45th Foot, to be surg.; the commission of Paymaster William Shepherd to be antedated to the 14th of May, 1861.

Coldstream Guards—William Chafyn Grove, gent., to be ensign and lieut., by purchase, vice Carter, promoted.

1st Regiment of Foot—Lieut. George Hall, from half-pay, late Land Transport Corps, to be lieut., vice Samuel Seggie, appointed quartermaster 9th Light Dragoons.

4th Foot—John Rimington Sharp, gent., to be ensign, by purchase, vice George Hall Hall, who retires.

11th Foot—Ponsonby Sheppard, gent., to be ensign, by purchase, vice Watson, promoted; Denis Bingham, gent., to be ensign, without purchase, vice Alexander Willoughby Montgomery Moore, appointed to the 97th Foot.

13th Foot—Major Henry Christopher Marriott, from the 82nd Foot, to be major, vice Brevet Lieut.-Col. George Latham Thomson, who exchanges.

15th Foot—Alfred Sebastian Boom, gent., late ensign, Elthorne Militia, to be ensign, without purchase, vice Thomas Prince Lloyd, appointed to the 93rd Foot.

16th Foot—Capt. and Brevet-Major Richard John Evans, from the 27th Foot, to be capt., vice John George Dartnell, who exchanges.

17th Foot—Charles Earnest Gaitskill Burr, gent., to be ensign, by vice Dwyer, promoted.

20th Foot—Ensign George Frederic Harris to be lieut., by purchase, vice Frederick Fox, who retires.

27th Foot—Capt. John George Dartnell, from 16th Foot, to be capt., vice Brevet-Major Richard John Evans, who exchanges.

33rd Foot—Major Arthur Sisson Cooper, from half-pay, late 25th Foot, to be major, vice Thomas Wickham, who retires upon half-pay.

43rd Foot—Spencer Perceval Talbot Nicholl, gent., to be ensign, by purchase, vice Tod, promoted.

45th Foot—Staff-Surg. Major William Home Fairbairn, M.D., to be surg., vice Thomas Connor O'Leary, M.B., appointed to the Royal Artillery.

47th Foot—Quartermaster, with the honorary rank of capt., John Dunlop, from half-pay, 75th Foot, to be paymaster, vice Capt. Henry Charles Watson, appointed paymaster of the School of Musketry.

48th Foot—Lieut. Arthur George Wyse to be capt., without purchase, vice Cairnes, promoted.

55th Foot—Staff-Surg. Thomas Parr to be surg., vice Henry Somers, M.D., deceased.

63rd Foot—Capt. Falkland Townshend Logan Paterson to be major, by purchase, vice Charles Le Mesurier Carey, who retires; Lieut. Geo. W. Clutterbuck to be capt., by purchase, vice Charles Colquhoun Pye, who retires; Lieut. John Richard Ramsbottom to be capt., by purchase, vice Paterson; Ensign Thomas Atkinson to be lieut., by purchase, vice Clutterbuck; Ensign Thornton Scovell to be lieut., by purchase, vice Richard Halliday Archer, who retires; Ensign John Pollard Mayers Burton to be lieut., by purchase, vice Ramsbottom; Gentleman Cadet Henry Nicholas Bayly, from the Royal Military College, to be ensign, by purchase, vice Atkinson; Alexander Hovenden Goldie Taubman, gent., to be ensign, by purchase, vice Scovell; Thomas Foster, gent., to be ensign, by purchase, vice Burton; Lieut. Charles Henry Kinahan to be adjt., vice Clutterbuck, promoted.

78th Foot—Ensign Andrew Murray to be lieut., by purchase, vice Malcolm M'Neill, who retires; Robert Lockhart Dalglish, gent., to be ensign, by purchase, vice Murray.

82nd Foot—Major and Brevet Lieut.-Col. George Latham Thomson, from the 13th Foot, to be major, vice Henry Christopher Marriott, who exchanges.

84th Foot—Assist.-Surg. Herman Bicknell has been permitted to resign his commission.

86th Foot—Lieut. Duncan Stewart to be capt., by purchase, vice Edward John Lees, who retires; Ensign Francis Glasse Marshall to be lieut., by purchase, vice Stewart; Henry Wise Ridley Blackett, gent., to be ensign, by purchase, vice Marshall; Lieut. Thomas Yardley, to be adjt., vice Duncan Stewart, promoted.

90th Foot—Ensign Francis Russell to be lieut., without purchase, vice George Gregg, deceased.

97th Foot—Ensign Alexander Willoughby Montgomery Moore, from the 11th Foot, to be ensign, vice Fulford, promoted.

99th Foot—Staff-Surg. Cornelius Clark Rutherford to be surg., vice Richard Cooper Todd, appointed to the Staff.

2nd West India Regiment—Ensign John Sheil, from the Ceylon Rifle Regiment, to be lieut., by purchase, vice Bellamy, promoted.

Ceylon Rifle Regiment—Josiah Erskine Collins, gent., to be ensign, by purchase, vice John Sheil, promoted to the 2nd West India Regiment.

Staff.—Capt. and Brevet-Major Alexander Abercrombie Nelson, Unattached, Assist.-Inspector of Rifle Volunteers, to be fort major at Guernsey, vice Major and Brevet-Col. John Hankey Bainbrigge, Unattached, promoted to major-gen.

Digitized by Google

BREVET.—Col. Alexander Tulloh, of the Royal Artillery, to have the temporary rank of major-general while serving as the Director of Ordnance. Lieut.-Col. Edward Whitmore Scovell, 96th Foot, having completed five years' service in the rank of lieut.-col., to be col. in the army under the 8th clause of the Royal Warrant of the 14th of October, 1858. Major Montagu Hamilton Dowbiggin, 99th Foot, to be lieut.-col. in the army. Second Capt. Theodosius Webb, half pay Royal Engineers, to be major in the army. Capt. Edward H. Langmore, Bengal Infantry, to be major in the army. Surg.-Major William Hawtree, of the Army Hospital Corps, to have the local rank of ensign while employed as acting capt. of Orderlies at the General Hospital, Woolwich.

MEMORANDUM.—The undermentioned officer upon half-pay has been permitted to retire from the service by the sale of his commission, under the conditions of the Horse Guards' Circular Memorandum of the 15th of February, 1861:—Second Capt. Theodosius Webb, half-pay, Royal Engineers.

THE NAVY.

PROMOTIONS.

CAPTAINS.—W. G. Jones, H. C. Glyn, H. J. Blomfield, C. E. H. Vernon, W. Wood, and G. F. Day, V.C.

COMMANDERS.—J. B. Scott, T. C. Bruce, Maxwell Fox, T. C. Cholmeley, H. B. Burnaby, J. K. Simcoe, G. A. W. Welch, W. B. Grant, and W. E. Gordon.

SECOND MASTER.—R. Cooke.

APPOINTMENTS.

COMMANDERS.—G. Tryon to the Warrior, F. W. Sidney (additional) to the Pelorus, for surveying service; G. Blane to the Hibernia, Hon. Augustus C. Hobart to the Foxhound, E. Maunsell to be inspecting commander of the Coastguard.

DEPUTY MEDICAL INSPECTORS.—J. Dunlop, M.D., and J. Robertson, M.D., on the retired list.

LIEUTENANTS.—Hon. H. B. Hamilton to the Virago; S. W. H. Thompson to the Aboukir; J. G. S. Clarke to the Impregnable; J. F. Lenson to the Virago; C. G. Jones to the Majestic; C. Mitchell to the Hecate.

MASTERS.—H. Brehaut to the Saturn; J. W. H. Harvey to the Emerald; C. C. Scott to the Indus, for the Styx; G. H. Dorning to the Pantaloon; F. Howard (additional) to the Pelorus, for surveying duties; A. de G. Sutton to the Gannet; T. Pounds to the Asia, for the Medea.

SURGEONS.—J. T. Gabriel to the Virago; L. J. Monteith (additional) to the Impregnable; M. Thomson to the Saturn; J. C. Sabben to the Asia; H. Harkan to the Pantaloon.

ASSISTANT-SURGEONS.—F. L. W. Wright to the Haslar Hospital; G. Goodman to the Plover; G. Jackson to the Aboukir; G. F. Elliott to the Victory, for Haslar Hospital; B. Ninnis (acting) to the Pantaloon; W. Roche (acting) to the Impregnable, for Plymouth Hospital.

SUB-LIEUTENANT.—R. P. Moutray to the Antelope.

SECOND-MASTERS.—W. H. Willing to the Dasher; E. W. Creak to the Liffey; W. Long to the Cuckoo; J. T. Hart (acting) to the Pembroke, additional.

ASSISTANT-PAYMASTERS.—A. Hughes to the Pembroke; T. M Jenkins and W. H. Gribben to the Plover, in charge; R. N. A. Richards to the Centurion.

MASTER'S-ASSISTANTS.—R. J. Phillips to the Dasher; F. H. Boys to the Antelope; L. J. W. Thomas to the Geyser.

Monetary and Commercial.

It appears that it is not the intention of Government to take any steps in reference to the Red Sea cable until some decision has been arrived at by the Treasury as to the guarantee which they at present pay to the company. The report of Sir Charles Bright, mentioned in a previous issue, cannot, therefore, for the present be acted on.

The *Malacca*, with the last portion of the cable to connect Malta with Alexandria, left Plymouth on the 25th for Malta. The Government Engineer, Mr. Forde, proceeded by yesterday's mail to Malta to complete the laying of the line. A full and interesting notice of this line will be found in another column.

The bar silver brought by the West India steamer has been disposed of at 60¼d. per oz., being the same price as that obtained for the last arrival.

The directors of the Agra and United Service Bank have announced an *ad interim* dividend of £2. 10s. per share for the half-year ending in June, being at the rate of 10 per cent. per annum.

The directors of the Chartered Mercantile Bank of India, London, and China, have declared a dividend for the half-year ending in June at the rate of 10 per cent. per annum, free of income-tax.

The China and Japan Steam Company have issued notices calling for applications for a Marine Manager in China. Several Commanders who have been in the China Trade, who are at present in this country, have applied for the office.

A floating dock for Sourabaya has been shipped by the *Rosella* from Glasgow, weighing 600 tons, and valued at £6,000. By the same vessel there is also a quantity of steam and other machinery valued at £1,700. There is also on board the *O'Thyen*, for Batavia, from Liverpool, a quantity of cotton seed from New Orleans.

On the China coolie trade to Cuba we find the following in an American paper:—

"HAVANA, July 22.—Entered on the 20th, the Bremen ship *Fides*, Arfmann, from Macao, in 128 days, with 252 Chinese on board, contract labourers for eight years in Cuba. When their present contracts expire they are obliged to re-contract, to leave the island, or be confined to labour on the public works the same as convicts. The police measure has been rendered necessary to save the community from the plundering disposition of this class when left in idleness, and which has led to a vast increase of crime in the island; although it is not in conformity with the specious contracts by which they are induced to emigrate. The deaths are not reported, but presumed to be large, as the tonnage capacity of the ship would admit the taking on board of only 300."

And in a West Indian paper the following appears on the condition of Chinese labourers:—

"In Trinidad it was noticed that the Chinese immigrants were marrying Creole women, and but very few of them seemed disposed to return to the homes of their birth. Within the year thirty-two coolies under indenture had purchased their time, and 1,456, whose time had expired, entered into new contracts, with a premium of from £2. 10s. to £3. Very many of them have extensive provision grounds, and make from £6 to £7 per month, while others are equally successful with retail shops."

On the Financial Budget of France the *Money Market Review* says:—

"The expenditure amounts to the colossal sum of £78,790,000 sterling, being some £9,000,000 in excess of the indefensibly large expenditure of our own Government. The surplus—£172,000—is purely a *paper* one. It is arranged in this fashion merely for the sake of making a decent appearance. It is hard to recal to mind any French Budget which did *not* exhibit on paper an equilibrium, or, more generally, a surplus, although the addition to the debt of France has gone on, ever since the accession of the present Emperor, at a rate unexampled in history, save in our own case when we were engaged in a death-struggle with his uncle."

NEW LEAD FOR TEA-CHESTS.

A great improvement and saving in cost has been effected in tea lead by the introduction of Wilmhurst's patent machine for cutting or turning metal foil. The Assam Company have adopted the system for the manufacture of all the lead foil they use in packing tea, the foil being made in this country, and sent abroad for re-export in packages. The Assam Company alone expend between £2,000 and £3,000 [illegible]. The lead-foil used by the Indian tea-growers is made here; but the Chinese growers use foil made on the spot by a very laborious and unmechanical process, as any one may see who inspects the texture of a Chinese tea-chest lining. The Chinese, as usual, are slow to appreciate the new invention; but from the fact of the company being able to supply their lead at £35 per ton, less an export discount of 5 to 15 per cent., while rolled lead costs £48 to £52, it can be only a question of time to see the new and cheaper article generally adopted. By the new process, the action of the cutting knife causes a closing of the pores of the metal and a consequent increase in strength and power to resist the air, &c. The committee of Lloyd's have examined the article and given a most favourable report on it. They even hold out hopes that they will be able to make a differential rate in favour of tea packed in this lead. Shipments have already been made to China on speculation, and realised the very handsome profit of £20 and £22 per ton.

The amount of bullion by the steamer *Pera* from Southampton on the 20th inst. was:—In gold, to Alexandria, £2,000; Madras, £1,392; Hobson's Bay, £440. In silver, to Madras, £15,000; Calcutta, £19,900; Hong Kong, £7,320; Foochow-Foo, £3,488; Shanghai, £31,715. Total, gold, £3,832; silver, £77,423.

ARTICLES OF IMPORT.

Tea.—The tea market during the last six or seven days has shown more animation, a speculative demand for Canada having taken off a considerable quantity of the common sorts of Congou, whilst the late very low rates ruling for good common to medium qualities, added to a better feeling in business generally, has induced the trade to purchase more freely; thus a firmer tone has been given to the market, though we cannot quote an advance in prices. The public sales in which large parcels are offered without reserve still continue, and cause prices to rule irregularly and render it difficult to do more than give approximate quotations; we therefore continue to quote good common Congou at 10½d. to 11½d. per lb. Fair flavoury and fair to good medium blackish leaf kinds are in some request, and prices are firm at previous rates. Good and fine Monings and Wopaks are only in moderate demand, and prices without alteration. Fine Kaisows as previously advised, though the near approach of the new crop makes the dealers cautious buyers of fine qualities both of Monings and Kaisows. Tayshans are neglected by the trade, bu a large speculative purchase has cleared the market of the best sorts. Oolong without change. Souchong the same. Flowery Pekoe is taken in small parcels at very low prices. Scented Caper and Orange Pekoe of common quality are saleable only at very low rates, fine qualities in moderate request. The scarcity of Green Tea has brought Japan Oolongs more freely into use, and they sell readily at the late low prices. Green Teas are very scarce, and high prices are obtained for the few on sale. Three public sales have taken place this month, the 8th, 13th, and 21st instant, at which 58,600 packages were offered, and 31,800 were sold, 26,200 being without reserve. These sales comprised 2,360 packages of Assam tea. Further sales are advertised for the 28th instant.

Silk.—The market still remains in the same dull state, but the new silks are beginning to arrive, and will most likely cause an alteration.

Sugar.—The dull appearance of the market for this article continued until the last few days, when the home trade evinced more inclination to buy, and transactions at firmer rates have been concluded with greater readiness. 722 bags Penang were chiefly realised at 33s. 6d. to 35s. for brown and low yellow; 37s. 6d. to 41s. low middling to fine yellow grocery. 1,489 bags Penang mostly sold, good brown to low yellow 33s. to 3 s. 6d; low middling to good yellow 37s. to 40s. 6d.; fine 42s. Privately 300 bags brown Siam are reported at 29s. 6d.

Coffee.—The demand observed in our last has been followed by more general and decided animation, and large transactions have taken place at an advance. 100 bags mixed Singapore at 58s.; 395 bags fine ordinary Malaba, at 67s. 6d. to 68s.

Rice.—Less activity has prevailed generally, although soft grain descriptions on the spot as well as afloat have been done at full rates. A few bags of Java sold at 12s. 6d. 45,000 bags of middling to good middling white Java at 13s. to 13s. 6d.

Pepper.—Market continues inactive, and privately but few transactions have taken place. 721 bags Singapore were partly realised at 31d. for ordinary dust, sold at 3½d. to 3¾d. for the former, and 3⅞d. for the latter. 202 bags Penang brought 3⅞d. to 3½d., and privately 600 bags of Penang at 3½d.

Sago.—Of 762 cases at auction, a small portion sold at 18s. 6d. per cwt. for fair small, subsequently good business has been done at a further improvement of 6d. to 1s. per cwt.

Flour.—500 bags sold at auction at 16s. per cwt. for fair.

Spices.—Cinnamon: Market quiet at previous quotations. Cassia Lignea Prices Lower. Of 491 cases at auction one-half sold at 82s. to 88s. per cwt. for second to first quality. Cassia Buds: Very scarce and high prices. Cloves: Steady. Five cases Penang sold at 11½d. to 1s. 3d. for middling to fine, and of 414 bags Zanzibar three-fourths sold at 3⅝d. to 3¾d. for fair. Mace: 12 cases Penang sold at 9d. to 1s. for ordinary to fair reddish. Nutmegs: Have not risen in value, and 85 cases Penang and 94 cases Batavia sold at auction, at 3s. 2d. per lb. for good bold, and 1s. to 1s. 6d. ordinary small to good medium.

Hemp.—Manila remains steady. Auctions confined to 486 bales, sold at £20. 5s. to £22. 10s. per ton for common to good roping, and £18. 15s. ordinary brown.

Cotton.—Market exceedingly firm, with strong demand. The moderate business done has embraced good fair new Broach at 6⅞ per lb; good air new Dhollera at 6⅞d; good fair Compta, 5½d. to 5⅝d.

Japan Wax.—No sales to report. Saucer is quoted 65s. to 70s.; block, 52s. to 60s.

Tobacco.—High prices are still maintained for Manila cigars and cheroots, and they are much wanted in the market.

Tin.—English tin again has been put down £3. per ton. Recently an improvement has taken place in Straits, which has advanced to £113. Business done in Banca within £114 to £115.

Gambier has advanced 6d. to 1s. per cwt., and 1,289 bales sold at auction at 16s. 6d. to 17s. per cwt. for good, 15s. 9d. to 16s. heated. Contracts made privately upon corresponding terms.—Cutch: Market remains very flat. 770 bags at auction all retired.

Miscellaneous.—Indian-rubber: Market quiet; 308 packages at auction all retired. Sales have been made privately at 1s. 3d. Camphor: No inquiry. Sapanwood: Firm, 18 tons Siam and 5 tons Manila all retired. Soy: Steady; about 80 hhds. sold at 2s. to 2s. 2d. per gallon. Mother-o'pearl shell: Flat; of 156 cases Manila one-fourth sold at 90s. per cwt. Star Anniseed: Very quiet. Sticklac: Firm; 94 cases at auction all retired. Gum benjamin shows some little improvement for the better sorts, and of 44 cases at auction, one-third sold at £11. 10s. to £12 per cwt. for second Sumatra, and £6 to £6. 2s. 6d. thirds. Damar: Without any variation of note; only 34 cases at auction, and but one-third sold, at 39s. 4d. to 40s. 6d. per cwt. for good in sorts. Gambouge: Still cheap; auctions confined to 9 cases, sold at £6. 7s. 6d. to £6. 15s. per cwt. for good pipe. Ratans: Only 976 bundles of Penang at auction, which were not sold. Saltpetre: Bengal has barely maintained the previous value; business moderate. 1,000 bags only at auction. Bombay has risen 6d. per cwt., and 2,038 bags sold at auction at 30s. 6d. to 31s. 6d. for 54 to 31 per cent. refraction. Gutta percha: 33 tons at auction all retired. Rape seed: Very firm, previous rates still maintained. Elephants' teeth: No fresh feature of consequence. Vermilion: 71 cases at auction sold at 2s. 1d. per lb. Galangal root: Quiet. Cubebs: Flat; 68 bags at auction all retired. Dragons' blood: 12 cases sold at 90s. to 97s. 6d. for middling block. Gall's: Steady. No sales of China or Japan. Rum: In East India little has taken place.

ARTICLES OF EXPORT.

Iron.—The quotations in London are for Welsh bars, £6. 0s. 0d. nail rods, £7 to £7. 10s.; hoops, £8. 10s. to £9; sheets, single, £9 to £9. 10s.; Staffordshire bars, £7. 10s. to £8; rails, £5 to £5. 10s.

Steel.—Swedish keg, £16.

Copper.—Sheet and sheathing, 11d.; yellow metal, 9½d.

Tin.—114s. for block; 115s. for bar. Tin plates, best charcoal, I.C., 28s. 6d. per box.

Lead.—English pig, £19. 0s. to £21. 10s.; shot, patent, £23. 5s.; sheet, £20. 0s. to £20. 10s.; spelter, £17. 10s.; zinc, English sheet, £23. 10s. to £24; quicksilver, £7 per bottle.

According to Mr. John Richards' Circular, the export of metals for China from 1st January to 31st July, 1861, was as follows:—Iron: British, 3,805 tons; hoop, 169; sheet, 136; pig, 85. Steel: Foreign, 75; British, 4. Copper: British, 7; sheet, 275. Tin: Plates, 7,664 boxes. Lead: British, 3,535 tons; sheet, 11. Spelter, 332. Quicksilver, 31,873 bottles.

EXPORT OF BULLION TO CHINA, &c.

The following return shows the shipments of bullion from Southampton during the present year by the P. and O. Company's mail steamers:—

	Gold.	Silver.
Shanghai	—	£394,780
Foo-Chow-Foo	—	33,480
Hong Kong	—	256,189
Manila	—	—
Singapore	17,219	66,992
Penang	—	19,024

FROM MARSEILLES.

	Gold.	Silver.
Shanghai	—	148,442
Hong Kong	—	45,518
Singapore	10,160	6,776
Penang	—	44
Foo-Chow-Foo	—	4,400

EXCHANGES.

	Bank Bills, 60 days' sight.		House Bills, 60 days' sight.
On Singapore (dols.) Bank Bills	4s. 9d.	Buy at	4s. 3d.
On Hong Kong, ditto	4s. 9d.	Do.	4s. 3d.

Bar Gold (per ounce)	£3 17 9
Spanish Doubloons	3 16 6
United States Gold Coin	3 16 3
Silver in Bars	0 5 0¼
Mexican Dollars	0 4 11
Carolus Dollars	0 6 6

MANCHESTER MARKET.

The market remains without material improvement since the beginning of the week. There are, however, a few exceptional indications of greater activity. In piece-goods adapted for the Eastern trade manufacturers find some revival of demand. The prices offered are at least 1½d. per piece lower than the quotations of the producers, but there seems to have been a small sale on terms of mutual concession. In nearly all kinds of cloth the absence of business is very evident, but there is no avowed departure from the rates current on Tuesday. The transactions in the yarn market are also of limited extent. Water twist is in better demand for Germany and China, but the sales are few, because the prices which buyers are willing to pay are generally below the figures that spinners could just now accept. The continued upward movement of cotton obliges sellers to stiffen or raise their prices, but they do not meet with much success in establishing any advance, and scarcely any business can be done. Mr. S. Mendel, in his circular of the 20th inst., says:—"There is no inquiry for either yarns or goods to-day: the market is very tame, and prices are generally irregular and weaker."

COMMERCIAL POSTSCRIPT.

Tuesday Afternoon.

Capt. Knowles, lately engaged in the China trade, is promoting a cruise to Japan for a limited number of passengers.

The allotment of the shares in the Oriental and General Marine Insurance Company is announced to take place this day.

Arrivals not Included in the Table.—August 24, at London from Akyab, Negotiator; 26, at Falmouth from Rangoon, Octavia; from Akyab, Euxine; at Liverpool from Akyab, Wm. Cole; 24, off Falmouth from Rangoon, Susanne; 21, at Bordeaux from Akyab, Elizabeth; 20, at Copenhagen from Sourabaya, Avik; 22, at Hamburg from Macao, Podesta; 21, at Brouwershaven from Batavia, Dorothea Henrietta; 7, at Vigo from Manila, Flora; 26, from Penang, Rajah of Cochin; Aug. 25, off Falmouth, from Akyab, Hindoo; 21, at Cuxhaven, from Akyab, Nicoline.

Departures.—August 14, from Brouwershaven for Batavia, Constantia; Anthony v. Hoboken. Aug. 24, from Deal for Kanagawa, Anna Maria Wilhelmina; 20, from off Dungeness, for Batavia, Electra.

Spoken.—Ida Elizabeth, Java to Rotterdam, June 27, 32 S., 11 E. Glencoe, from Shanghae, June 22, 35 S., 22 W.

Laid on at London.—For Singapore: Salvador Packet.

CRISIS, Singapore to Liverpool, June 1, 26 S., 55 E.
IDA ELIZABETH, Java to Rotterdam, June 27, 23 S., 11 E.

EXPECTED.

From JAPAN.—At London: Canton.

From CHINA.—At London: Chilo, Lady Ann, Northern Cross, Petchelee, Egmont, Strathallan, Shantung, Glencoe, Panic, Strathmore, Ziba, Golden Eagle, Sir Ralph Abercrombie, Carribean, Glenclune, Ellen Rodger, Falcon, Fiery Cross, Flying Spurs, Geelong. At Liverpool: Robin Hood. At Outports: Henry Moore, Eloise, Indres Minde.

From SINGAPORE.—At London: Robert Small, Peter Symons, Procymatia, Britannia, Granville, Weymouth. At Liverpool: Crisis, Champion, Panic, Excelsior, Primula, Kamehaha IV., Christopher Newton, Mayola. At Outports: America, Commerce, Elizabeth, Australia.

From MANILA.—At London: Kate, Regina Maris. At Liverpool: G. B. Carr, Julia, Pepita, Soberana. At Cork: Roebuck, Victor Emmanuel.

From PENANG.—At London: America, Parsee, Sirocco, William and

From BATAVIA.—At Liverpool: [illegible]
England: Therese.

FREIGHTS AND CHARTERS.

Current Rates Freight for Vessels on the Berth.—To Amoy: 50s. to 60s. measurement, 80s. weight; Kanagawa: 60s. measurement, 80s. weight. To Shanghai: 40s. measurement, 50s. weight. To Hong Kong: 35s. measurement, 40s. weight. To Manila and Labuan: 50s. weight or measurement. To Singapore: 30s. weight or measurement. Penang: 35s. to 40s. Batavia: 45s. weight, 40s. measurement. To Bankok: 60s. weight or measurement.

There is little of interest to report in connection with the Freight Market. The berth freights from London are very quiet, and the loading brokers show little disposition to lump ships.

The Admiralty received tenders on the 23rd inst. for several lots of stores for their different stations, and amongst them 800 tons old ordnance from Mauritius to Woolwich. They also invite tenders for the conveyance of five batteries Royal Artillery coastwise.

For India, China, and the Cape of Good Hope there are 44,000 tons of shipping on the berth. There is no alteration in coal freights, and few charters are concluded.

INSURANCE.

The following are the current rates of premium at Lloyd's, according to the class of vessels, &c.:—To Hong Kong, 40s. to 50s.; Shanghai, 50s. to 60s.; Singapore, 30s. to 45s.; Batavia, 30s to 40s.; Manila, 50s. to 60s.; Japan, 50s. to 60s.

At Hamburg, for Batavia and Singapore, 40s.; China and Manila, 50s.

CASUALTIES.

Havre, August 12.—The Chateau dul Gol, Francois, from Java for Bordeaux, which put into Mauritius April 27 with damage, has been condemned there, and was to be sold July 10.

The Edwin Flye, Wever, which sailed from Sunderland August 7 for Hong Kong, put into Falmouth August 16, to stop a leak.

The Bon Pere, Bourat, which arrived at Monte Video July 14 from Batavia, was leaky.

At St. Helena, July 8, Proteus, Bakker, from Sourabaya; 9, Tweeling Zusters, Carst, from Java, Eliza Ella, Lunt, from Shanghai.

"INDUS" TROOP-STEAMER.—This peculiarly-constructed vessel (designed for the India Government by Mr. T. B. Winter, of Moorgate-street), will shortly be taken to pieces and be sent out to India in a vessel chartered for the occasion. Since her late trial she has had her paddle-wheels enlarged in circumference and width, so as to give her greater hold in very shallow water.

THE P. AND O. CO.'S STEAMER "RIPON."—This vessel is being lengthened and almost rebuilt, in Messrs. Wigram's docks at Blackwall, and it is expected she will be some time under repair. The steamer *Mooltan*, which met with a slight accident to her machinery on her passage out to Gibraltar, was not interrupted afterwards. She is expected at Southampton to-day.

METROPOLITAN LIGHT COMPANY,

447, STRAND, LONDON.

CLARK'S PATENT IMPROVED LAMPS FOR THE CAPE, INDIA, CHINA, AND JAPAN.

THE advantages of CLARK'S PATENT GEM LAMP, are so apparent, and its superiority so unquestionable, that it would be extremely surprising were any one acquainted with its merits to purchase the Lamps hitherto sent abroad.

THE LAMP GIVES DOUBLE THE LIGHT OF THE OLD LAMPS.

It is much more elegant in appearance. It is so simple in construction that it cannot be mismanaged.

The GEM LAMP for Table use is fitted on Bronzed, Lacquered, Cut Glass, Silvered, or Jasper Slate Pillars.

Merchants are respectfully informed that, for many reasons, French or English Moderator Lamps are not suitable for exportation. The size of the glasses for the Gem Lamps being only one-half of those of the old lamps, 50 per cent. is saved in freight and package; their cost and risk of breakage are also considerably less. The Gem Lamp is admirably adapted to burn any of the native oils, such as cocoa-nut, olive, mustard, or rape seed oils.

To show the superiority of CLARK'S PATENT LAMPS, one is always kept burning.

CLARK'S CANDLES for Tropical Climates are the best adapted for the East, as they are entirely free from grease in substance, &c., and do not gutter. They give a most brilliant light, and are unsurpassed by any yet manufactured.

JOHN CLARK, Manager.

MESSRS. LENNY & CO.

CROYDON, AND 9, PARK-LANE LONDON.

Under the Patronage of Her Most Gracious Majesty, the Kings of Sardinia and Portugal, the Royal Families of Russia, Prussia, and the Nobility of all Countries.

HARMONIUMS (ALEXANDRE'S).—New FIVE GUINEA HARMONIUM in oak, with four octaves; and the new Six-Guinea Harmonium in oak, with five octaves, and two foot pedals, equally adapted for school and home use; also all the other varieties of Harmoniums from Six to Seventy Guineas. Merchants and shippers supplied on the lowest terms. City Depot, KEITH, PROWSE, and Co., Agents, 48, Cheapside, E.C.

MUSICAL BOX DEPOT, 48, Cheapside, London.—Messrs. KEITH, PROWSE, and Co., importers, have just received from Messrs. Nicole, Freres, a large assortment of their newest boxes, some of which are with flute, bell, and drum accompaniments, the expressive effects of which upon the ear are exceedingly novel and beautiful. The ordinary boxes 4 to 12 airs at one guinea each air. Remittances direct will receive prompt attention.

CHRONOMETERS, WATCHES, CLOCKS &c.—E. WHITE, for several years Principal Assistant at Dent's, having COMMENCED BUSINESS on his own account, begs respectfully to call the attention of residents in China to his Patent Keyless Lever Watches, which are constructed to bear the most violent exercise, and, having an adjusted Chronometer Balance, are not effected by the variations of temperature. The cases are made air tight, and never require to be opened. They will keep clean much longer than the ordinary Watches; their can be wound in the dark, and the Key can never be lost. Prices, in gold hunting cases, 40 guineas; open face, 35 guineas; gold English lever watches, from 18 to 40 guineas; silver, 6 to 20 guineas.

Orders with remittance, faithfully and expeditiously executed, or through Mr. GEO HOLMES, Hong Kong.

20, Cockspur-street, Pall Mall, London, S.W.

Duty paid—Double, at 21s. Sparkling Hock, Moselle, Champagne, and Claret, in Bond and Duty Paid.

STAYS.—SMITH'S PATENT ROYAL SYMMETRICAL and ROYAL RADION CORSETS, which combine Front Fastenings, Side Lacings, and Elastic in the Back, are the only English Stays which obtained a Prize Medal at the Paris Universal Exhibition, and upwards of 120,000 pairs have been sold. They are to be had of every respectable Draper and Stay Maker in Town and Country, and (wholesale only) of A. SALOMONS, Old Change, London, E.C.

The public are requested to see that each Corset bears the name of Mrs. Smith stamped on the inside of the Stay, in indelible ink.

SPIRAL CRINOLINE STEEL AND BRONZE FOR LADIES' SKIRTS.

This admirable invention, patented in England, France, and Belgium, is the most important hitherto introduced for Ladies' Skirts, and possesses the following advantages over the ordinary steel, now so much in use—it will not break; it cannot be put out of shape; it will fold up into half the space of an ordinary crinoline skirt.

To be had by the gross—in sets, and in Net and Muslinette (wholesale only), of A. SALOMONS, Old Change, London, E.C.

HOLLOWAY'S PILLS NEVER AT FAULT.—So great are the therapeutic properties of these well known Pills that they are eminently serviceable in every state and stage of disease. Their first action is upon the stomach and liver, which they cleanse and regulate; their essence then enters the circulation, and is carried to the lungs, where it displays its wonderful purifying powers over the whole mass of blood as it comes to or goes from those organs. These Pills expel all morbid humours, and change or improve every secretion. From the wholesome influence of Holloway's Pills on every individual organ the whole frame is rendered sound, the old blood is regenerated, new blood is formed, and health and vigour return.

TESTIMONIAL RECEIVED BY

TUCKER AND SON,

MANUFACTURER OF IMPROVED INDIAN LAMPS.

"Messrs. TUCKER & SON. "Edinburgh, Sept. 11, 1856.

"Sirs,—I have much pleasure in bearing my testimony to the excellence of the Lamps supplied by you to me when in India last year. They give a brilliant light, are not affected by the punkah, and are in every way suited to the Indian climate. In short, they are the best lamps I have seen in the country.

(Signed) "A. Ross, Bengal Civil Service."

DR. CURTIS'S MEDICAL WORK, "MANHOOD."
An Essay on Nervous and Generative Diseases.
The 140th Thousand, with numerous plates in a sealed envelope, price Half-a-Dollar,

MANHOOD: the CAUSE and CURE of PREMATURE DECLINE IN MAN, with plain directions for perfect restoration to health and vigour, being a Medical Essay on Nervous and Generative Diseases, their Prevention and Cure, with the Author's experience in the Treatment of the various Disqualifications of Marriage—whether resulting from Youthful Abuse, the Follies of Maturity, the Effects of Climate or Infection. The result of Twenty-five Years' successful practice. By Dr. J. L. CURTIS, 15, Albemarle-street, Piccadilly, London.

Consultations, Ten till Three and Six till Eight.

REVIEWS OF THE WORK.

"We feel no hesitation in saying, that there is no member of society by whom the book will not be found useful—whether such person hold the relation of a Parent-Preceptor, or Clergyman."—Sun, Evening Paper.

"Dr. Curtis has conferred a great boon by publishing this little work, in which is described the sources of those diseases which produce decline in youth, or more frequently premature old age."—Daily Telegraph, March 27, 1855.

The Book concludes with numerous varied and interesting cases, to which is added the Author's Receipt of a Preventive Lotion.

Dr. CURTIS may be consulted, as usual, either by letter or personally, at his residence, as above. Patients in INDIA, CHINA, and the COLONIES can be cured by correspondence only, and have their medicines sent with secrecy and despatch. The efficacy and harmless nature of the remedies employed by Dr. CURTIS, having been demonstrated by the most complete success during a practice extending over a period of Twenty-five Years, nervous sufferers of every class have a perfect guarantee that the utmost skill and experience will be made available in the treatment of their cases.

THE WORK SOLD BY HINNAM, QUEEN'S ROAD HONG KONG.
